An Introduction to EdrawMind

Wondershare EdrawMind is a powerful cross-platform mind-mapping tool designed to enhance your productivity. So far, EdrawMind supports Windows, macOS, Linux, Android, iOS, and Web access. You can download computer software and phone applications, or go to the EdrawMind Online editor.

With our user-friendly app, you can effortlessly create a diverse range of mind maps to visually represent concepts, ideas, words, tasks, and information. Experience the comprehensive solution provided by EdrawMind, enabling you to organize your thoughts and streamline your workflow efficiently.

EdrawMind offers both a free trial and the premium versions.

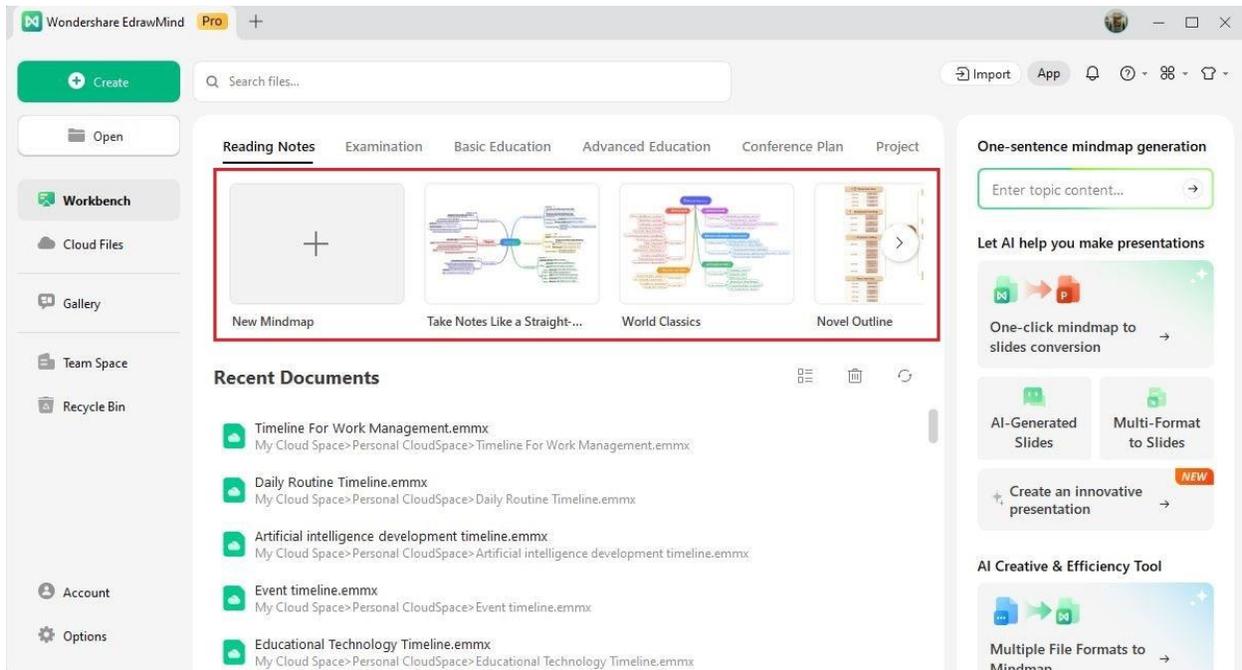

Whether you're involved in project management, team brainstorming, classroom instructions, or public presentations, EdrawMind has become a trusted tool for countless users seeking accuracy and efficiency in their creations. Join the diverse community of EdrawMind users and elevate your visual communication to new heights.

Key Features of EdrawMind

Here are the key features of EdrawMind that you can immediately take advantage of.

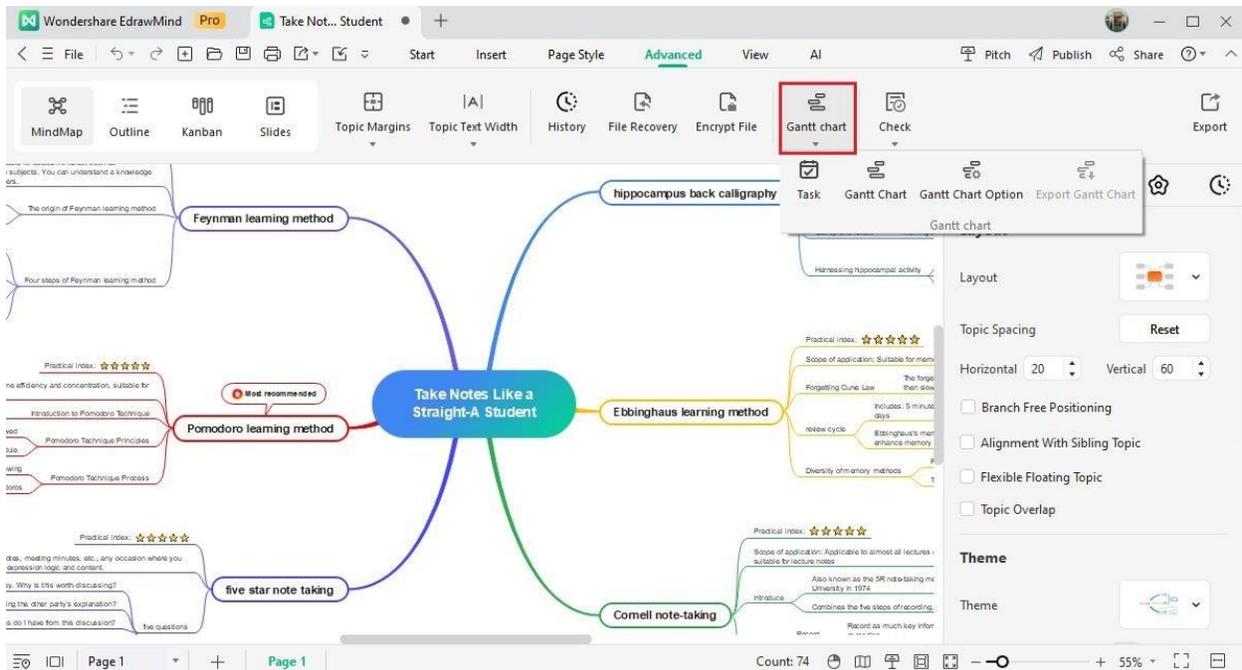

1. Abundant Templates

The software has many ready-made templates that cover different topics. It gives you lots of options to be creative and come up with new ideas. You can explore and let your imagination soar to new heights!

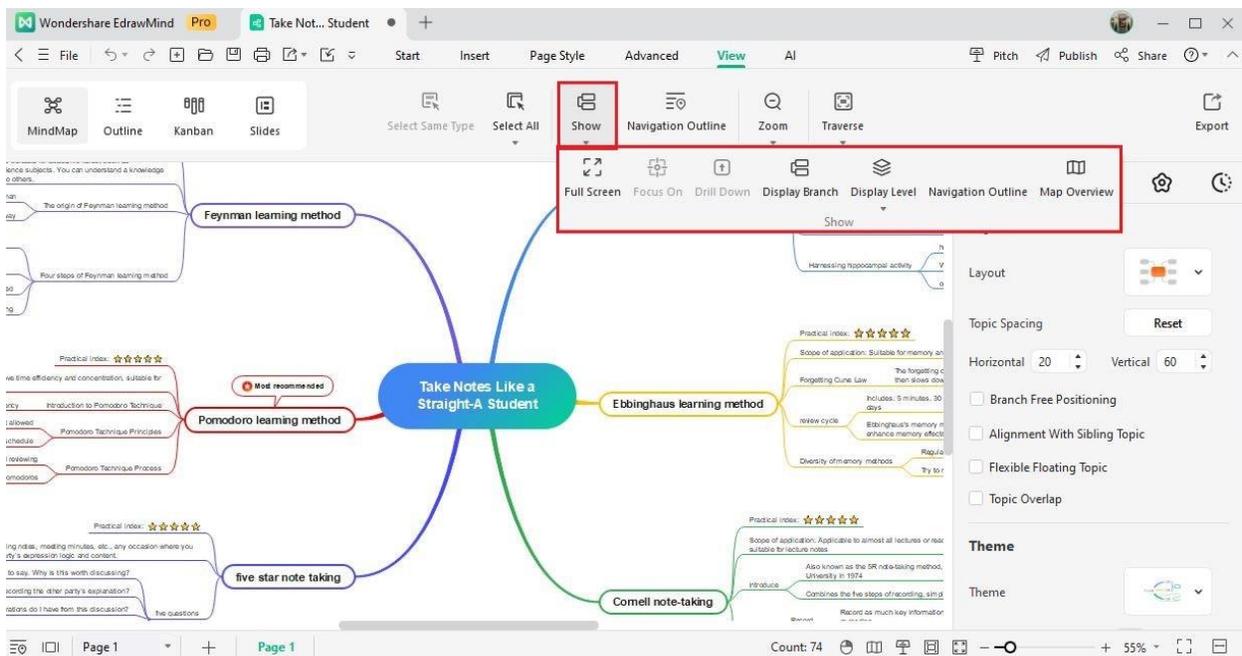

2. Gantt Chart

In the Advanced function, there's something called the Gantt Chart. It helps you manage tasks for your projects while making mind maps.

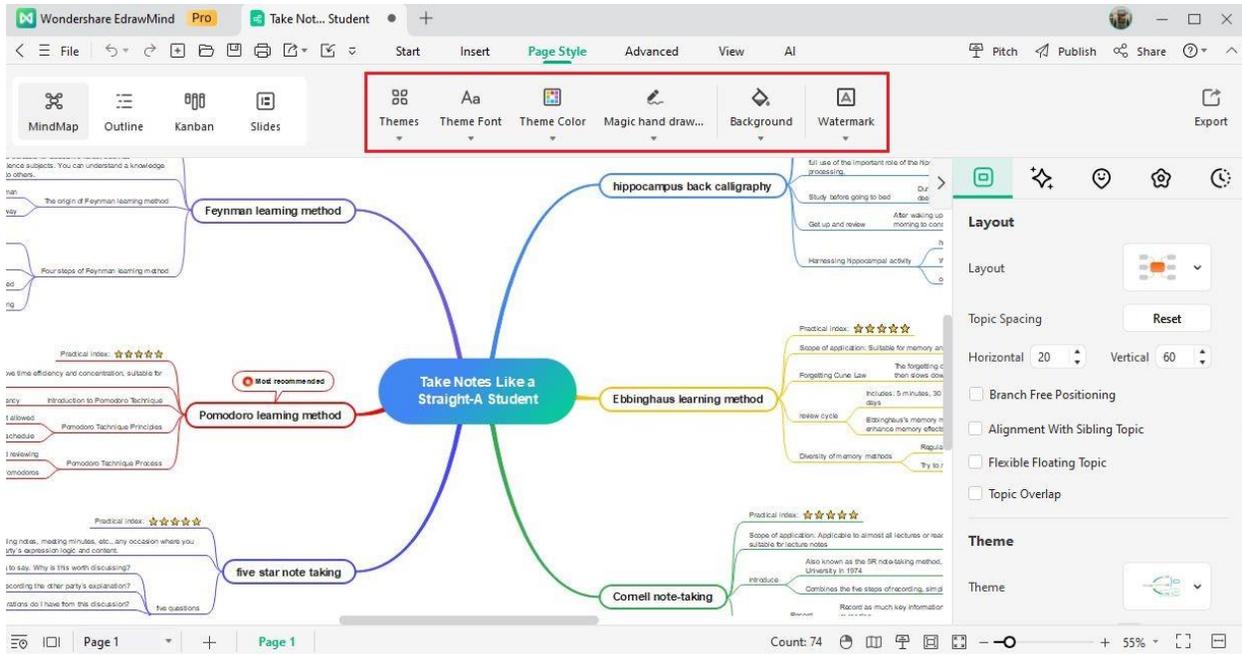

3. Show Feature

Click the Show tool to access Full Screen, Focus On, Drill Down, Display Branch, Display Level, and Map Overview features.

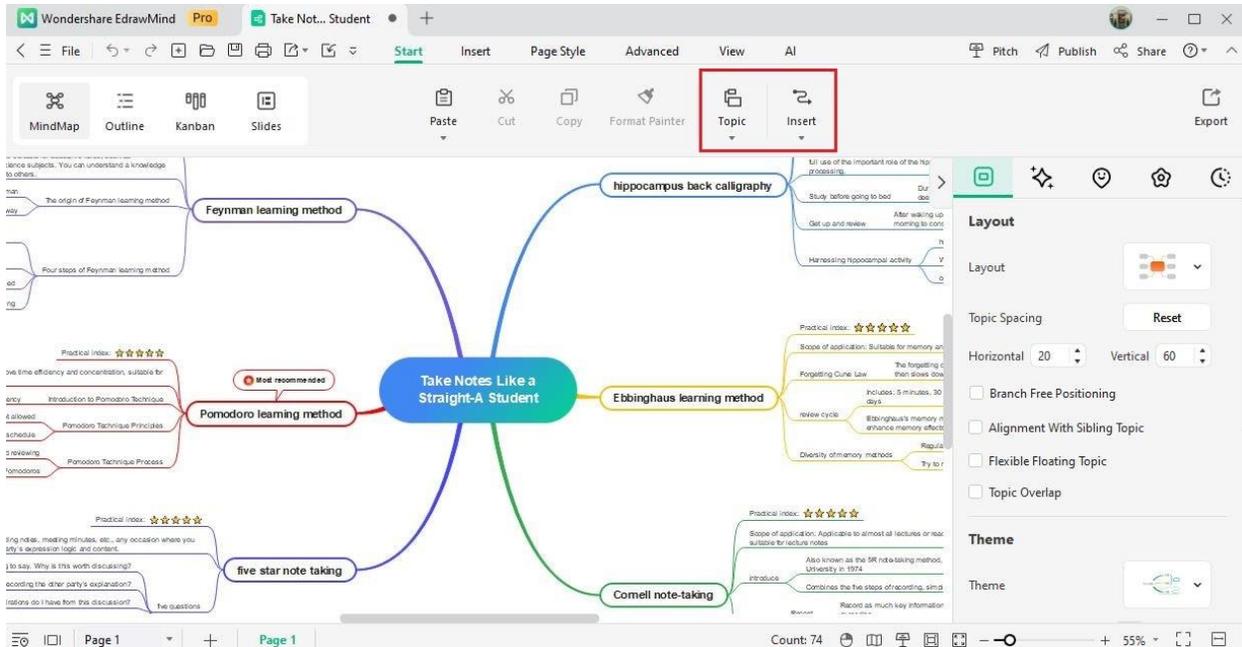

4. Styles and Themes

EdrawMind offers many beautiful styles and designs for you to choose from. You can pick different fonts, shapes, colors, and line sizes that match your own style.

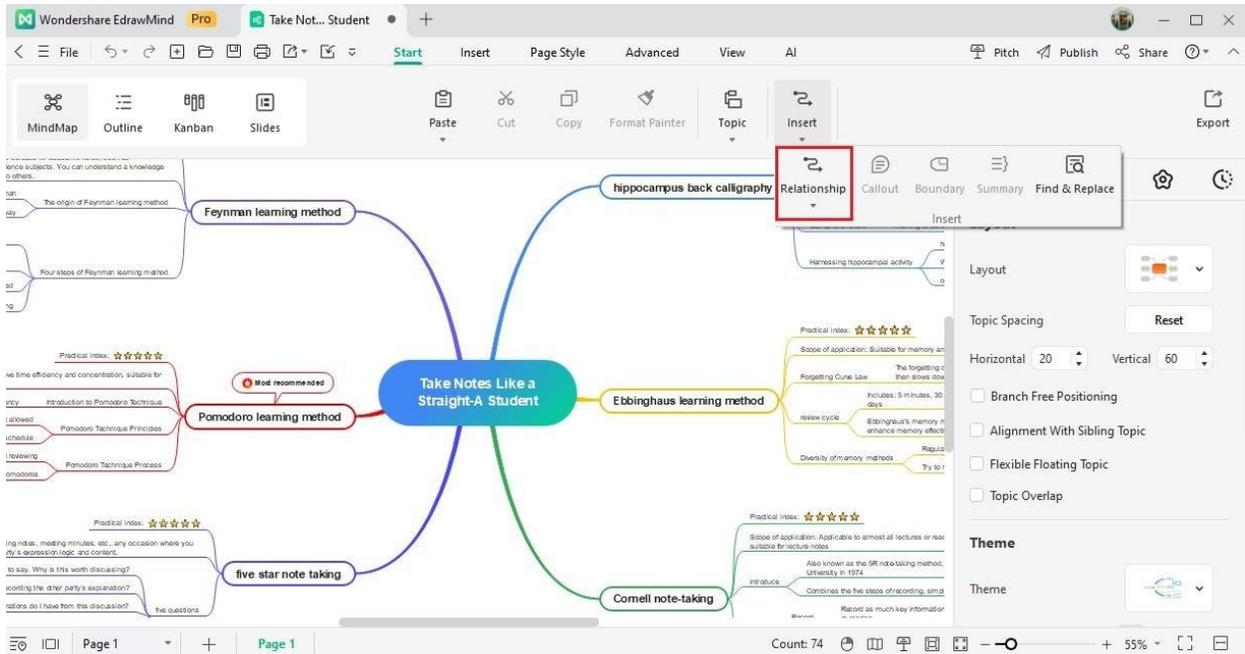

5. Powerful Toolbar

EdrawMind has a special toolbar that helps you get more things done and be really productive.

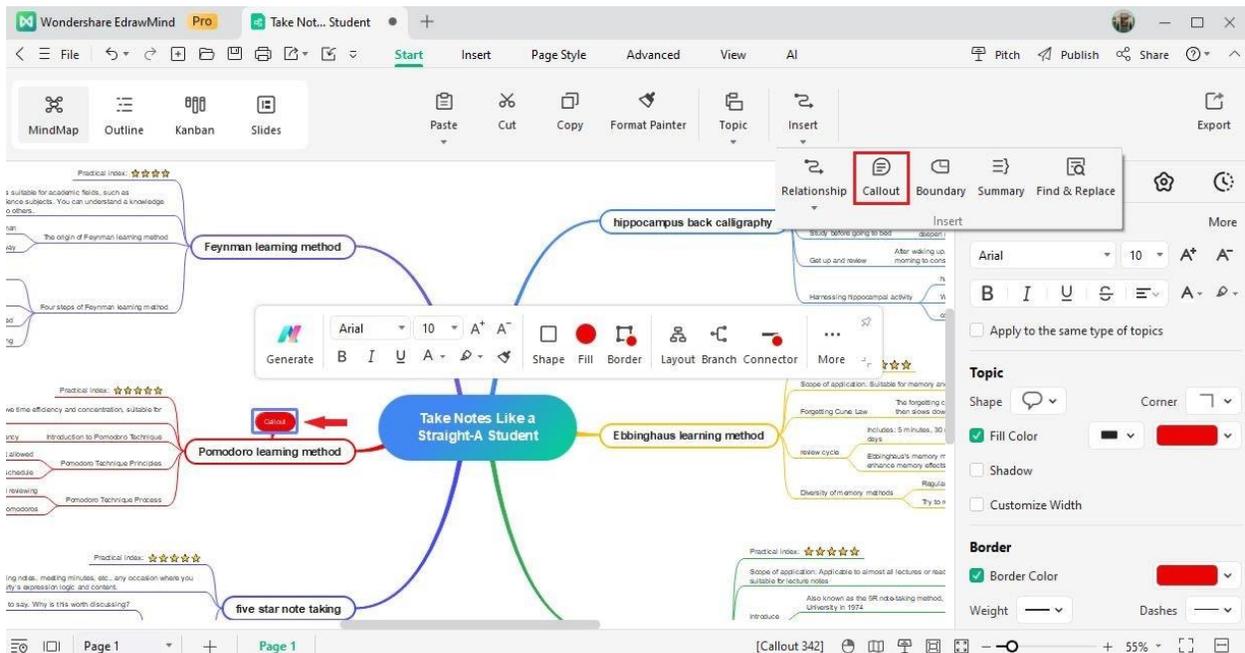

Relationship Line

Users can connect two subjects using a Relationship Line to show they're related. EdrawMind will adjust the arrow direction automatically, and users can change the line's appearance, color, and add text to explain the relationship.

Callout

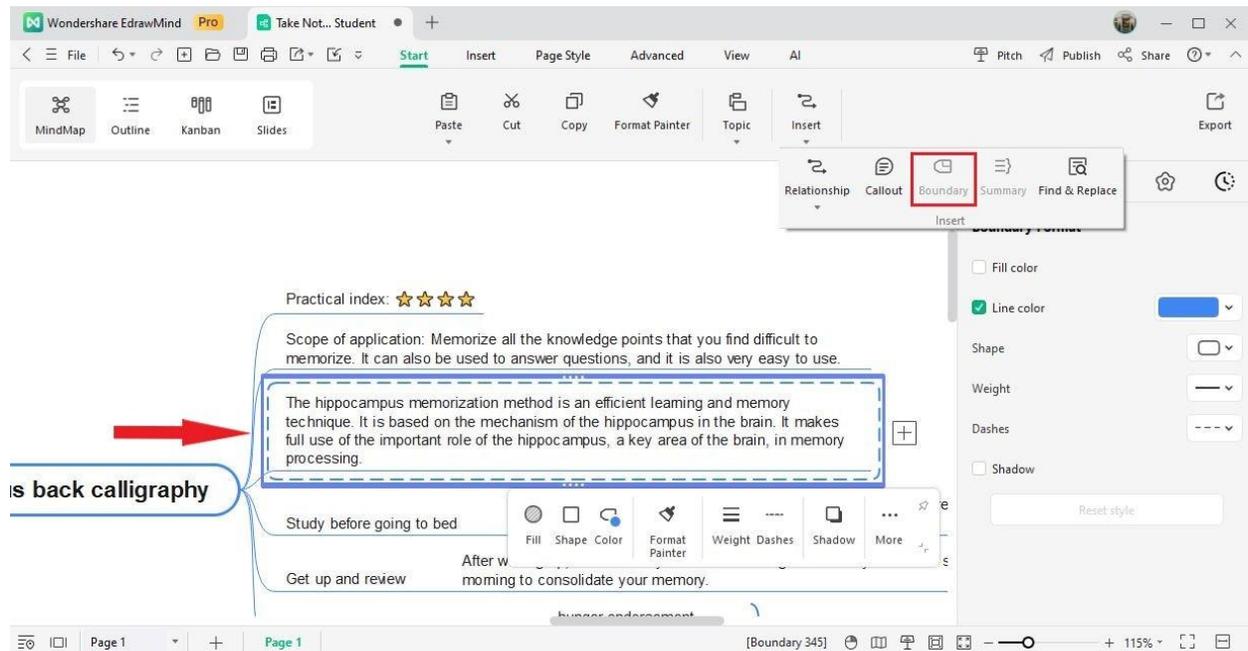

Callouts are additional information on a particular topic and can form their branches.

Boundary

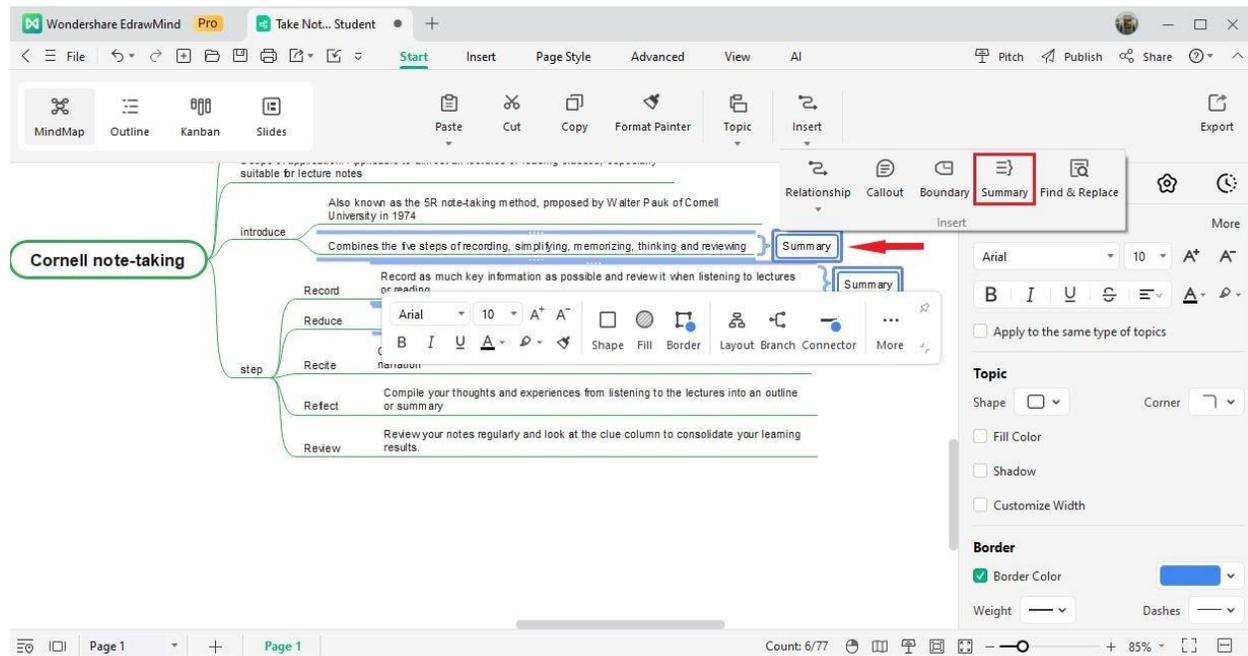

The Boundary feature in EdrawMind helps show the connection between topics. It creates outlines around a specific area on the map to group related topics and

highlight important content. EdrawMind offers different styles of frames to choose from for this purpose.

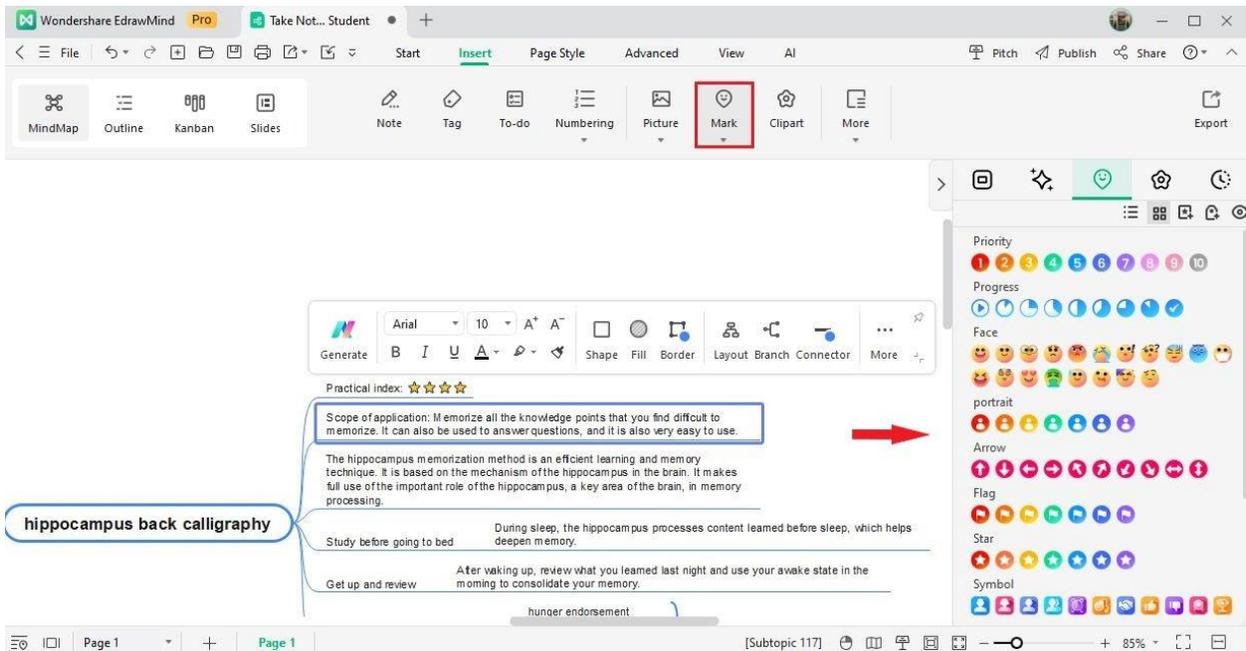

Summary

The Summary feature in EdrawMind allows you to add a summary for several topics. This makes it easier to understand the main idea.

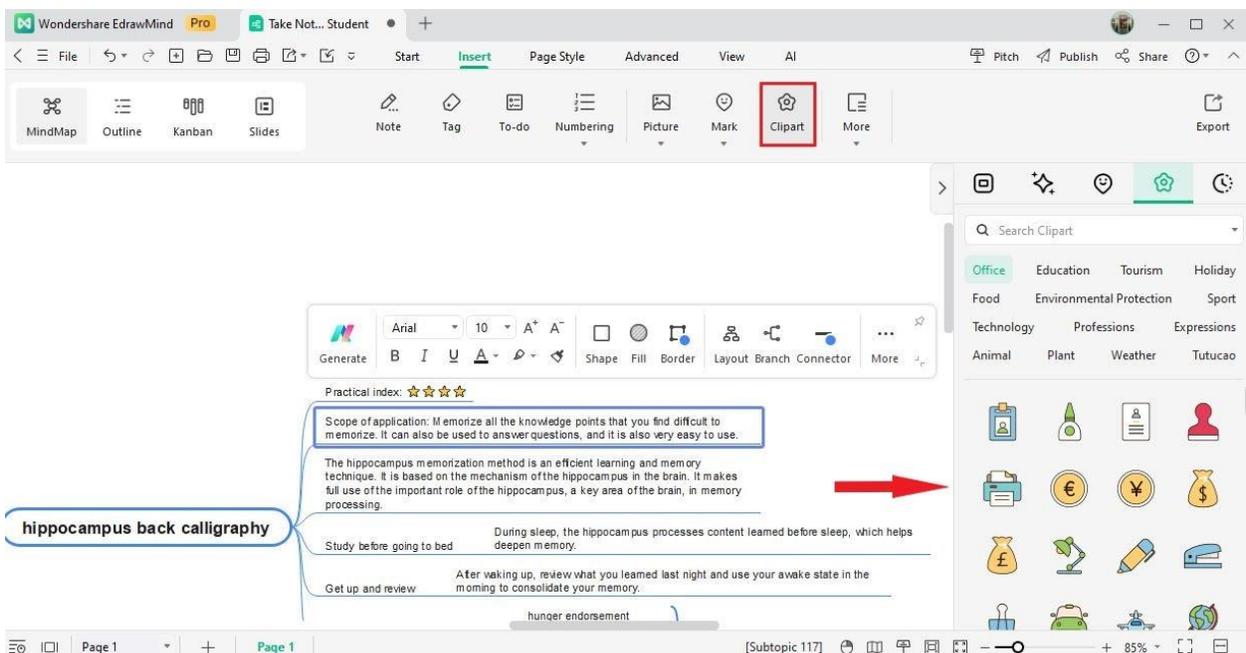

Mark

In EdrawMind, you can use special icons called Marks to add visual elements to your topics and make your mind map more interesting. These icons help explain the content and make the map look more colorful. EdrawMind has lots of different icon groups to choose from, and you can even create your own custom icons.

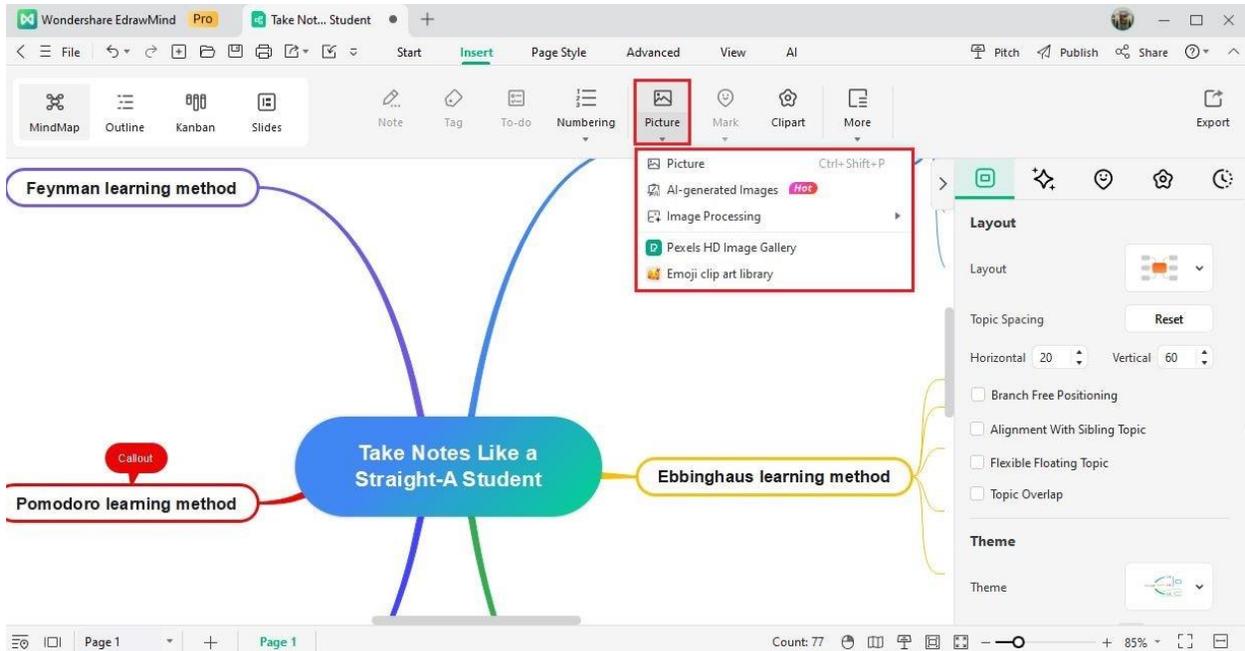

Clipart

In the software, there is a Clipart gallery with professionally designed clip art. These clip arts can be used to make your maps look visually appealing and exciting.

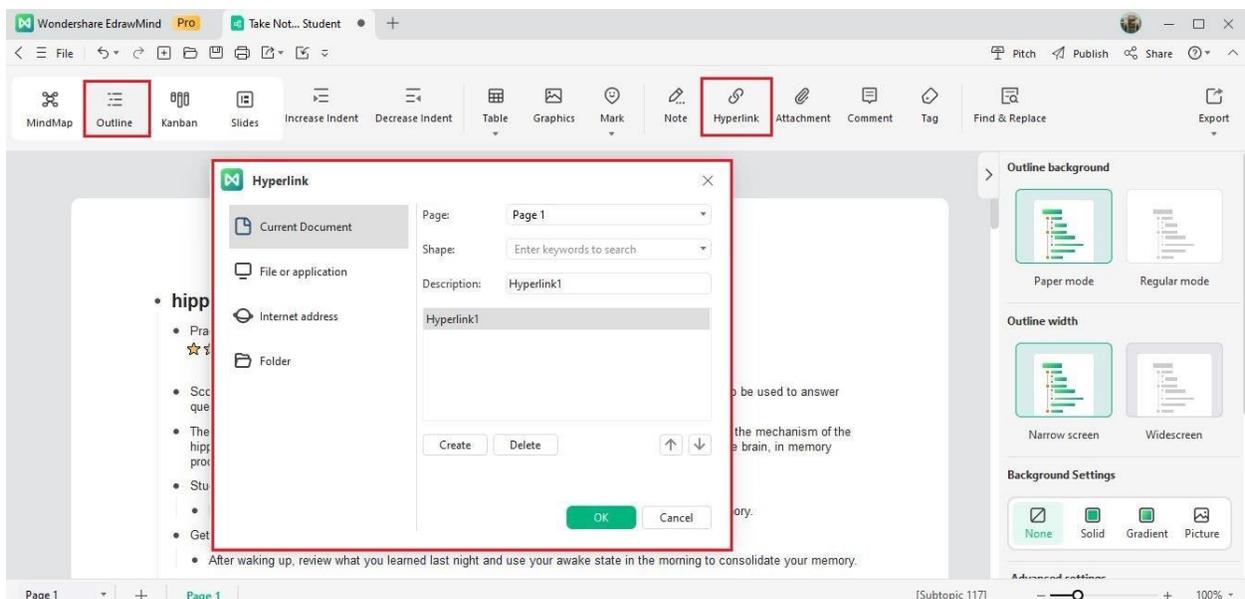

Picture

To add pictures to your map, you can choose any image from your computer. Just click on Picture and insert it directly into your map. If the image is too big, you can make it smaller to fit the map without losing its clearness.

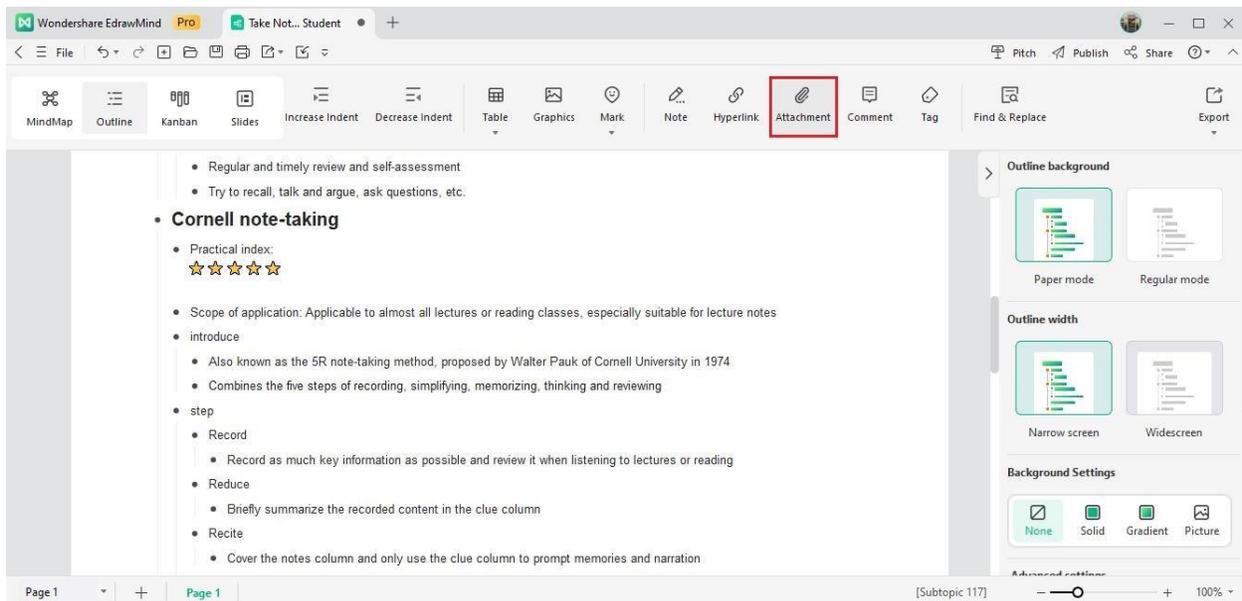

Hyperlink

Hyperlinks are like shortcuts that take you to other files, websites, or pages. They help keep your map clean by letting you access information without cluttering the map. When you click on a hyperlink, it will open the updated file or page.

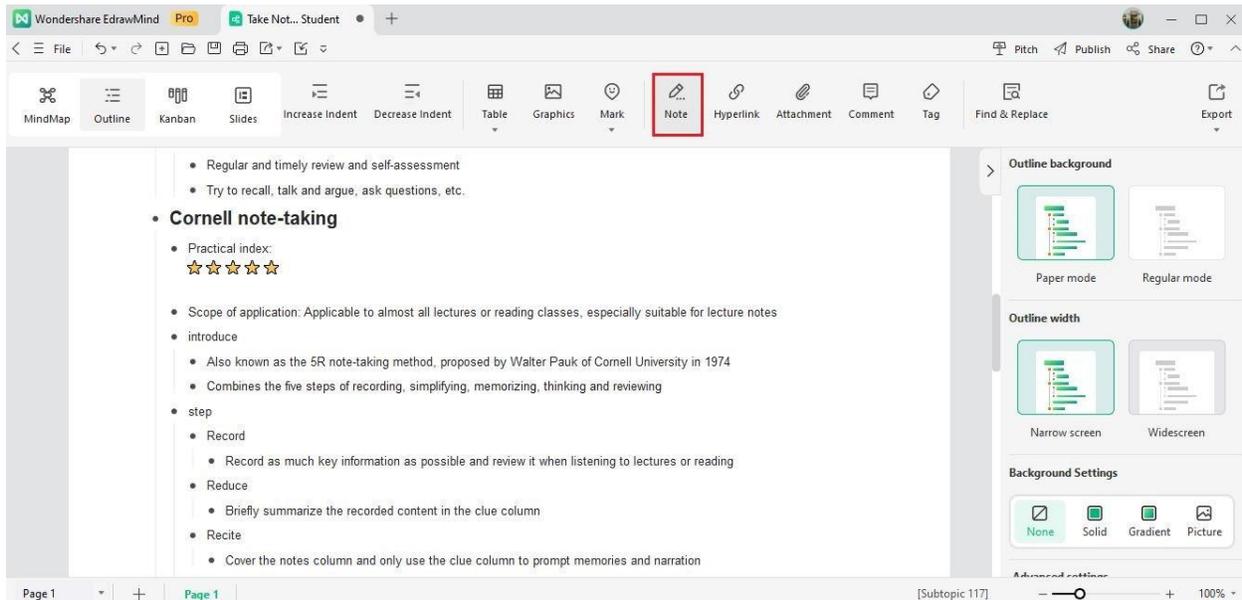

Attachment

Users can add external documents to their mind maps by clicking on Attachment.

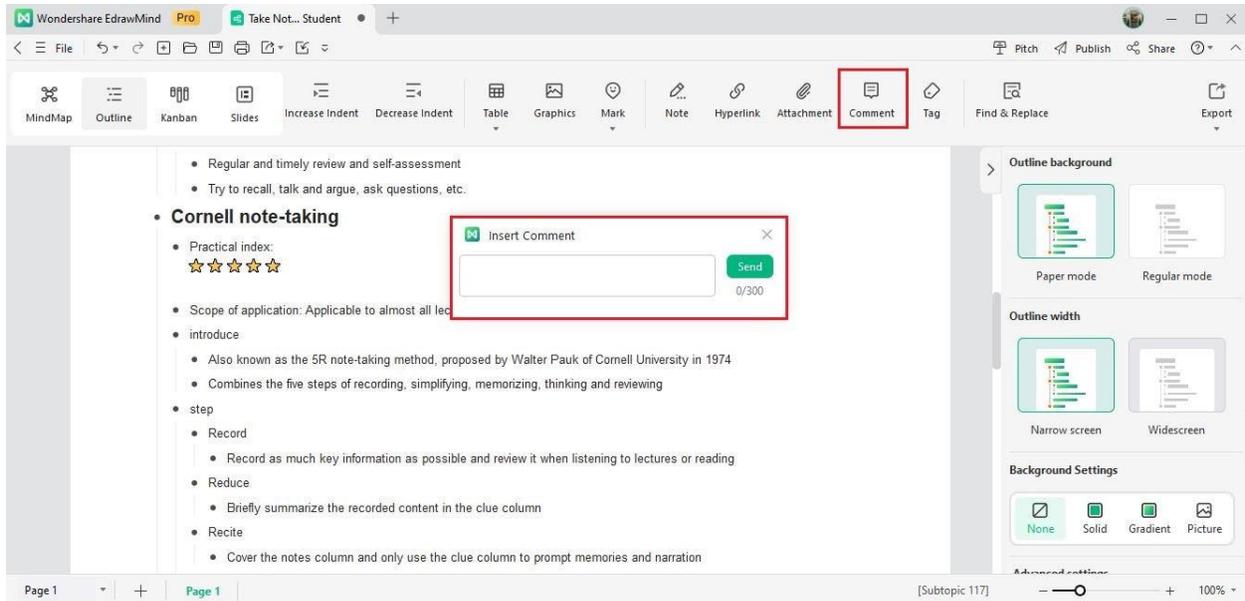

Note

Insert a note to the outline by clicking on Note.

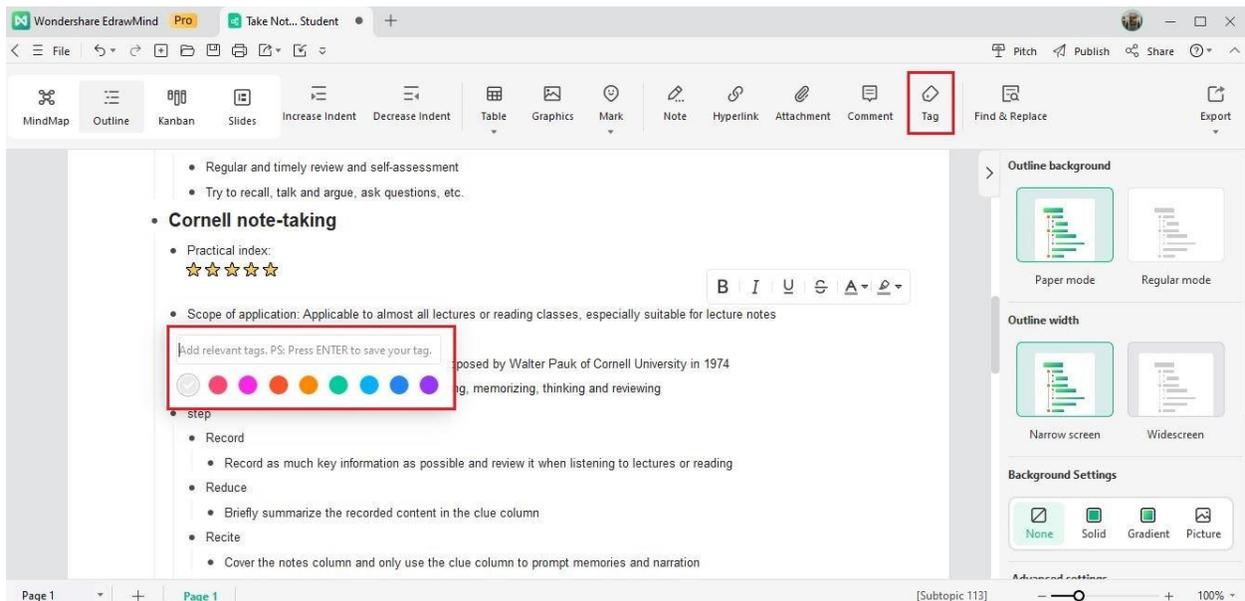

Comment

To leave comments on a subtopic, click on Comment.

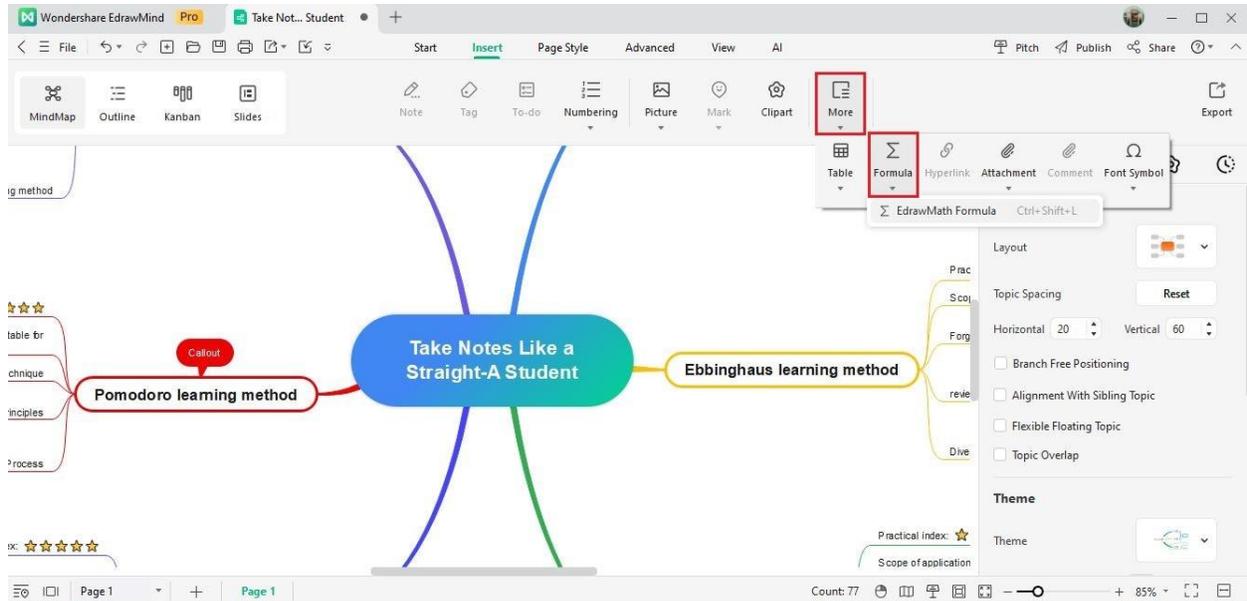

Tag

Adding tags to topics is possible by clicking on Tag to mark task information.

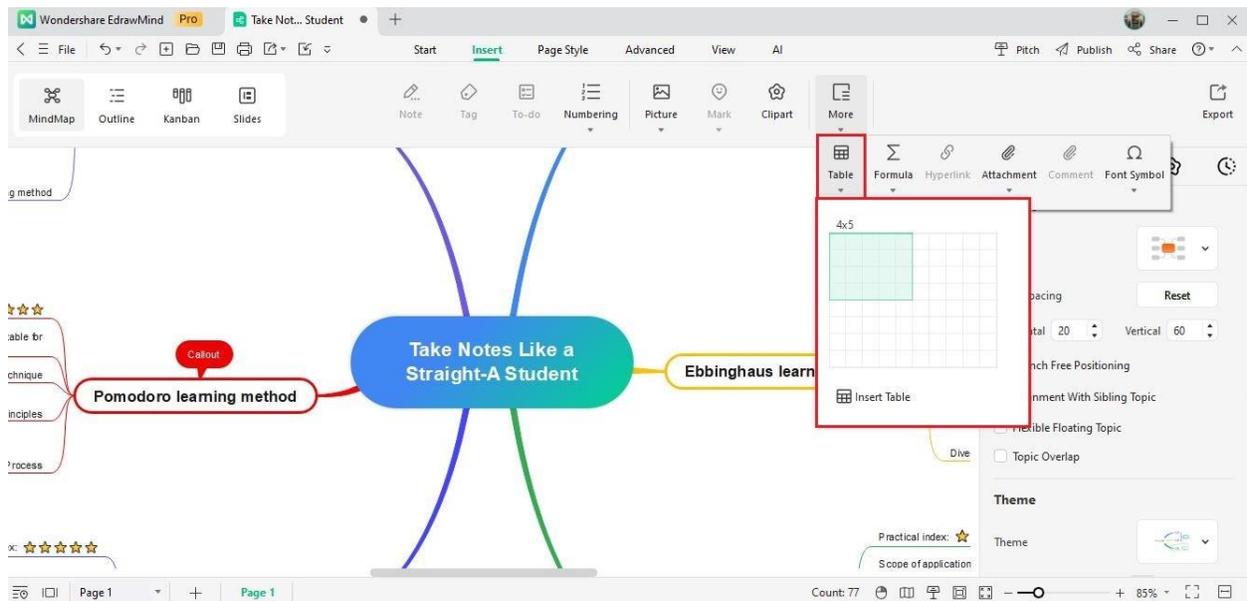

Formula

If you need to include mathematical formulas, you can insert EdrawMath formulas.

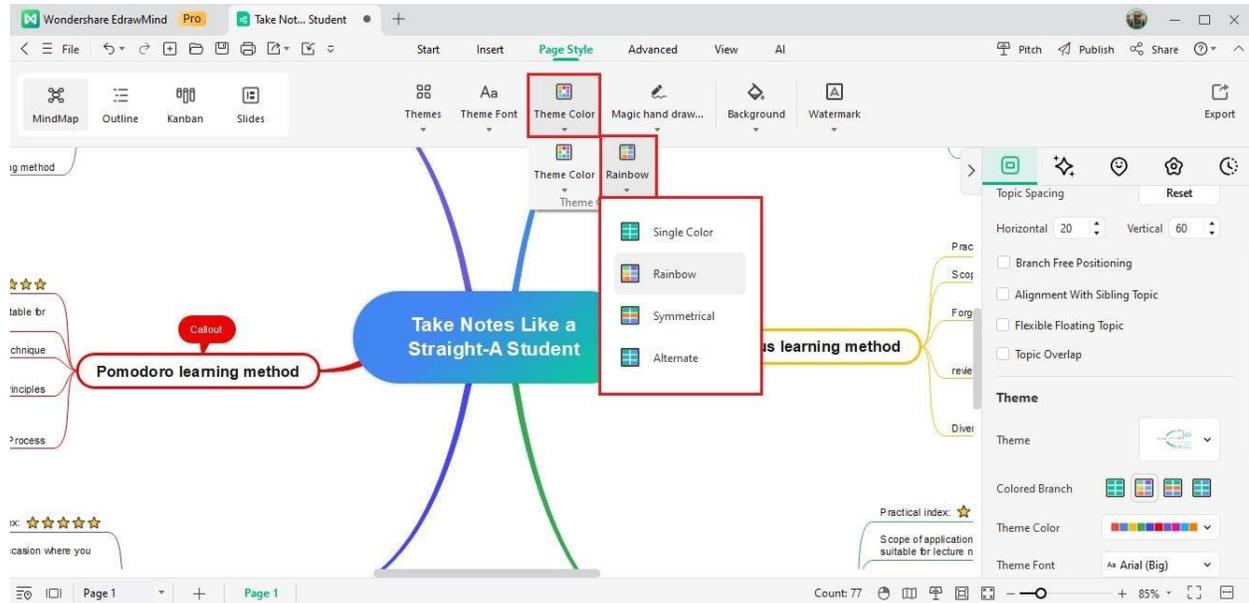

Table

Tables can be inserted directly into the map using the Table feature. You can also customize colors and font sizes.

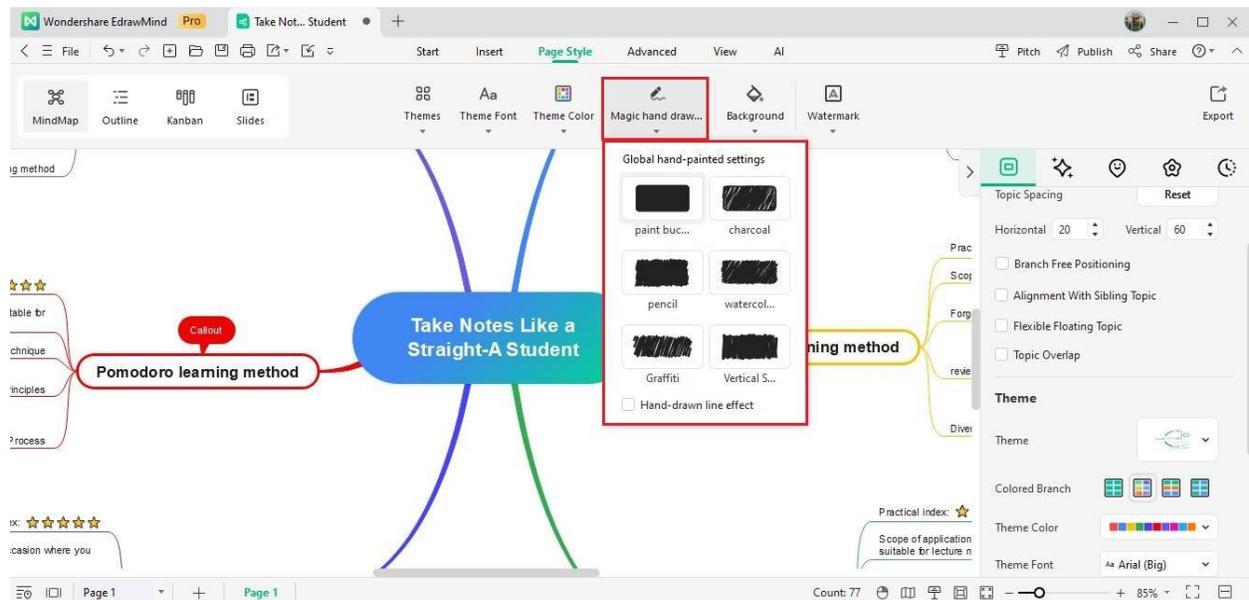

6. Rainbow

With the Rainbow function, you can quickly change the color scheme of the map.

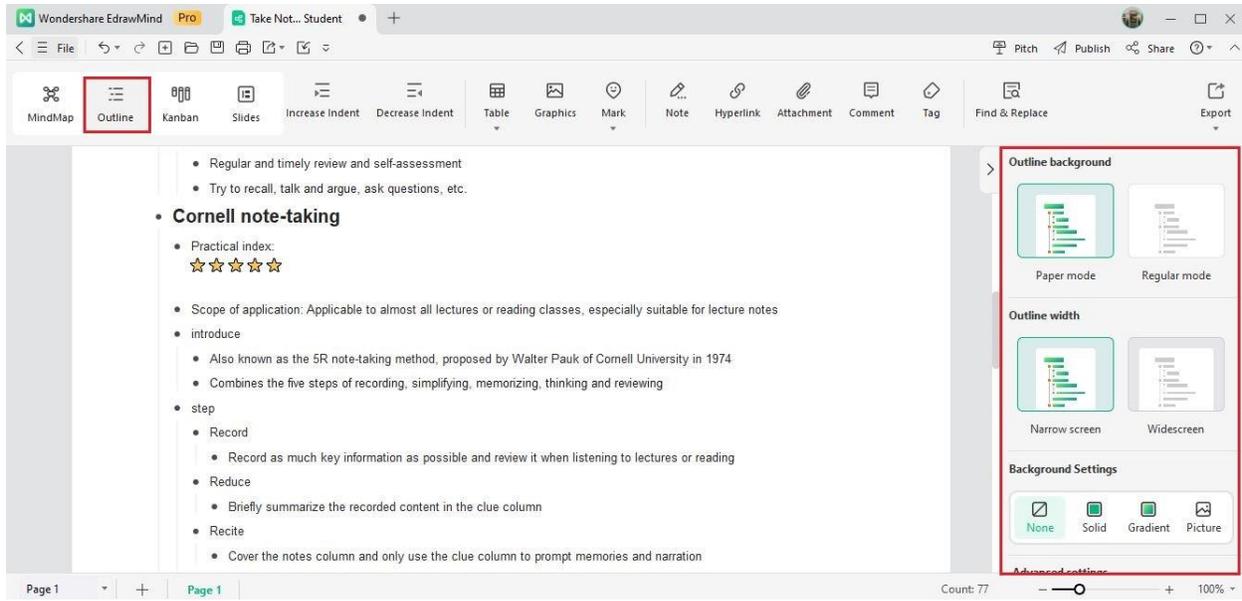

7. Magic Hand Drawing

Switching between Paint Bucket Style, Charcoal Style, Pencil Style, Watercolor Pen Style, Graffiti Style, and Vertical Scribble can be done with one click.

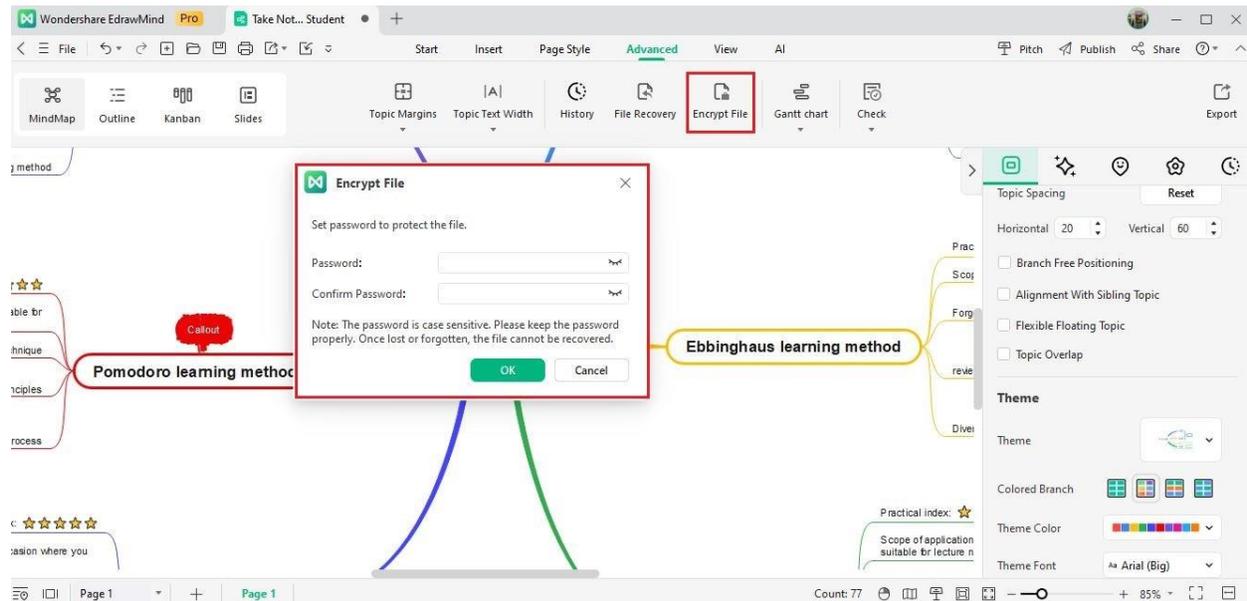

8. Outliner

The Outliner feature displays the map's content in a text outline format for easy understanding.

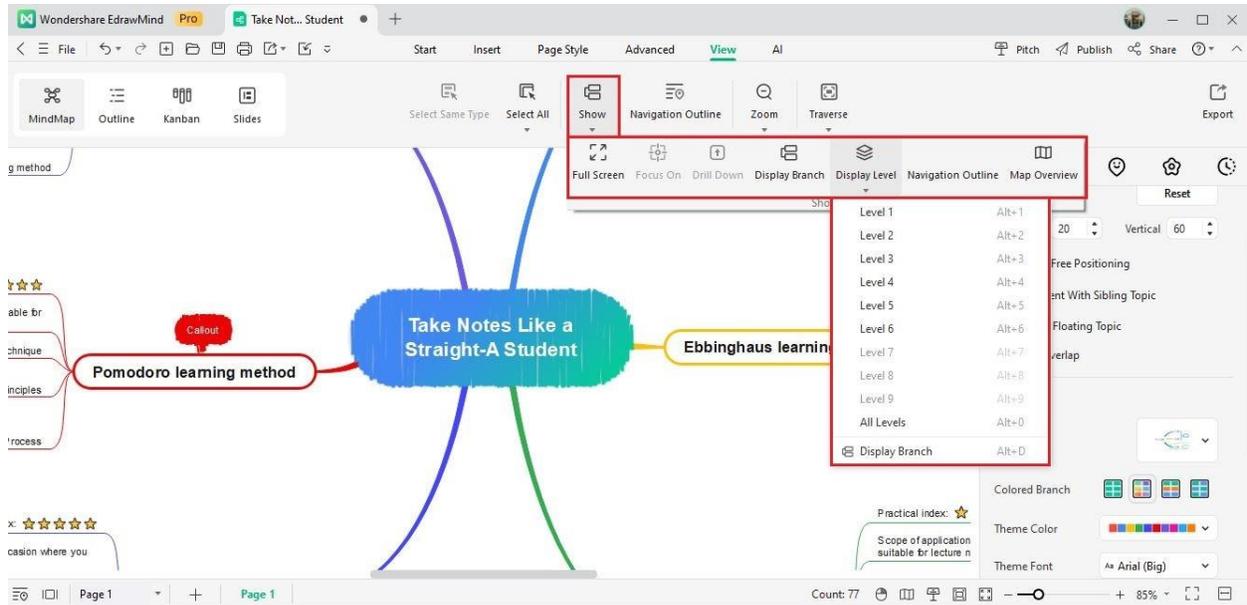

9. Encrypt File

You can encrypt your files with the Encrypt File function to protect them.

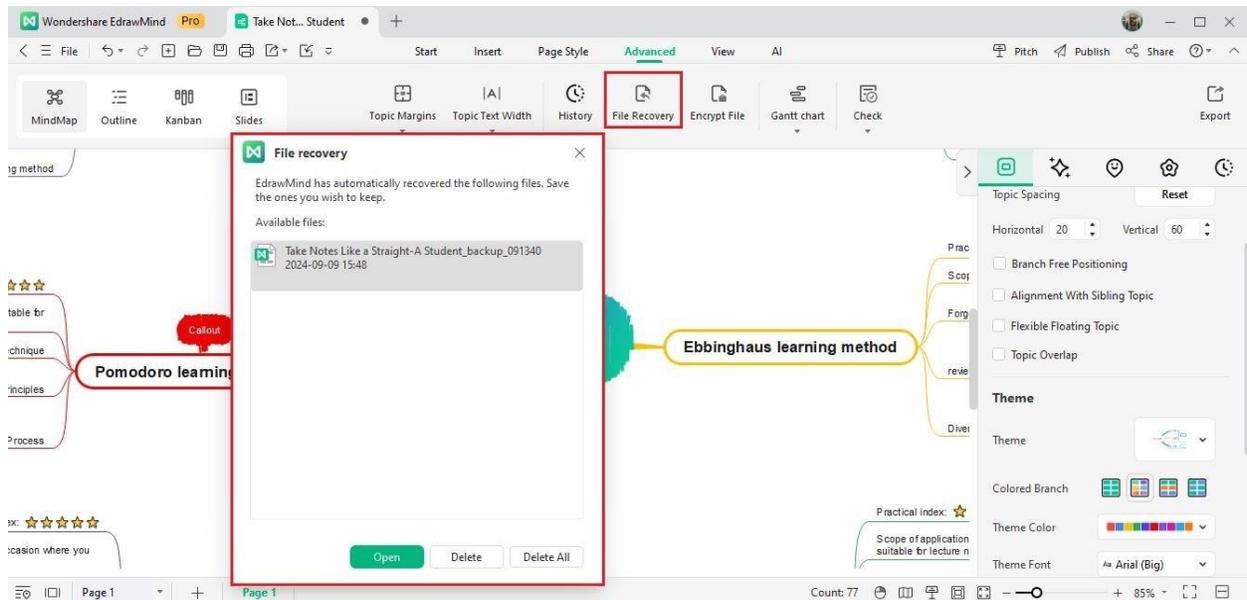

10. Display Level

Use the Display Level function to collapse or expand topics, helping you focus on specific areas.

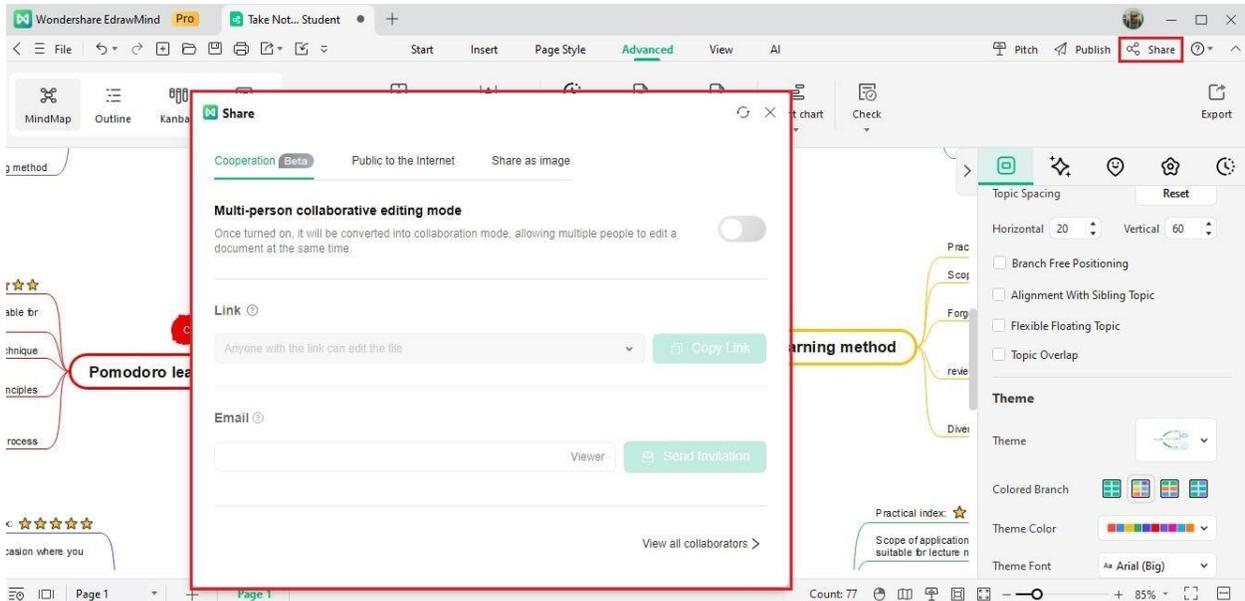

11. File Recovery

If the software unexpectedly closes without saving your map, you can easily recover the unsaved file with one click using File Recovery.

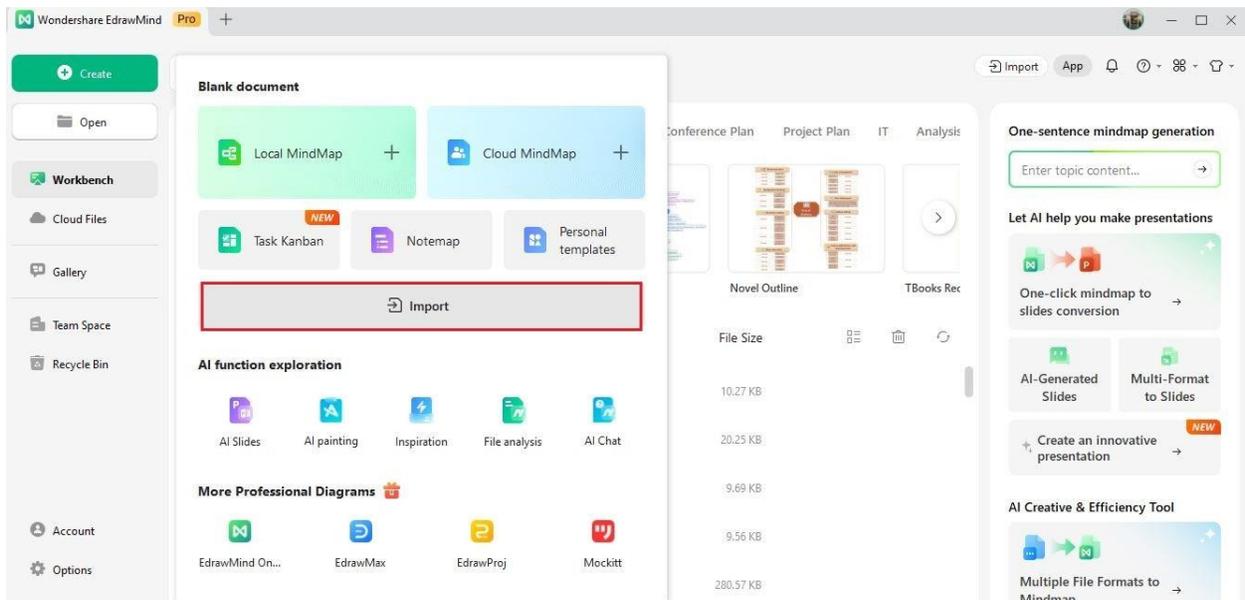

12. Share

Sharing your maps on social media is possible with the Share function.

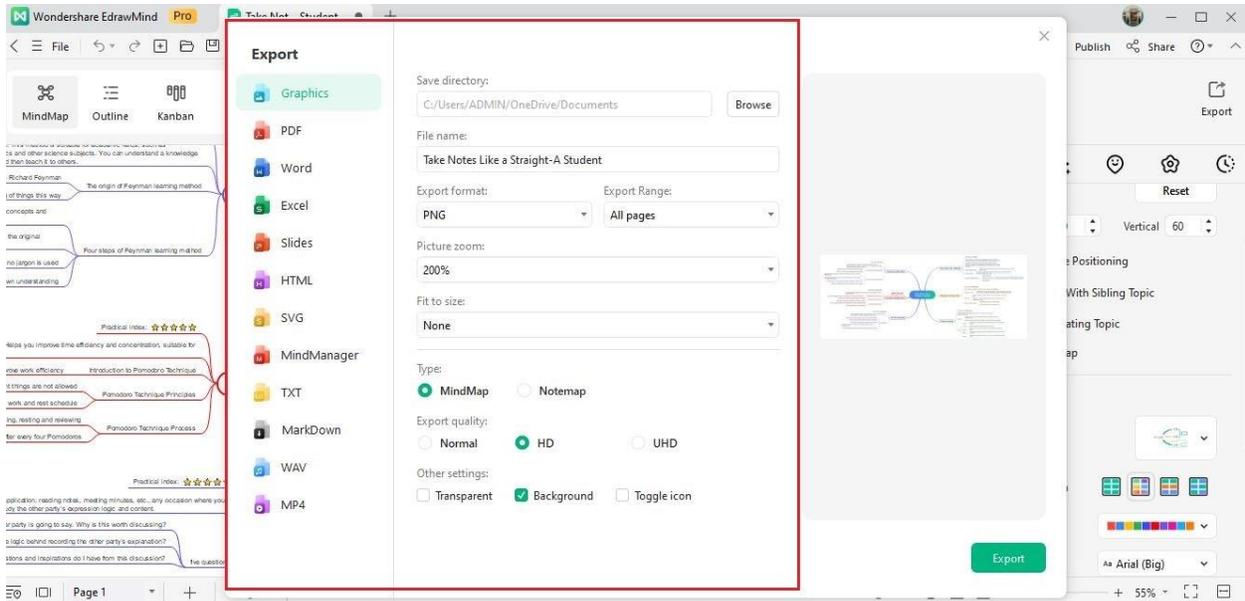

13. Import

EdrawMind supports importing mind maps from other software and file formats, such as MindManager, XMind, FreeMind, Word, HTML, Markdown, and more.

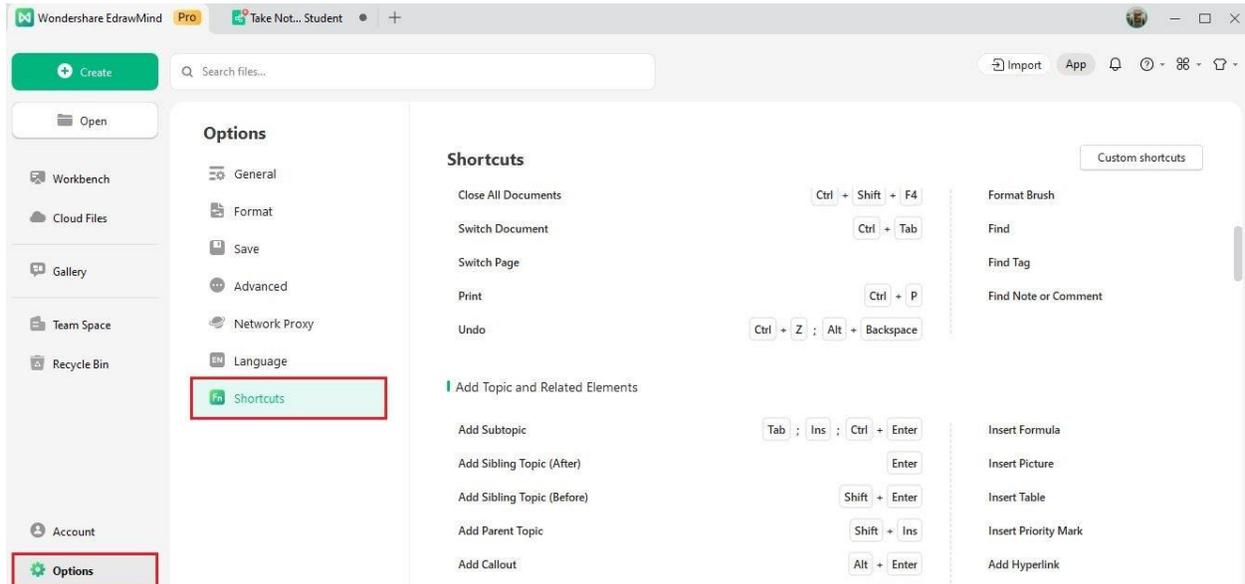

14. Export

You can export your maps to various image formats, PDF, Word, Excel, PPT, HTML, SVG, and MindManager.

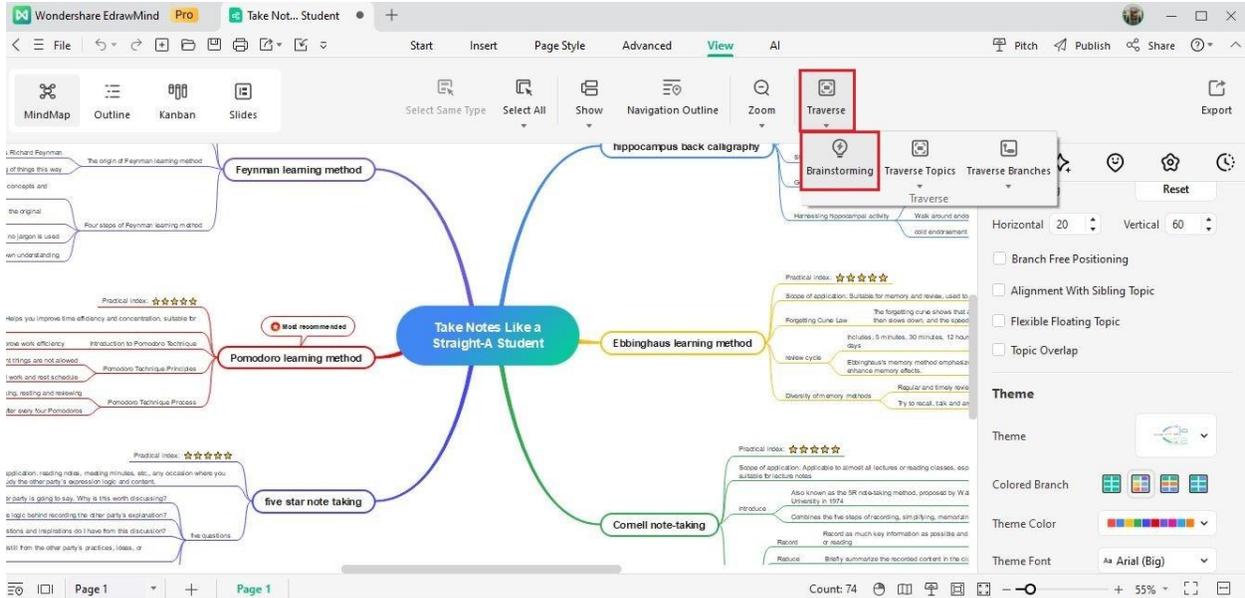

15. Shortcuts

Shortcut keys greatly improve drawing efficiency.

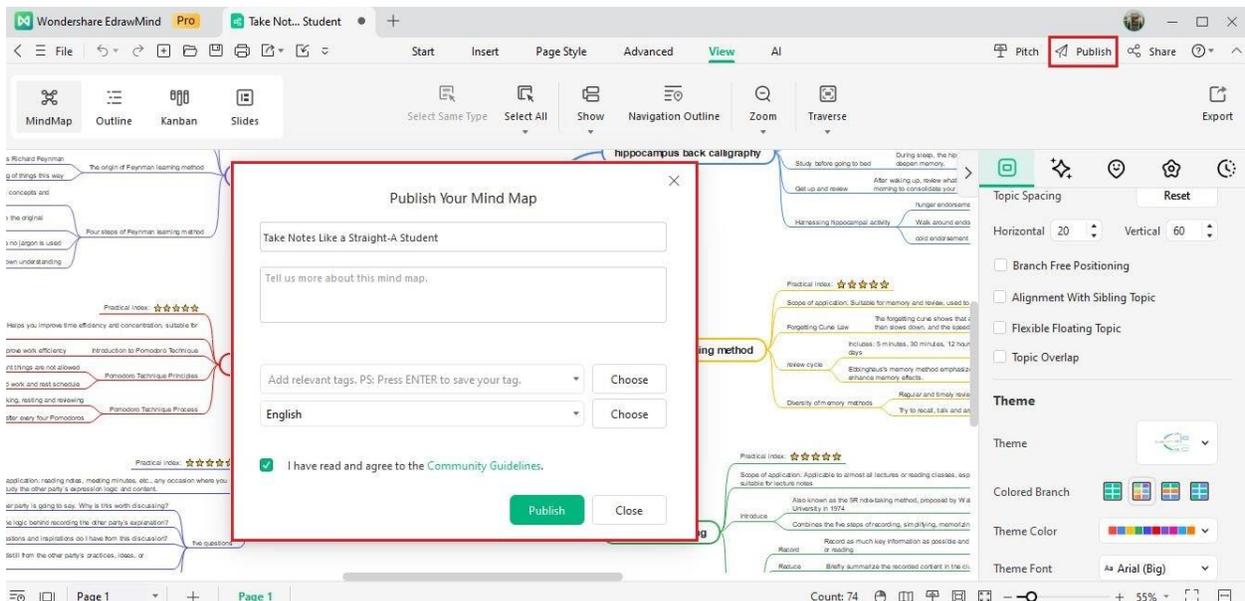

16. Brainstorming

The Brainstorming function in the Slideshow panel provides a creative solution for teams and individuals.

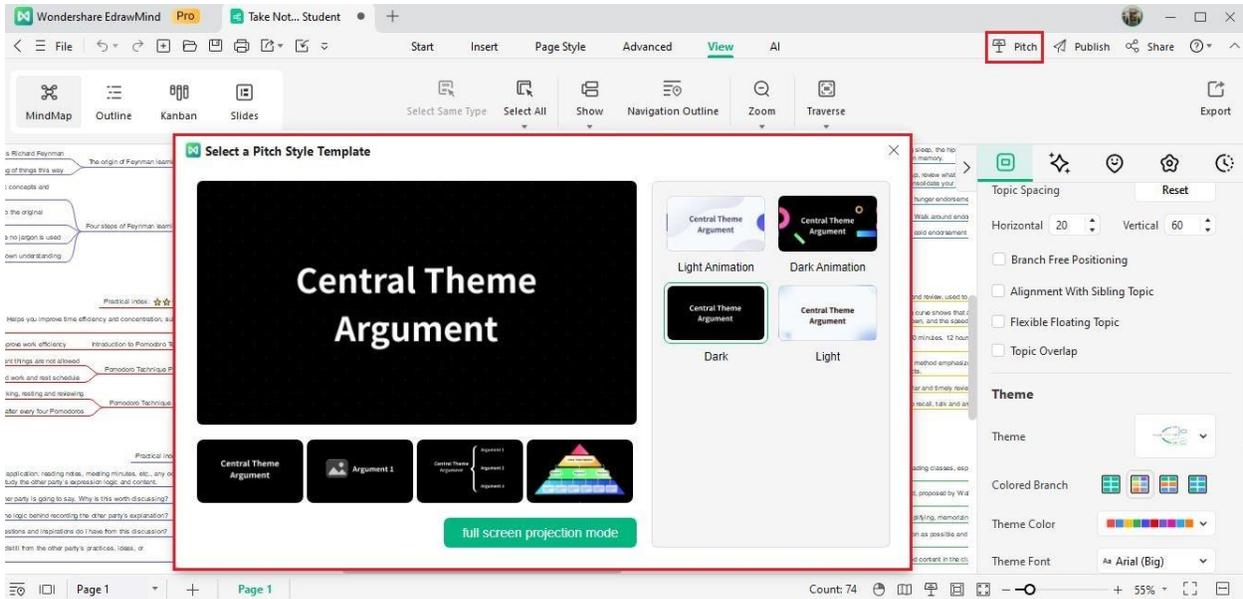

17. Mind Map Gallery

The Mind Map Gallery offers thousands of original mind maps for reference and inspiration. To publish your work in the Community, click on the plane icon in the upper right corner and fill in the relevant information in the Publish Your Mind Map window before clicking Publish.

18. Pitch

Pitch Mode gives provides a variety of ways to showcase your mind maps beautifully and uniquely. Among the styles you can use are **Light Animation**, **Dark Animation**, **Dark**, and **Light**.

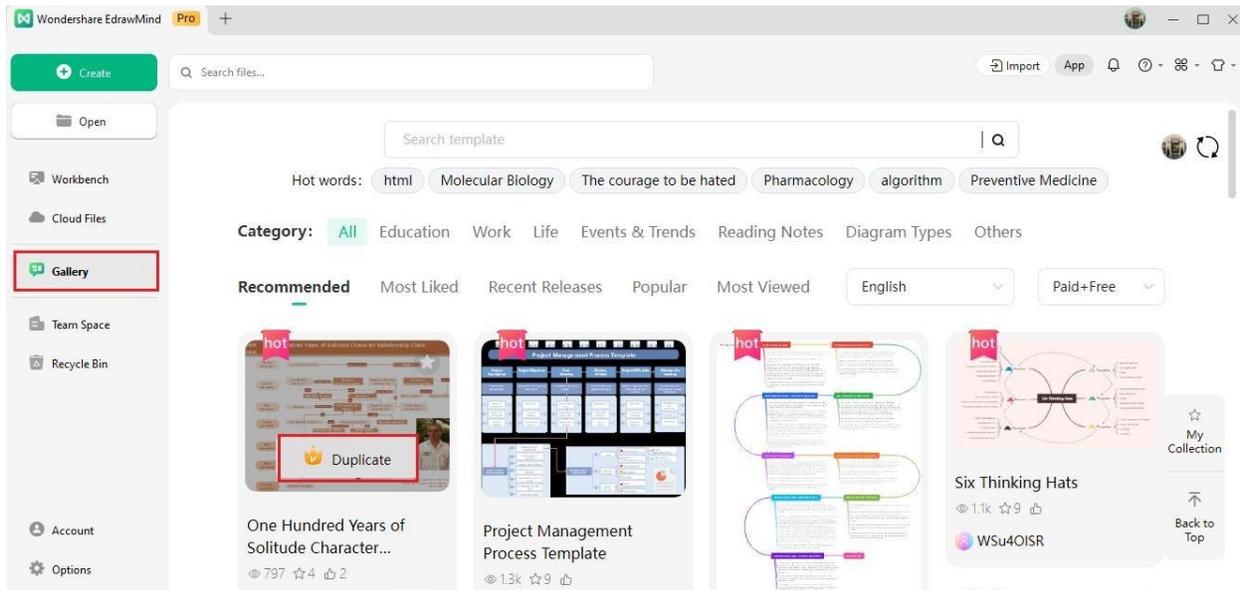

Create Your First Mind Map

With EdrawMind, creating mind maps becomes a breeze. Whether you prefer to start with a pre-designed template or build from scratch, this powerful tool empowers you to visually organize your thoughts and ideas. In addition, EdrawMind has an AI assistant that can create mind maps with just one command.

Method 1 Use a Template

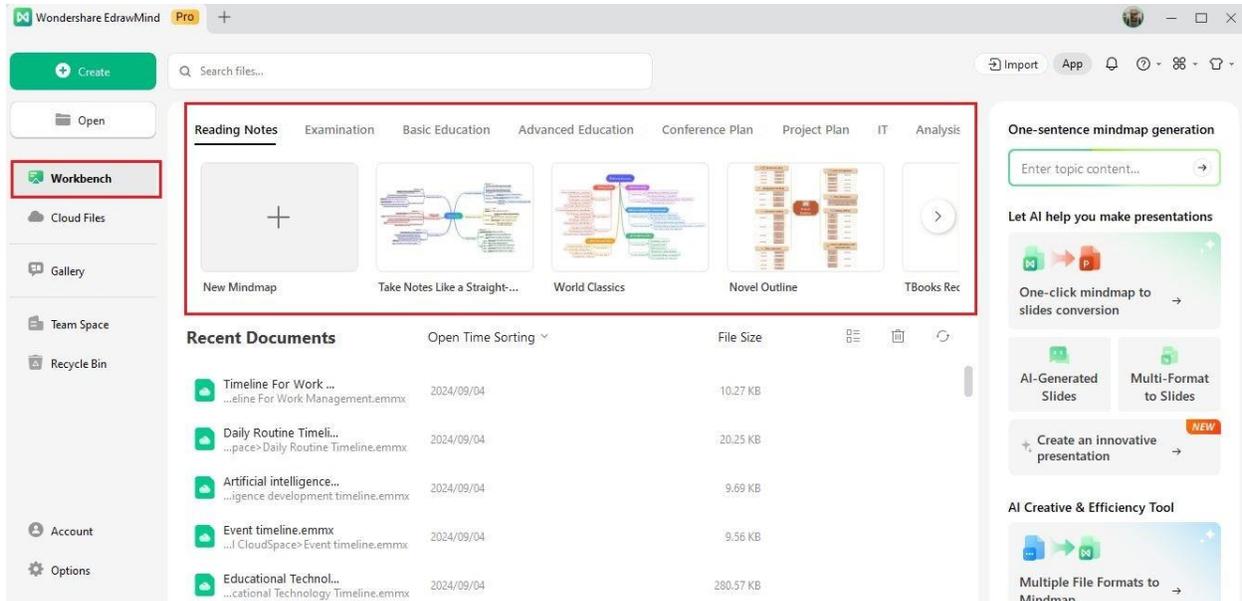

Check out the EdrawMind Gallery, which has thousands of beautiful templates to choose from. Using a template can save you time and make it easier to start your mind map.

To use a template, simply hover your mouse over the thumbnail and click the Duplicate button. The template will then appear on the canvas, where you can edit and customize it to your liking. Get ready to let your creativity shine and make your mind map uniquely yours!

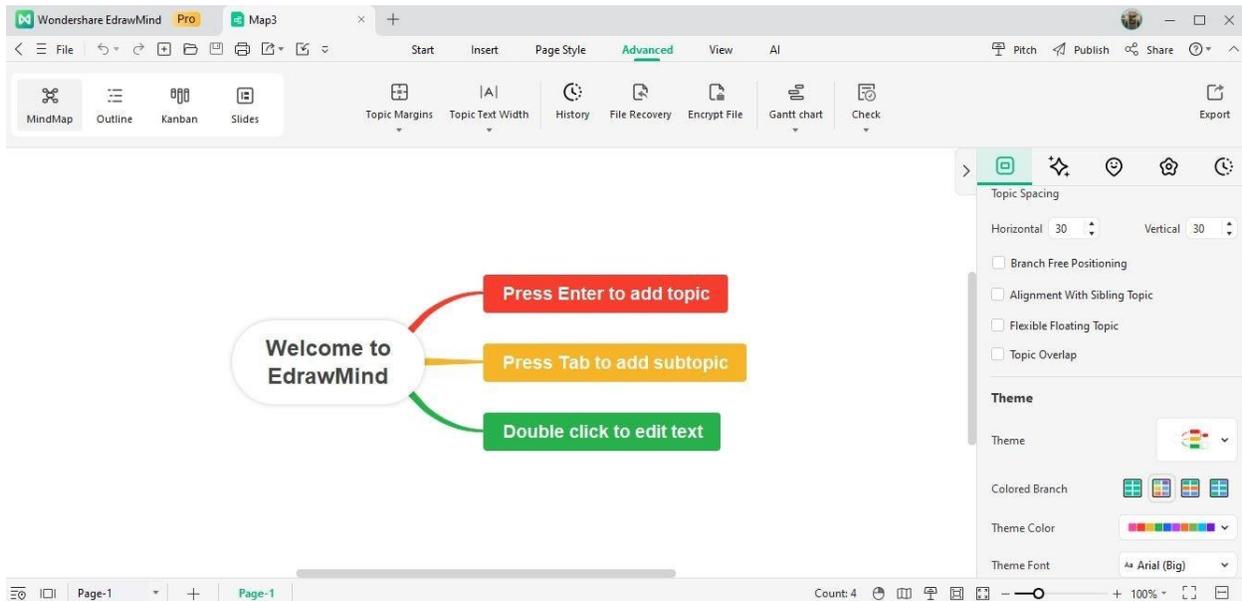

Method 2 Start From Scratch

To start creating a mind map in EdrawMind, go to the Workbench tab on the homepage. Choose a map structure that fits your needs. A simple map will appear in a new window.

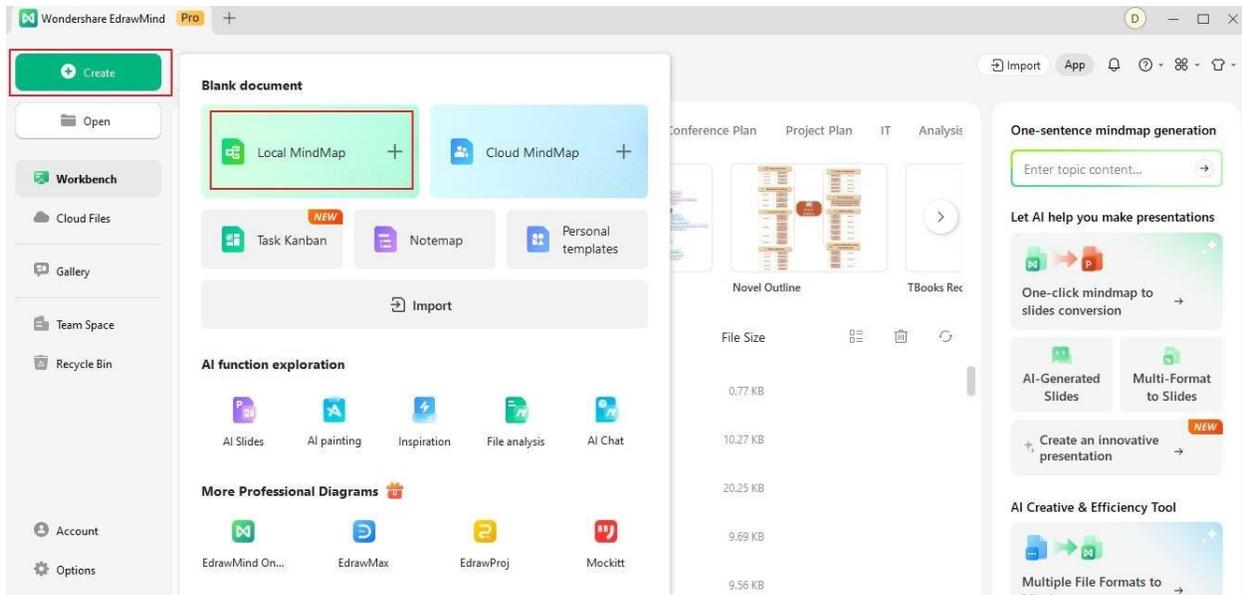

To add topics to your mind map, use the commands on the Home tab. You can insert different topics under the Main Topic. Once you do that, you can edit the text on the topics and change their styles using the formatting tools.

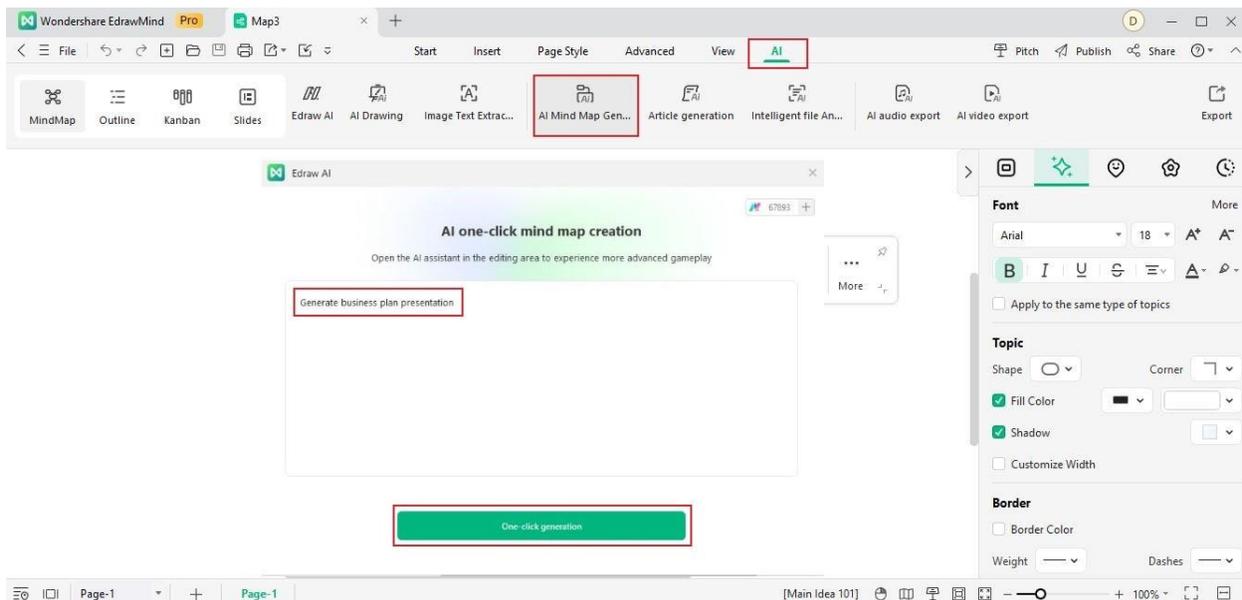

Method 3 Create Mind Maps With AI

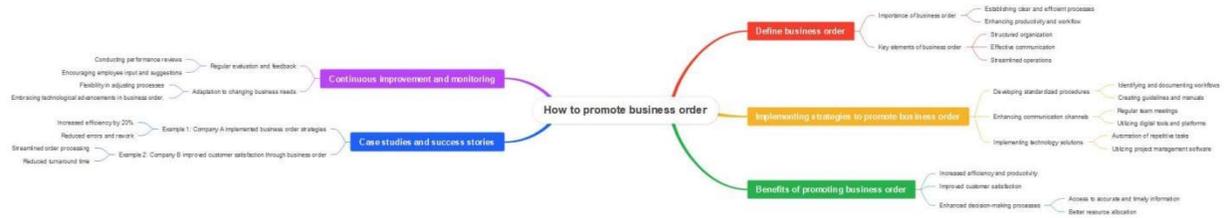

To create a mind map quickly and easily in EdrawMind, click on the Create button and select The Local MindMap option.

Under the AI section, click the AI Mind Map Generation feature. A pop-up window will appear where you can enter a command.

Once you enter the command, Edraw AI will automatically generate a mind map that meets your needs. It's like having a smart assistant helping you create your mind map effortlessly.

Install, Update, and Uninstall EdrawMind

Here are the steps to Install, Update, or Uninstall EdrawMind on your desktop.

01 Operating System Requirements

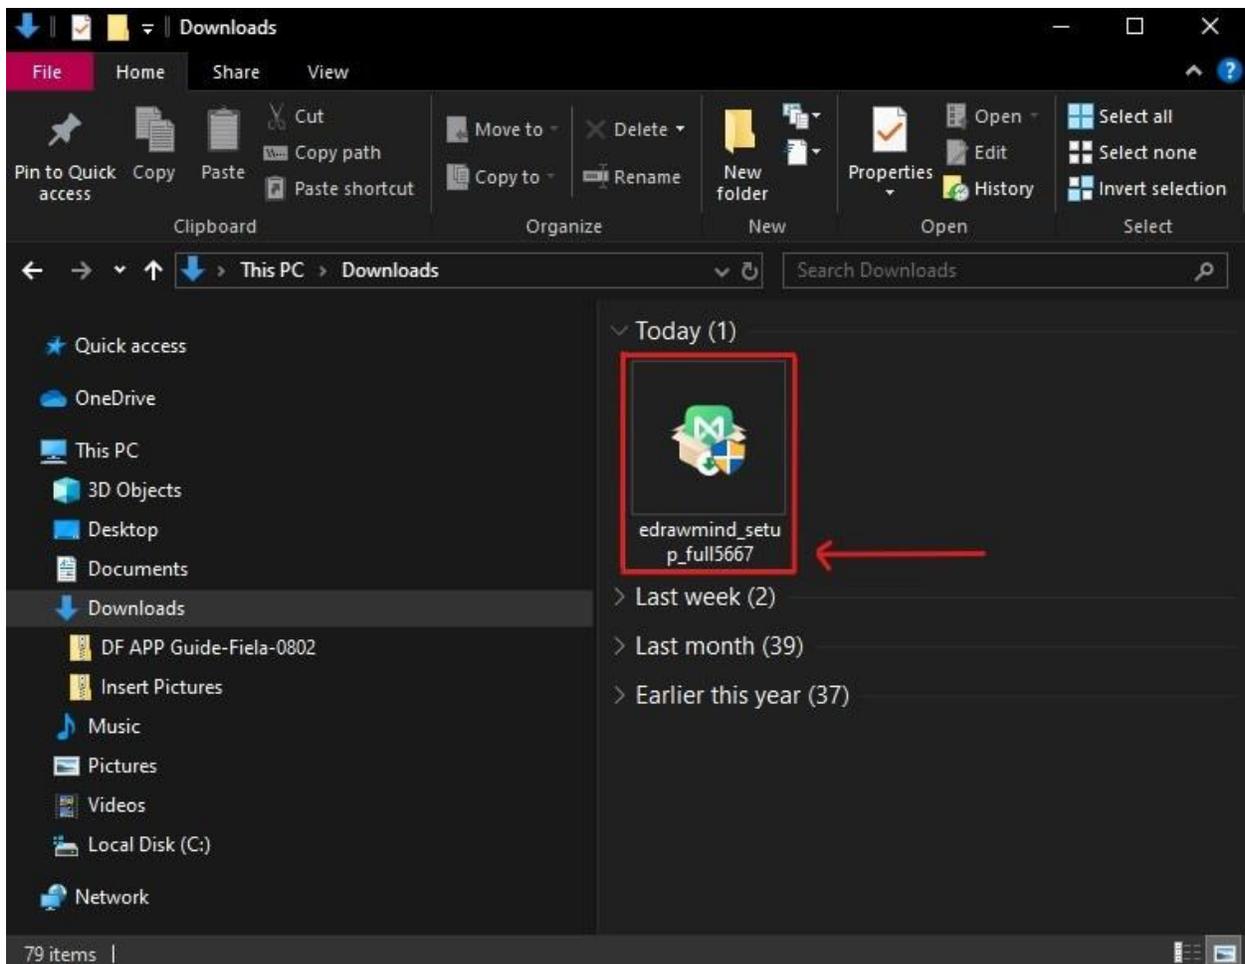

EdrawMind supports multiple systems, which include:

- Windows Vista/7/8/10/11 (32bit/64 bit)
- Mac OS X 10.10 and later
- Linux (Debian, Ubuntu, Fedora, CentOS, OpenSUSE, Mint, Knoppix, RedHat, Gentoo, and More)

02 How To Install

EdrawMind supports multiple systems, which include:

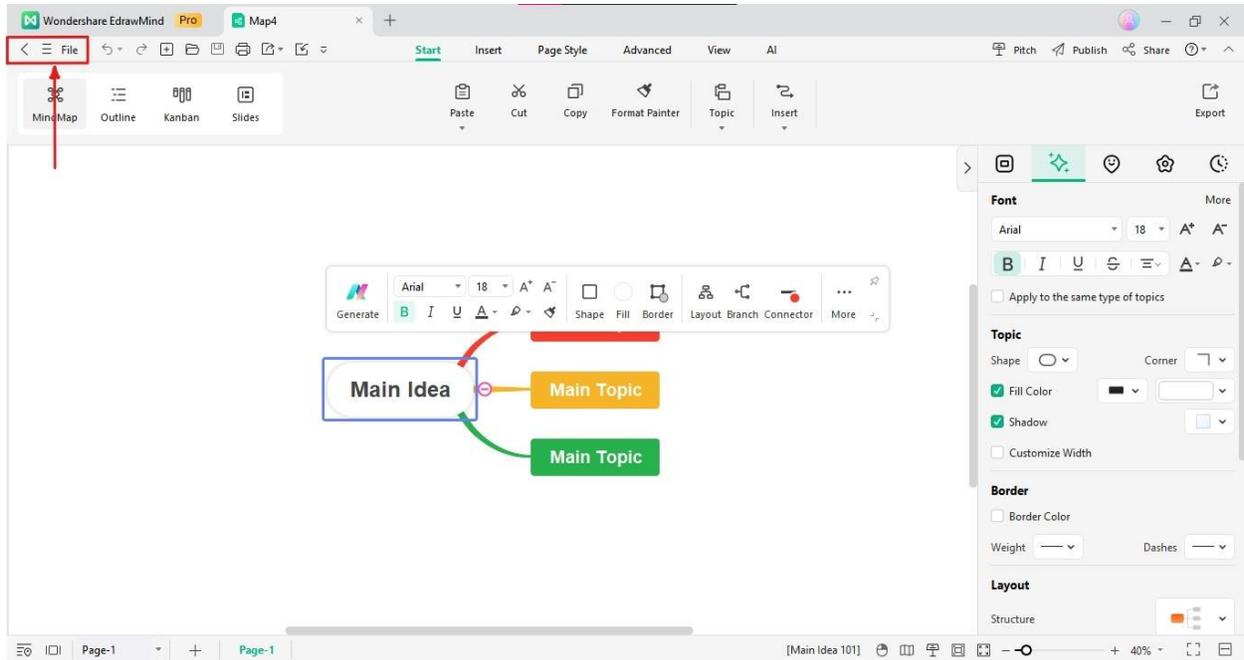

- **Step 1:** To get started with EdrawMind, visit the EdrawMind website.
- **Step 2:** From there, you can download the installation package that is suitable for your computer's operating system.
- **Step 3:** After the download is complete, double-click the file with the extension .exe to install it.

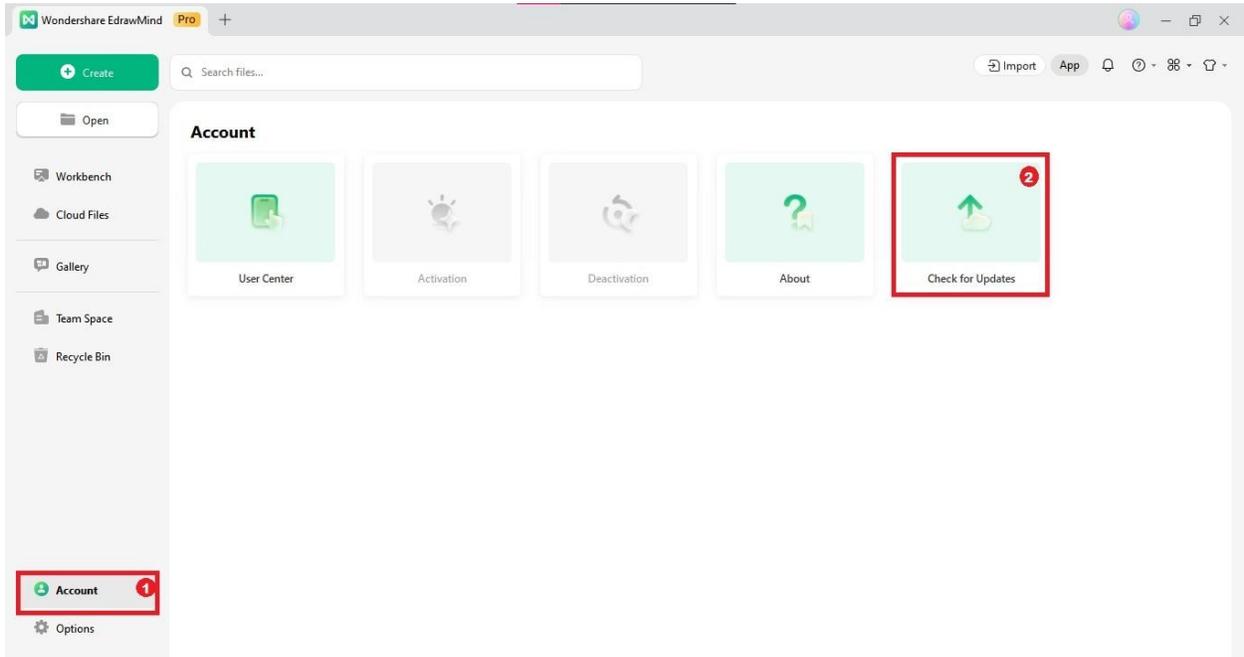

03 Check for Updates

Follow the easy steps below to check if your EdrawMind software has the latest version.

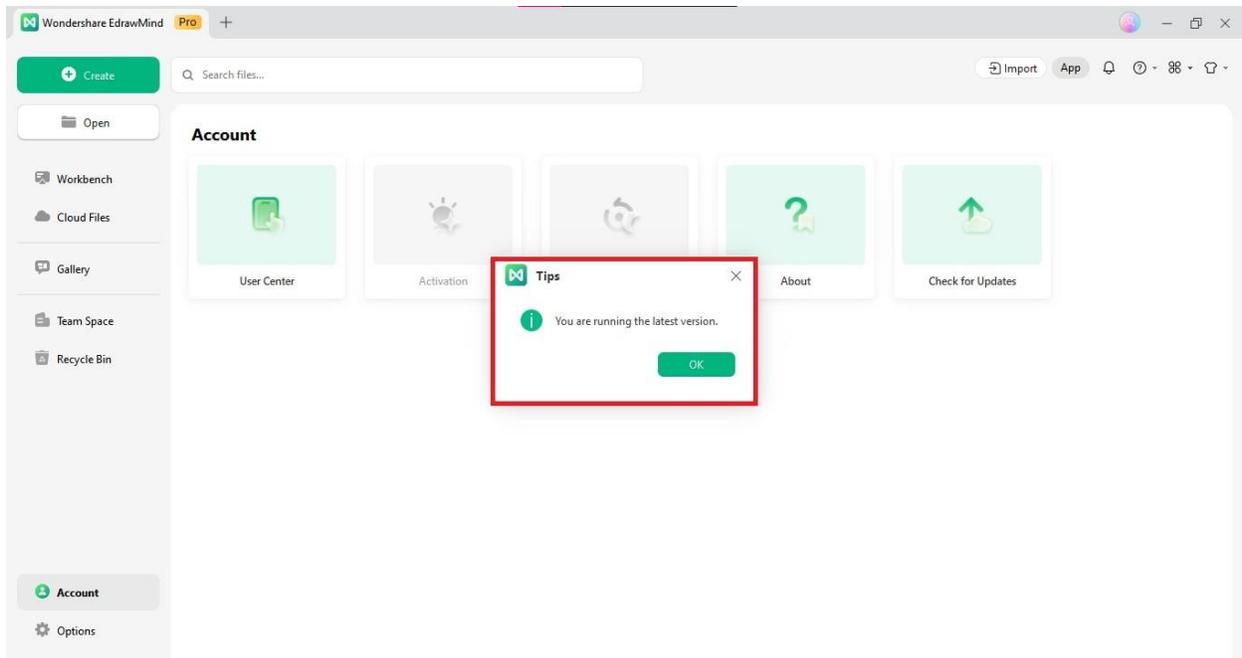

Step 1: Click File in the menu bar.

Step 2: Click Account in the lower left corner. In the Account interface, click Check for Updates.

Step 3: EdrawMind will automatically check and update the software to the latest version.

04 How To Uninstall EdrawMind

Step 1: Go to the installation folder of EdrawMind located on your computer.

Step 2: Click Unins000.exe in the installation folder to remove the program.

Register and Sign In

After launching EdrawMind, you need to sign in when you use the software for the first time. Here is how to register and log in.

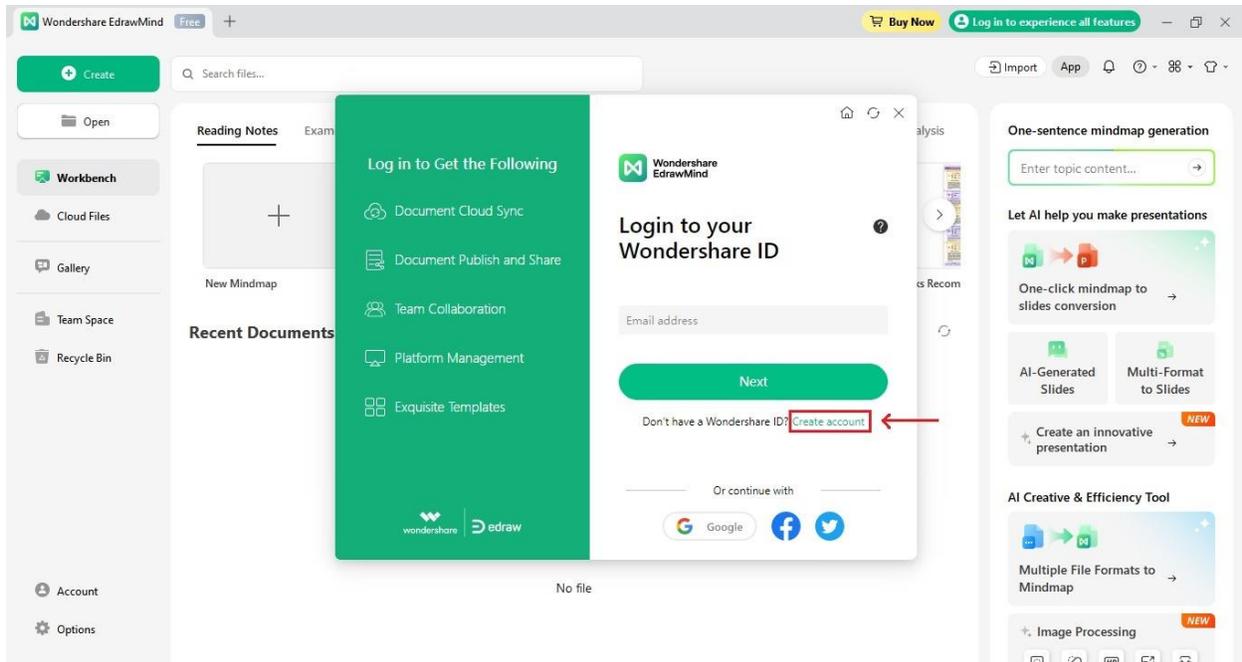

01 Register Your Wondershare ID

If you haven't got a Wondershare ID yet, you need to register first. Here are the easy steps to create a new account.

Step 1: Click Log In to Experience All Features in the upper right corner of the interface.

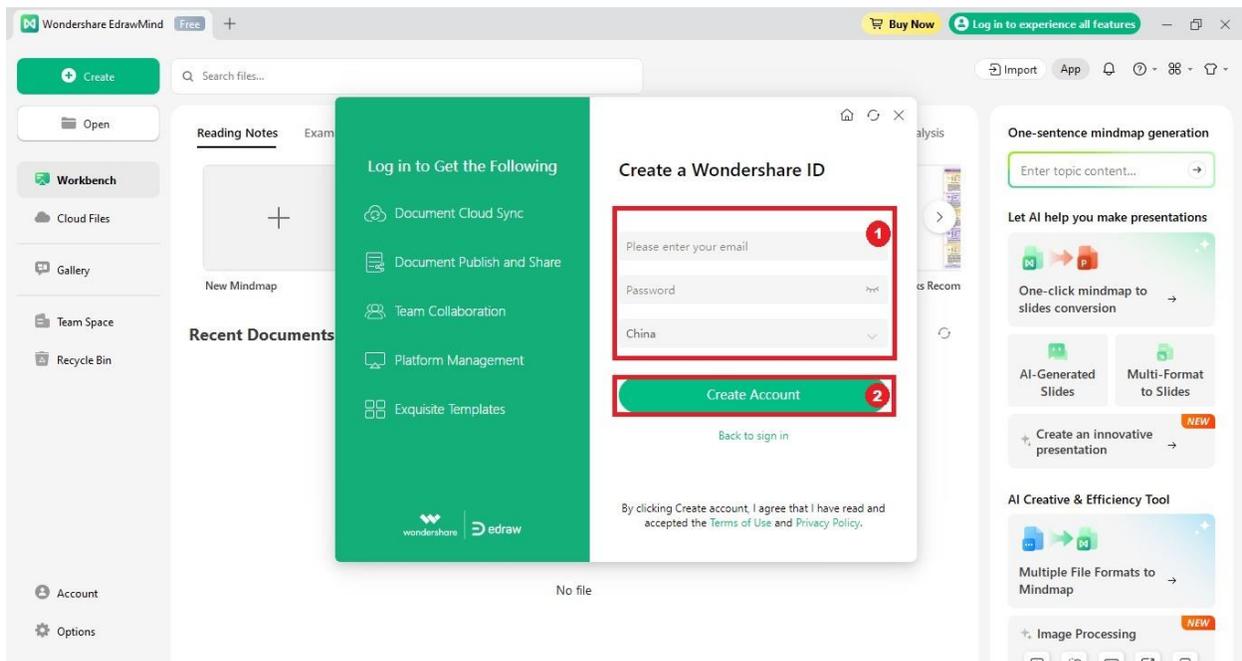

Step 2: Click Create Account in the sign-in window.

Note:

You can also continue with your Google, Facebook, or Twitter accounts to skip registering with an email account.

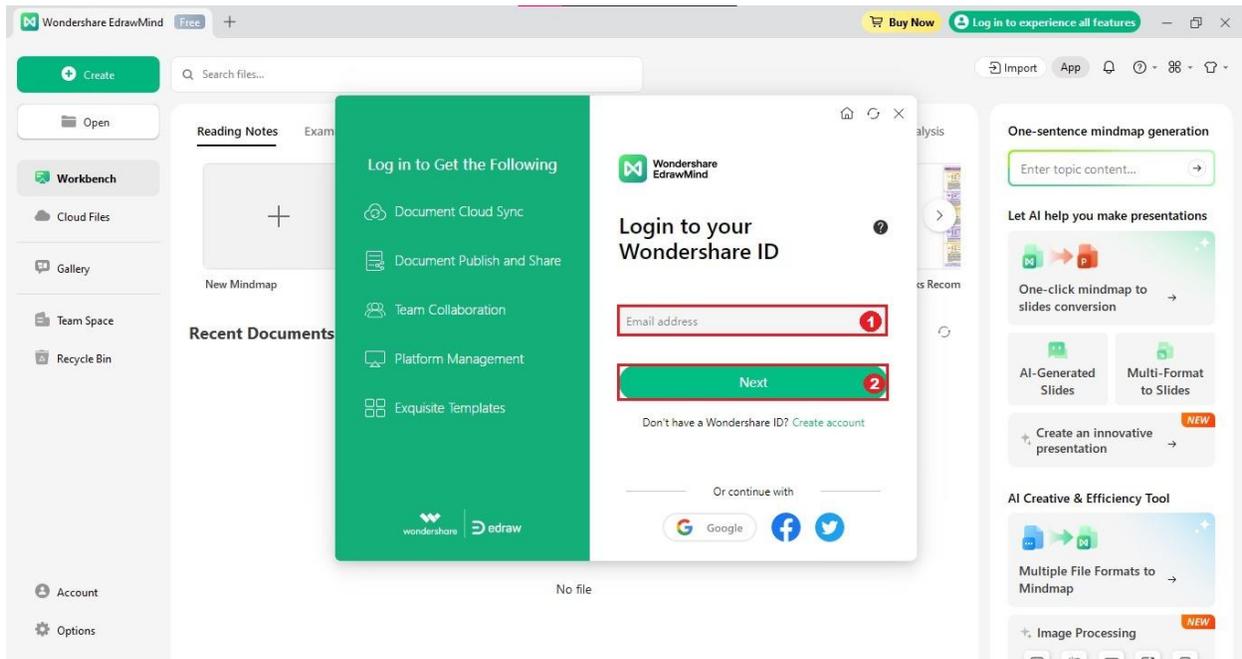

Step 3: Enter your email and password, then choose the country where you are. Then, click Create Account to get an ID.

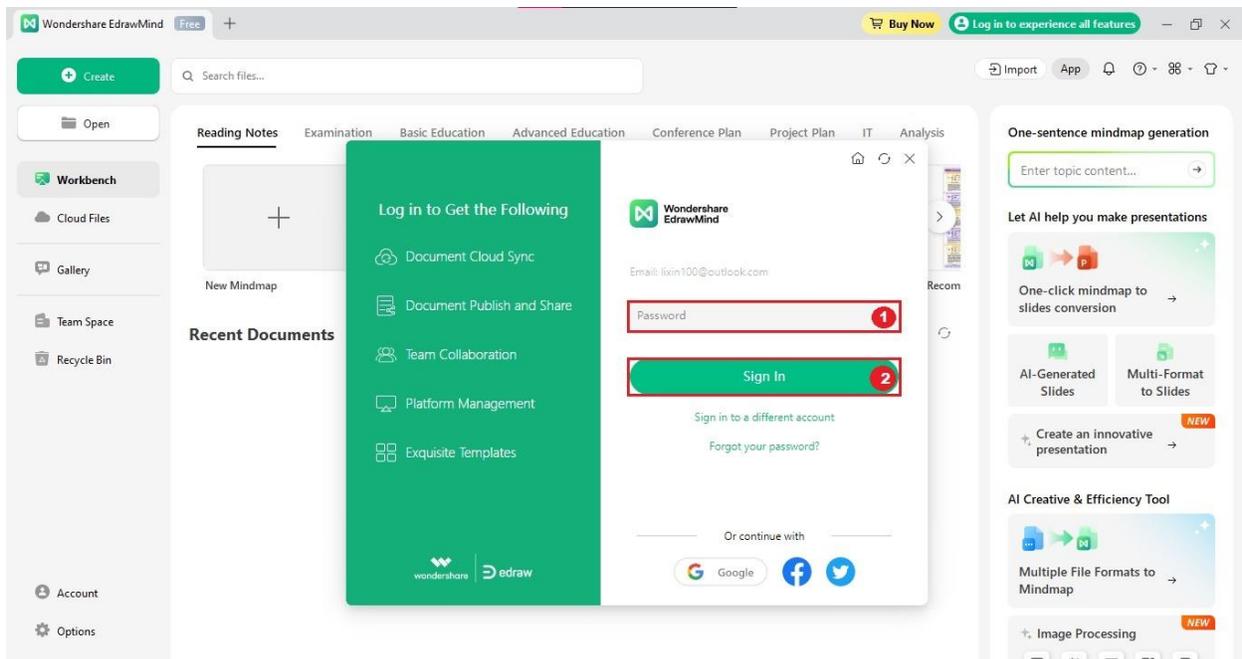

02 Sign Into Your Account

If you've already got your Wondershare ID, please follow the steps to log in directly.

Step 1: After clicking Sign In in the upper right corner of the interface, enter your email address in the blank, then click Next.

Step 2: Input your Password account and click Sign In.

Activate or Deactivate EdrawMind

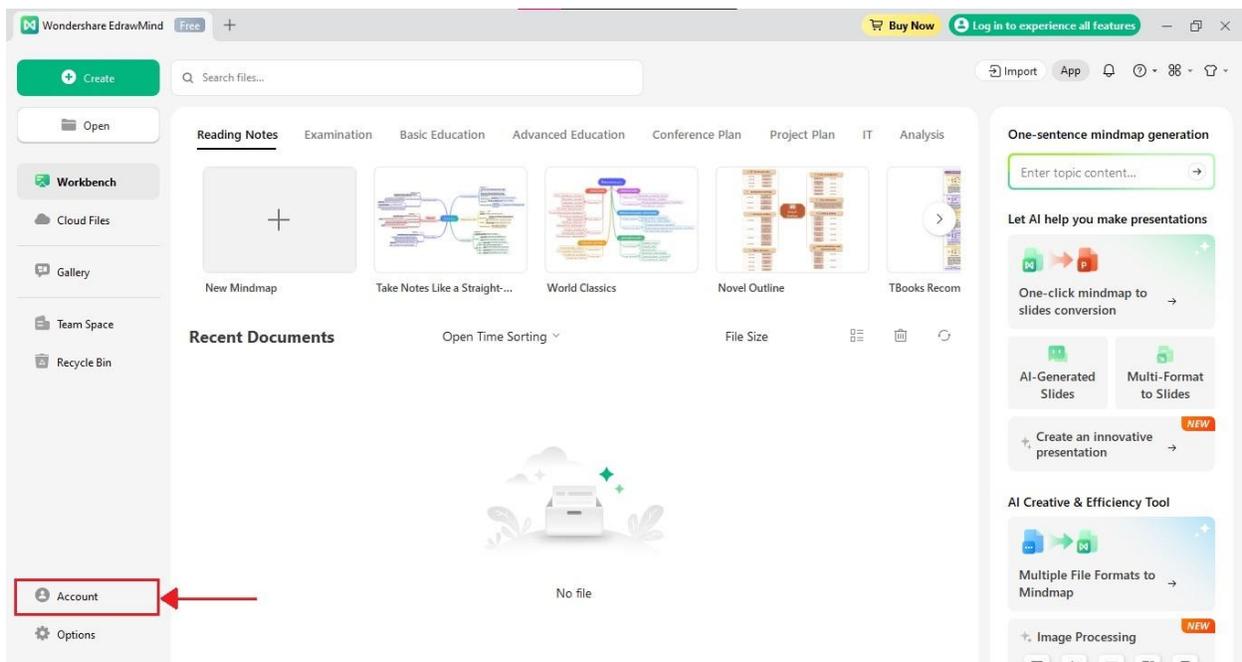

With its range of features, EdrawMind assists in streamlining your thought process, enabling you to create visually appealing mind maps that are clear and easy to follow. Learn to activate and deactivate your EdrawMind subscription plan to maximize its potential.

01 How To Activate EdrawMind Account

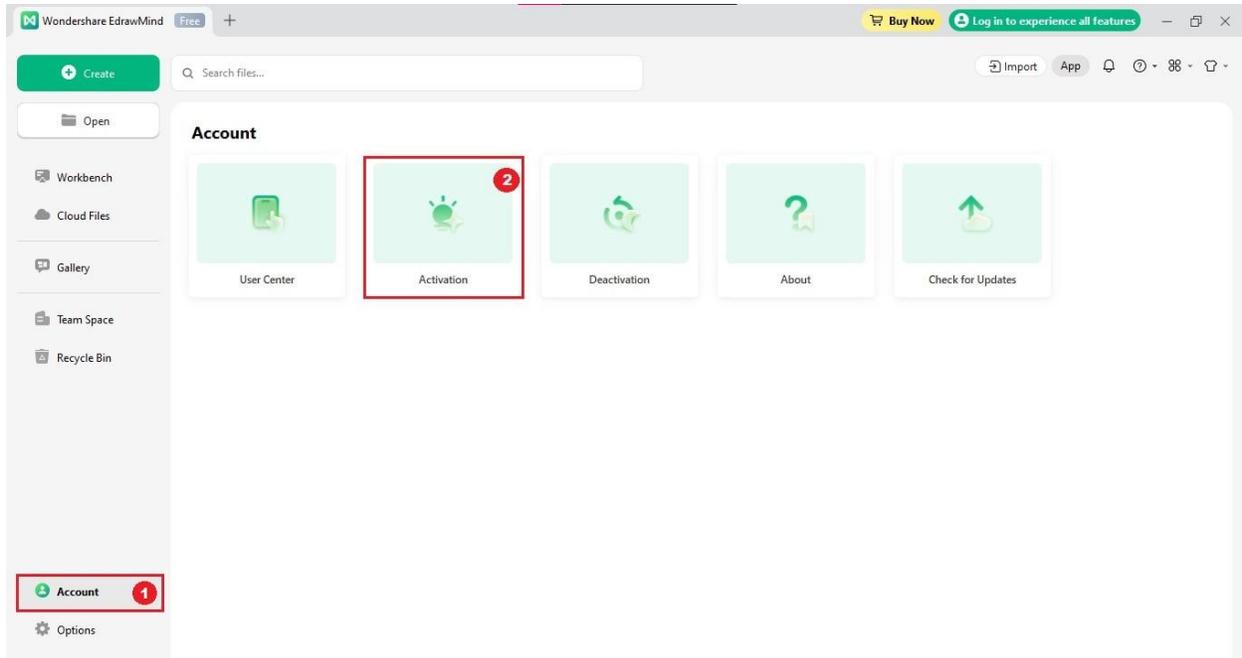

Unlock the full potential of EdrawMind's advanced features by activating your license or subscription plan. Here's a step-by-step guide to help you get started with your EdrawMind account activation.

Step 1: Launch the EdrawMind application on your desktop.

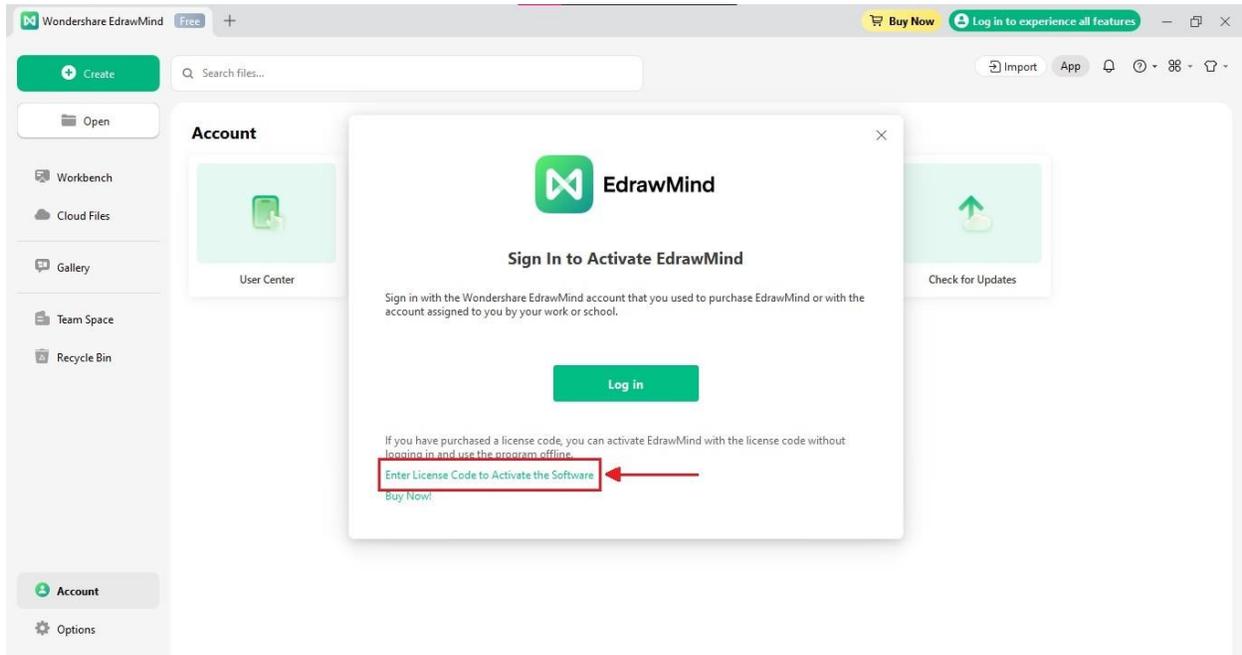

Step 2: Click Account on the lower left side navigation pane of the homepage.

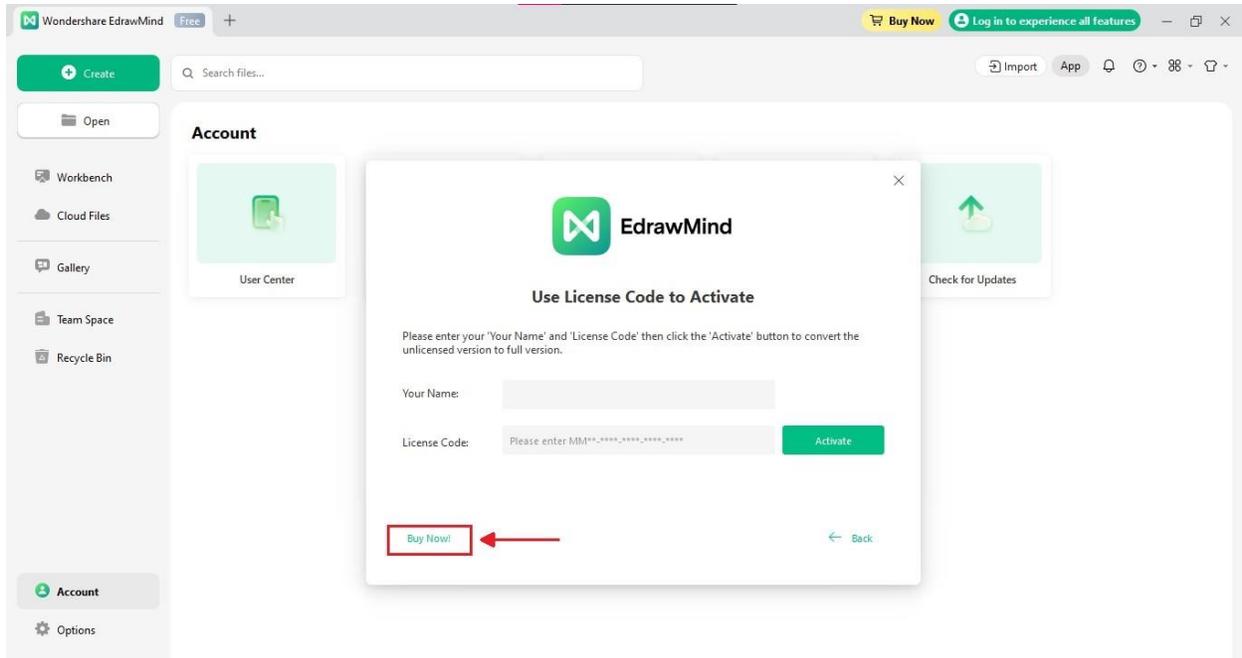

Step 3: Click Activation from the Account selection on the Account page.

Step 4: Click Enter License Code to Activate the Software on the lower left corner of the Sign In to Activate EdrawMind dialogue box.

Step 5: Enter the details in the Your Name and License Code field on the Use License Code to Activate dialogue box. Then, click Activate once you've filled in the required information.

- If you haven't obtained the product key, go to the pricing page of EdrawMind, and find the plan that best fits your business or school needs. Next, click Buy Now to purchase your selected pricing model.
- If you haven't purchased a license yet but are viewing the Use License Code to Activate dialogue box, click Buy Now! in the lower left corner.

02 How To Deactivate EdrawMind Account

Deactivating the Edraw MindMaster program on the current computer will convert it into an unlicensed version. So, if you plan to use the software on a different computer, ensure to deactivate it on the original one beforehand. Follow these deactivation steps to close your license or subscription plan account:

Step 1: Open EdrawMind on your computer device, then click Account on the lower left-side navigation pane.

Step 2: Click Deactivation from the Account selection on the Account page.

Quick Access Toolbar

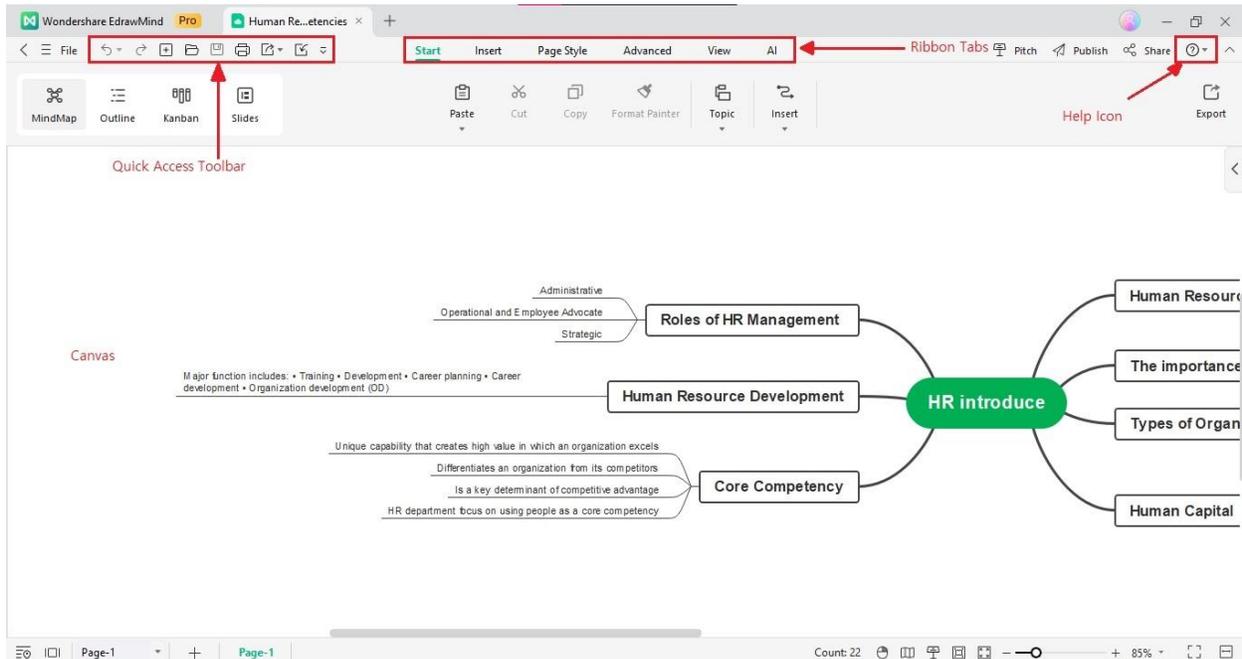

The Quick Access Toolbar offers quick access to frequently used tools. In the default EdrawMind quick access toolbar, you can use the features of Undo, Redo, Create New Mind Maps, and Open, Save, Print, Export, and Import files. Follow the steps below to customize the quick-access toolbar.

Step: In the quick access toolbar on the top of the interface, click the down arrow on the right to hide or add the features of quick tools.

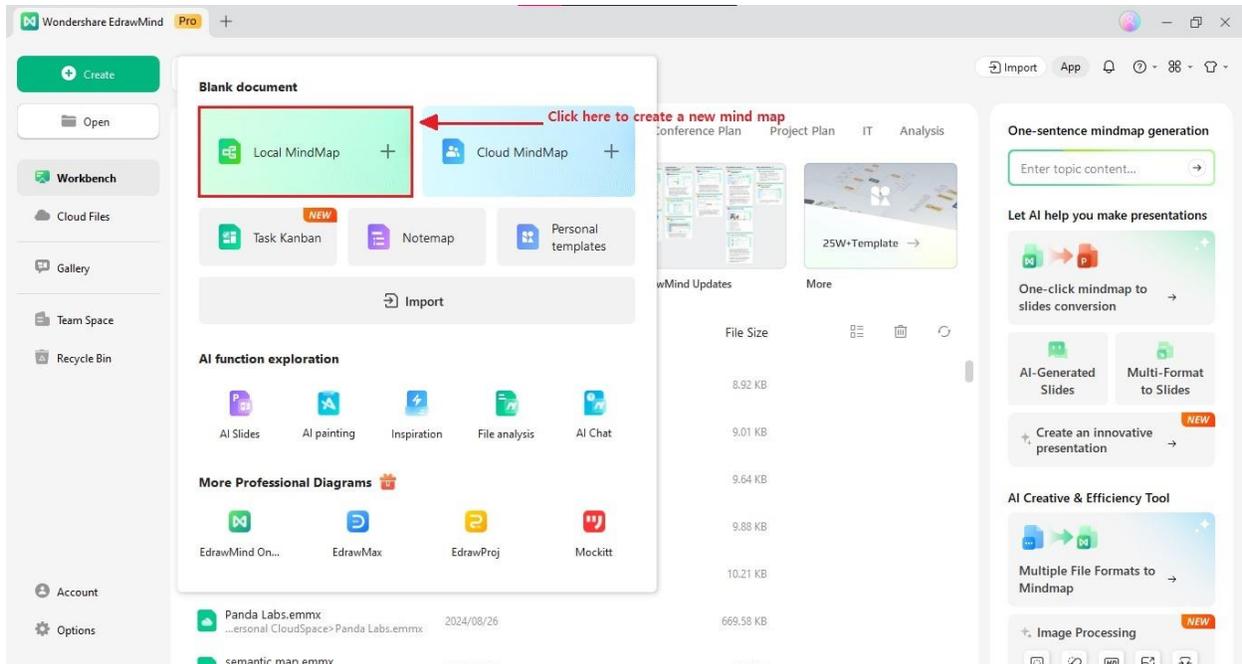

Ribbon Tabs in EdrawMind

This guide will walk you through everything about the ribbon tabs. By the end, you can navigate and utilize the program like a pro, streamlining your mind-mapping workflow and creating engaging and effective mind maps.

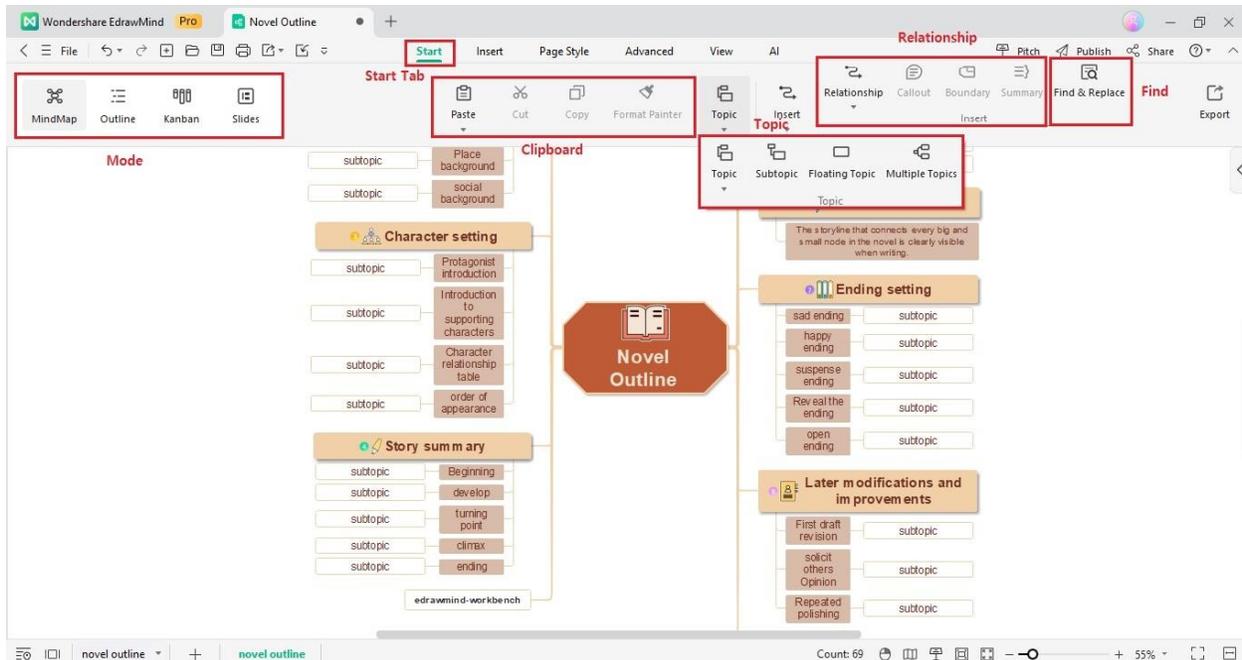

01 Workbench

The Workbench tab is your gateway to creating and managing your mind map projects. Clicking on this tab will take you to a page where you can choose from various templates or create new content, such as local mind maps or outline notes. You can also access your saved templates from this tab, making it easier to jumpstart your projects and get started right away.

02 Start

The Start tab in EdrawMind houses essential tools as the backbone of your mind map, chart, outline, or any other diagram. This tab is the perfect starting point for anyone who wants to design a structured and comprehensive visual representation of their ideas. With a user-friendly interface and powerful tools, you can easily organize and refine your content to achieve the desired result.

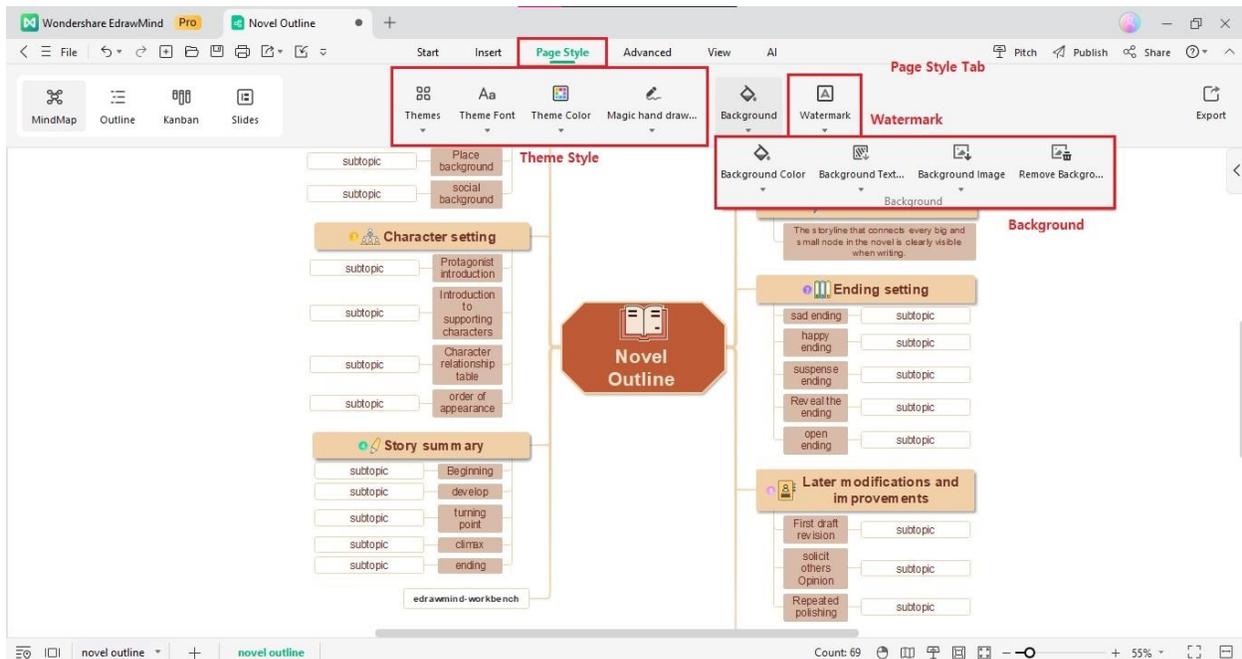

- **Mode:** The Mode group allows you to easily switch between multiple modes - from mind map, outline, kanban, and slides. It makes it easier to visualize your ideas and choose the most appropriate format for presenting them.
- **Clipboard:** Streamline your workflow and create and edit content more efficiently with its essential command buttons. Cut, Copy, Paste, and Format Painter basic tools make the process smoother and more efficient.
- **Topic:** It allows you to easily organize the sections of your ideas on each mind map. It contains features to let you build the main foundation of your project, such as adding sections and subsections. This group makes it easier to keep your thoughts organized and create a coherent structure for your project.
- **Relationship:** You'll see here the commands to add relationship arrows, callouts, boundaries, and summaries.
- **Find.** With the Find group, searching for specific information and replacing it becomes effortless, saving you precious time and effort. You won't have to go through the hassle of manually scanning through the project for the data you need, making it a more efficient way to work on your project.

03 Page Style

The Page Style tab is a treasure trove of groups that can enhance the overall look and feel of the file. These features are especially beneficial for making customized mind maps, charts, or timelines for their work, studies, or personal projects. With its wide

array of personalization options, you can edit contents that effectively convey your ideas while looking aesthetically pleasing.

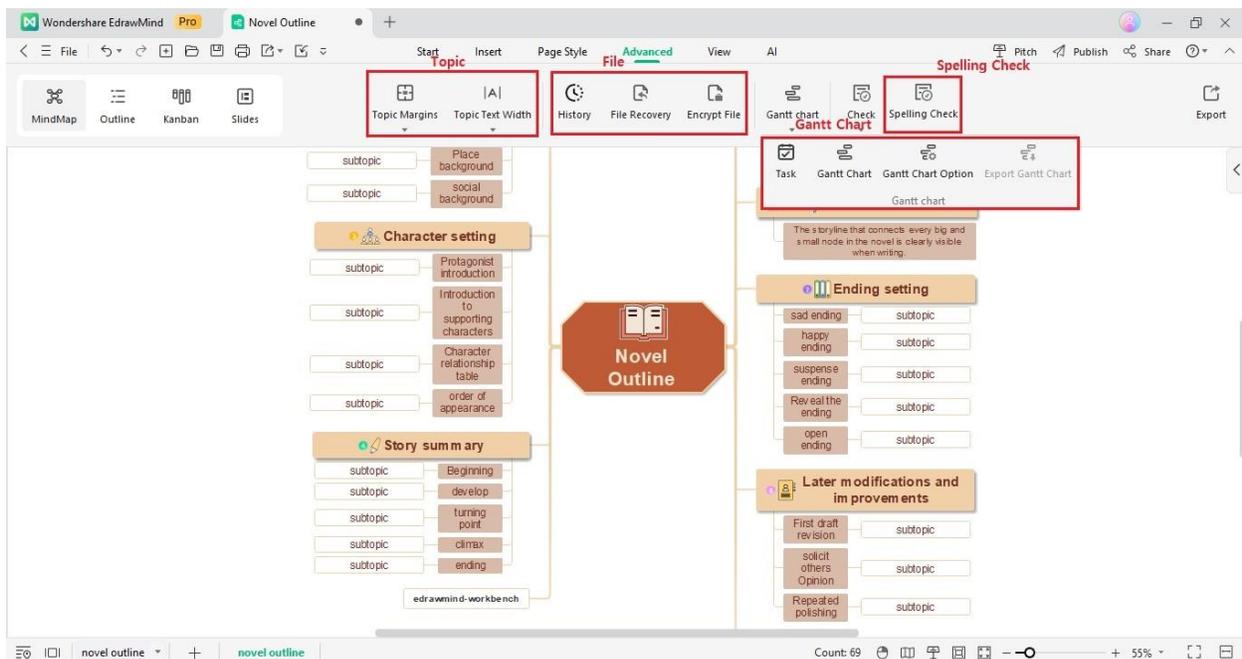

- **Theme Style:** With a range of themes, theme fonts, and theme colors, you can easily customize your mind map to match your style or brand. Additionally, you can opt for rainbow colors or even create a hand-drawn style for a more creative and playful touch.
- **Background:** This group houses the tools you'll need to customize the background style of your mind map. You can modify the canvas background by changing the background color, adding a background texture, or uploading a background image to make your subjects unique and eye-catching. The watermark feature is also available to add an extra layer of protection and ownership to your files.
- **Watermark:** Add a built-in watermark or one you customize to the background of the mind map to show propriety.

04 Advanced

The Advanced tab is the go-to ribbon tab to take your mind map formatting to the next level. This feature-packed tab offers a range of commands, including modifying topic margins, encrypting the file, creating a Gantt chart, and checking your spelling. With

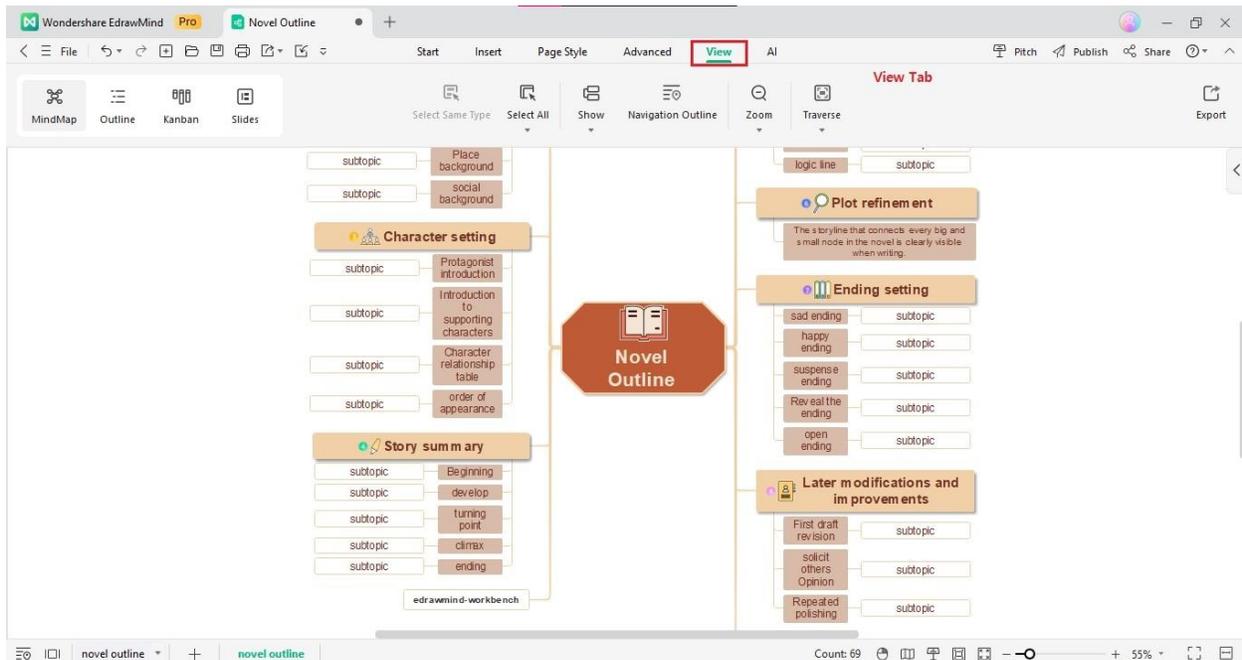

its range of groups and command buttons, you can rest assured that your mind map will be visually appealing and highly functional.

- **Topic:** It allows you to fine-tune the formatting of your mind map. You can adjust the topic margins and text width with the Topic group. It ensures that your mind map looks neat and organized.
- **File:** It helps you keep your mind maps safe and secure. With file recovery, you can retrieve auto-saved documents. Also, the Encrypt File tool provides an extra layer of protection by allowing you to password-protect your mind maps.
- **Gantt Chart:** The Gantt Chart tools can be used to create detailed project timelines and track progress. You can easily visualize your milestones and dependencies with the feature to create Gantt charts from your mind maps. The task command button lets you edit the details of each task in your Gantt chart, while the Gantt chart option tool allows you to adjust the time frames to fit your needs.
- **Spelling Check.** The spelling check feature permits you quickly identify and correct spelling errors. The OCR tool lets you extract text from external sources and insert it directly into your mind map.

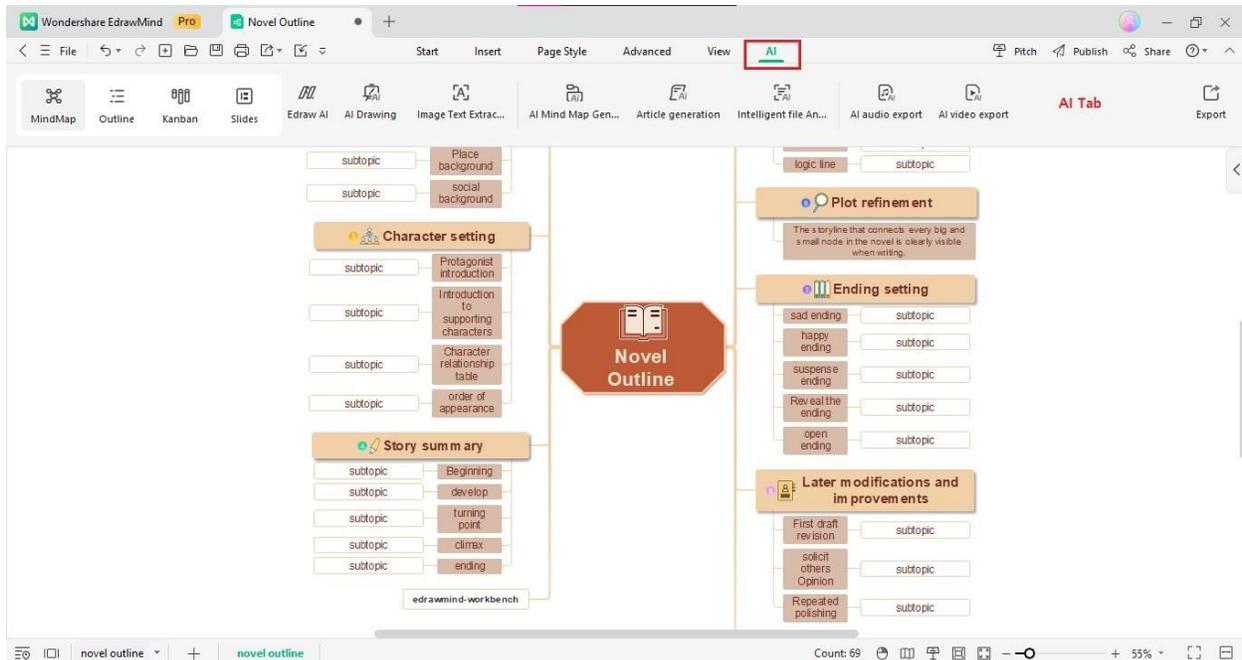

05 View

The View tab is the central hub for all the necessary tools to navigate and explore your mind map on the canvas. This tab provides multiple options to focus on specific parts of your map or view it in full screen. Its groups enable you to analyze your mind map comprehensively, ensuring you don't overlook any essential information and understand your work.

- **Select:** With the **Select Same Type** and **Select All** tools, you can quickly and easily select topics based on their level in your mind map. The feature is time-saving when making changes to multiple topics or subtopics simultaneously.
- **Show:** You can choose the full-screen mode, which removes distractions and maximizes your canvas space. Alternatively, the map overview tool provides a macro view of your diagram in one glance. The **Display Branch** tool allows you to view specific topics of your diagram and expand or fold them as needed. The **Display Level** tool lets you visualize your map at different hierarchical levels. Also, you can see the whole mind map in a thumbnail through the **Map View**.
- **Zoom:** It allows you to zoom in and out of your mind map, making it easy to work on finer details or get a bigger picture of the entire project. You can choose to match the size or the width of the whole mind map to the windows of the computer system.
- **Travel:** You can enter the **Brainstorming Mode**, or traverse topics or branches through this menu.

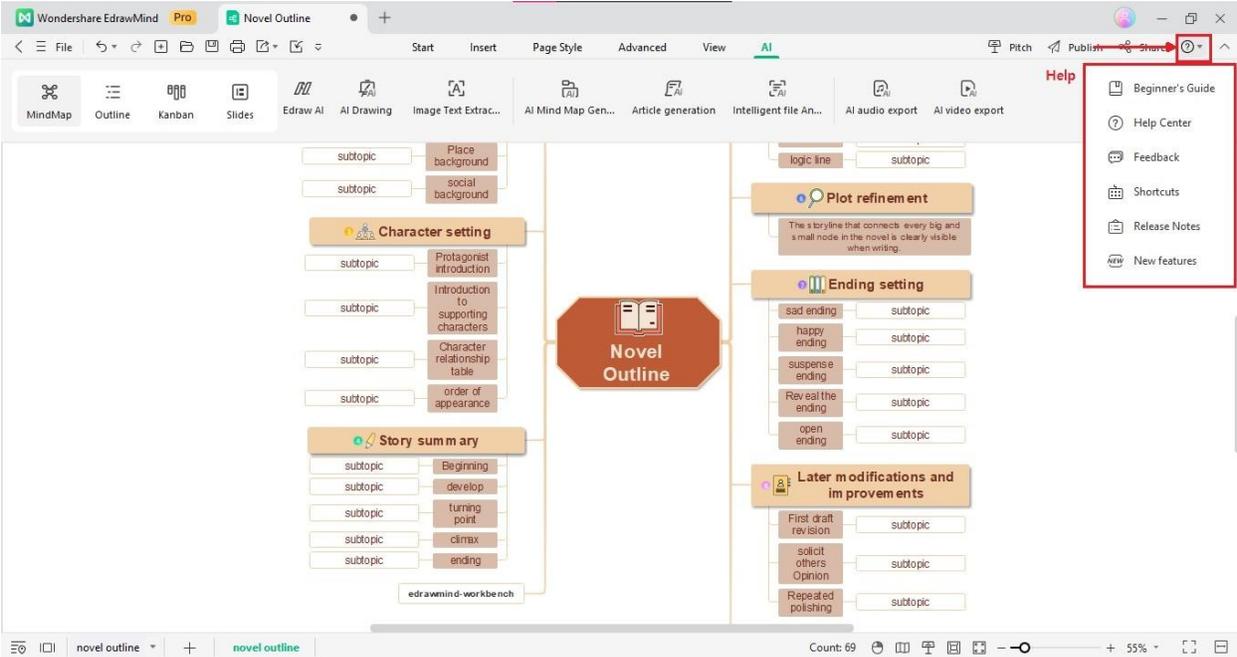

The AI tab in EdrawMind includes helpful tools and features related to AI technology.

- **Edraw AI:** This is where you can interact with the AI assistant and access pre-scene features for different scenarios.
- **Image Text Extraction:** This feature allows you to extract text from images using OCR technology.
- **AI Mind Map Generation:** With just one command, you can create a mind map automatically.
- **Article Generation:** The Article generation feature that helps you generate articles.
- **AI Drawing:** AI Drawing feature enhances diagram creation with intelligent suggestions, streamlining the process for efficient and visually appealing mind maps.
- **Intelligent File Analysis:** The Intelligent File Analysis efficiently organizes and interprets complex data. Moreover, it organizes information for seamless visualization and enhanced productivity.
- **AI Audio Export:** Convert text of your mind map into audio.
- **AI Video Export:** Present your mind map in a video for a stronger visual impact.

07 Help

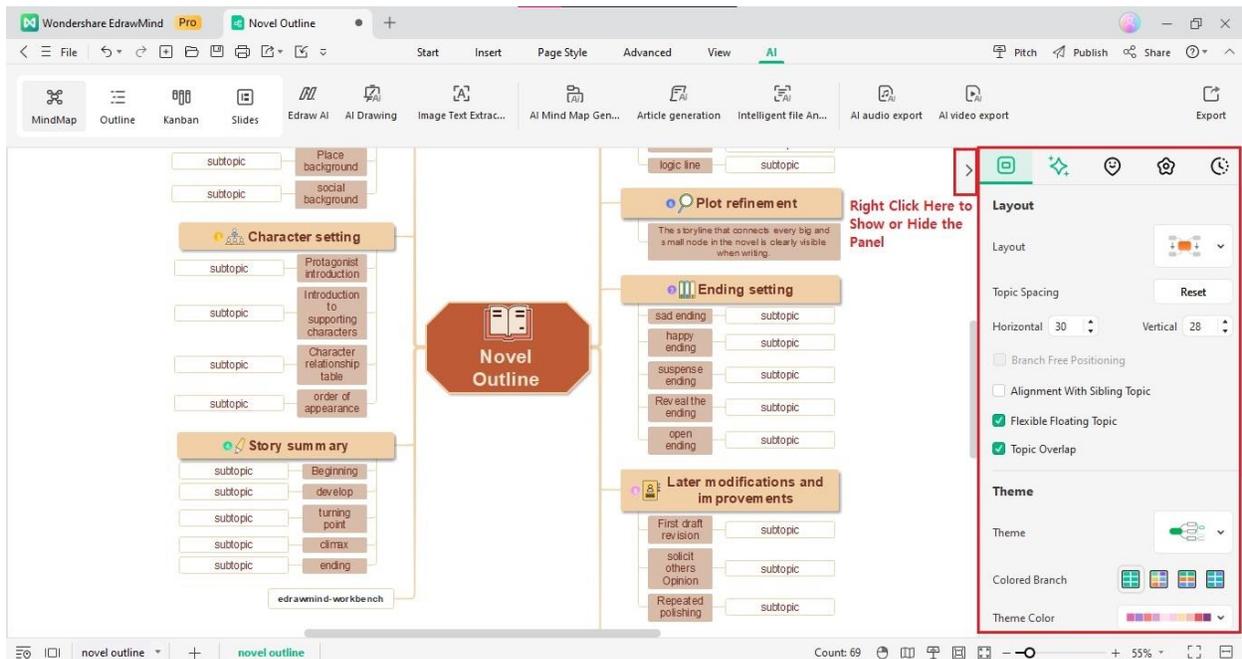

If you need additional assistance, click the Help dropdown button in the upper right-hand corner. This comprehensive resource contains the Beginner's Guide, Help Center, Feedback, Video Tutorials, Shortcuts, Release Notes, and New Features, which can help you navigate the platform more efficiently. With these resources at your disposal, you can learn how to use its features, troubleshoot issues, and get answers to any questions you may have.

Navigating the Right Side Panel in EdrawMind

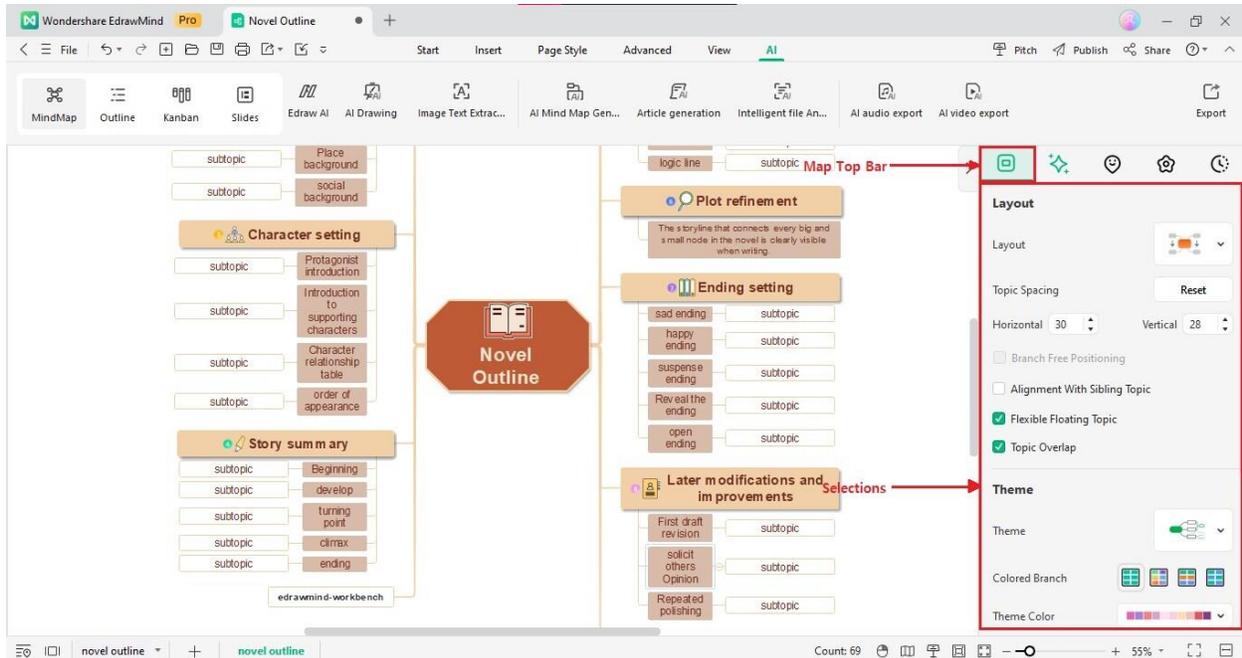

In the right side panel, you'll find four tab bars with a range of commands for enhancing your visual presentations. Whether you're looking to adjust the layout, add icons and clipart, or make changes to fonts or shapes, there's a tab bar available.

This guide will take you through each in detail, showing you how to leverage their features to create more engaging and professional-looking mind maps that impress your audience.

01 Map

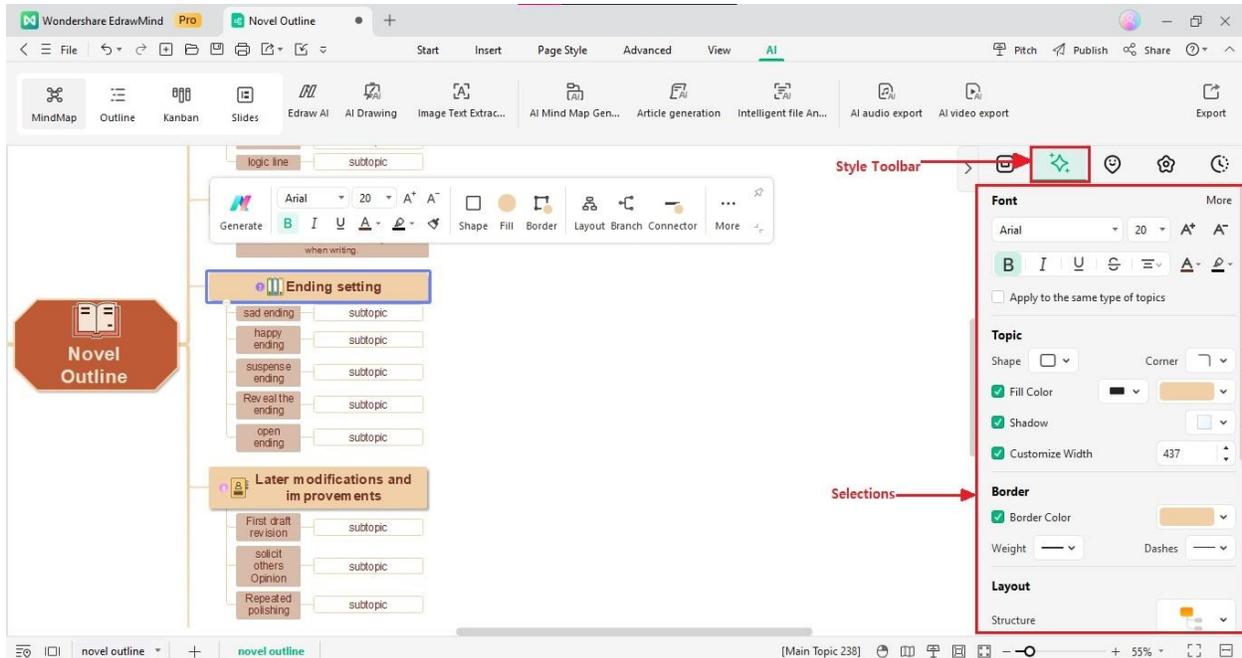

One of the most significant components of the right panel is the Map tab bar. It offers an array of commands that can elevate the overall look of your project. By utilizing the Map tab bar, you can enhance the aesthetic appeal of your mind map and make it stand out in any setting.

- **Layout:** With these intuitive commands, you can instantly switch between different Layout styles, such as Right Map, Classic, or Horizontal Timeline. You can also adjust Topic Spacing, select Alignment With Sibling Topic, or Topic Overlap to create a customized layout for a polished finish.
- **Theme:** Choose between a light or dark Theme. You can also select a Colored Branch or a different palette of the Theme Color of your mind map to match your style. Additionally, you can choose a Theme Font that complements your brand or select a Hand-Drawn Style for a unique touch.
- **Background:** The Background selection provides tools to customize the canvas background, from changing the Color to adding a Texture or using an available Image. You can also upload your image and select Insert Watermark for extra protection and ownership of your files.

02 Style

The Style tab bar provides a range of commands for customizing the appearance of your mind map. With Font, Topic, Border, and Branch selections, you can tailor the visual style to your liking, ensuring your mind map is professional and eye-catching. With just a few clicks, you can enhance the readability and create a more cohesive look, making it an effective communication tool for your ideas and concepts.

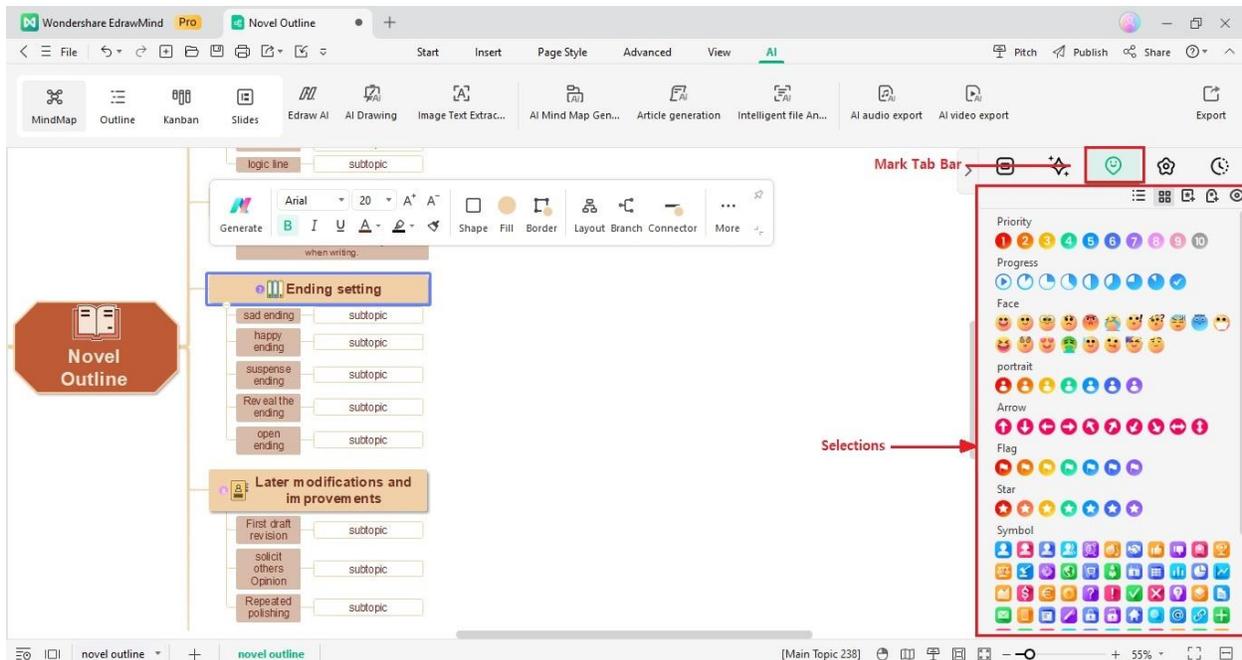

- **Font:** Enhance the readability of your text by adjusting its typeface, size, and style. You can choose from commands such as Bold, Italic, Underline, and Strikethrough to add emphasis.
- **Topic:** Choose the perfect design elements from Fill Color, Shadow, Customize Width, and Corner style to match your desired style.
- **Border:** Add visual appeal by selecting a color from the Border Color dropdown list. Next, adjust its thickness or line type from the Weight and Dashes dropdown lists.
- **Branch:** The Branch selection enables you to customize the connectors. Choose a Connector Style, Line color, Tapered style, line Weight, and more to create a cohesive and visually striking mind map.

03 Mark

The Mark tab bar offers a range of visual markers to help represent various concepts and ideas in your mind map. With selections such as Priority, Progress, Face, Arrow, Flag, Star, and Symbol, you can easily mark your topics and give them more context.

These icons serve as visual cues that enhance the readability of your mind map, making it easier to understand and remember complex ideas. Select the item in the canvas, then the icon you want to add.

- **Theme Style:** Add icons that signify importance or urgency.
- **Background:** Use icons that represent the stages of a process or project.
- **Face:** Choose emoticon-style icons to convey emotions or moods.
- **Arrow:** This selection provides directional icons that you can use to indicate movement or direction.
- **Flag:** Add flag-style icons to represent different types of information or categories.
- **Star:** Insert emphasis or mark something as exceptional.
- **Symbol:** Use it to represent more concepts or ideas.

04 Clipart

In the Clipart tab bar, you'll find a vast collection of high-quality clip art to help you visually communicate your ideas. With its user-friendly search function, you can quickly find the clipart you need by entering relevant keywords or browsing through popular categories like Education, Office, Animal, and Technology.

The available clipart can help make your mind map more engaging and memorable for your audience. So go ahead and take advantage of this feature to enhance the impact of your mind map.

Multiple Pages

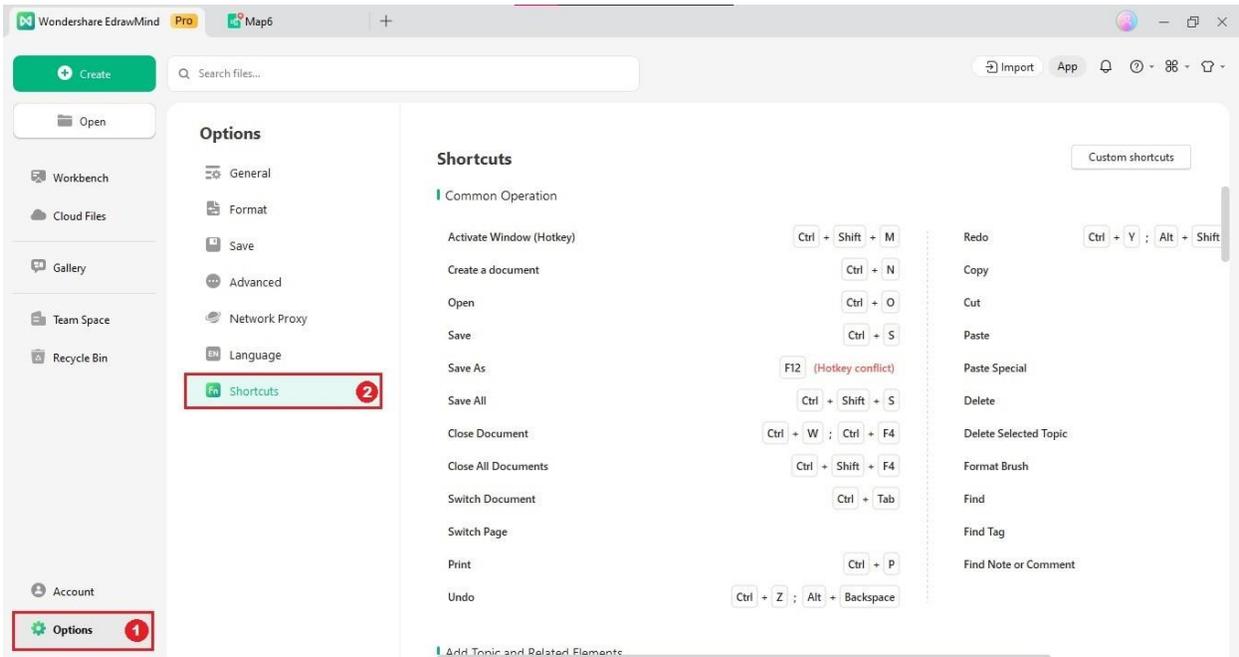

You can build multiple pages in a mind map file. The feature makes the content of the file richer and more systematic. Follow the step below to launch the feature.

Click + at the bottom of the interface to get more pages. Then you'll see the new page appear on the right side.

Shortcuts

EdrawMind offers a range of default shortcut keys for quick actions, and most of these shortcuts can be customized. You can find the complete list of shortcut keys in the Options menu under Shortcuts in the software. To personalize the shortcut keys, simply go to Options > Shortcuts and click on Custom Shortcuts. From there, you can modify the shortcut keys to suit your preferences and make your workflow even more efficient.

Common Operation

Function	Shortcuts
Activate Window (Hotkey)	Ctrl + Shift + M

Topics

Add Topics

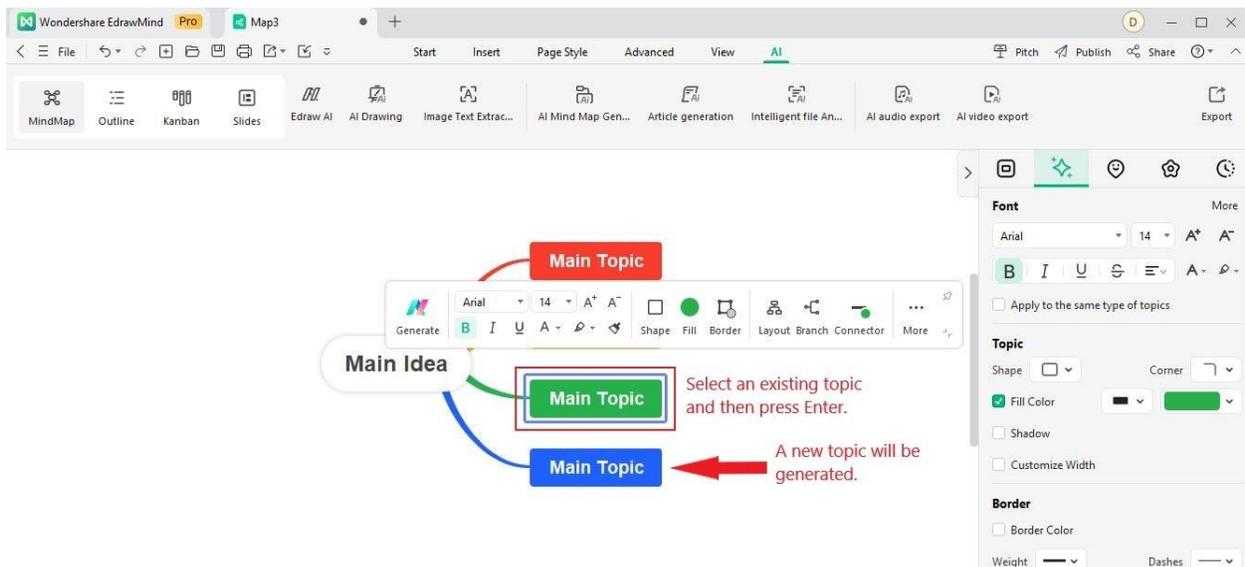

You can add main topics, subtopics, floating topics, and multiple topics. Additionally, you have the option to use shortcut keys to insert topics quickly.

01 Add Main Topic

When creating a mind map, you may need to add some topics. Generally, there are three methods to add a topic. Follow the steps below to insert ones.

Method 1: Use Enter Key

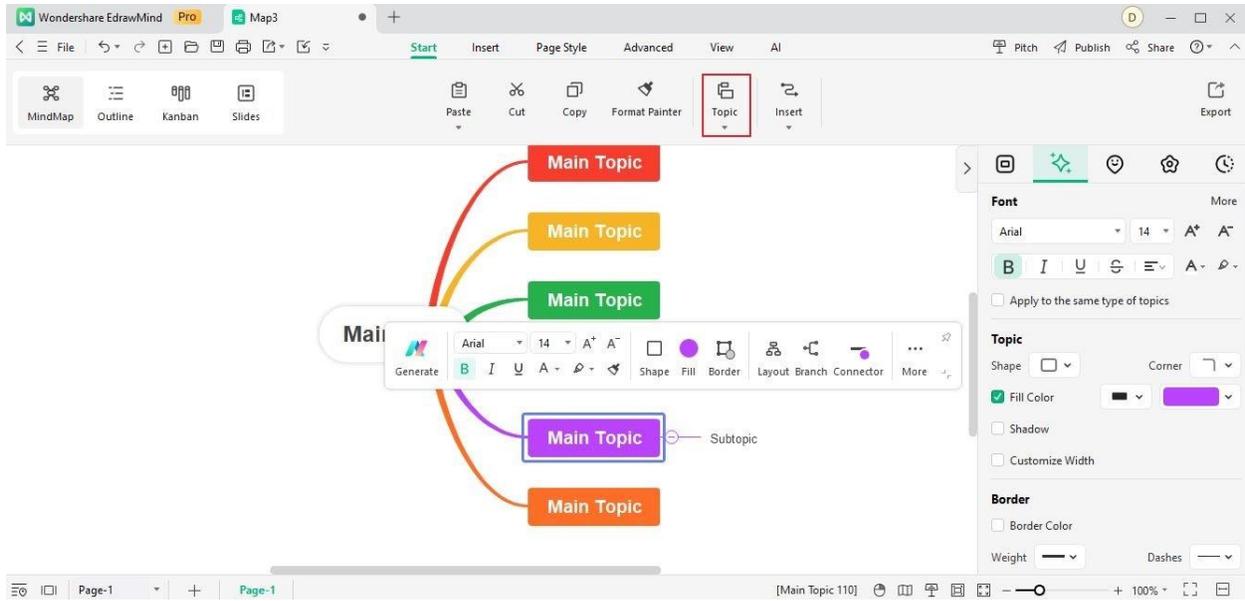

After selecting a topic, press the Enter key on your keyboard, and a new topic will be generated below the selected one.

Method 2: Use Topic Button

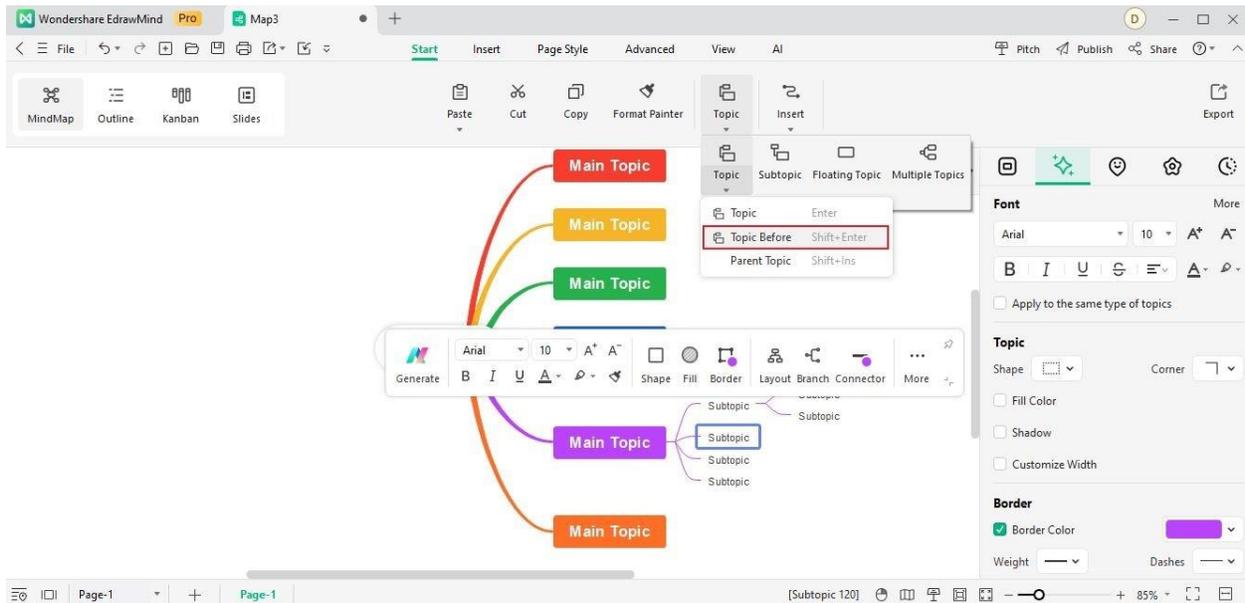

On the Home page, click the Topic button in the ribbon to add a topic. To select the exact type of the topic you want to add, click the down arrow below.

Note: You can add a topic of the same level below the selected topic by clicking the Topic button.

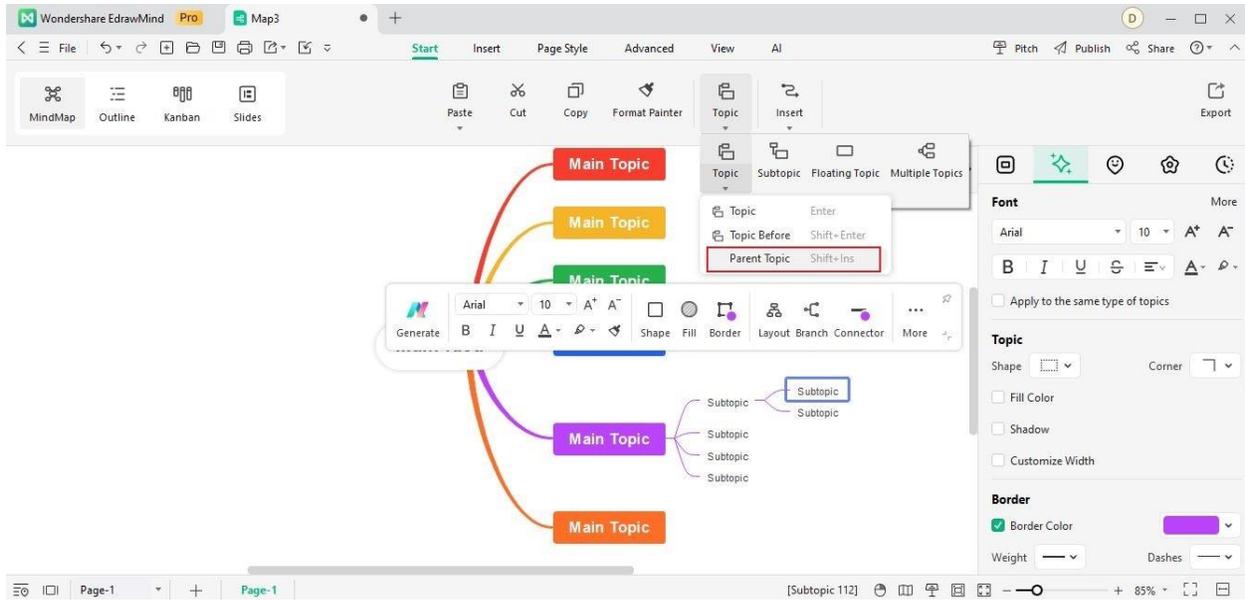

Then, a new topic will be generated below the original selected topic.

You can add a topic above the selected topic at the same level by clicking **Topic Before**.

You can add a parent topic for the selected topic by clicking **Parent Topic**.

02 Add Subtopics

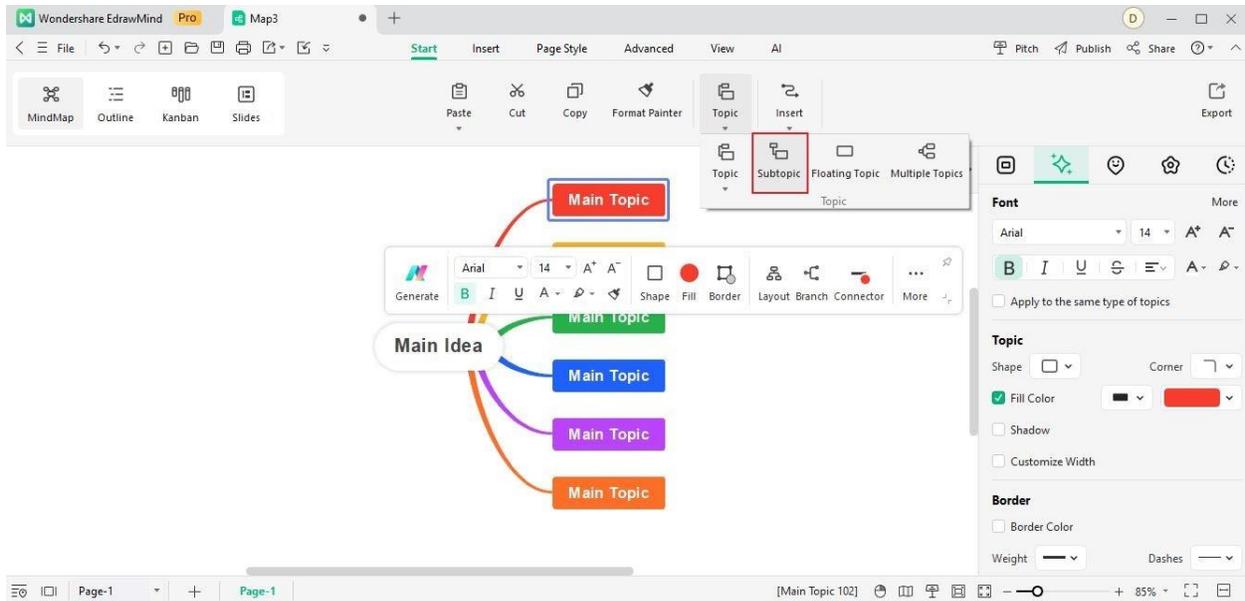

It's common to add subtopics to a mind map. Here are three methods to add a subtopic in EdrawMind.

Method 1: Use Shortcuts

Select a topic to which you want to add a subtopic, then press the Tab key, Insert key, or Ctrl+Enter key on the keyboard.

Method 2: Use the Subtopic Button

Click the topic for which you need to add a subtopic first, then click the Subtopic button in the ribbon of the Home page.

03 Add Floating Topics

Floating topics are separate topics that are not related to the structure of the mind map. Here are three methods to add a floating topic.

Method 1: Use the Alt + F Buttons

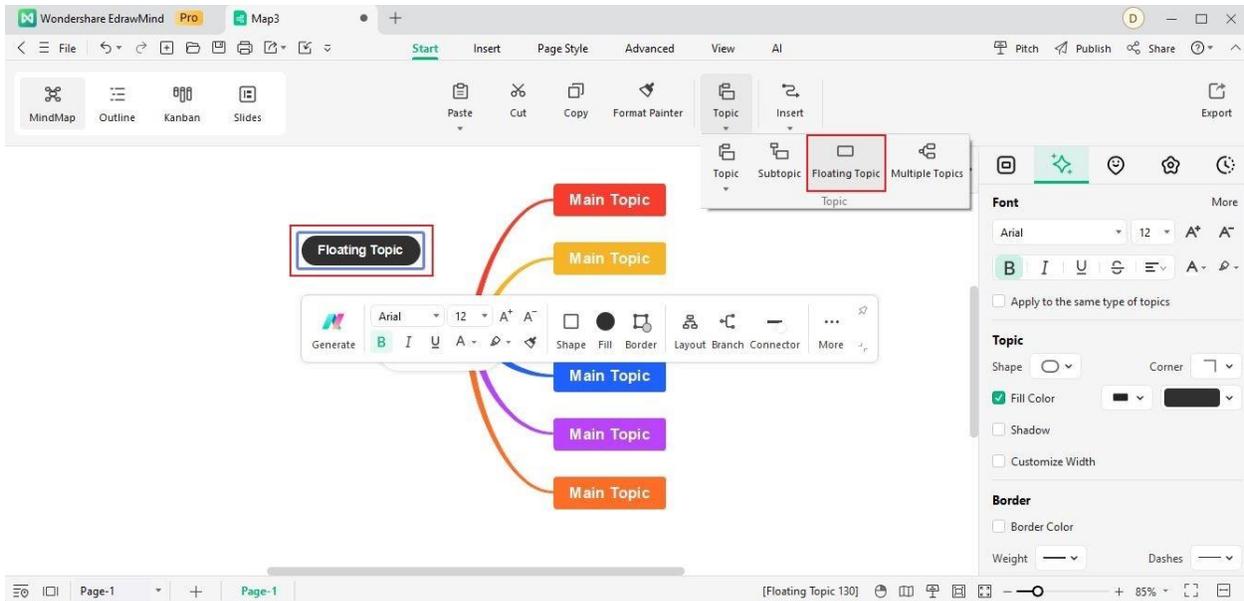

Press the Alt + F buttons on the keyboard, then place the cursor where you want to add a floating topic in the drawing window. Finally, left-click your mouse to insert a floating topic.

Method 2: Use the Floating Topic Button

You can also apply the Floating Topic feature in the ribbon. Here are the detailed steps.

Step 1: Click the Floating Topic button in the ribbon of the Home page.

Step 2: Click anywhere you need within the drawing window to add a floating topic.

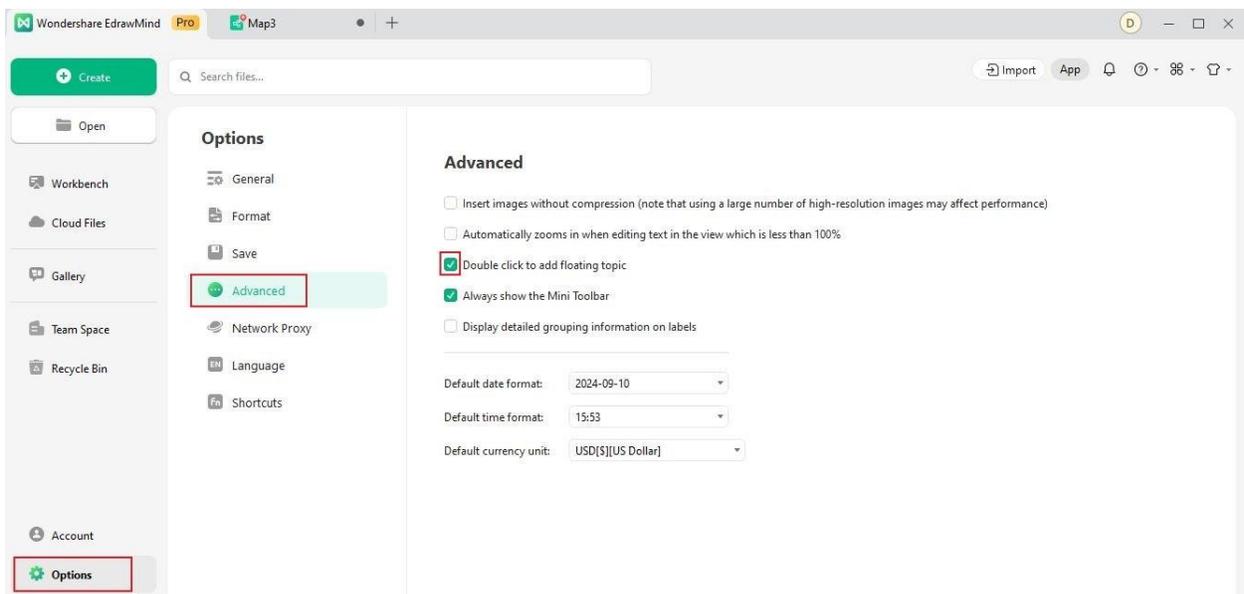

Method 3: Double Click

Directly double-click your mouse on the place where you want to add a floating topic in the drawing window.

Tip: If you don't need such an effect, follow the steps below to turn it off.

Step 1: Click and enter the File page.

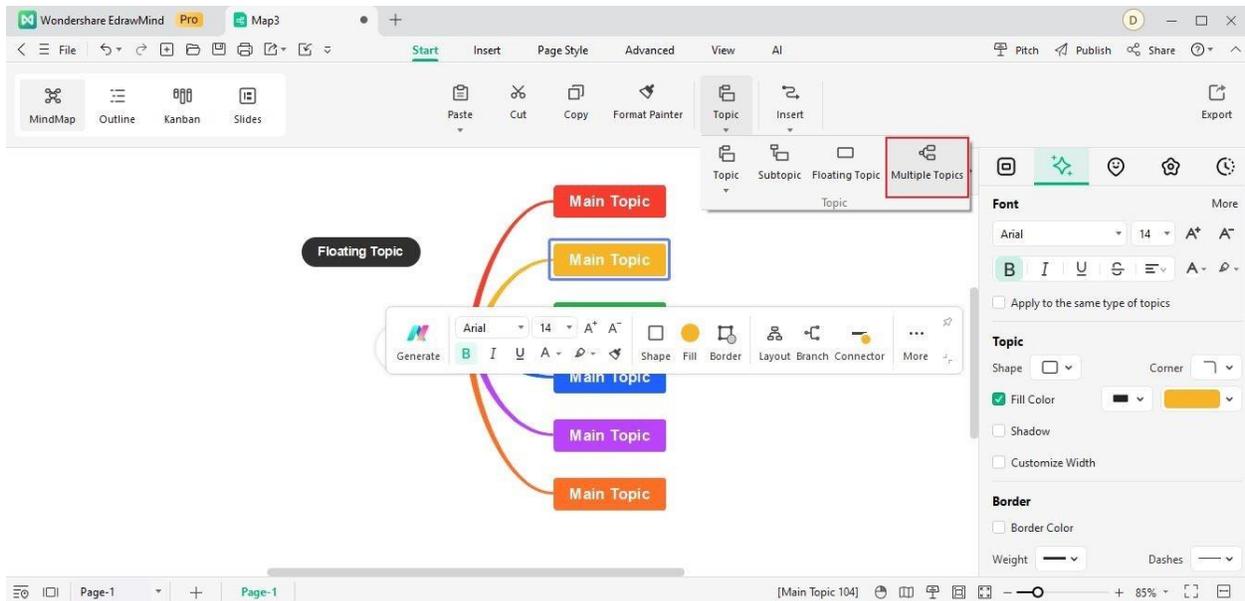

Step 2: Click the Options button in the lower-left corner of the interface. Then go to >>Options Advanced, and click the tick button of Double click to add a floating topic to remove the feature.

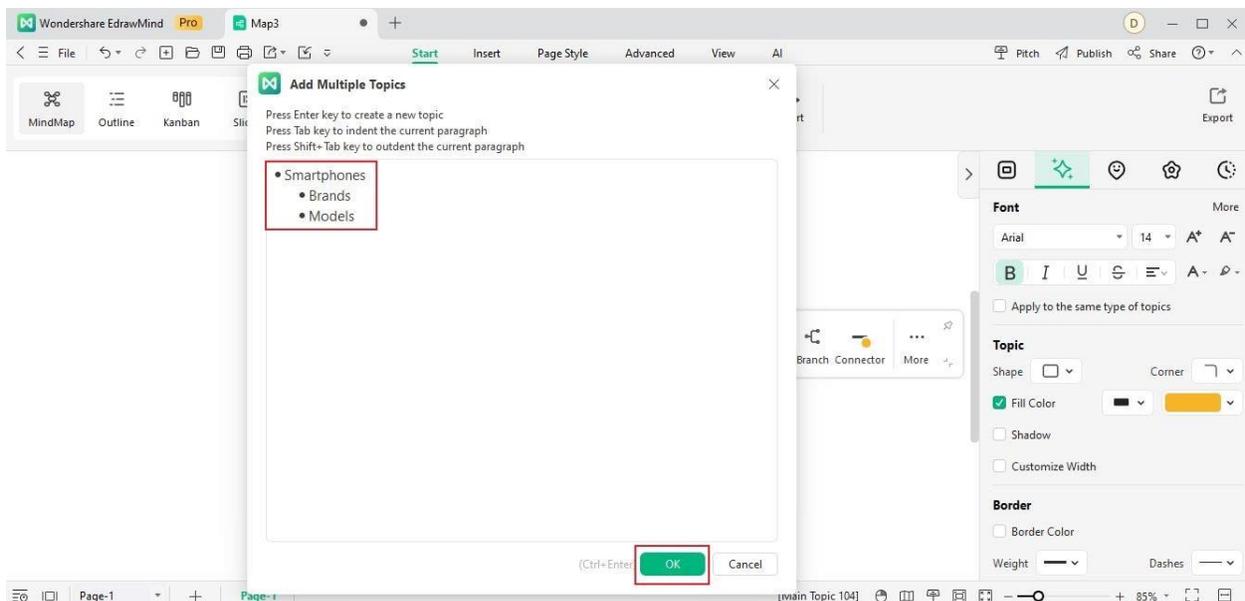

04 Add Multiple Topics

If you want to add more than one topic at a time, apply the feature of Multiple Topics. Follow the steps below to add them.

Step 1: Select the topic for which you intend to add other topics. Then click the Multiple Topics button in the ribbon on the Home page. Alternatively, you can press **Ctrl + M** on the keyboard to launch the feature.

Step 2: In the window of Add Multiple Topics, enter the text of one topic in each line.

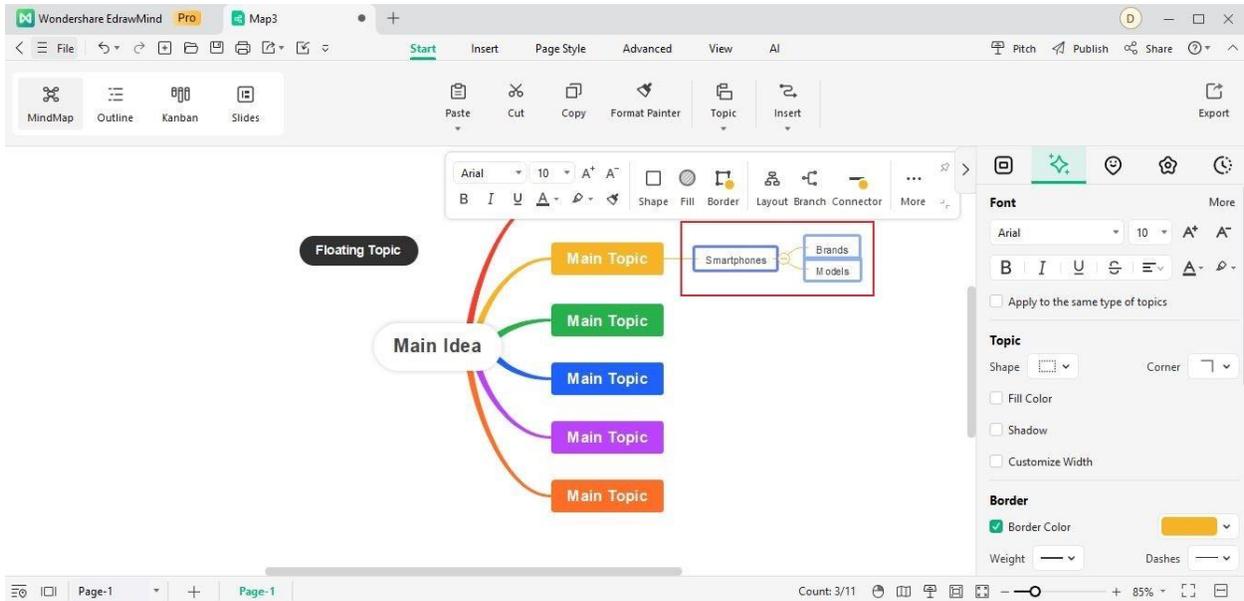

Tip 1: After entering the text of a new topic, press Enter key.

Tip 2: To add a subtopic to one topic, press the Tab key on the keyboard to indent the text.

Tip 3: If you need to cancel the subtopic feature, press Shift+Tab to outdent the text.

Step 3: After you have finished all the topics you want to add, click OK to apply to add multiple topics. Then, you can see EdrawMind automatically generates the topics.

Shortcut Keys for Inserting Topics

Here are common shortcut keys to help you insert topics quickly.

Main Idea	Automatically created
Subtopic (created from Main Idea)	Enter
Sibling Topic	Enter
Subtopic	Tab / Insert / Ctrl + Enter

Parent Topic	Shift + Insert
Floating Topic	Alt + F + mouse click
Multiple Topics	Ctrl + M
Topic Before	Shift + Enter

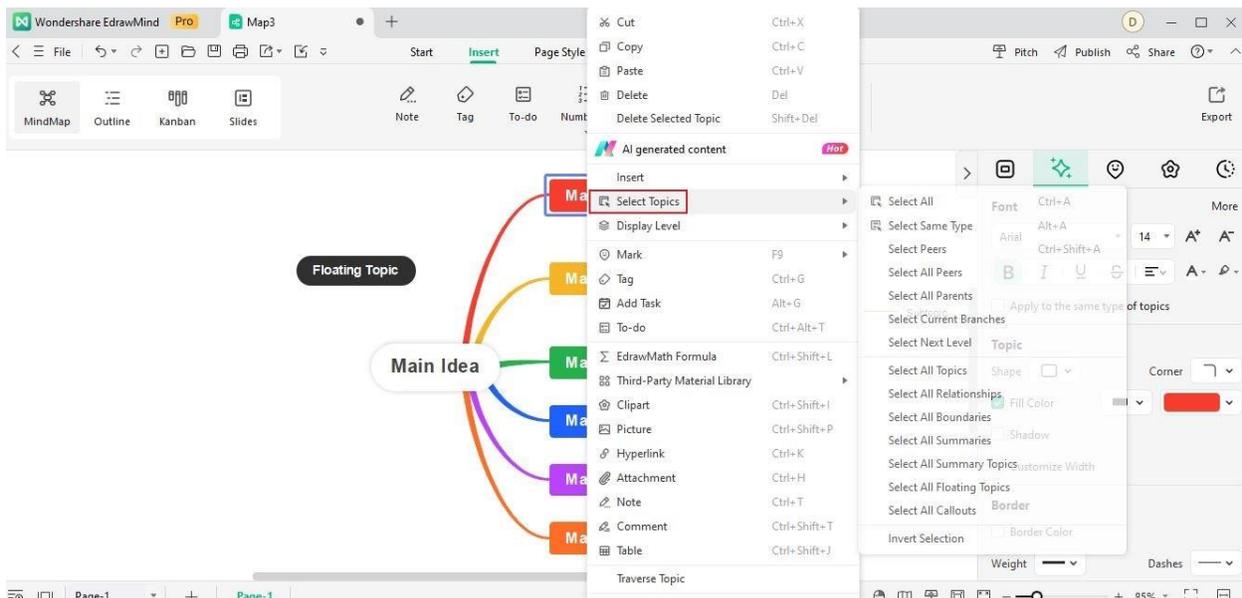

Select and Edit Topic

Below are the steps for selecting and editing content on specific topics:

01 Select Topic

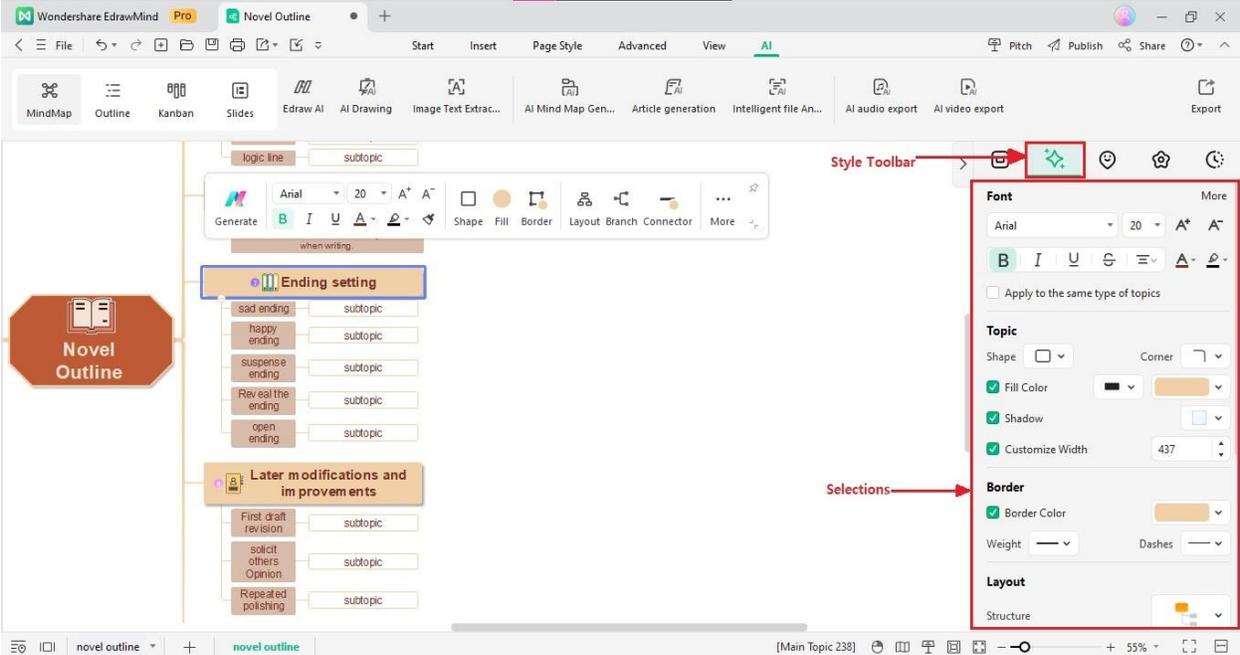

Topics can be selected by their types or level. Right-click your mouse on Select Topics in the menu, and you can choose your needed topic from:

- All
- Same Type
- Peers
- All Peers
- All Parents
- Current Branches
- Next Level
- All Topics
- All Relationships
- All Boundaries
- All Summaries
- All Summary Topics
- All Floating Topics
- All Callouts
- Invert Selection

02 Edit Contents of Topic

You can edit the content of a topic by double-clicking your mouse on it. Here are shortcuts to help you edit topic content quickly.

Processing	Shortcut
Edit Topic Text	F2
Move Cursor to Beginning of Topic Text and Edit	Shift + Space
Move Cursor to End of Topic Text and Edit	Space
End Editing	Enter / Esc

Wrap Text	Ctrl + Enter; Shift + Enter; Alt + Enter
Move to Beginning of Current Line	Home
Move Cursor to Beginning of Topic Text	Ctrl + Left
Move Cursor to End of Topic Text	Ctrl + Right
Cancel Editing	Esc
Find & Replace	Ctrl + F
Find Next	Enter
Spelling Check	F7

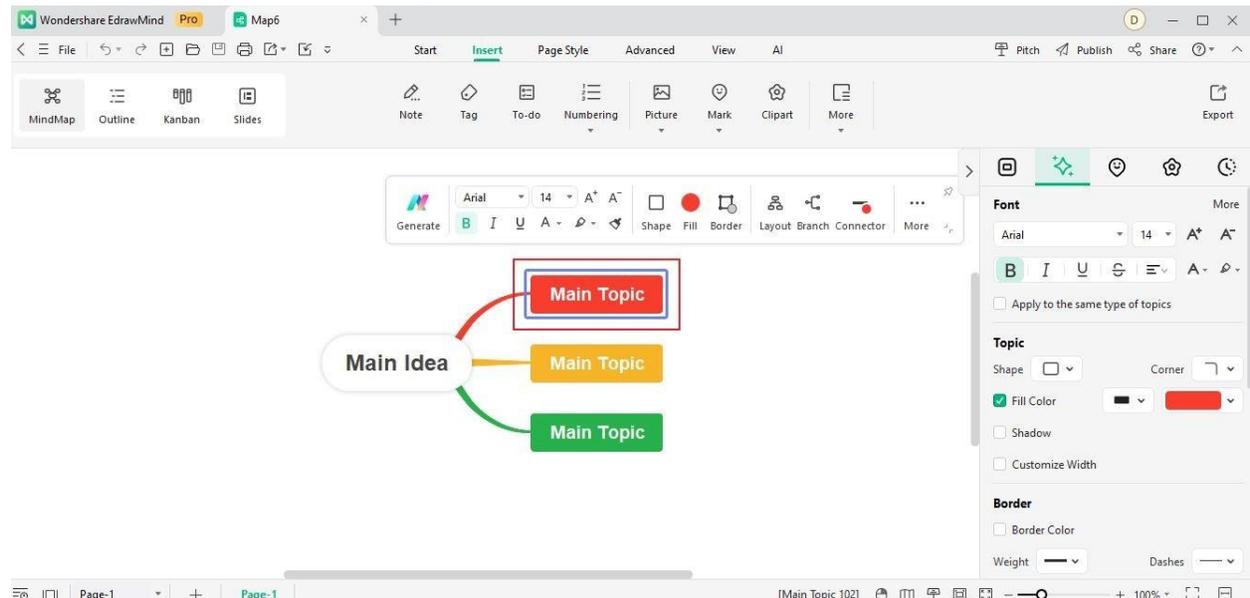

Move Topics

EdrawMind allows you to move a topic in two ways.

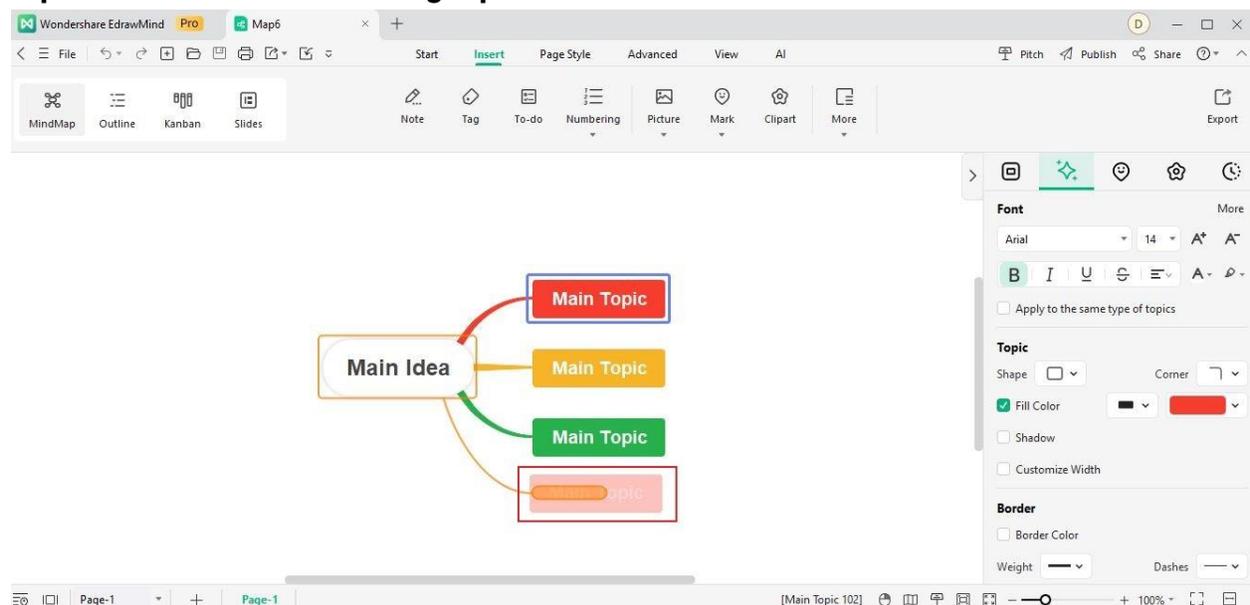

Method 1 Drag the Topic With the Mouse

Follow the steps below to move the topic with your mouse.

Step 1 First, select the topic you want to move.

Step 2 Drag the topic to the target position with your mouse. Then, as previewed, the topic will be moved to the target position.

Note:

Except for the Main Idea, you can move any topic or branch to and under any parent topic or subtopic.

Method 2 Use Shortcut Keys

You can also rearrange the topic with shortcut keys. Follow the procedure below to help you move topics quickly.

Step 1 Select a topic that you want to move.

Step 2 Press the shortcut keys to move the topic.

Note:

Here are some common shortcut keys to move topics.

Move up Topic	Ctrl + Shift + Up
Move down Topic	Ctrl + Shift + Down
Move Topic to Top	Ctrl + Shift + Home
Move Topic to Bottom	Ctrl + Shift + End

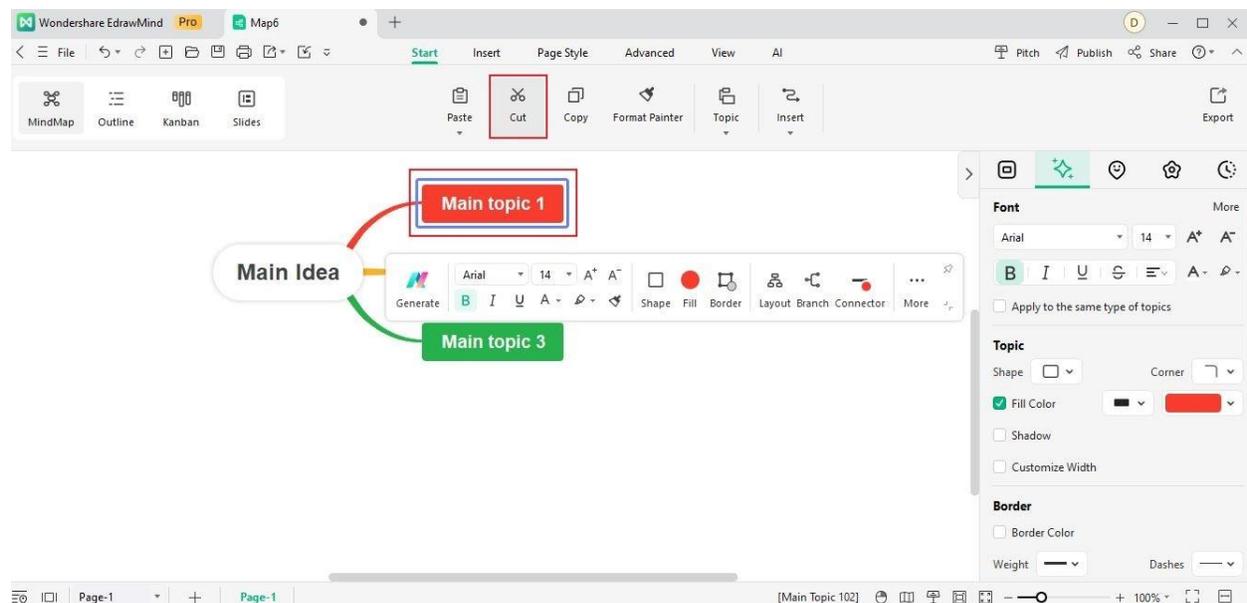

Cut, Copy, and Paste Topics

In EdrawMind, you can cut and copy a topic or a branch, then quickly paste it as a floating topic or a subject of a selected topic.

01 Cut Topic

Follow the procedure below to cut topics.

Step1: Select a topic or a branch to cut first.

Step2a: Click Copy in the ribbon from the Start tab.

Step2b: Right-click the topic or the branch you want to cut, then click Cut in the pop-up window.

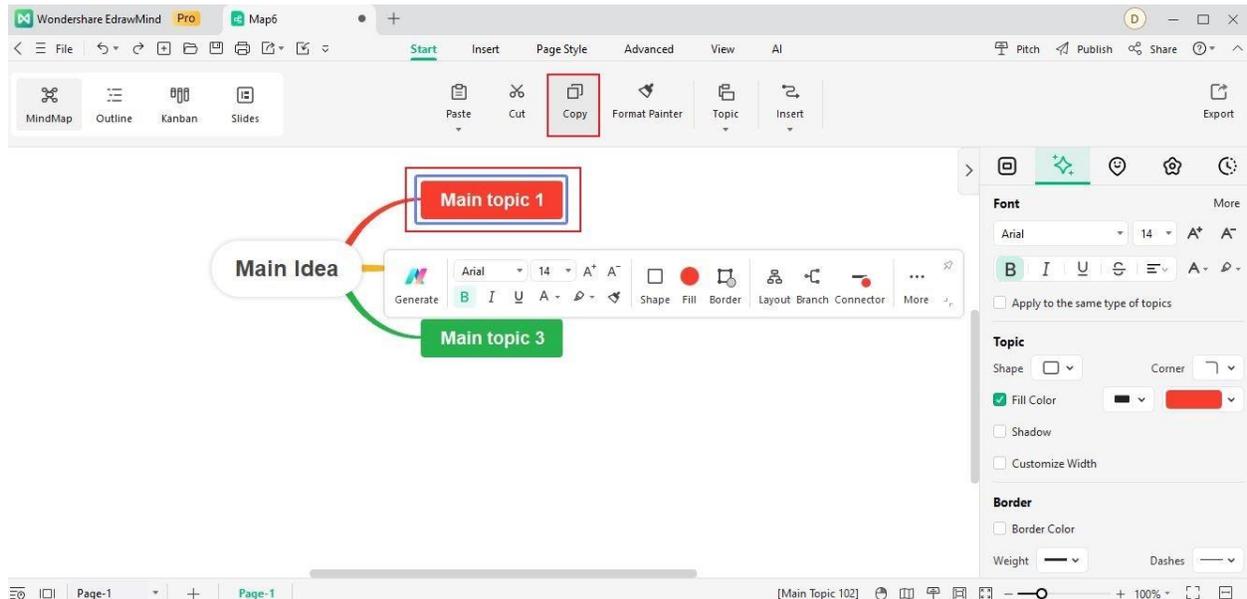

Step2c: Press Ctrl + X on the keyboard.

02 Copy Topic

You can also follow the steps below to copy a topic or a branch.

Step 1: Select the topic you want to copy first.

Step 2a: Click Copy in the ribbon on the Home page.

Step 2b: Right click the topic you want to copy, then click Copy in the pop-up menu.

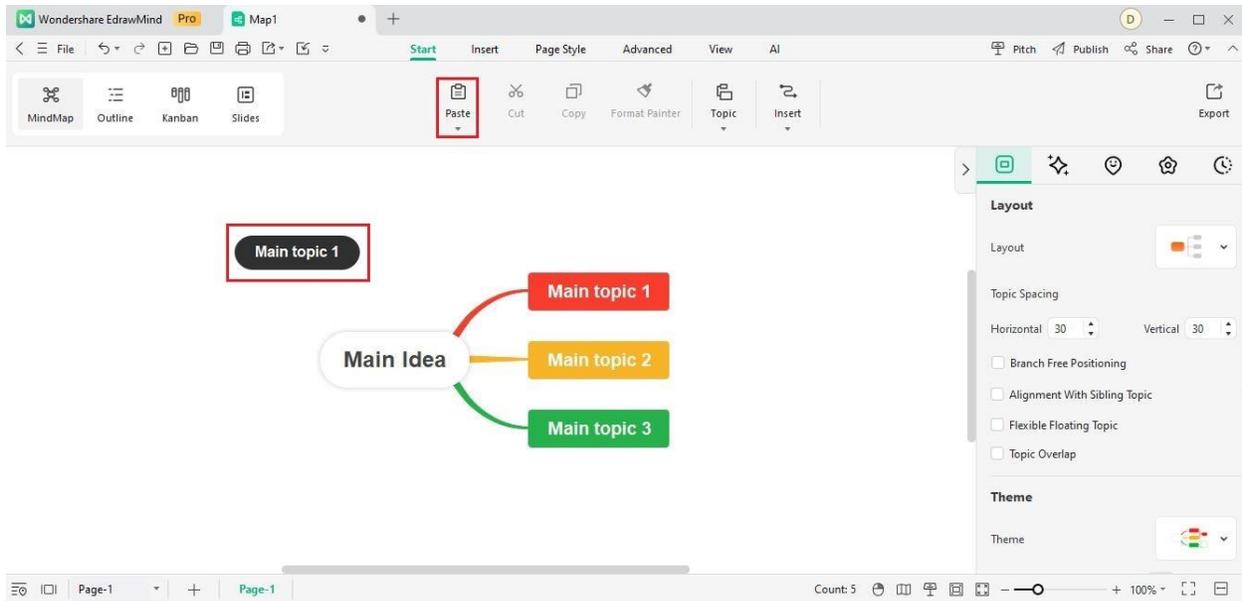

Step 2c: Use shortcut keys Ctrl + C keys on the keyword.

03 Paste Topic as Floating Topic

Here are detailed steps to help you create a floating topic for your cut or copied topic.

Step 1: Click the blank space in the drawing window.

Step 2a: Press the Paste button in the ribbon from the Start tab. Then, the cut or copied topic will be posted in the blank area.

Step 2b: Right-click the blank space in the drawing window, then click Paste in the pop-up window.

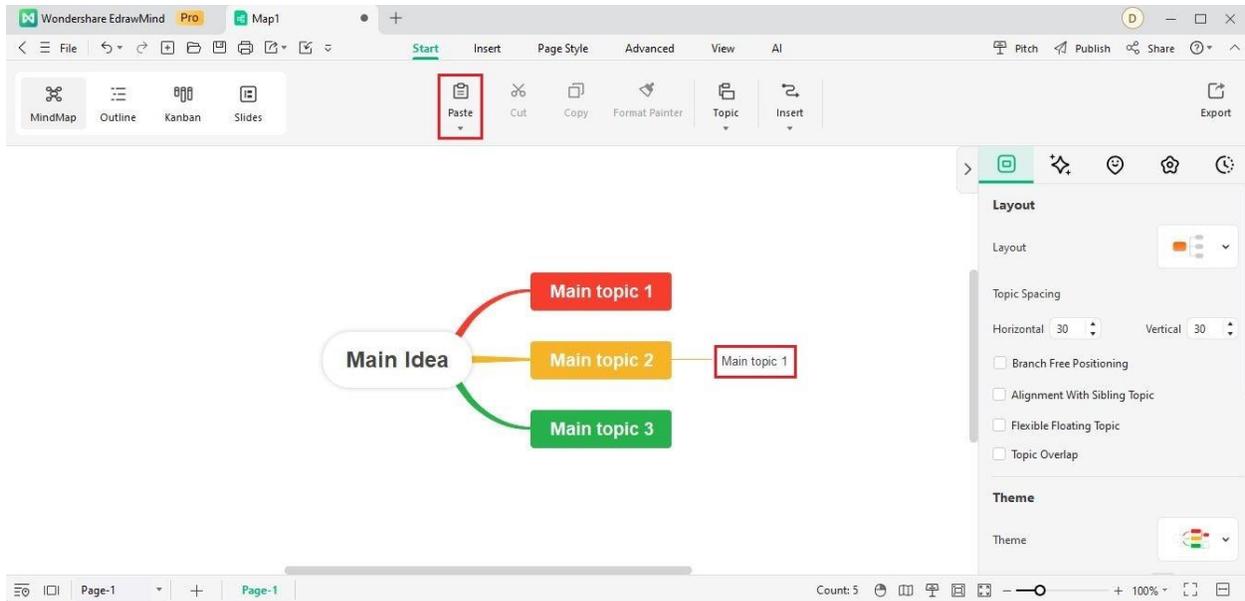

Step 2c: Press Ctrl + V keys on the keyword.

04 Paste Topic as Subtopic

If you want to edit the structure of the mind map and paste the processed topic as a subtopic, follow the steps below.

Step 1: Choose a topic. You will paste the topic as a subtopic.

Step 2: Paste the topic with the three methods mentioned above. Then, it will be posted as a subtopic to the selected topic. The image below is an example of pasting the copied topic.

Note:

You can rearrange the topic position with the Cut, Copy, and Paste features.

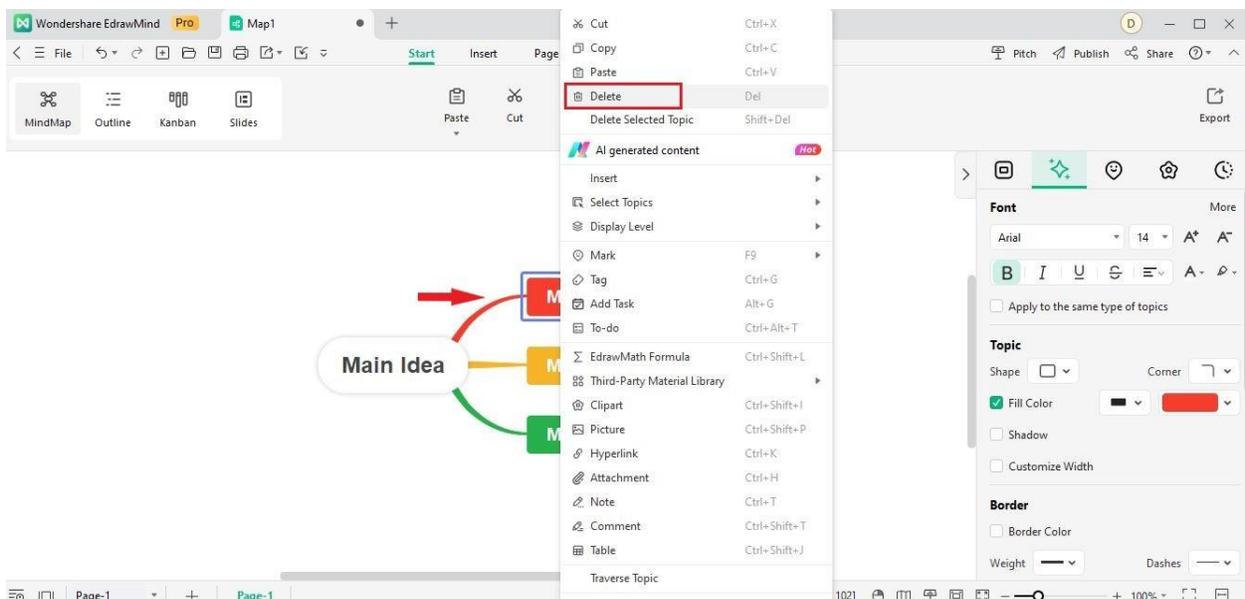

Delete Topics

You can delete a selected topic while maintaining its subtopics or delete the chosen topic with all its subtopics.

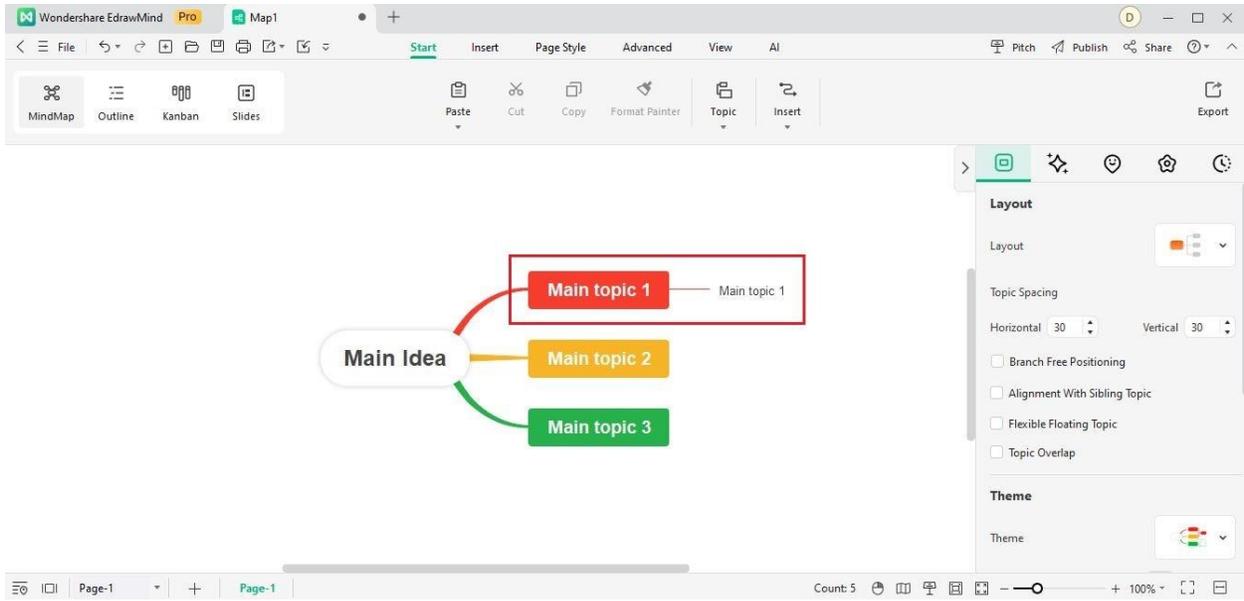

01 Delete a Selected Topic With Subtopics Remained

Follow the steps below to delete a selected topic without deleting its subtopics.

Step1: Right-click the topic you want to delete.

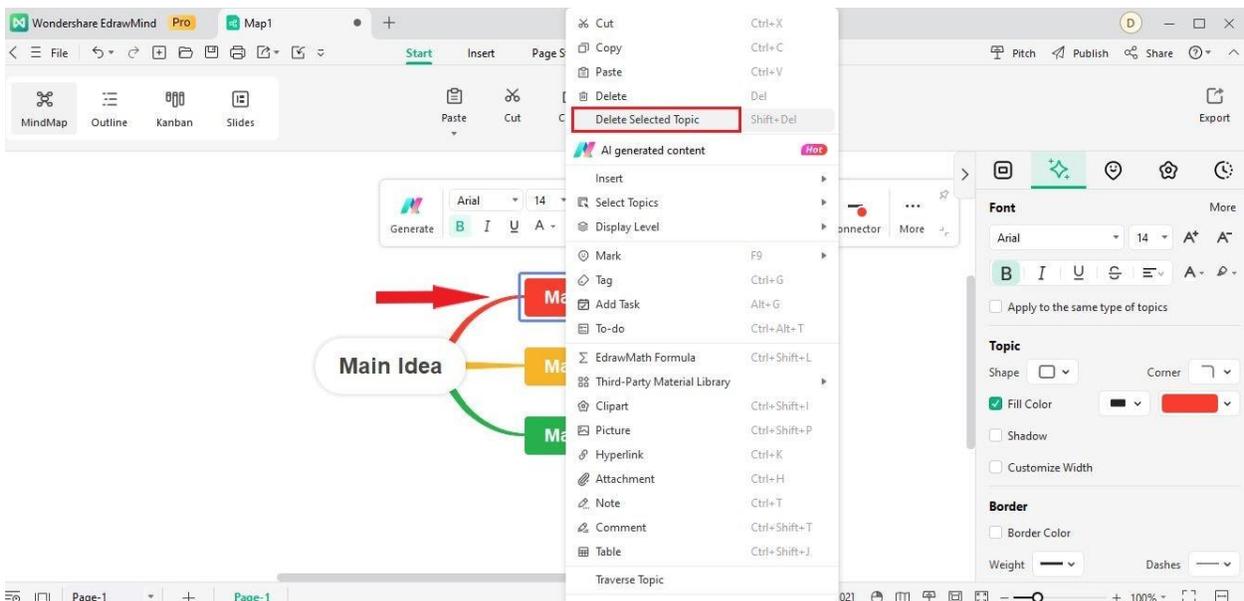

Step2: In the pop-up window, click Delete Selected Topic. Then, as shown below, the selected topic is deleted, and its subtopics will be automatically retained to the topic of the above level.

02 Delete a Selected Topic With Subtopics

Here are detailed steps to delete your selected topic and its entire branch at a time, including the subtopics and all annotations.

Step 1: Right-click the topic you want to delete with its subtopics.

Step 2: In the pop-up window, click Delete. Then, as shown below, the topic with its whole branch will be deleted.

Find Topics

Follow the steps below to quickly find and replace text in topics, tags, notes, or comments.

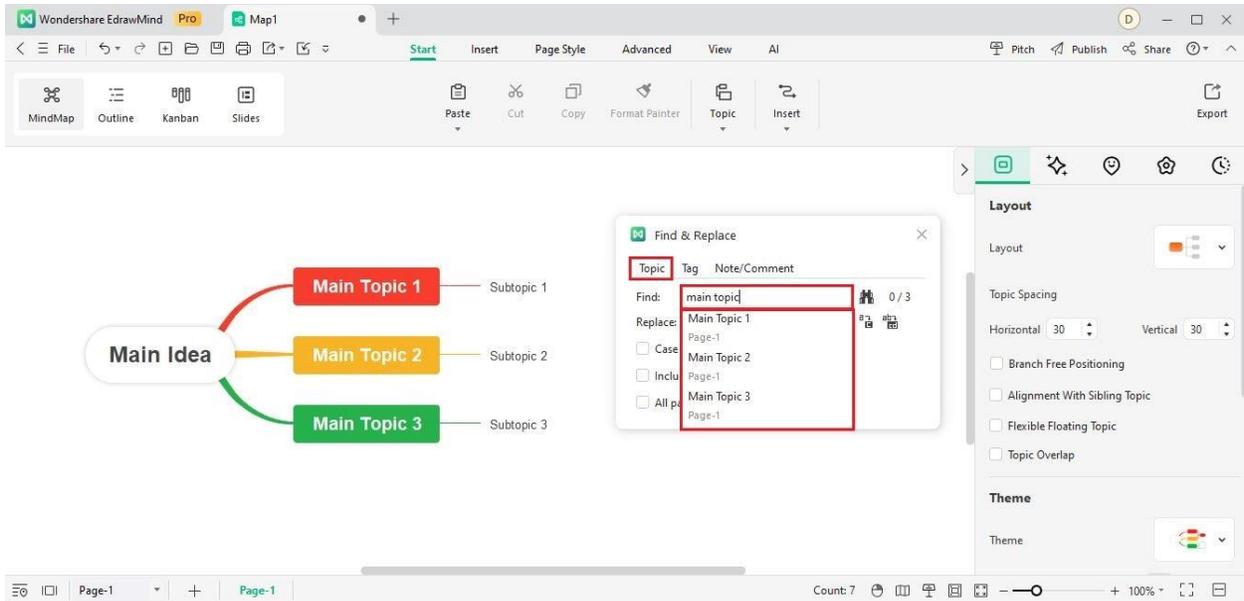

Method 1 Use Shortcuts Ctrl + F

Here is how to find topics with default shortcuts.

Step 1 Press Ctrl + F buttons on your keyboard, and the Find & Replace window will appear.

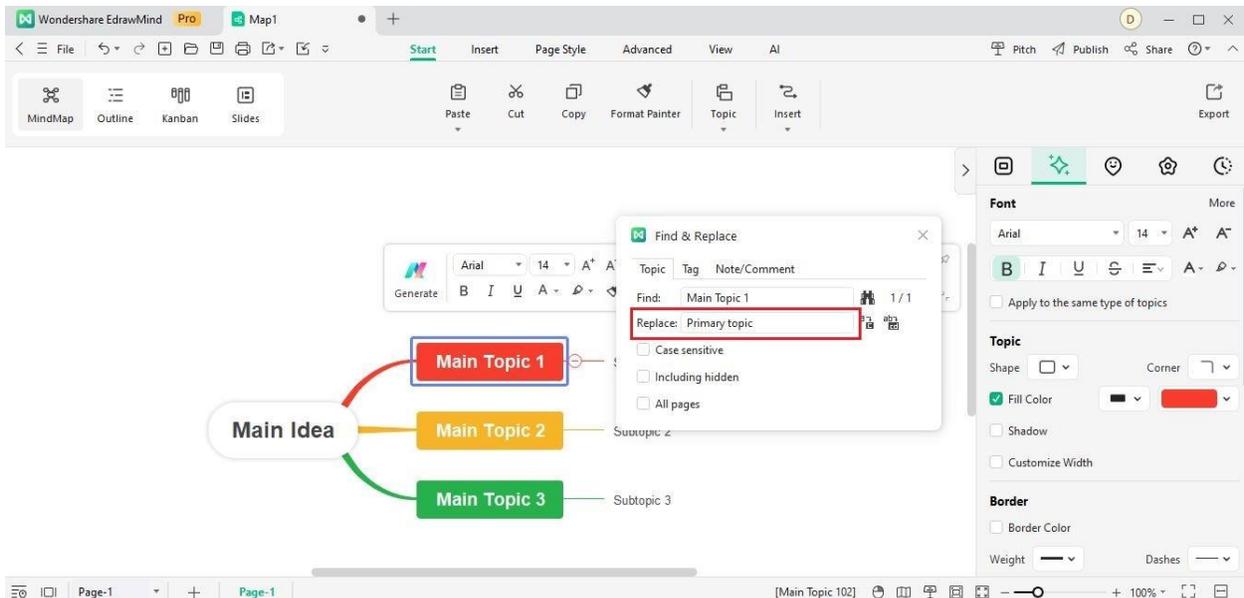

Step 2 Input the words included in the topics you want to search in Find under the Topic tab.

Method 2 Find Topics and Replace Some Text

If you want to replace some text, follow the steps below.

Step 1 After finding the topics that include your needed text, enter the text you want to replace in the text box of Replace.

Step 2 Select the topic you want to replace. Then click the first icon on the right side of the input box to replace one selected topic. If you intend to replace all, click the second icon on the right side. Then all the original text you are looking for will be replaced by your intended text.

Insert Pictures

EdrawMind allows you to insert pictures in the mind map. You can insert pictures of various formats to improve the visual effect, such as JPG, PNG, BMP, ICO, PBM, PPM, PGM, TIF, and TIFF. You can insert pictures with several methods. Here are the detailed steps.

Method 1 Insert Pictures With the Picture Button

Here is a step-by-step guide to inserting images with the Picture feature.

Step1Select the topic you want to insert pictures. Click Picture in the ribbon of the Insert menu.

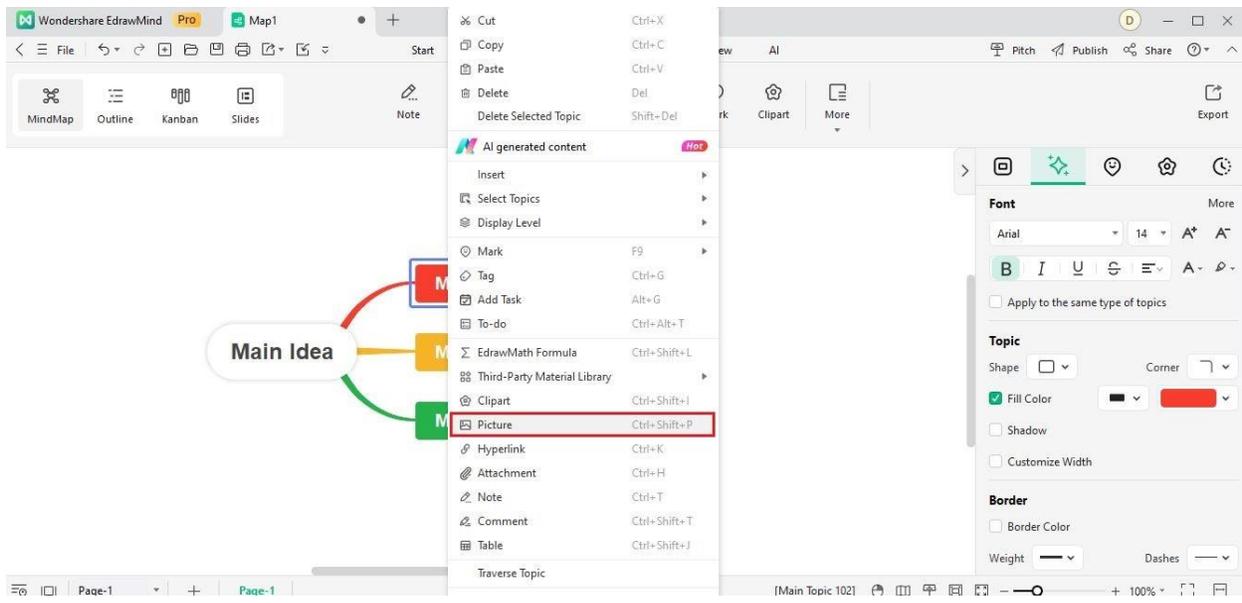

Step2Choose an image from local documents in the Insert Picture box. Then click OK after finding the one you want to insert.

Note:

If you don't select any topic, the inserted picture will automatically be a floating topic.

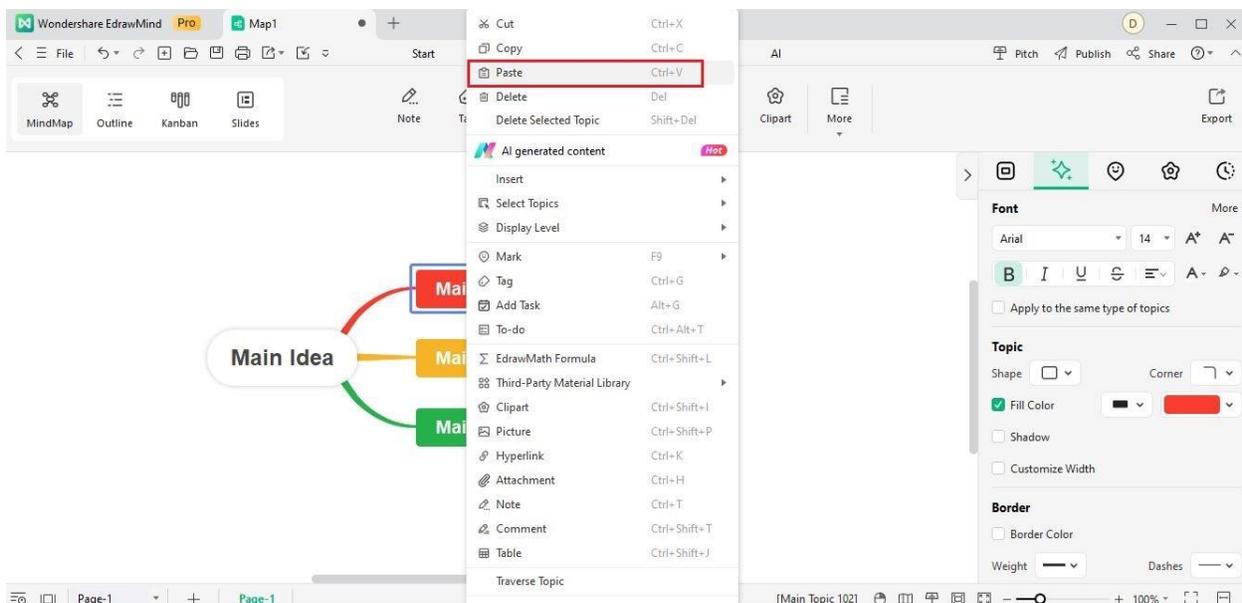

Method 2 Use the Right Mouse Button

Alternatively, you can right-click the mouse and click Picture in the menu. Then, select the picture you want to insert in the window. Click OK when you finish.

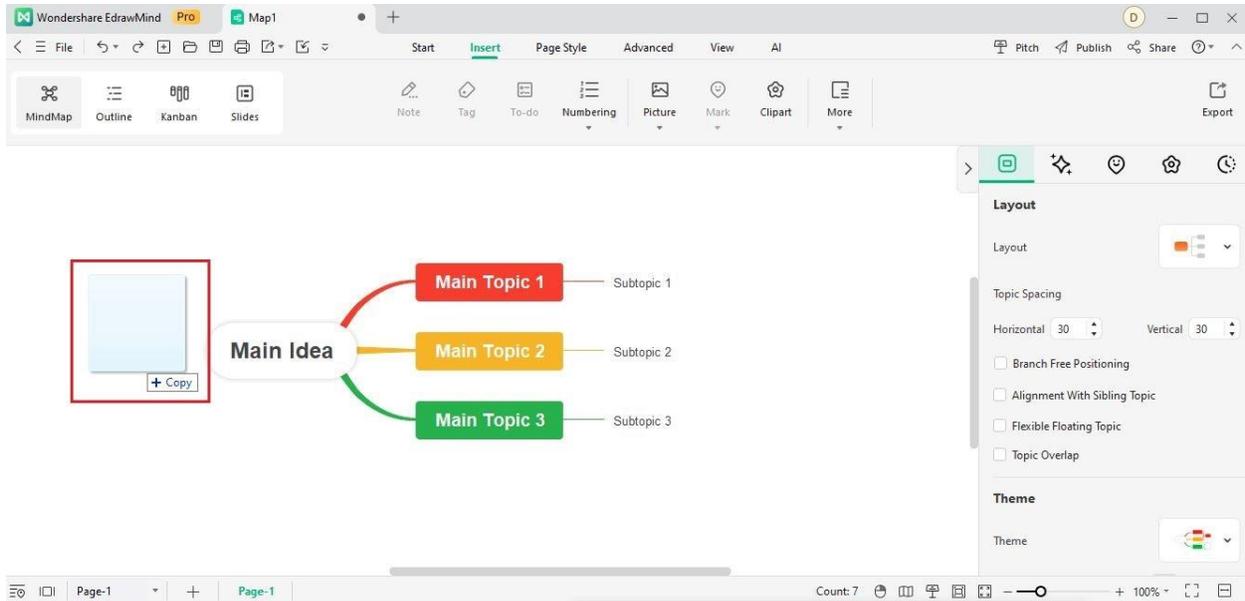

Method 3 Copy and Paste

Copy a picture from local files to add to your mind map. Right-click your mouse on a topic or the blank area, and select Paste to add the image.

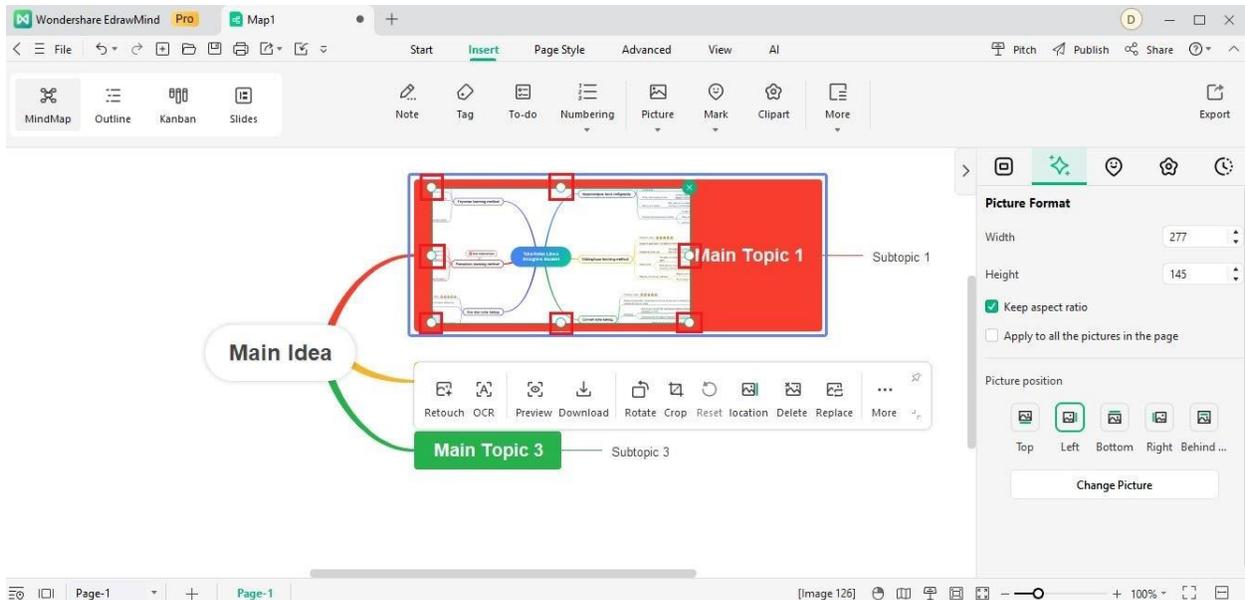

Method 4 Drag a Picture

Directly drag a picture from the outside of EdrawMind to a topic or the blank area. Then, click Add as a picture.

Adjust Image Size

After inserting a picture into a topic or a subtopic, drag its control points at corners to adjust the size.

Tip:

By default, the picture will be inserted to the left of the topic text. You can drag it to change its position.

Insert Attachment

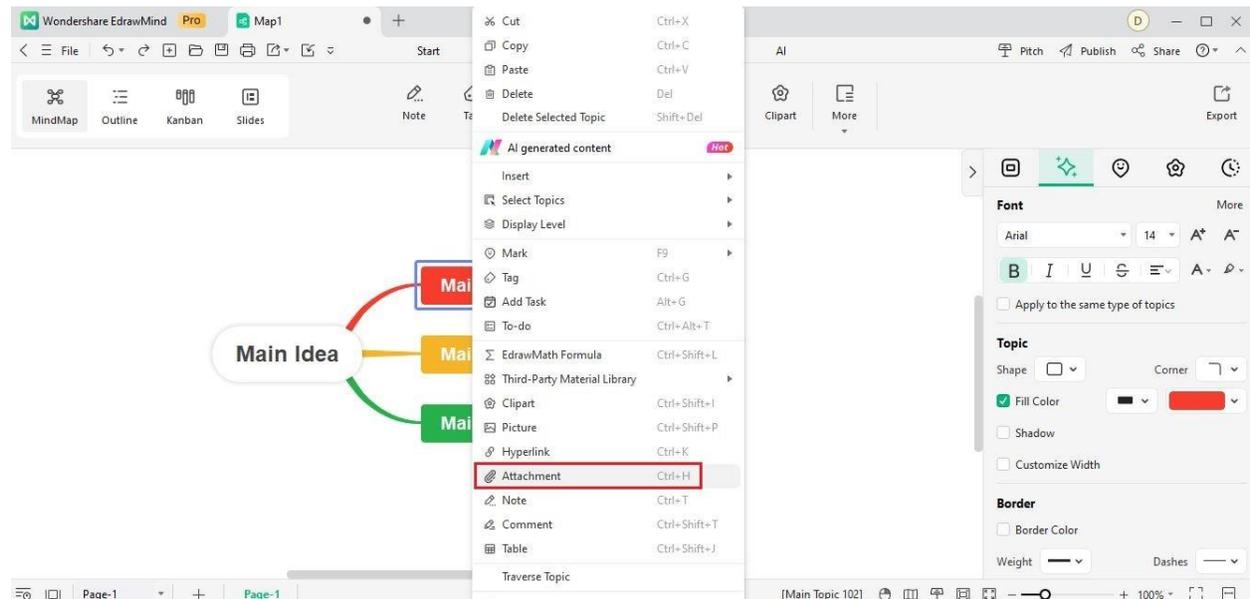

EdrawMind allows you to insert attachments. The files would be automatically saved to the map.

It's easy to add large files to the map in EdrawMind, and this feature helps to make the map clean and intuitive. Here are two methods to insert the attachment.

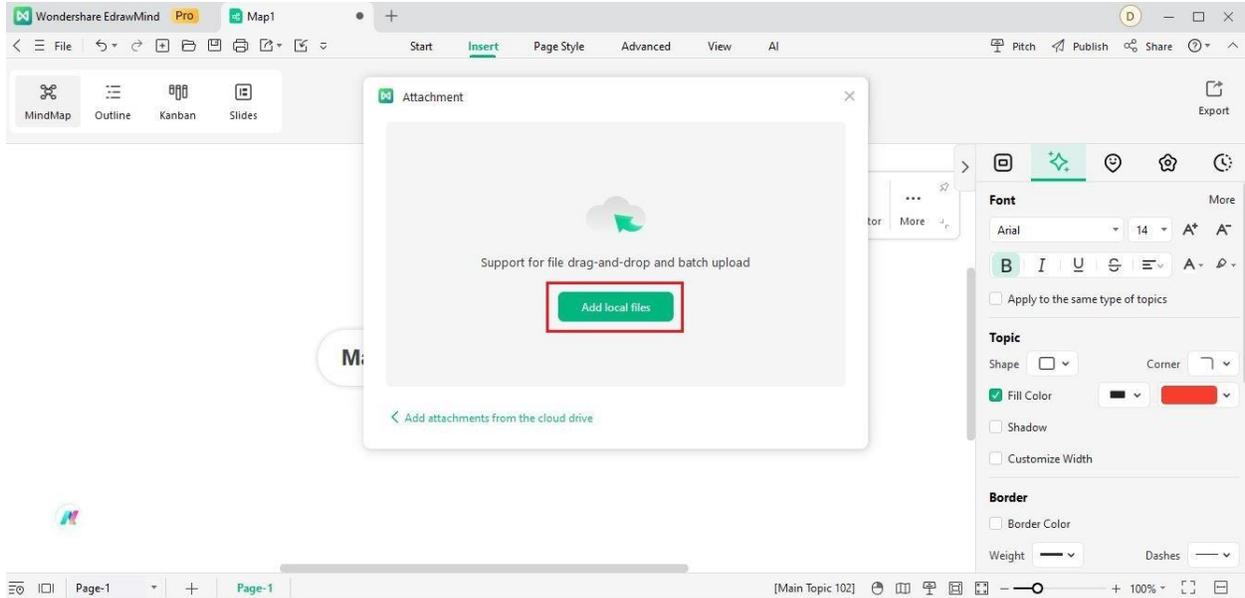

Method 1: Use the Attachment Button

Follow the steps below to insert attachments.

Step1 Right-click the topic you want to add an attachment to. Then click Attachment in the menu.

Step2 Click Add Local Files in the pop-up Attachment window to choose your File in the computer. Alternatively, click Add Attachments From the Cloud Drive if your files are stored online.

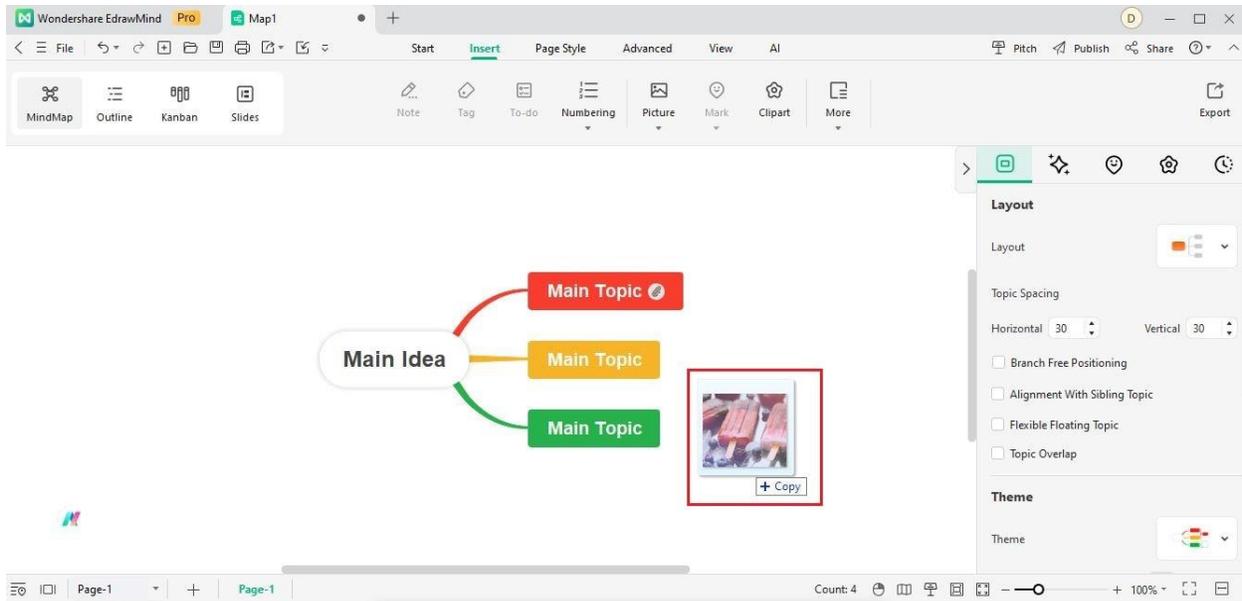

Note:

You can change the attachment's name by entering the name in the input box beside Name.

Step3Click Continue to Add Attachments to insert more files into the selected topic. Otherwise, close the pop-up window if you're done already. Then, the attachment will be added to the topic, and the attachment icon will be displayed on the right side of the topic text.

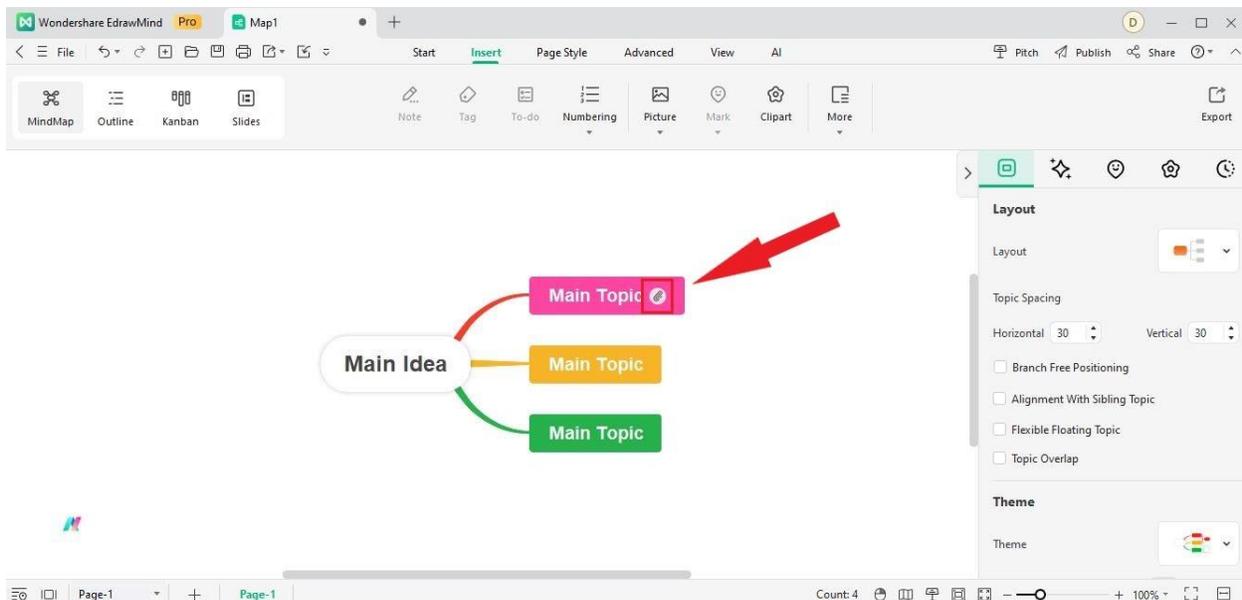

Method 2: Drag the File to the Targeted Topic

To insert the attachment more quickly, you can directly drag the file to where you want to insert it. Then, click Add as attachment.

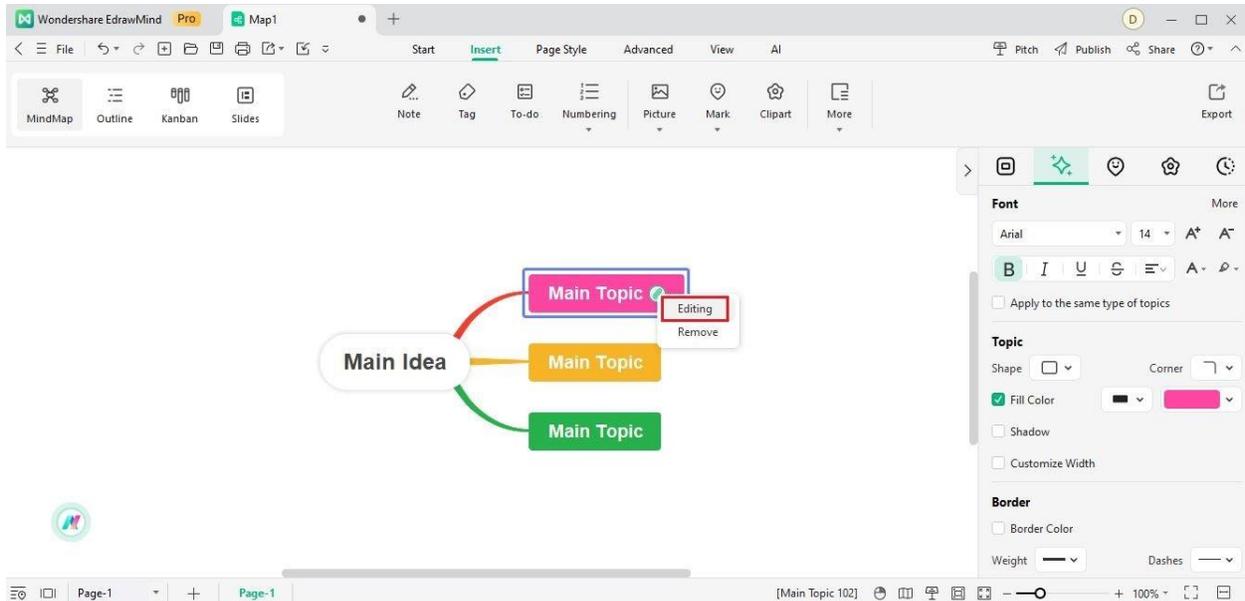

01 View Attachment

You can hover the mouse pointer over the icon to see the attachment's name. To view the attachment's content, you can click the name of the attachment directly to open it.

02 Edit Attachment

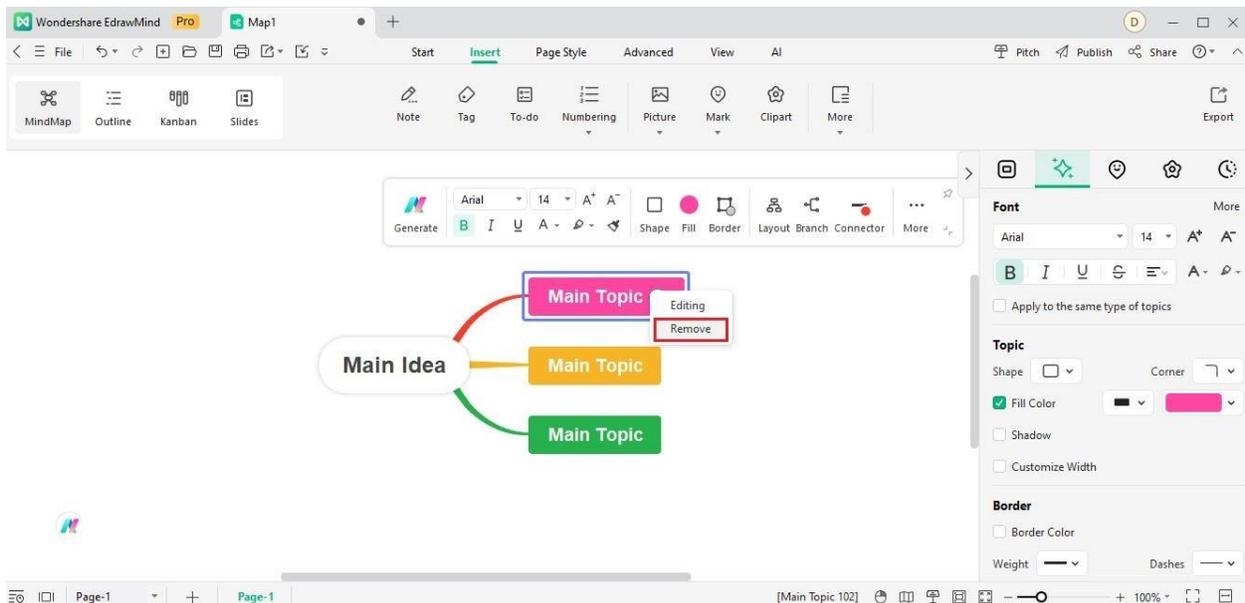

To edit the attachments, right-click the attachment icon and click Editing. Then, in the Attachment window, you can edit the file name, reorder the file, and add or delete the file.

03 Delete Attachment

There are two ways to delete the attachment for different purposes.

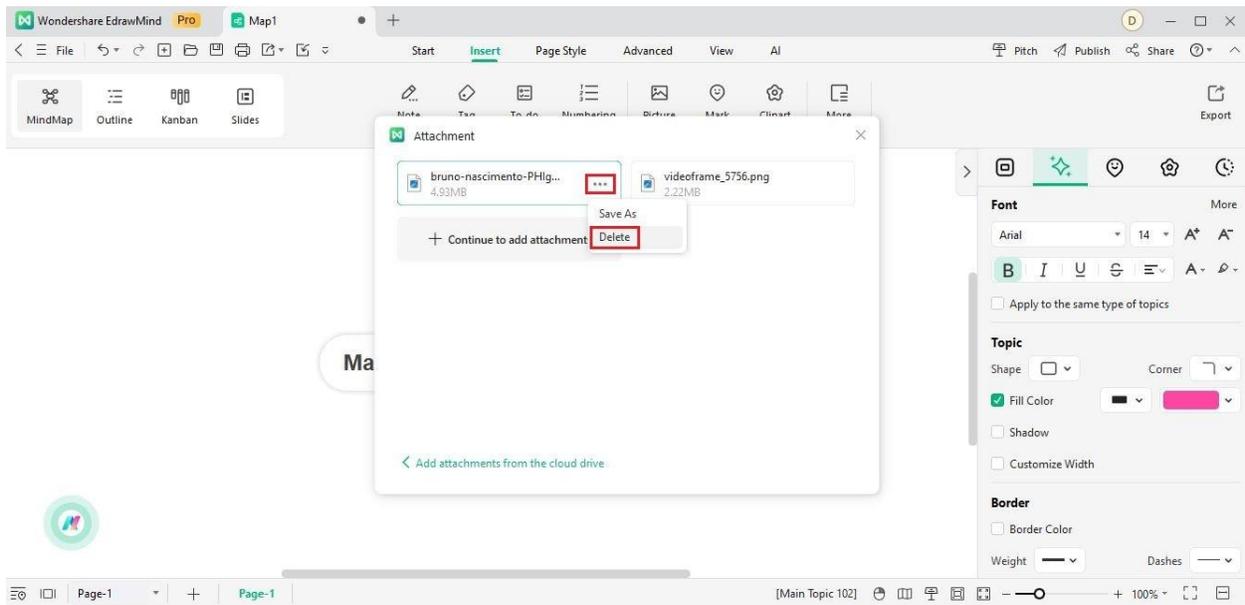

Option 1: You can right-click the attachment icon to delete all the attachments in one topic at a time. Then, click Remove to delete all attachments.

Option 2: Follow the steps below to delete a single file.

- **Step 1: Right-click the attachment icon and click Editing.**

- **Step 2: Select the file you want to delete, and then click the More Options button next to it. After that, click Delete.**

Insert a Hyperlink

The hyperlink can be used to add external files and internal files and can avoid cluttering the map when you insert or copy content.

EdrawMind allows you to insert several types of hyperlinks, including:

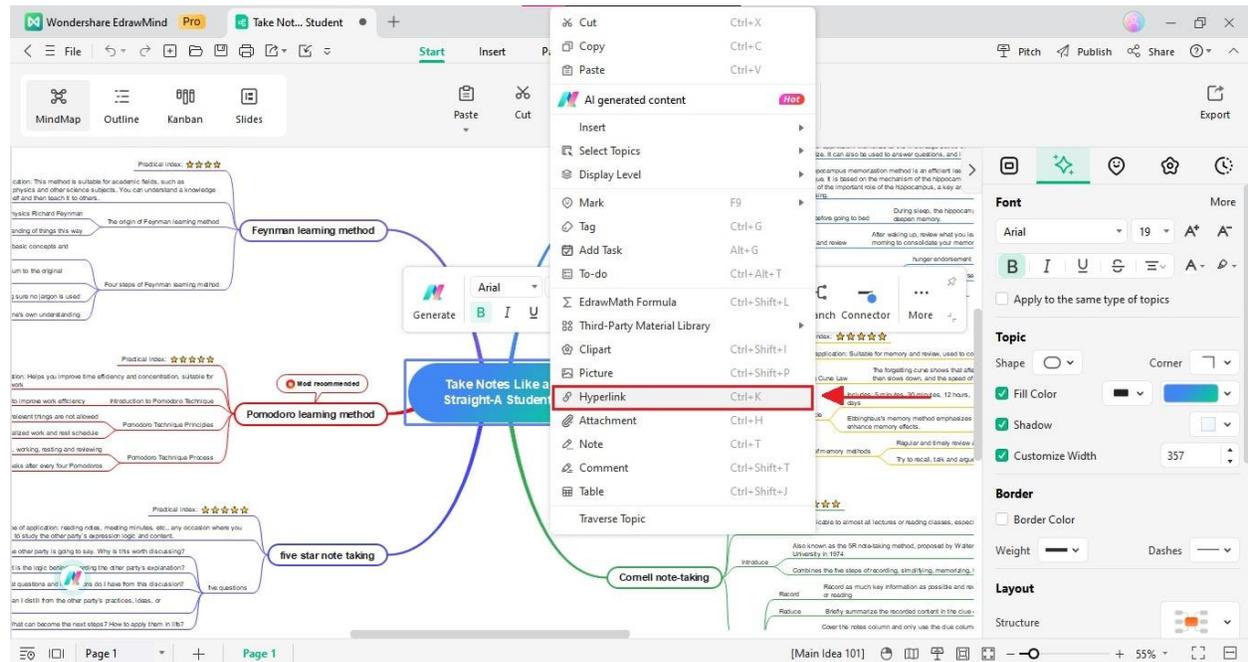

- Current Document
- File or application
- Internet address
- Folder

01 Add Hyperlink

You can follow the steps below to insert the specific hyperlinks in your mind map.

Step1Select the topic you want to insert the hyperlink.

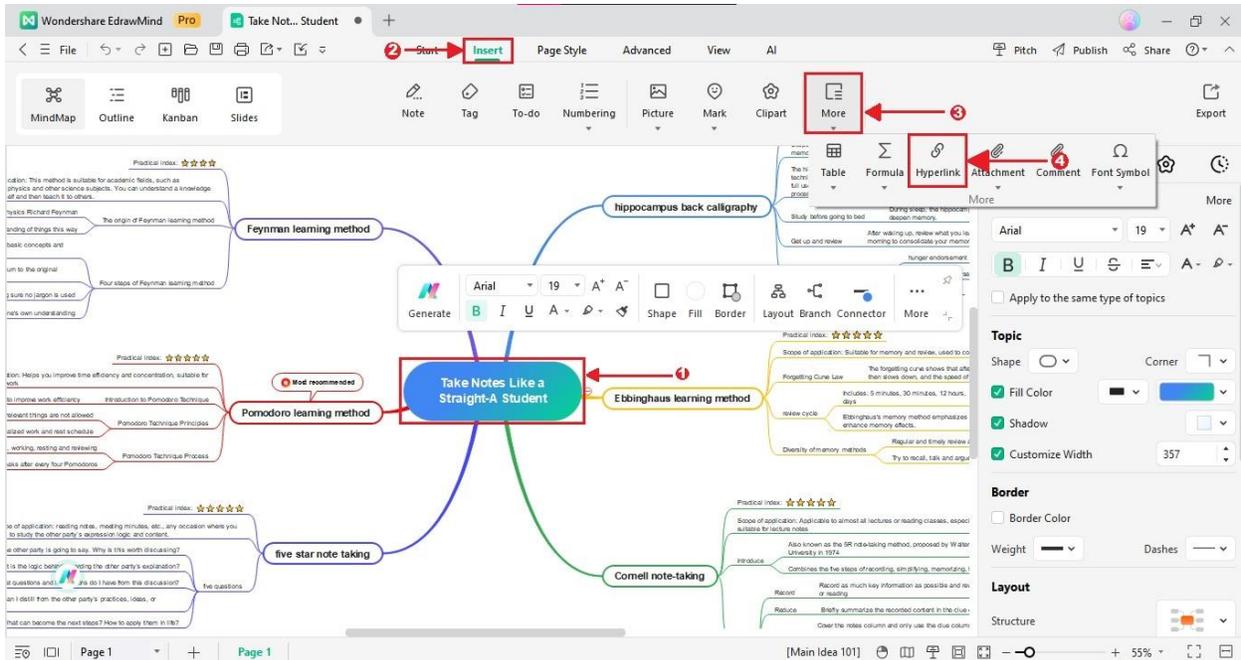

Step2Right-click the topic, then click Hyperlink in the menu.

Step3: Decide which type of hyperlink you want to insert and edit.

Note:

Here is another method to add a hyperlink. Select a topic and click More in the Home menu. Then you'll also see the Hyperlink window.

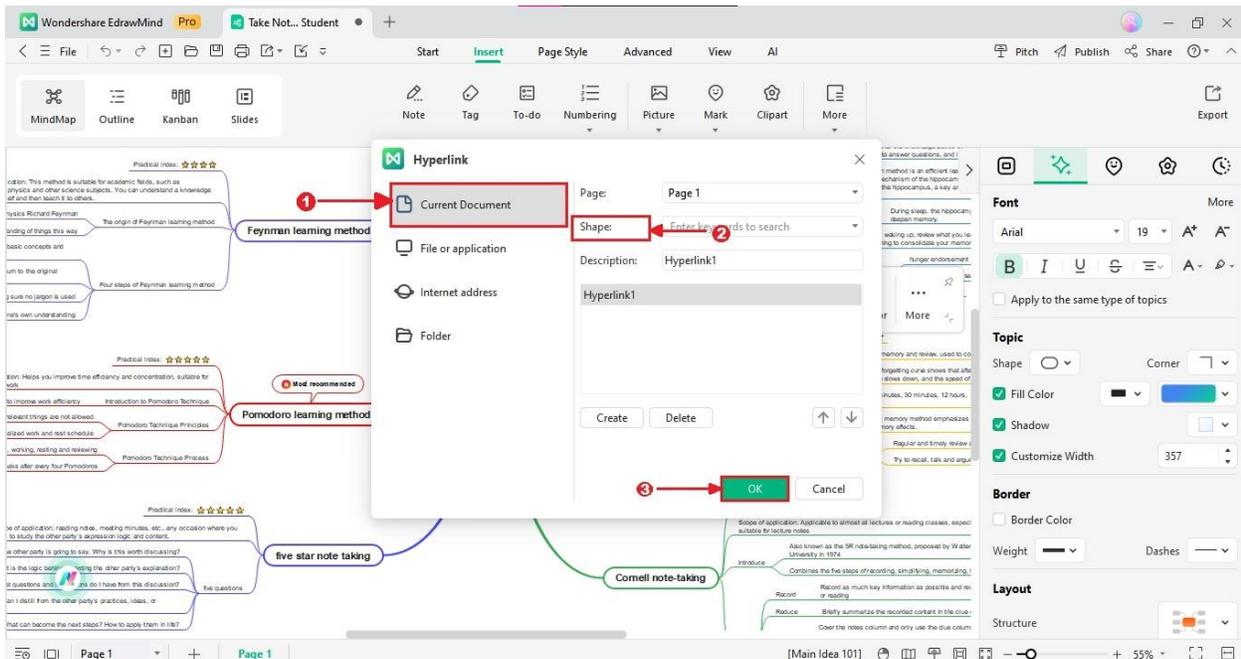

02 Insert a Current Document as a Hyperlink

Here are steps to insert the topic of the current document as a hyperlink.

Step1 Click Current Document on the left side of the Hyperlink window.

Step2 Select a specific topic in the drop-down menu of the Shape and click OK.

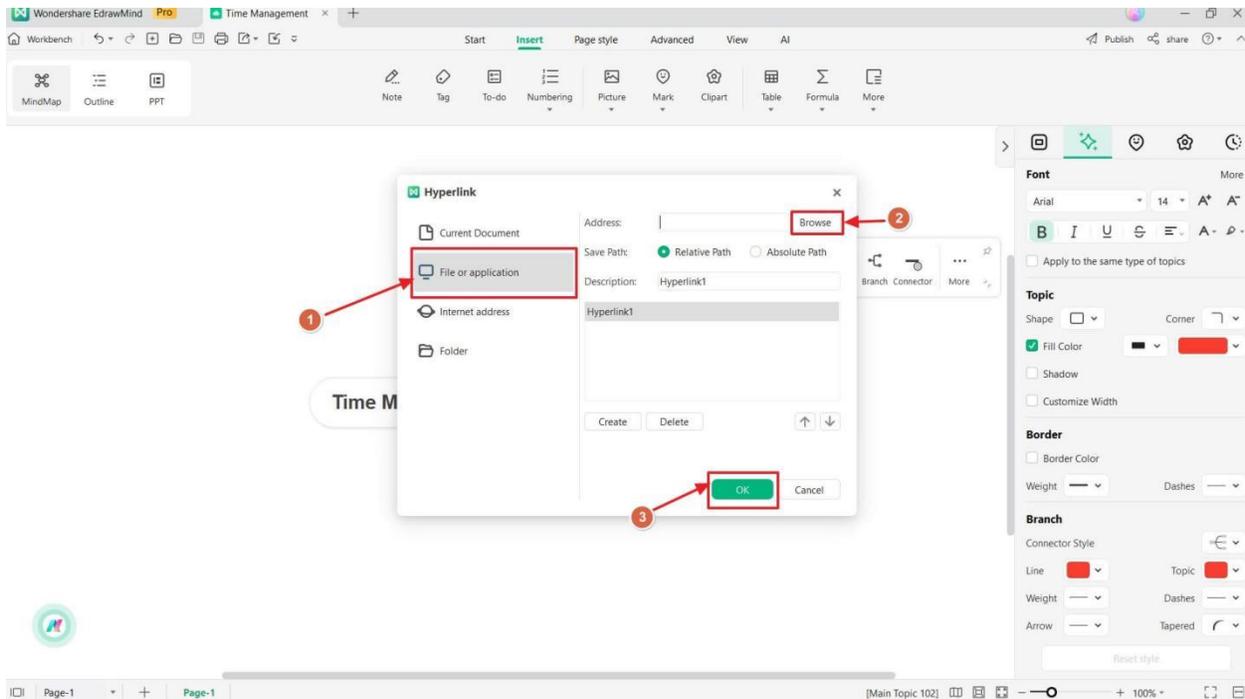

03 Insert a File or Application as a Hyperlink

Follow the steps to insert a file or application as a hyperlink.

Step1 Click File or application on the left side of the Hyperlink window.

Step2 Click Browse to choose your needed file saved on the computer. Then click OK to confirm.

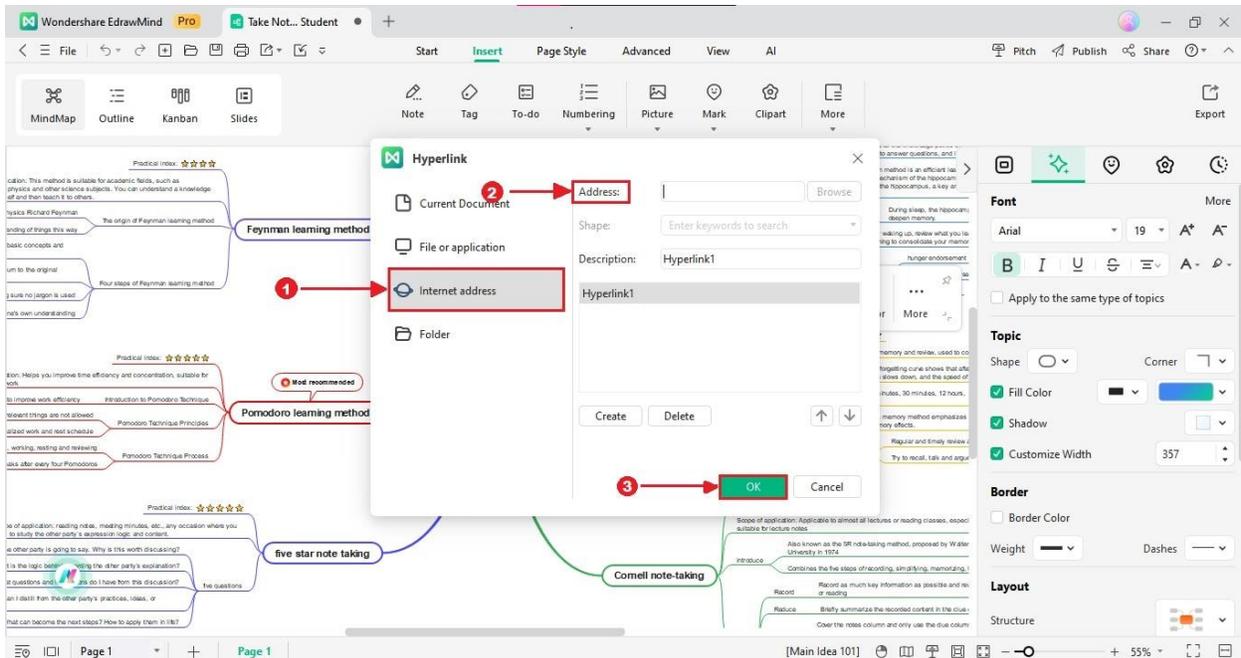

04 Insert an Internet Address as a Hyperlink

The following is the guide to inserting an internet address as a hyperlink.

Step1 Click Internet address on the left side of the Hyperlink window.

Step2 Enter an internet address in the input box beside Address. Then click OK to confirm.

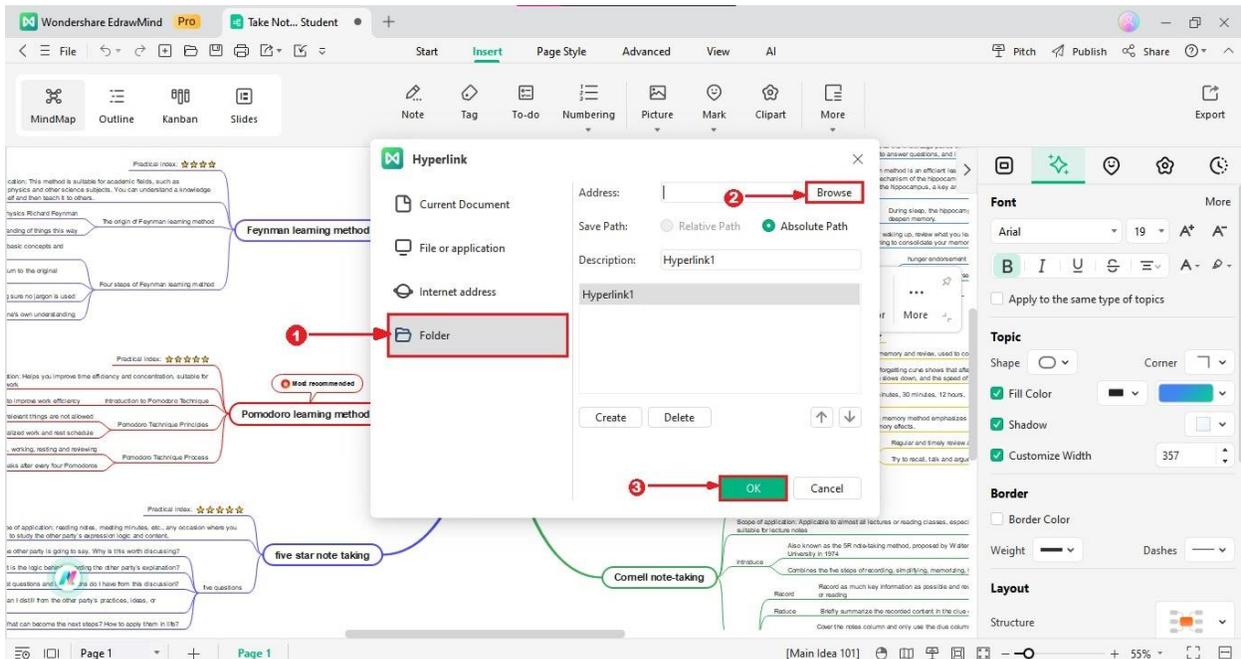

05 Insert a Folder as a Hyperlink

Learn from the steps below to insert a folder as a hyperlink.

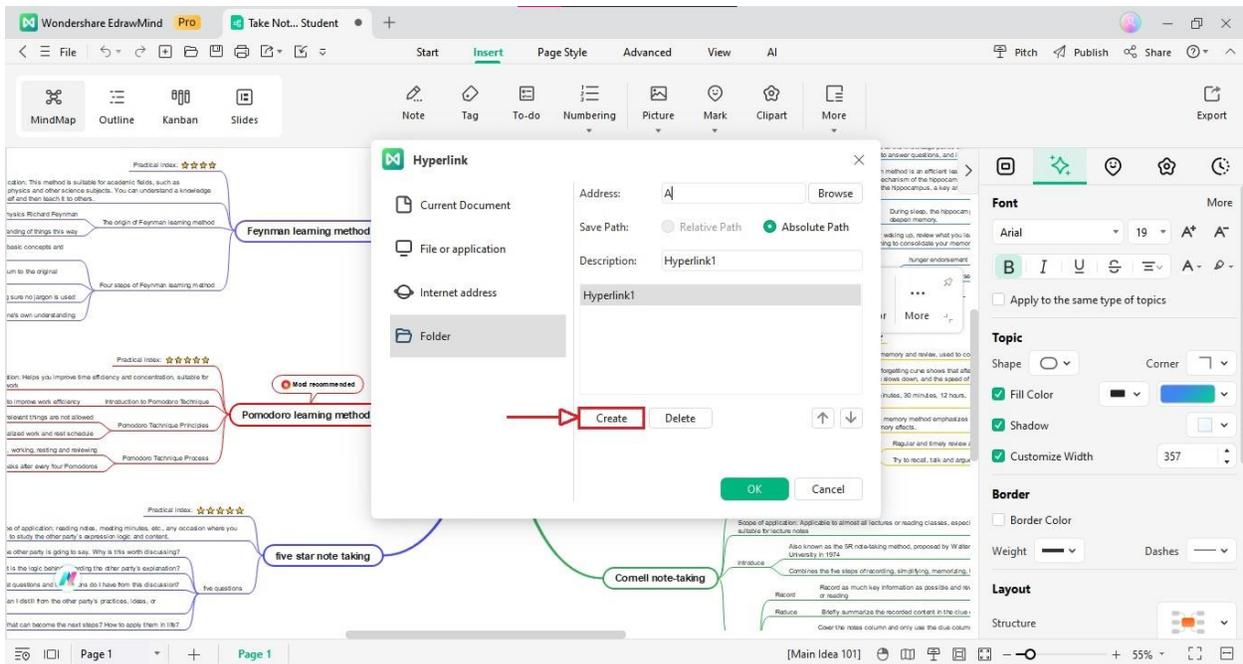

Step1 Click Folder on the left side of the Hyperlink window.

Step2 Click the Browse button on the right side to select your needed folder on the computer. Then click OK to confirm.

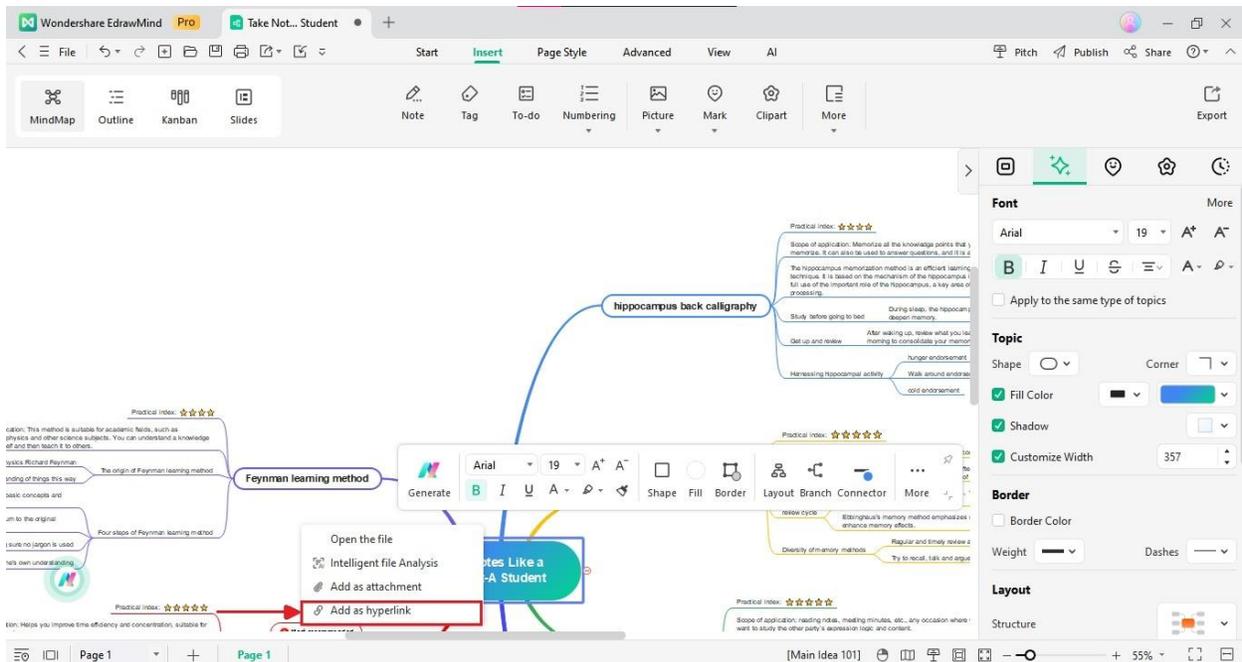

Step3Name the hyperlink accordingly in the input box after Description, which will be displayed on the hyperlink icon.
Step4Click OK to confirm editing.

Tip 1: If you want to insert multiple hyperlinks to one topic, click the type of your needed hyperlink and click Create in the Hyperlink window. Then, repeat the steps above to add another one.

Tip 2: To insert hyperlinks more quickly, you can directly drag the file to where you want to add. Then, click Add as hyperlink in the pop-up menu.

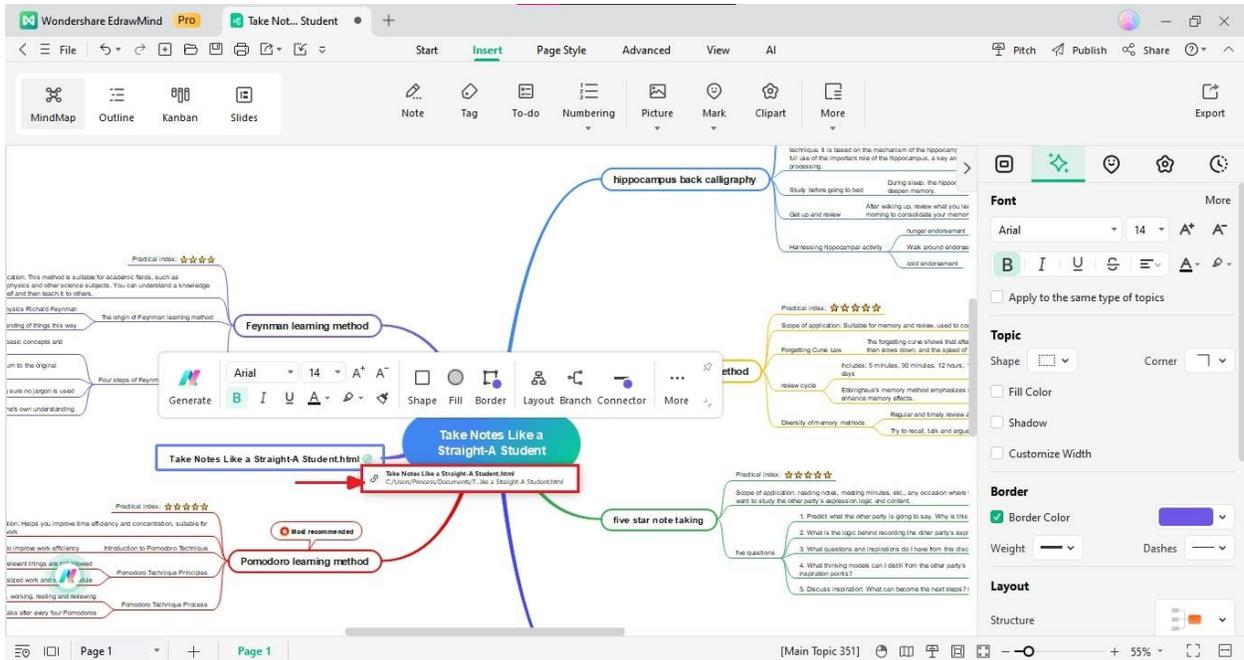

View, Edit, or Delete Hyperlinks

The hyperlink icon is located on the right side of the topic text. You can view, edit, or delete hyperlinks with it.

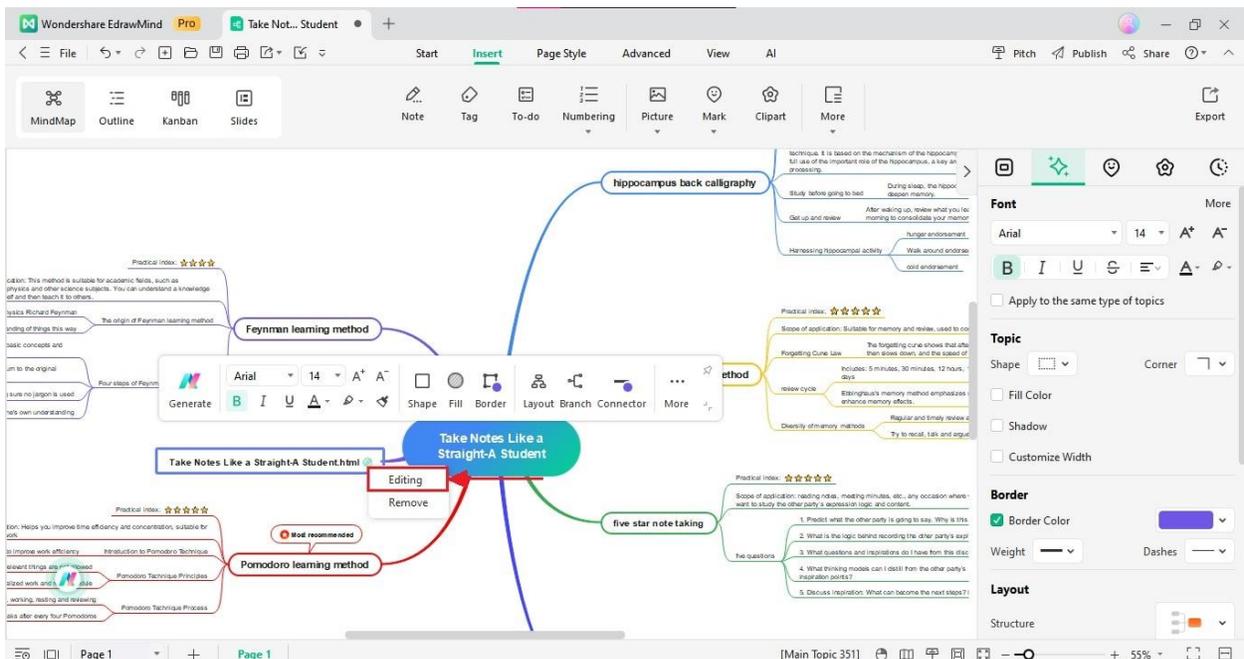

01 View Hyperlink

If you hover the mouse pointer over the hyperlink icon, you can see the name or description of the hyperlink. Then, click the name to view the corresponding hyperlink.

02 Edit Hyperlink

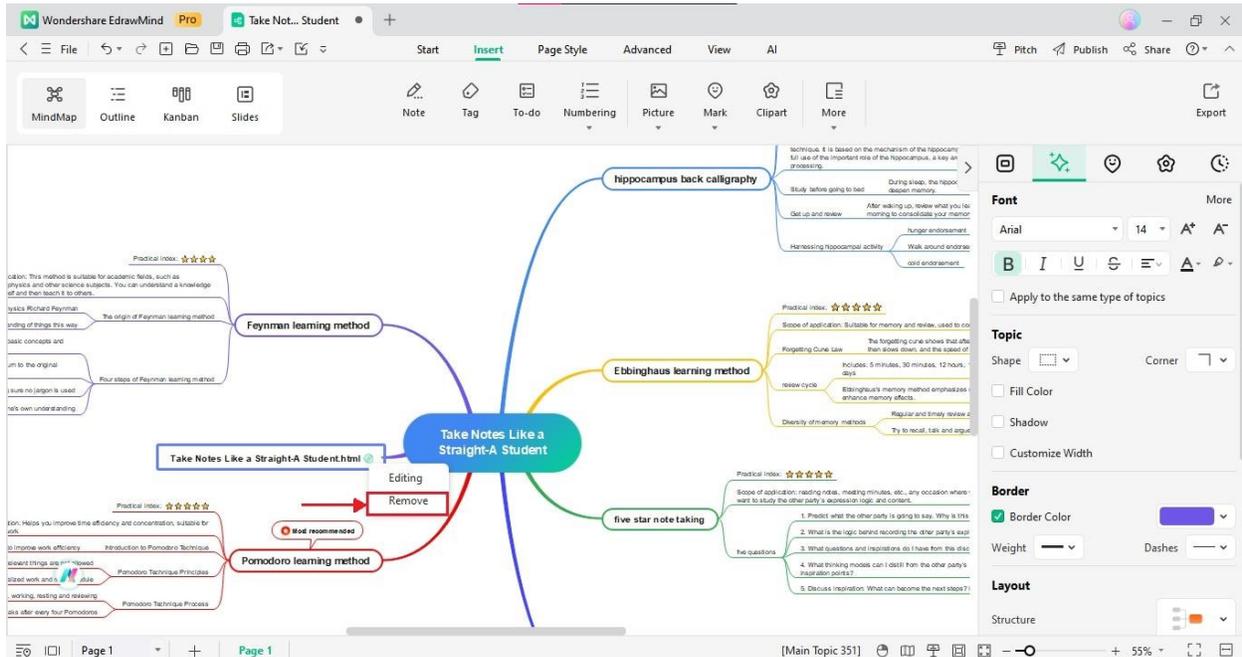

Right-click the hyperlink icon and click **Editing**. Alternatively, you can directly click the hyperlink icon to open the Hyperlink window when there are multiple hyperlinks. Then, in the pop-up window, you can modify the hyperlink description, address, and hyperlink order and add or delete hyperlinks.

03 Delete Hyperlink

There are two ways to delete the hyperlink.

Method 1: If you want to delete all hyperlinks in a topic at a time, you can right-click the hyperlink icon. Then, click Remove to delete the entire hyperlinks.

Method 2: If you need to delete one of the listed hyperlinks, you can right-click the hyperlink icon and click Editing. Then, follow the procedure below to delete a hyperlink.

Step 1 Select the exact hyperlink you want to delete.

Step 2 Click the Delete button.

Step 3 When you have confirmed the modification, click OK.

Insert Comment

When working with EdrawMind, a powerful mind-mapping tool, viewers can share their thoughts directly within the mind map using the comment feature, which is helpful for collaboration or reference purposes. You will notice a blue comment icon when you add a comment, making it easy to locate.

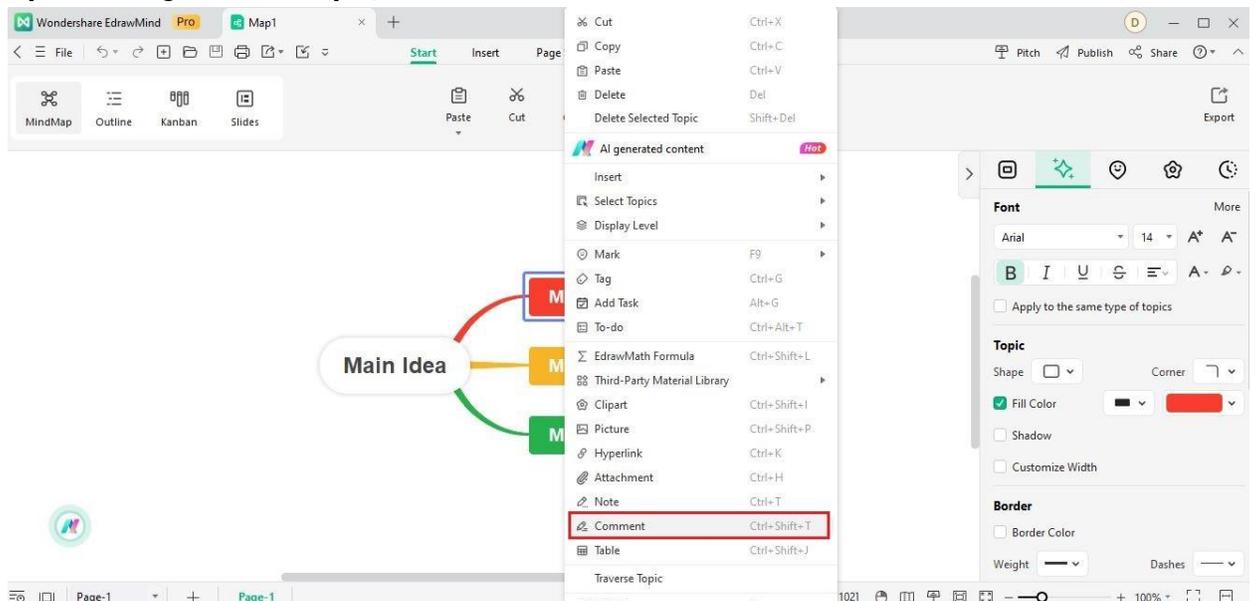

Hovering your cursor over the icon reveals essential details such as the author, content, and timestamp. You can add multiple comments to a topic, allowing in-depth discussions and feedback. This feature empowers map makers to gather insights, facilitate communication, and streamline collaboration within the mind map.

Follow the steps below to facilitate collaboration and idea-sharing among team members. Adding a comment will help ensure the mind map reflects the latest insights and feedback.

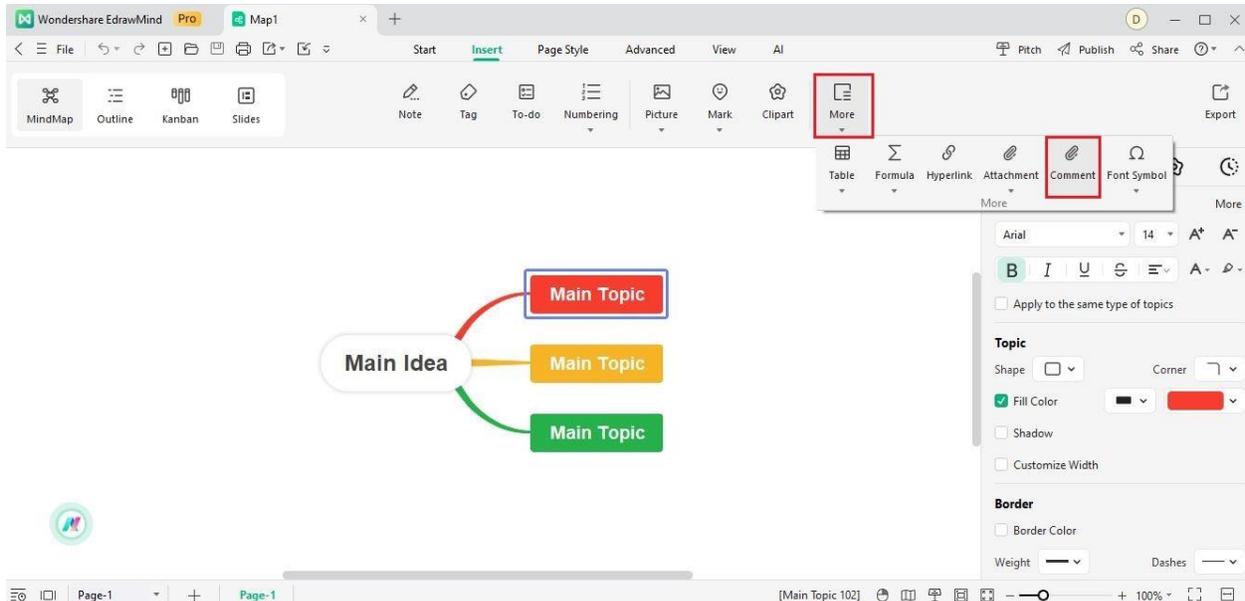

Step 1 Select a topic on the canvas.

There are two ways to insert a Comment in the mind map.

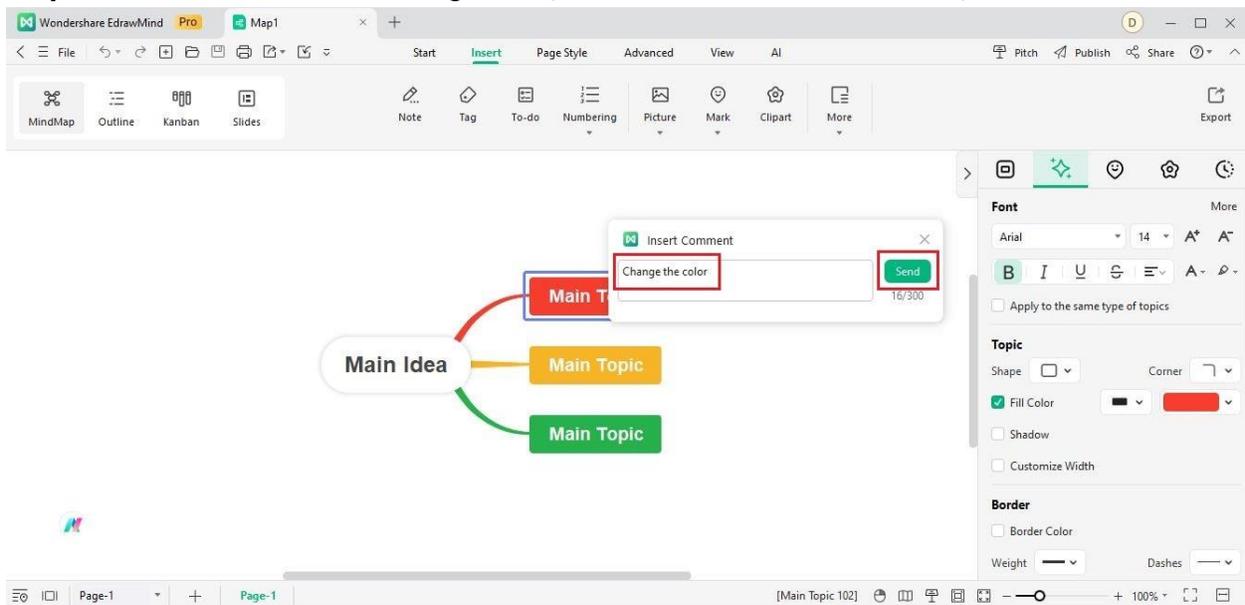

- **Option 1: Right-click a topic, then select Comment.**

- **Option 2: Click the topic you want to comment on. Then click the More dropdown list in the Home tab, and select Comment.**

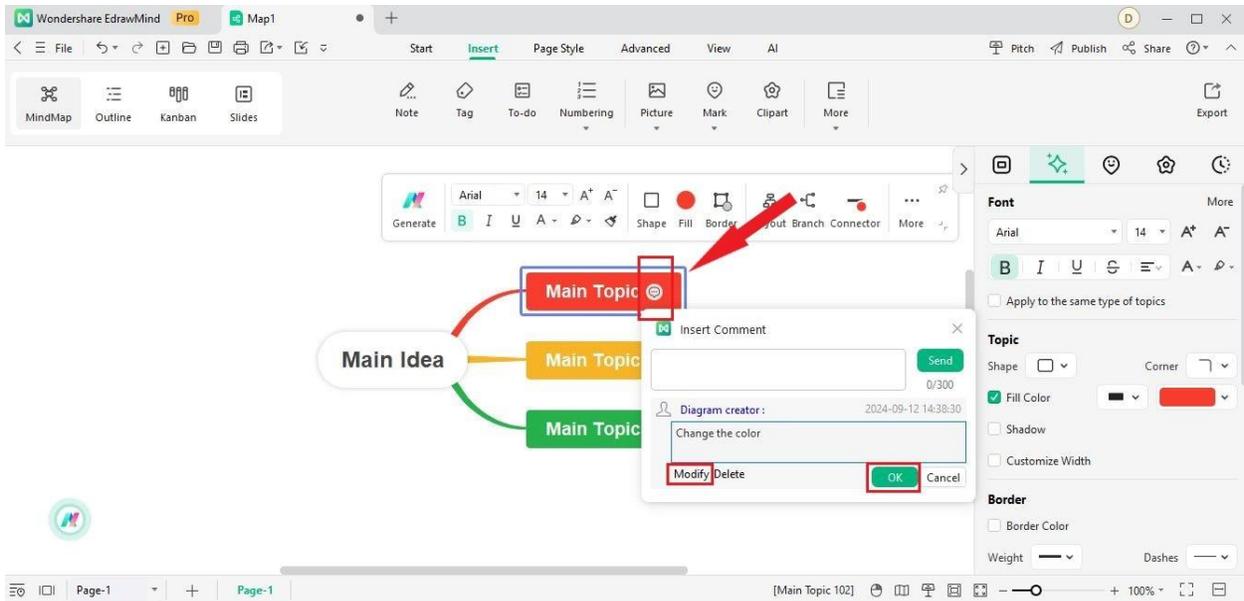

Step2In the Insert Comment dialogue box, enter a remark in the text field, then click Send.

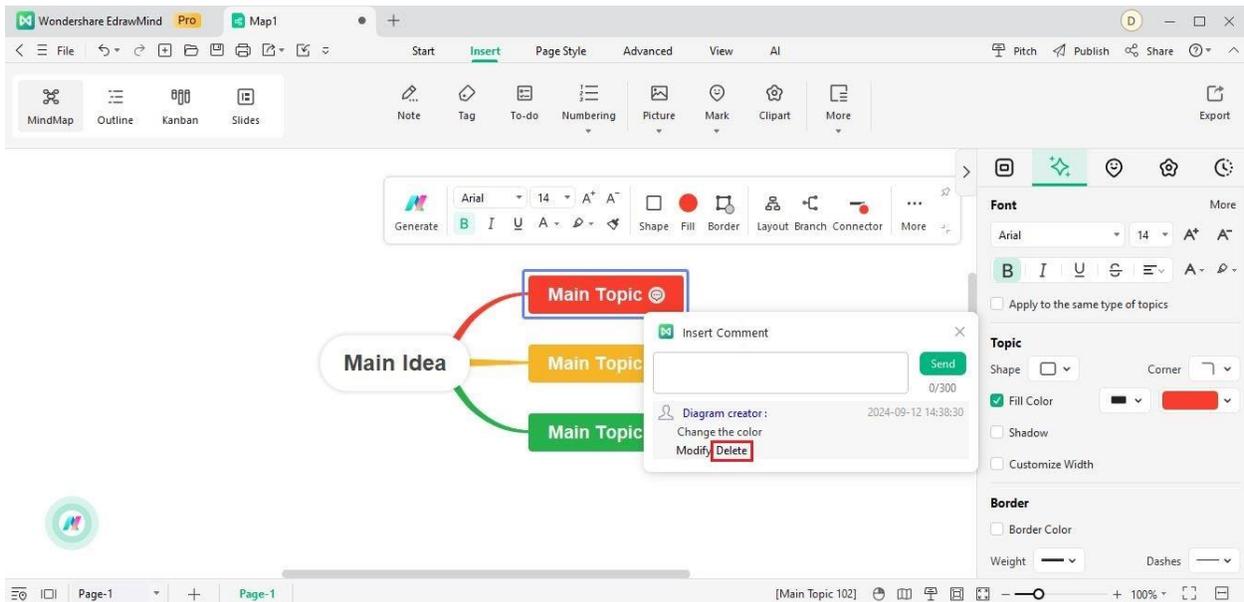

Note:

If you want to edit a comment, click the blue comment icon within the topic. It will open the Insert Comment dialogue box. Click Modify to make your desired changes, and then click OK. If you are satisfied with the changes, close the dialogue box.

To remove an existing Comment, repeat the steps above to open the Insert Comment dialogue box. Next, Click Delete, and close the Insert Comment dialogue box.

Insert Note

Note and comment are features in EdrawMind with distinct functionalities for organizing information in a mind map. While comments offer short remarks that augment the ideas, notes can accommodate longer texts for additional context or insights that are not immediately evident from the mind map.

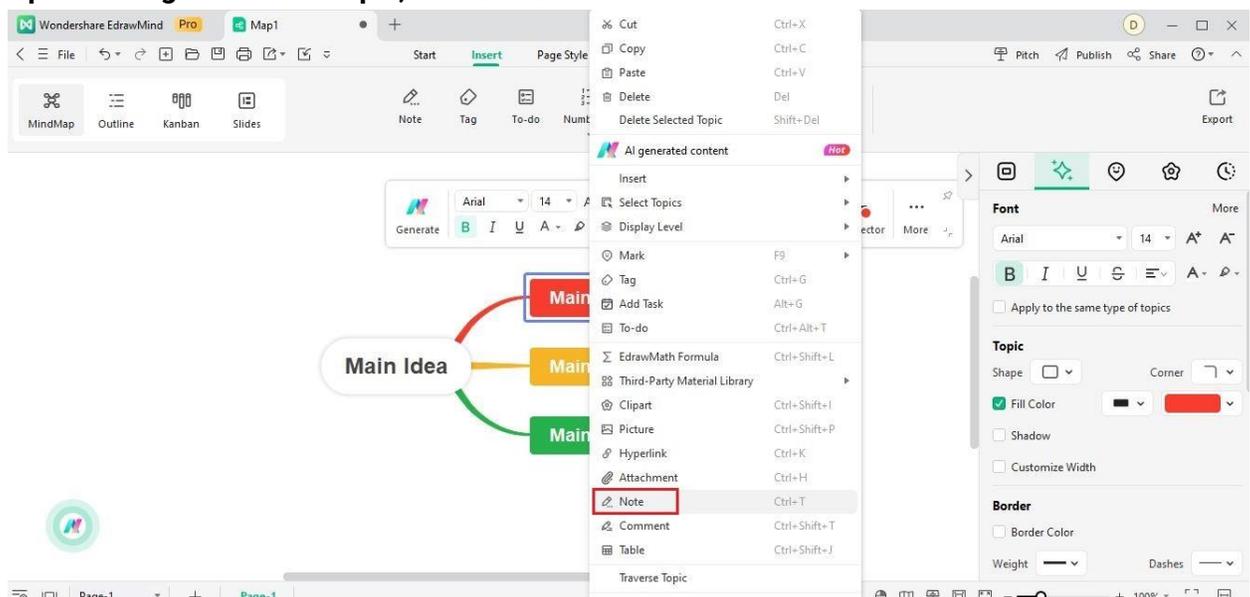

This feature goes beyond just plain text. It also integrates the EdrawMath Formula, enabling you to add mathematical equations. Moreover, adding a date can help establish a temporal context so your team sees how your ideas have evolved. Elevate your mind map beyond just visuals with notes. Follow these steps to learn to add them to your mind map.

Step1Select the topic where you want to add a note.

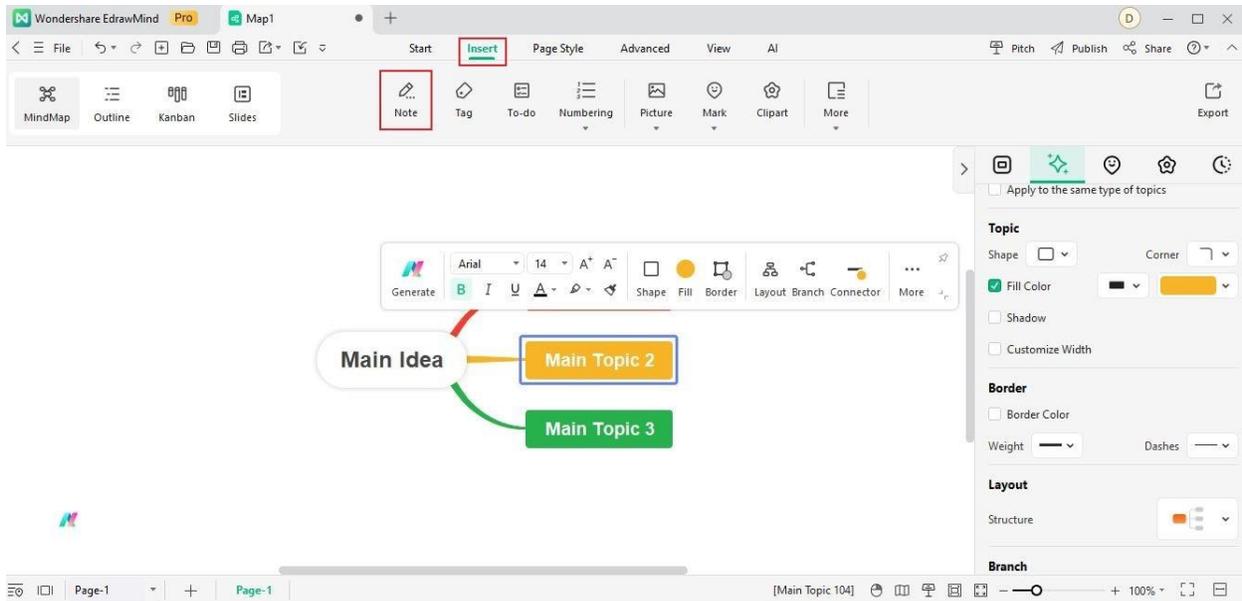

Step2Insert a note on the selected topic.

Here are the two methods for inserting a note on a topic:

- **Option 1: Right-click the topic, then select Note.**

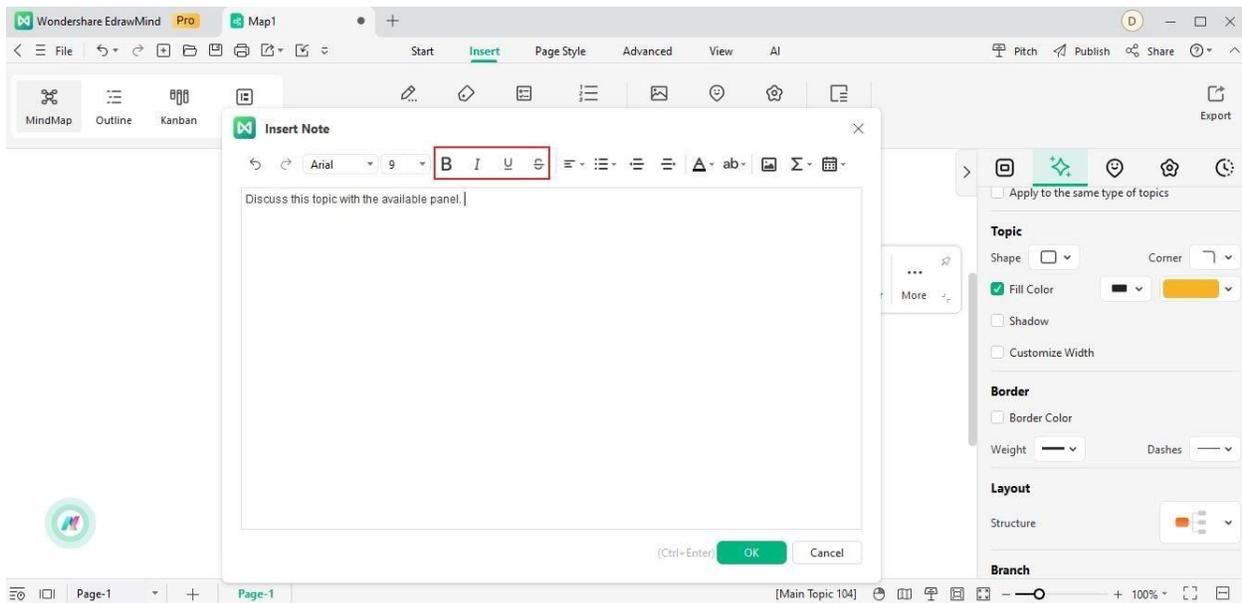

- **Option 2: Click the topic. Then, from the Insert tab, click the Note command button.**

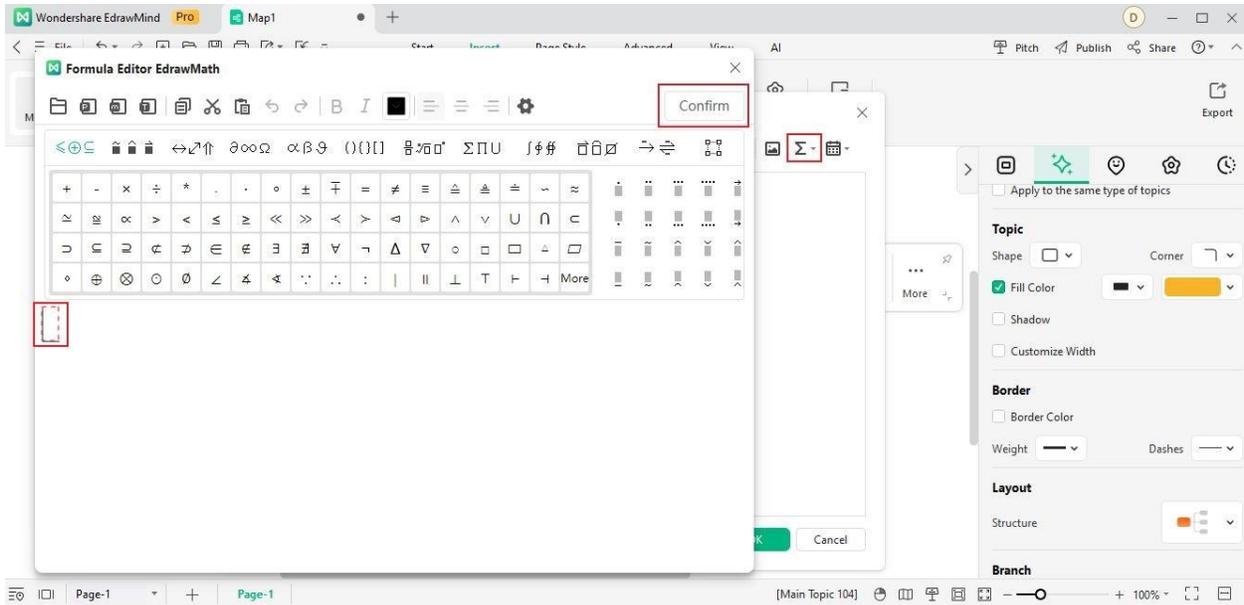

Step 3 Enter details in the Insert Note dialog box.

Here are the various types of details that you can include in a note, along with the steps on how to add them:

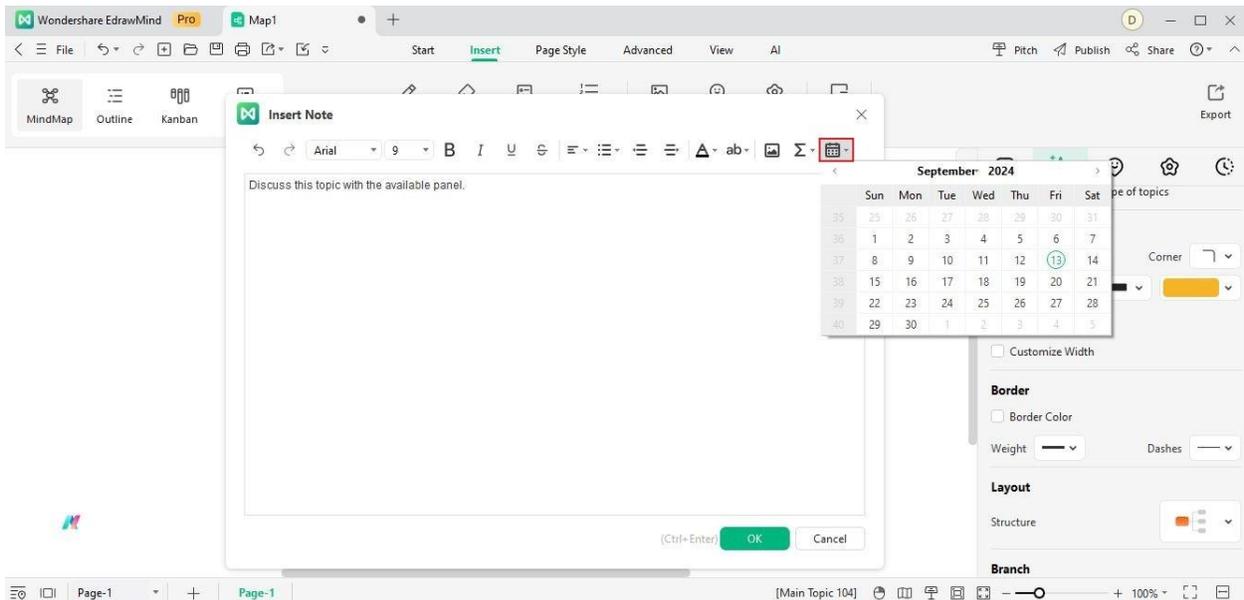

- **Text.** Enter your input in the text field. You can also change its font style, size, and typographical emphasis (Bold, Italic, Underline, and Strikethrough.)

- **Image.** Click the Picture icon in the Insert Note dialog box. Next, select and upload an image file from your local storage.
- **Formula.** Click the Formula icon in the Insert Note dialog box. Create the equation in the Formula Editor EdrawMath dialog box, and once done, click Confirm.

- **Date.** Click the Insert date time icon in the Insert Note dialogue box to insert the current date. Alternatively, if you wish to specify a different date, click the Insert date time dropdown list.

Step4Click OK in the Insert Note dialogue box after adding all the relevant information.

Tip: Upon adding a note, a note icon will appear on the right side of the selected topic. Hovering your cursor over this icon reveals its content.

Edit, Delete, or Move an Existing Note

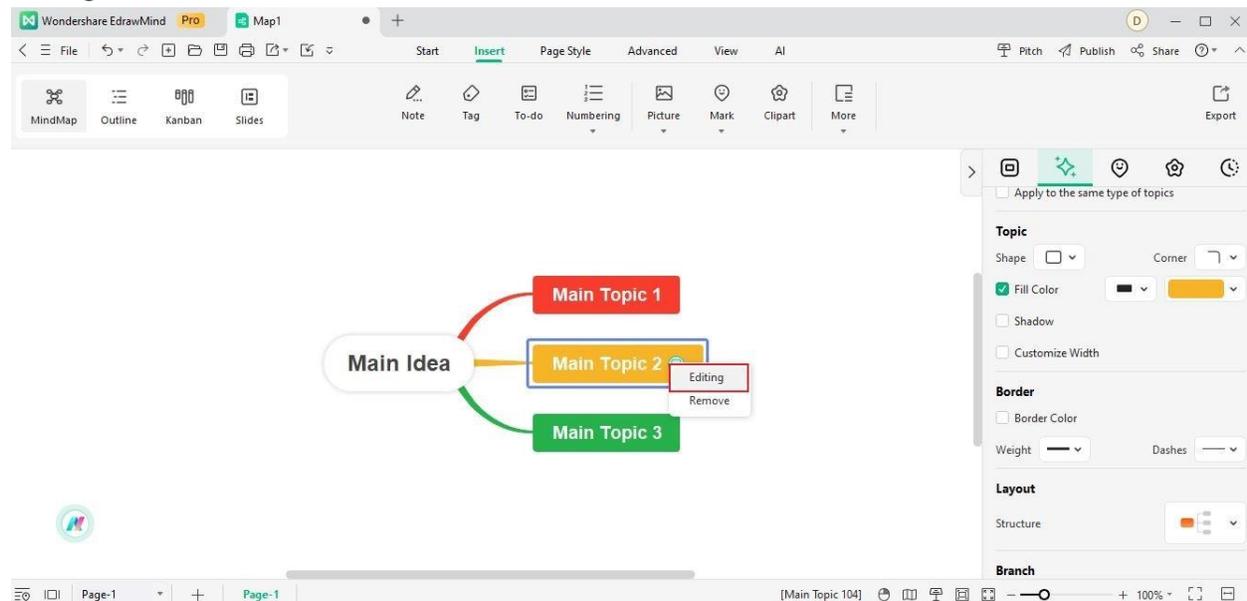

After adding a note to your mind map in EdrawMind, you can edit, delete, or move it as needed. These options allow you to customize them and ensure they are organized and relevant to your mind map's content. Learn more about how to perform these actions for efficient note management.

01 Edit a Note

Editing a note in your mind map can be helpful when you need to refine or update its details. For example, you may want to add details, correct a mistake, or revise the content to reflect new information.

Step1 Click the existing note icon in the topic. Alternatively, right-click the note icon, then select **Editing**.

Step2 Edit the content in the **Insert Note** dialogue box and click **OK** to apply the changes.

02 Remove the Note

Deleting an outdated, irrelevant, or unnecessary for your project can help streamline and declutter your work. Here are the steps to remove a note from your mind map.

Step1 Right-click on the existing note icon in the selected topic.

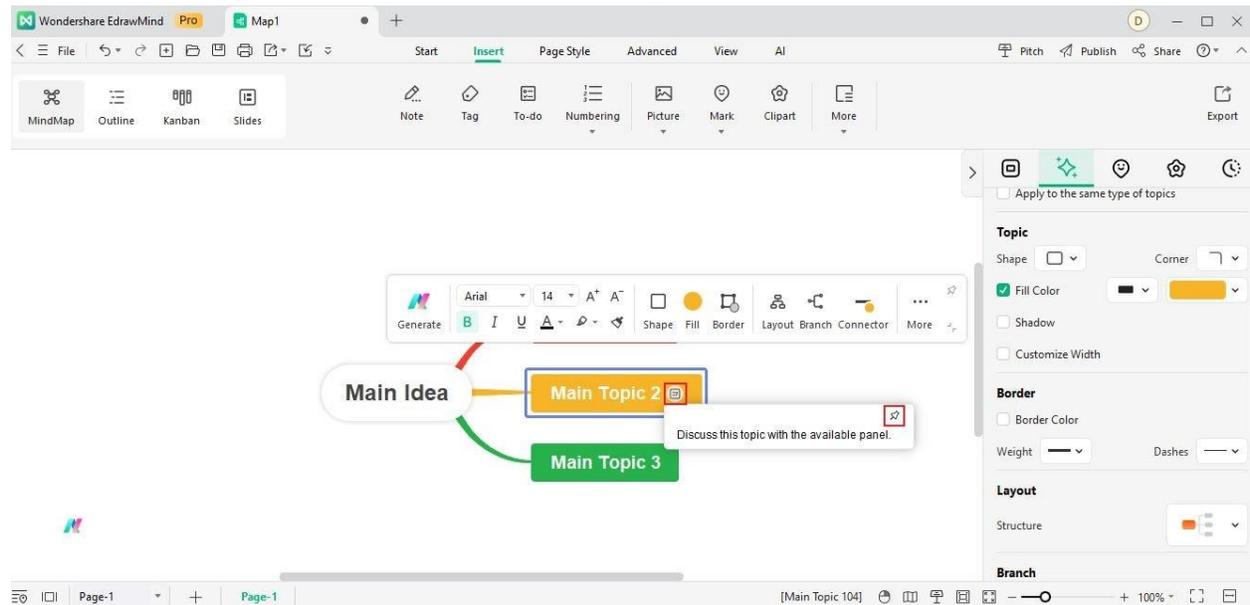

Step2 Select **Remove**.

03 Move the Note

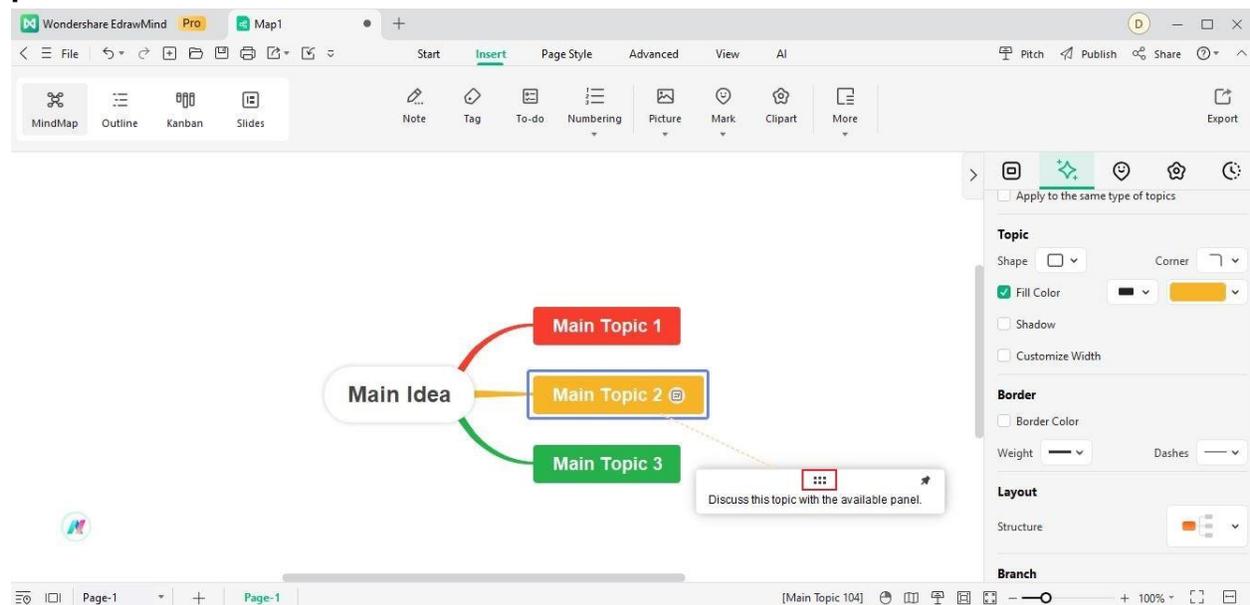

Move a note away from a topic to reorganize your mind map for better organization. Here are the steps to move it away from a topic and place it elsewhere in your mind map.

Step 1 Place your cursor over the existing note icon.

Step 2 Click the pin icon to anchor the note in place.

Step 3 Hover over the ... (horizontal ellipsis) and drag the note preview window to your preferred location on the canvas.

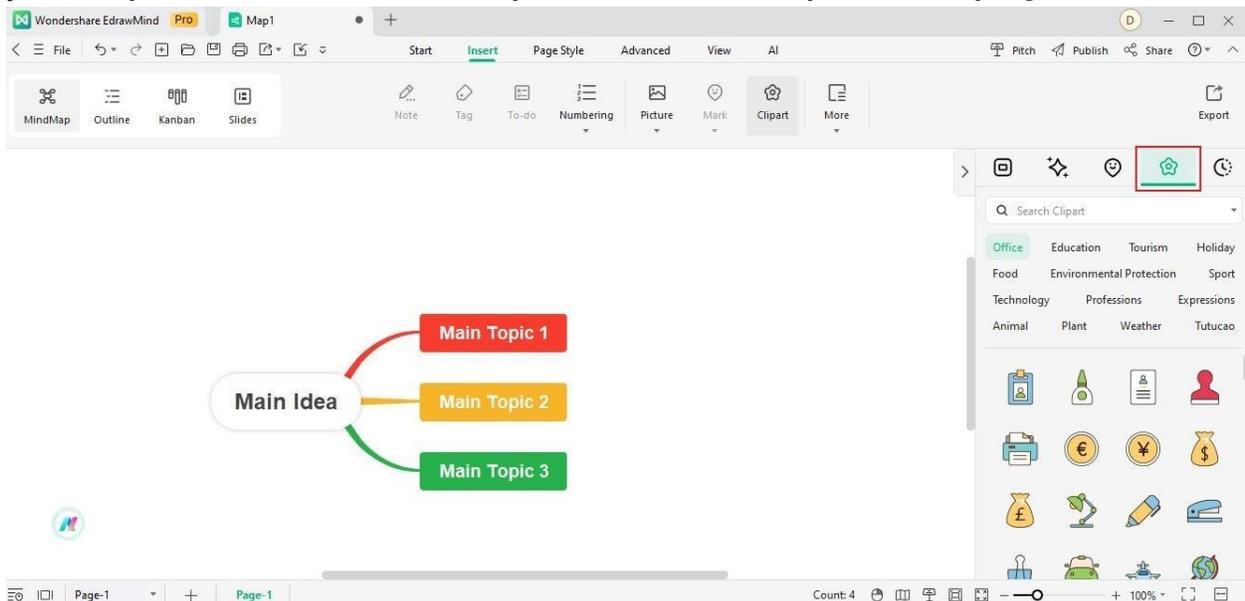

Note:
If you click the pin icon again, the note window will return to its original place.

Insert Clipart

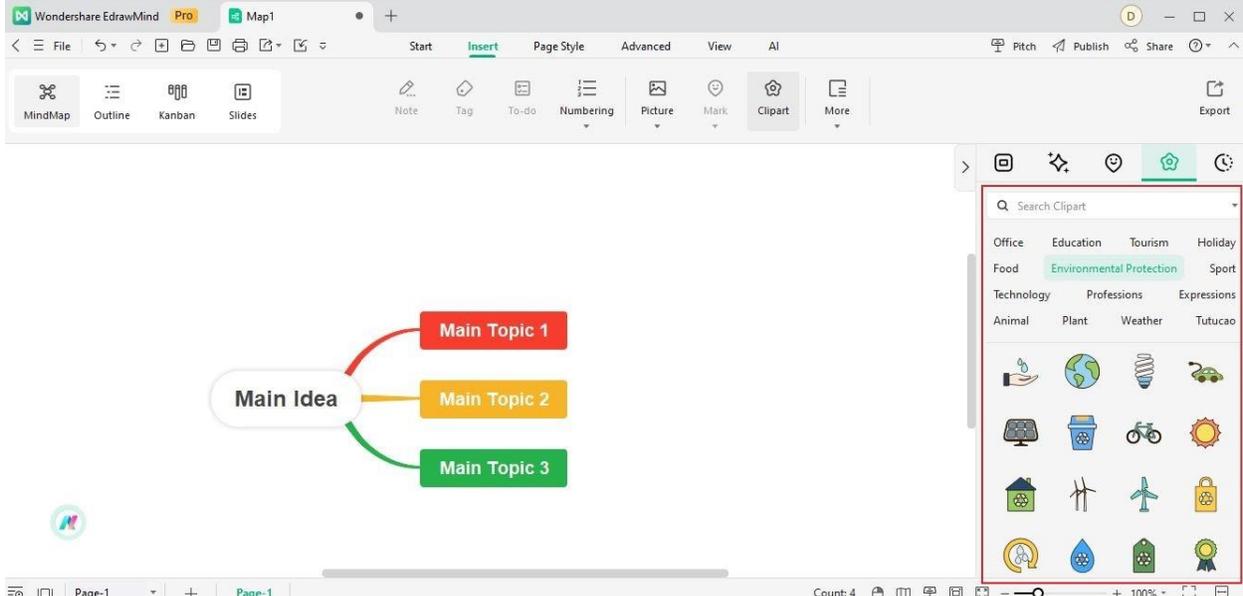

EdrawMind provides a rich material clipart library for users to use, and the material covers many fields such as education, office, tourism, food, technology, sport, and so much more.

Here's how to insert clipart with EdrawMind.

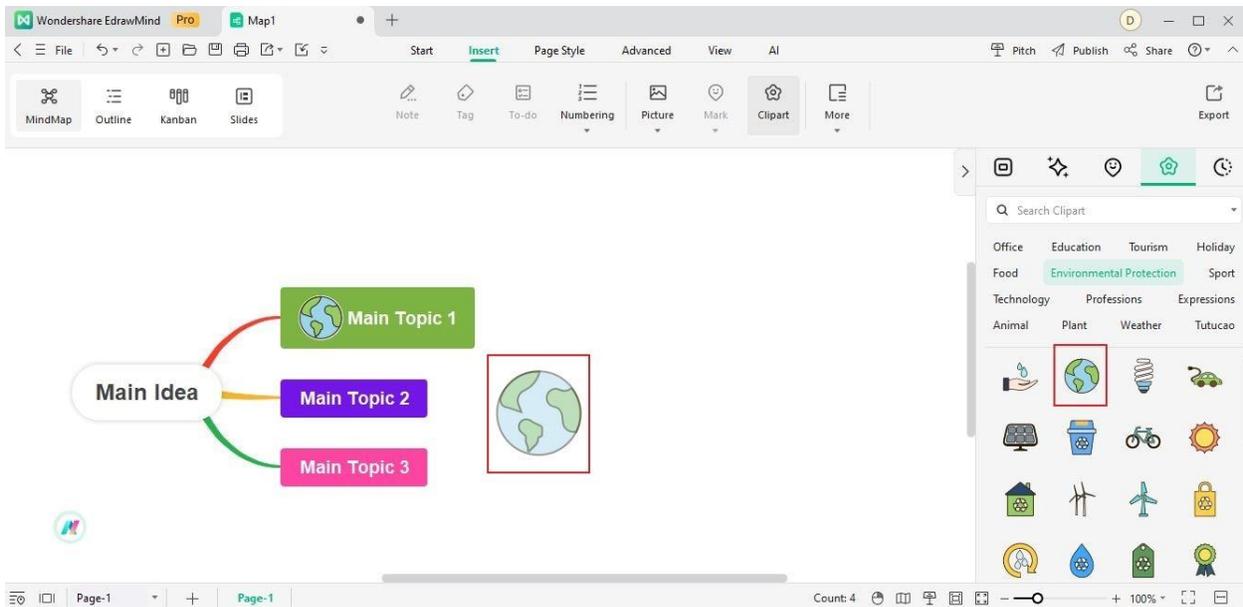

Step 1 Launch EdrawMind. Click Create to start a new project or Open to open the file saved on your computer. On EdrawMind's workspace, find and click Clipart at the top-right corner.

Step 2 There are many different types of libraries inside Clipart. Use the mouse wheel to scroll through the elements in the library and select your preferred clipart. Alternatively, you can also enter keywords in the search box of the Clipart library.

Step 3 Click the clipart to add it to the selected topic or drag the clipart with the mouse to any topic shape or blank area of the map.

Note:
Cliparts can be inserted anywhere around the subject text.

Insert Illustrations

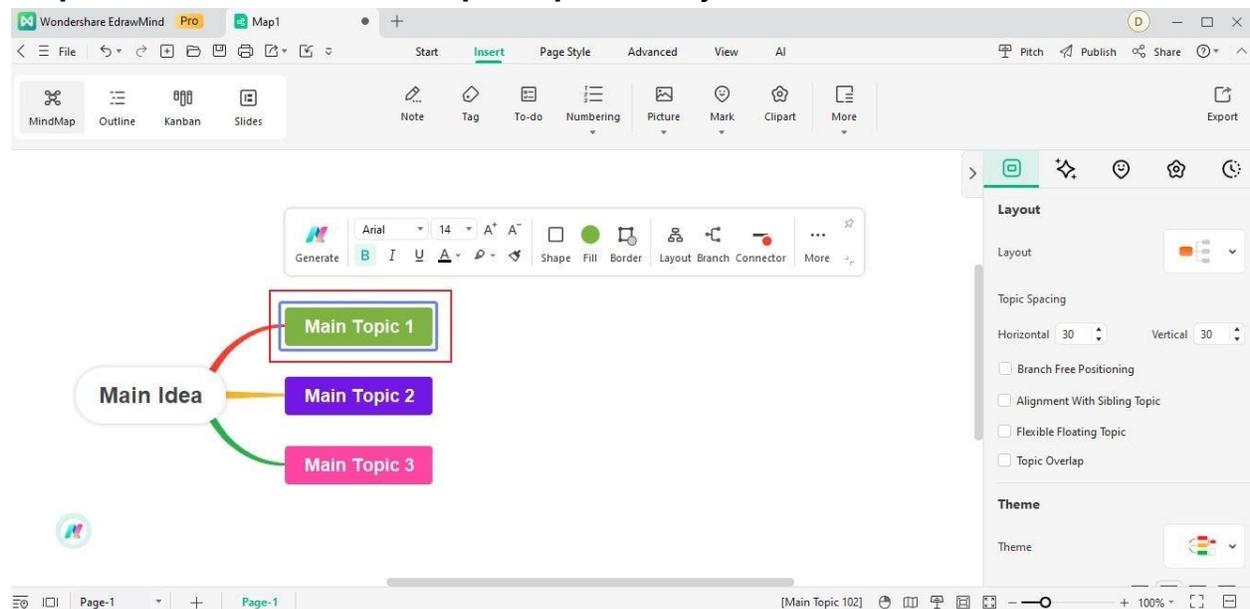

Marks or icons can make diagrams and mind maps more lucid and easier to understand. They can draw attention to key concepts, progress, or priority items. EdrawMind has marks in various categories, including priority, progress, portrait, star, flag, arrow, and symbol available.

You can also customize a group of icons for easier access, making your mind maps more engaging, persuasive, and effective.

01 Add Mark Into a Map

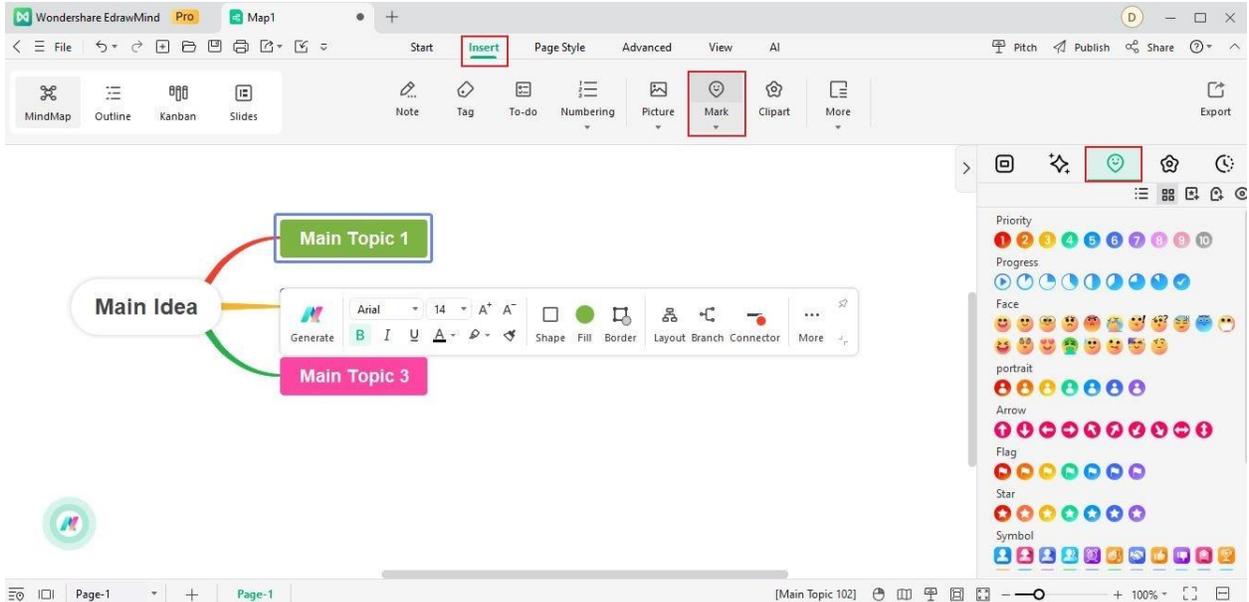

Inserting a mark or icon into a topic or an entire mind map is easy, and here's how to do it.

Step1Select the entire mind map or topic where you want to add a mark.

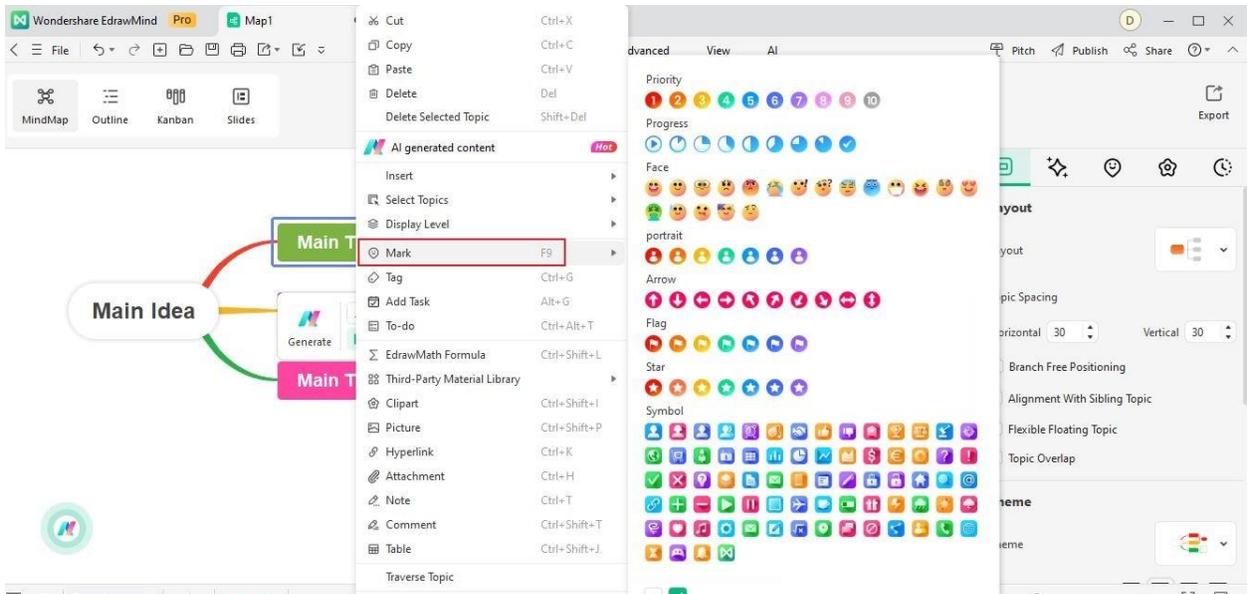

Step2Here are four different ways to access the Mark command button:

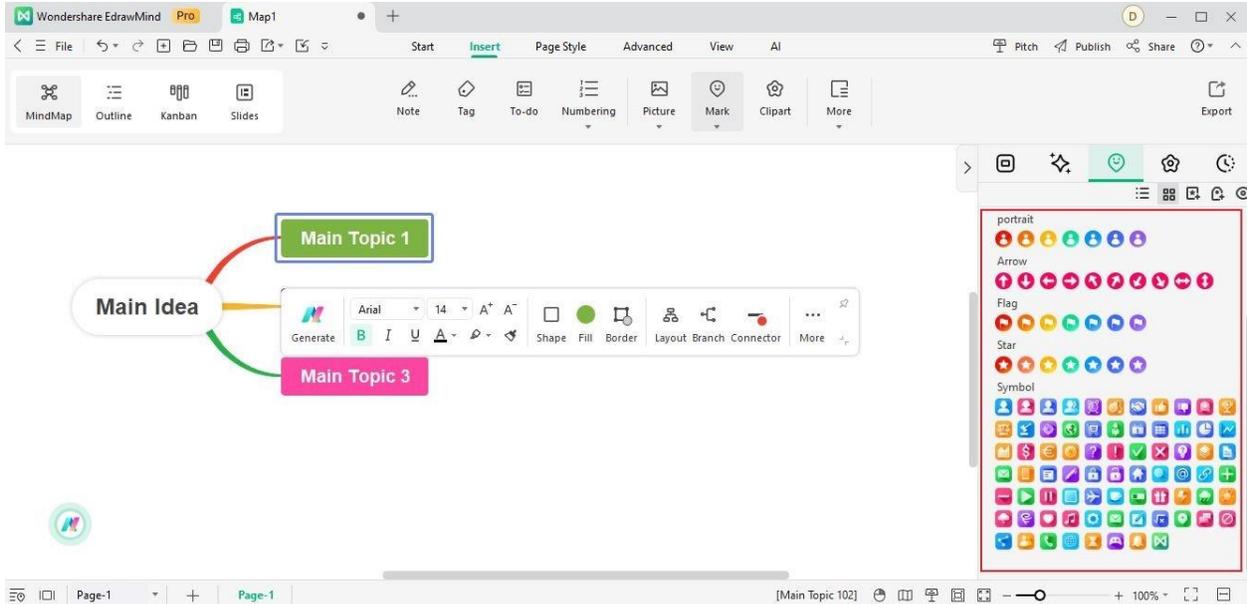

- Press F9 on your keyboard.
- Click the Mark dropdown list under the Insert tab bar.
- Click the Mark tab bar in the right panel.

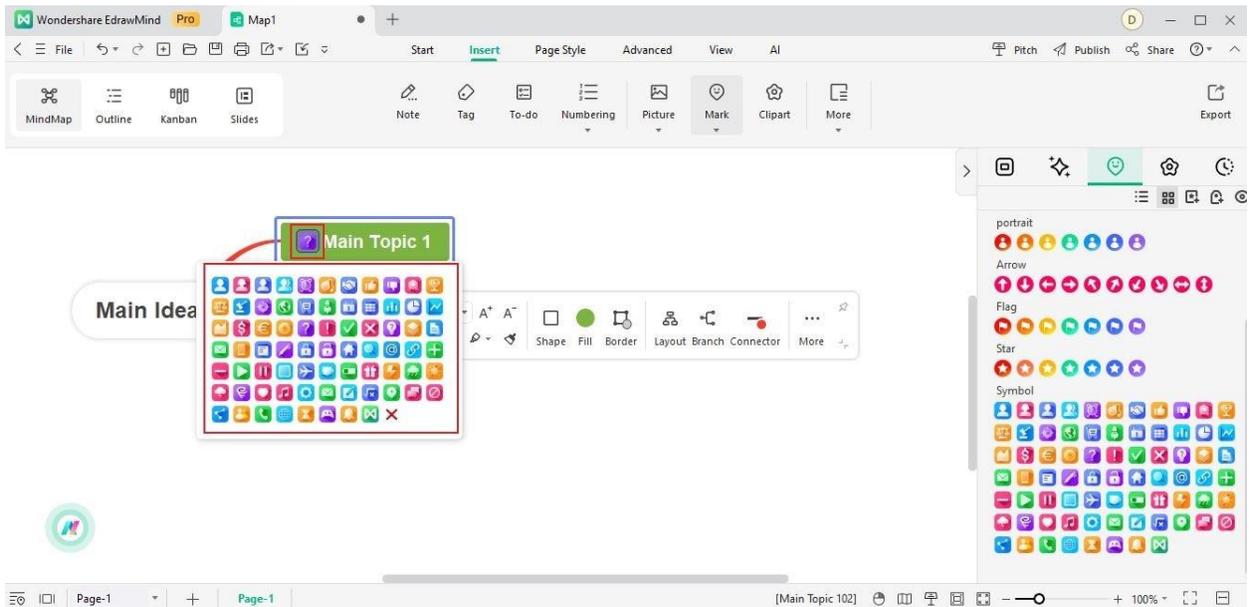

- **Right-click on the Topic and then choose Mark.**

Step3 Browse the available items under Priority, Progress, Face, Arrow, Flag, Star, and Symbol, then click the one that best suits your needs.

Tip: Once you have added an icon to a topic, you can easily switch to other icons from the same category. To do so, click on the added icon, and its category will appear below.

You can click on any icon to replace or delete it from there. This feature allows you to update the icons quickly and seamlessly in your mind map or diagram without starting again from scratch.

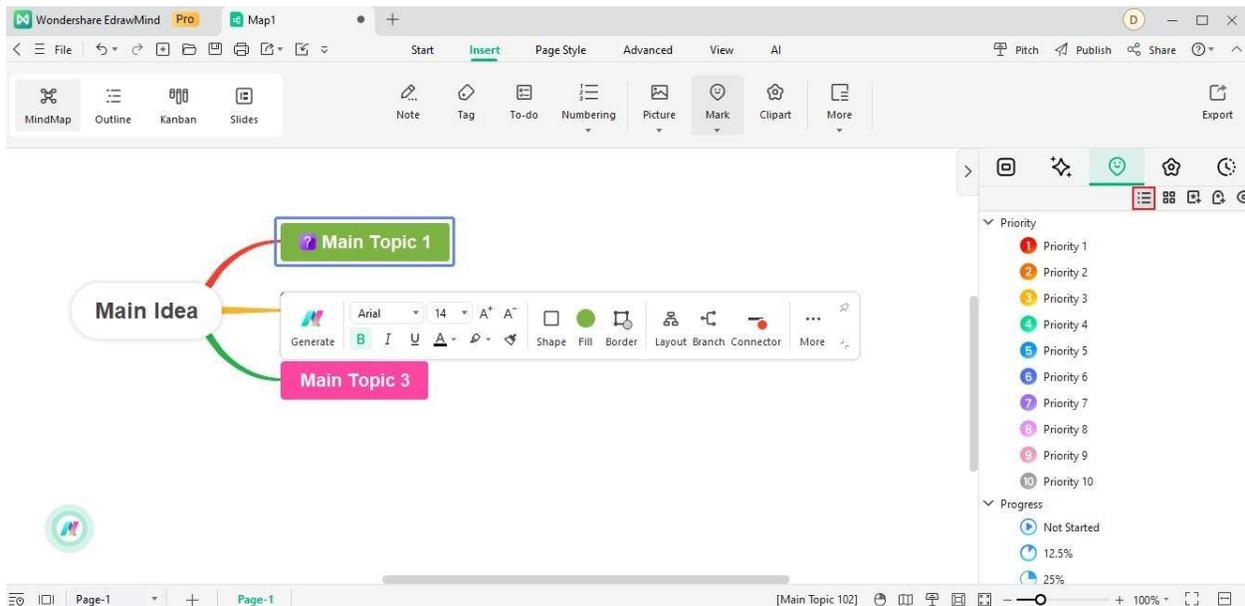

Note:

Except for Symbol, you can only attach a single mark from each category to a topic. But you can add several icons from various mark groups to the same topic. It ensures that each mark effectively serves its purpose without overwhelming the content. You should choose the most appropriate mark for each instance and use it judiciously. By limiting the number of marks you can use per category, EdrawMind encourages users to intentionally use icons, leading to more focused and impactful diagrams and mind maps.

02 Manage Icon Group

The Mark tab bar in EdrawMind offers two different ways to view the icons: Icon list view and Icon tile view. This feature provides greater flexibility in organizing and managing the icons, ensuring a more efficient and personalized diagramming experience. Click the display command buttons below the Mark tab bar to switch between the two.

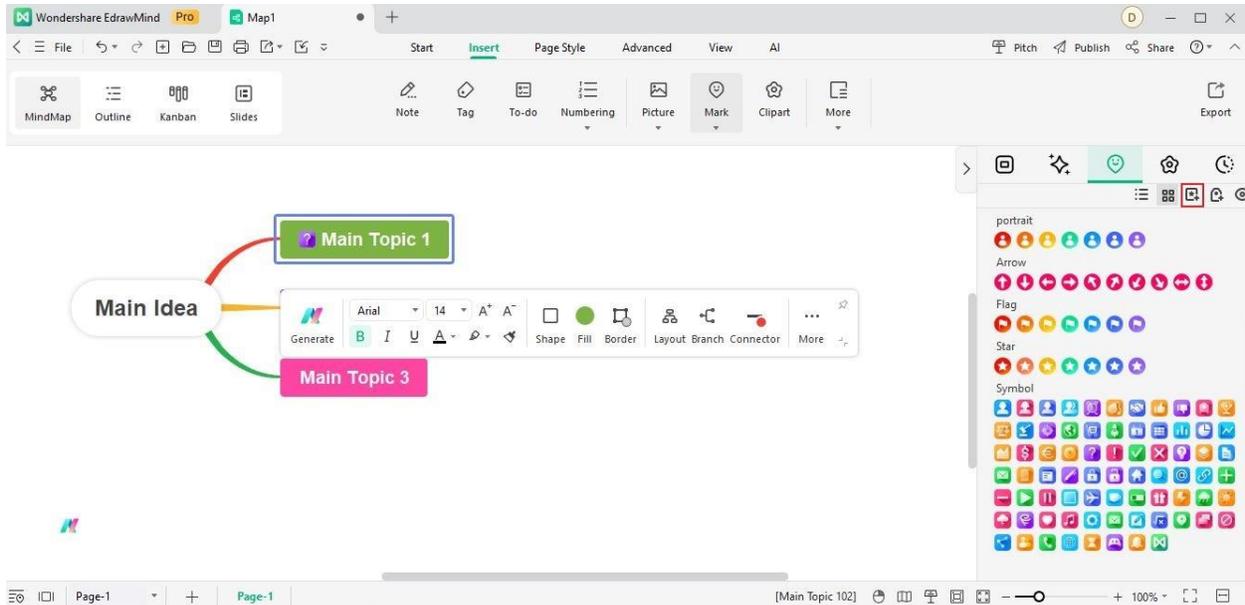

- With the Icon list view, you can see all your marks in a vertical list format, making it easy to browse through and select the desired mark.

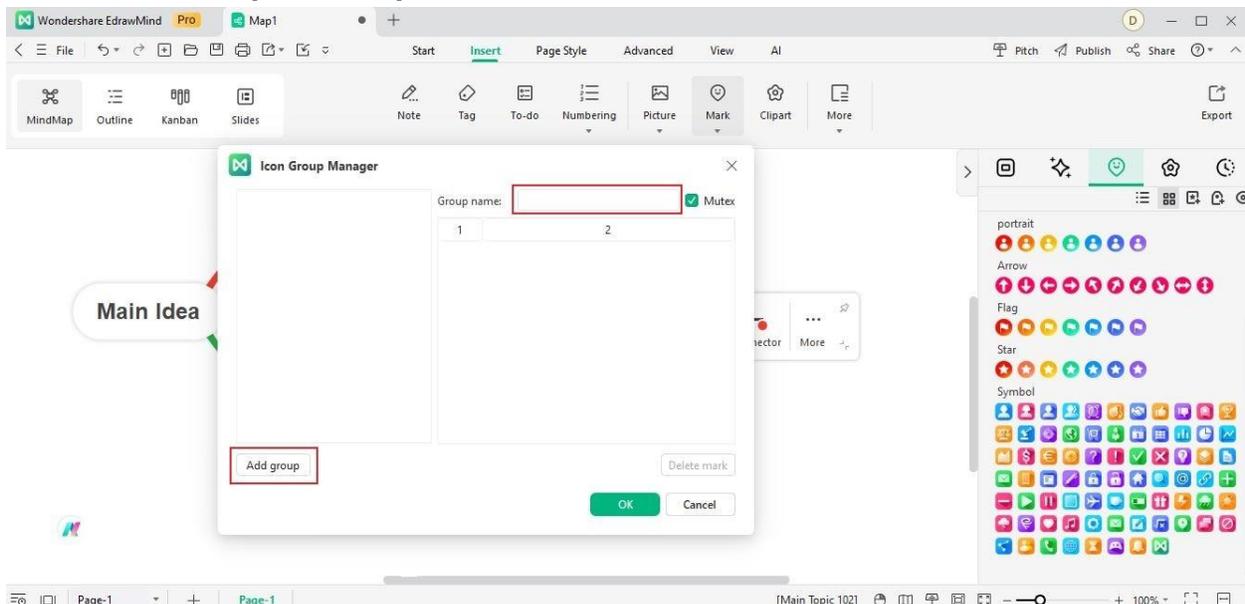

03 Add Icon Group

Here are the steps to creating your icon group.

Step 1 Click the Mark Manager icon in the upper right corner below the Mark tab group.

Step2 Click Add Group button in the Icon Group Manager dialogue box and enter a name in the Group Name input field.

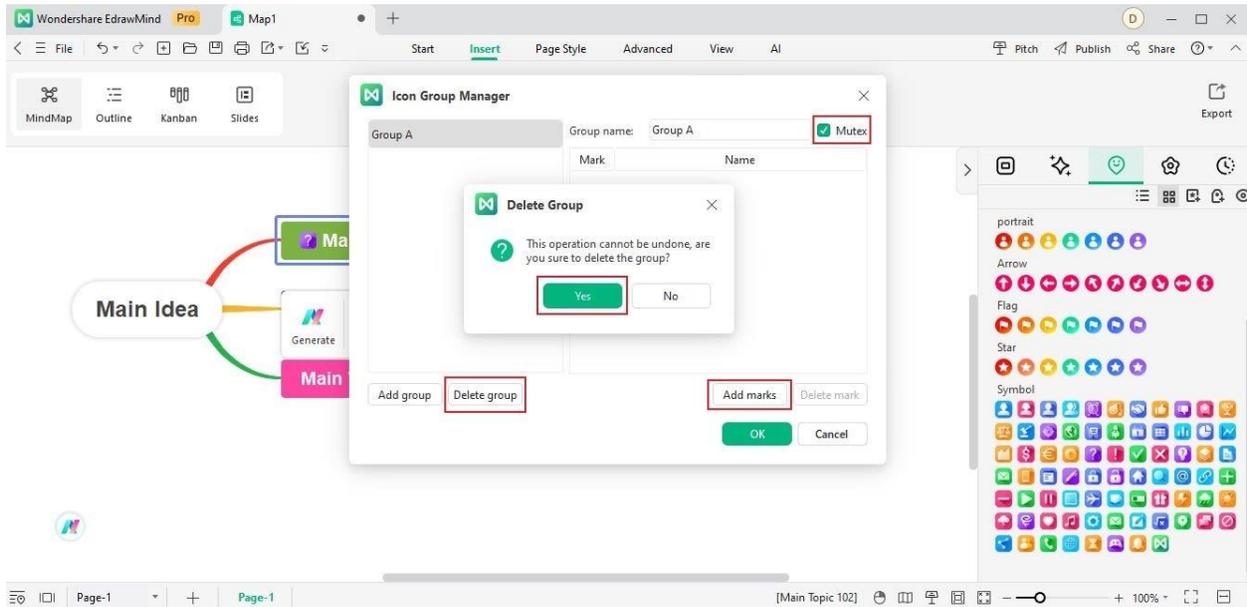

Step3 Click OK once done with the necessary changes, then wait for the icon group to reflect in the Icon Group Manager dialogue box.

Here are the methods of managing icon groups in the Icon Group Manager box.

- Select the Mutex checkbox in the upper right corner of the Icon Group Manager dialogue box to define the marking icons as mutually exclusive.
- Click Add marks to open your local device storage, and select the icon you want to upload in EdrawMind.

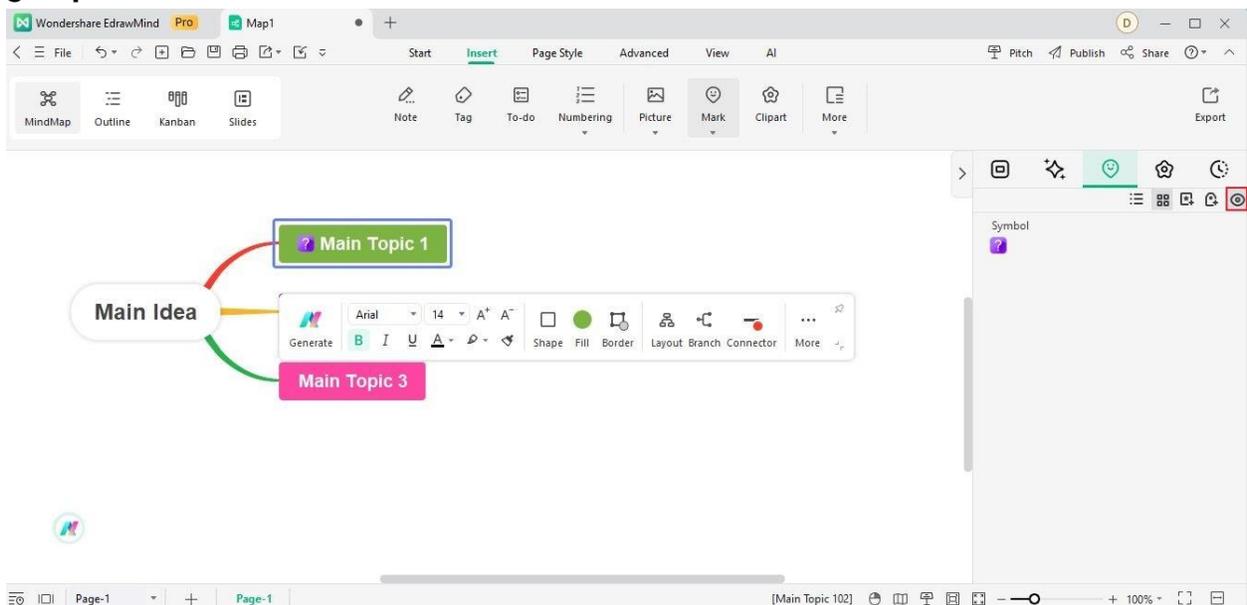

- Click Delete Group to delete the entire mark group, then select Yes in the Delete Group dialogue box.

04 Hide Unused Marks

The Hide unused marks function lets you mask idle icons, leaving only the ones you work with. It can help you stay focused and avoid getting sidetracked by unnecessary visual elements.

Step 1 Click the Hide unused marks icon in the upper right corner below the Mark tab group to hide or reveal the unused marks.

Insert Tags

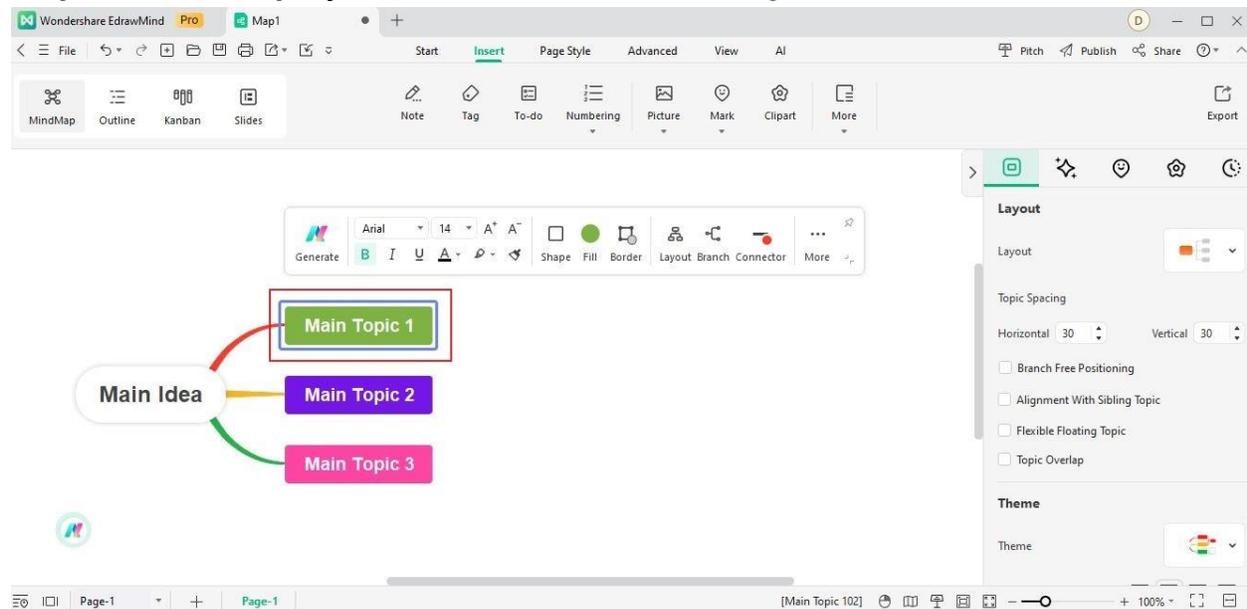

A tag in EdrawMind is a powerful tool that adds contextual information to your mind map. Located below the topic, it can be keywords, labels, dates, people, locations, or a short supplementary description.

This feature simplifies the process of searching, filtering, and grouping similar topics, making your mind map more intuitive and easier to navigate. Using tags to group related ideas, you can quickly identify critical themes and connections, saving time and streamlining your creative process.

01 Create or Manage Tag Group

Want to add more context and organization to your mind maps? Here's how to generate a tag in EdrawMind.

Step1 Select the topic you want to label or attach a tag.

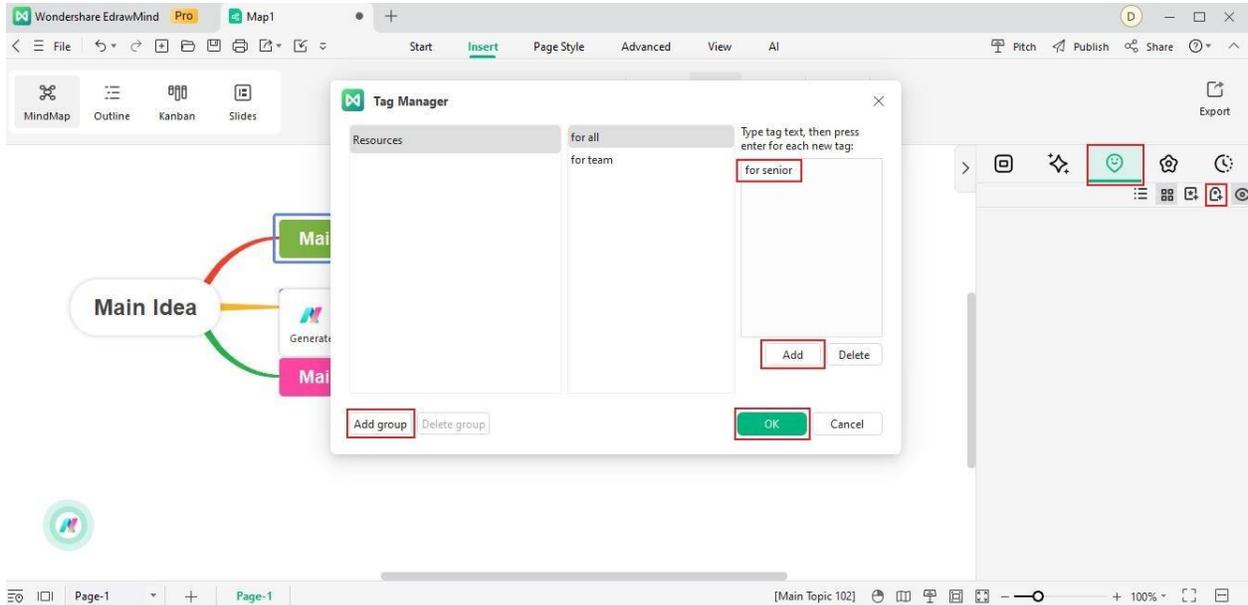

Step2 Click the Mark tab bar in the right panel, and choose Tag Manager in the upper right corner.

Step3 Click Add group in the lower left corner of the Tag Manager dialogue box.

Step4 Enter your desired tag into the text input field, then press Enter on your keyboard for each new tag.

Step5 Next, click Add on the right side of the Tag Manager dialogue box to add the tag to its respective group.

Step6 Click OK to confirm your changes after creating the tag groups. Then you will add tag groups at the bottom of the Icon list view under the Mark tab bar.

Note:

To delete a tag group, repeat steps one and two. Next, select a tag group, click Delete group, then click Yes in the pop-up window.

02 Add a Tag to a Topic

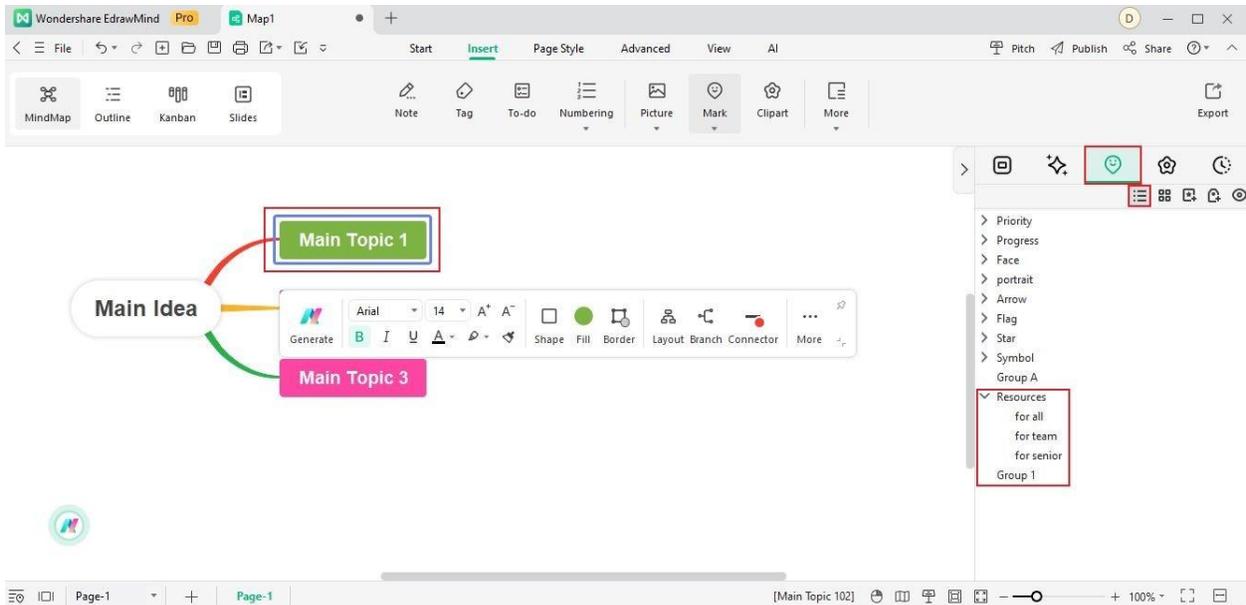

Follow these methods to tag a specific topic in your mind map.

Method 1: Use Icon List View

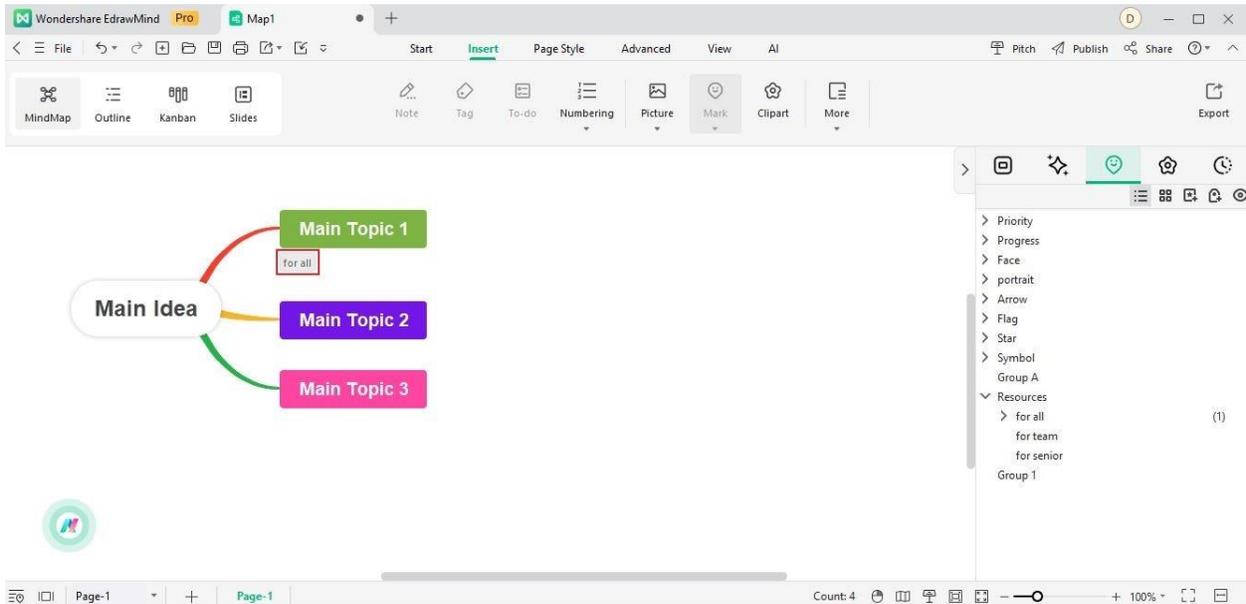

Step1 Select the topic where you want to add a tag.

Step2 Click the Mark tab bar in the right-hand panel, and choose Icon list view.

Step3 Select a tag you generated beforehand in the Tag Manager dialogue box or the default tags in Edrawmind.

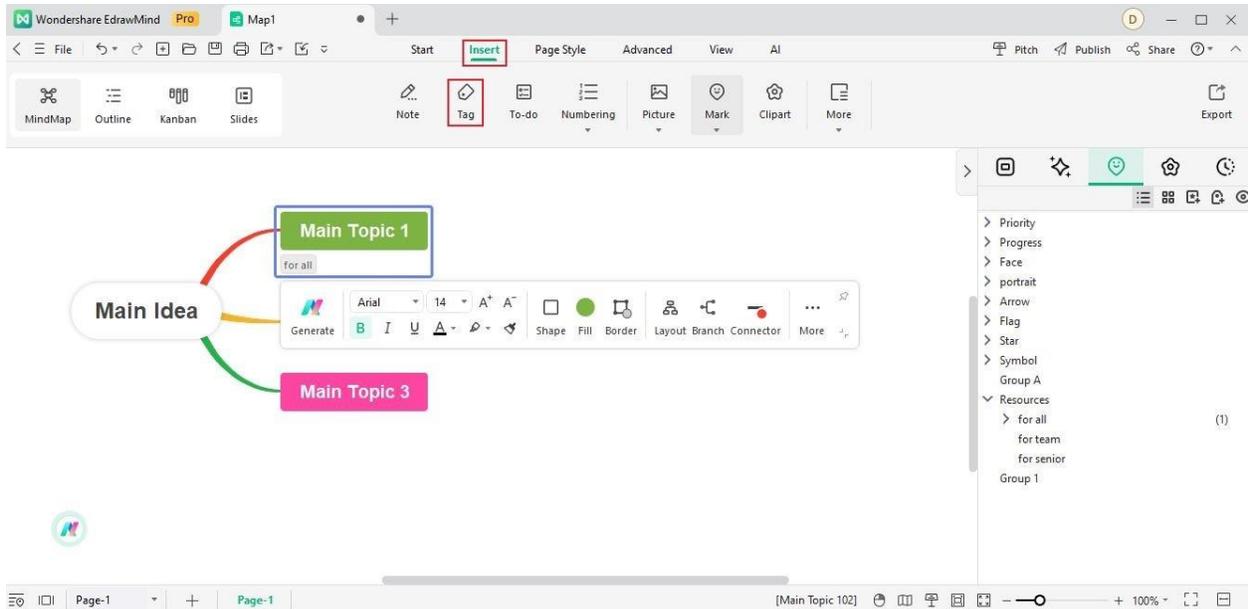

Step 4 The selected tag will appear at the bottom of the chosen topic.

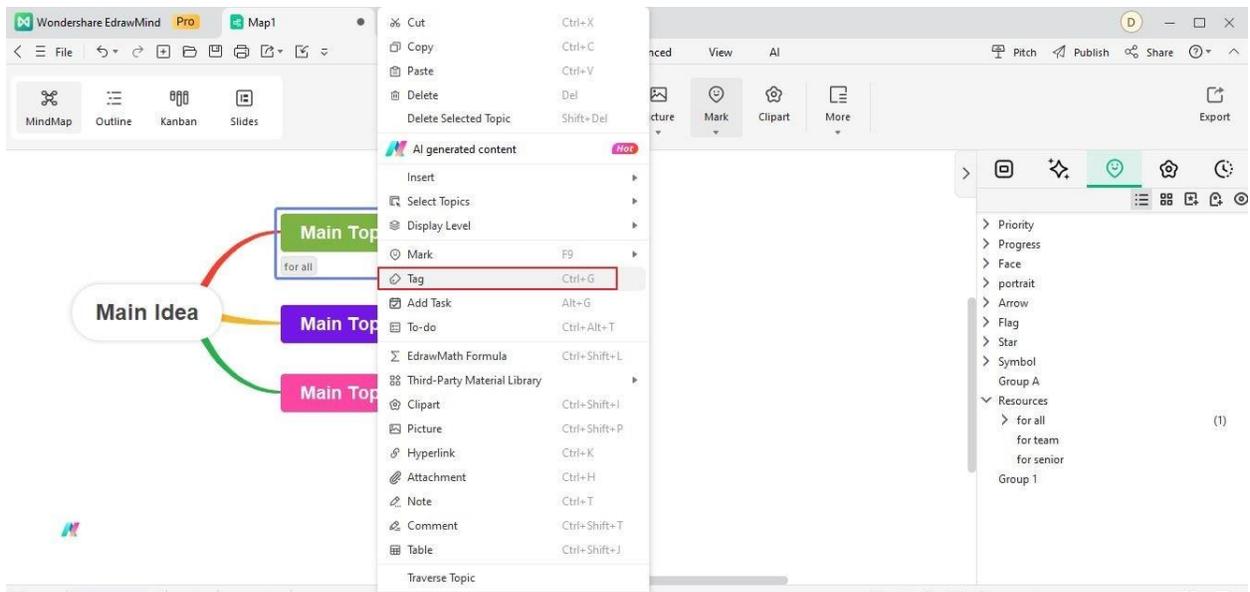

Method 2: Through the Insert Menu

Select a topic. In the Insert menu, click Tag.

Method 3: Right Click a Topic

Step1 Right-click on the topic, then choose Tag.

Step2 Enter your preferred tag in the text input field and choose your desired color. Press Enter on your keyboard to save the tag in the topic.

Add Relationship Lines

Relationship lines are essential for creating a clear and organized flow of information. They establish connections between ideas or concepts and help you visualize their links. You can customize these lines to match your specific preferences.

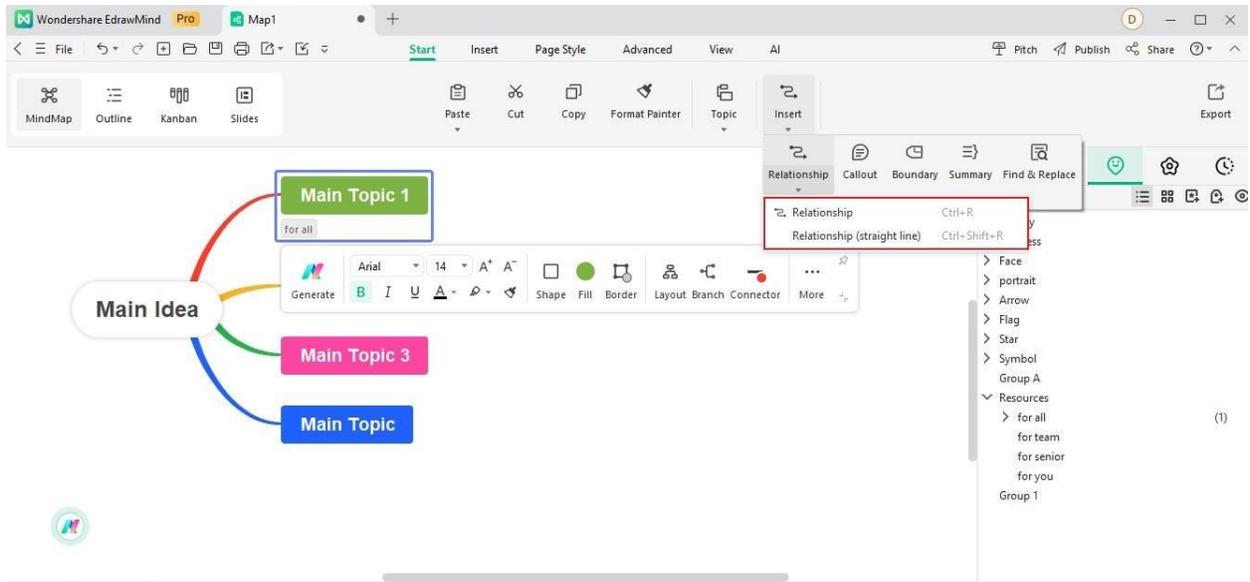

Follow the steps below to improve the clarity and coherence of your ideas, which results in more effective communication and a better understanding of your ideas. By doing so, you can keep your audience engaged and focused on the information you're presenting.

Step1 Choose the topic to be the starting point for the connection.

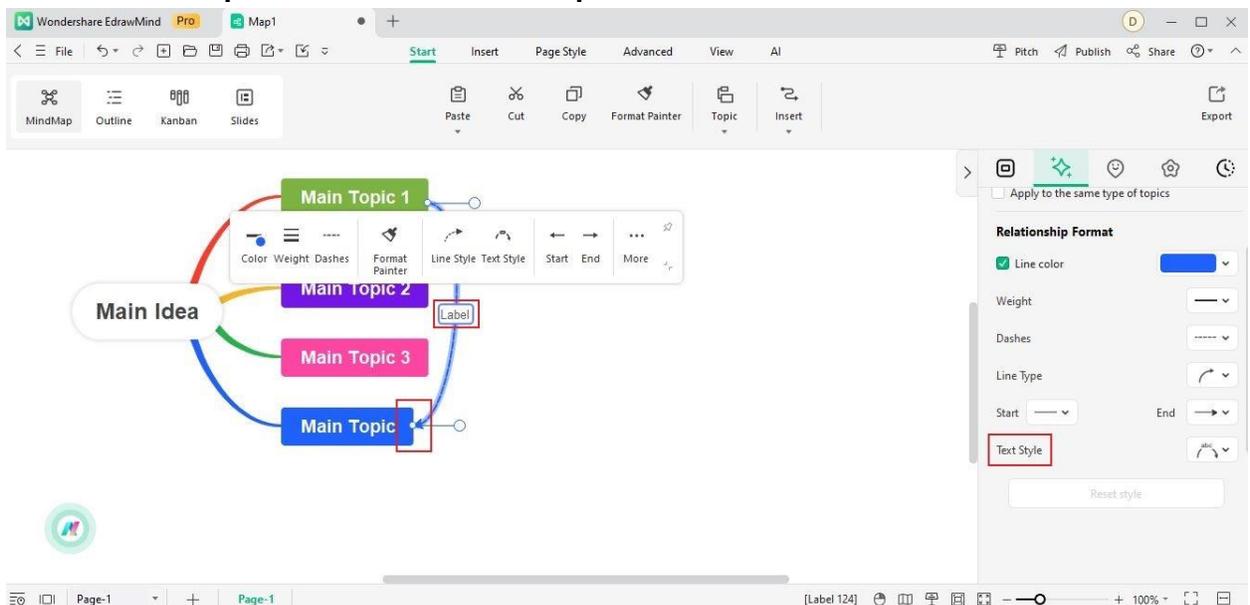

Step2 Add a relationship line using one of two available methods:

- Option 1: Access the Start tab, then click the Insert > Relationship command button.
- Option 2: Go to the Start tab. Then click the Relationship dropdown list and select a relevant relationship line style.

Step3 Drag the cursor from the starting topic to the next topic you want to connect. Then, click on the second topic to insert the relationship line.

Step4 Click Label, and enter a description in the text field to identify the relationship line.

Tip:

Click the Text Style dropdown list in the Relationship Format section to modify the style. Next, select the desired appearance of the text in the Relationship.

Relationship Format

Customizing the design of relationship lines enhances visual appeal and functionality for a more effective and insightful mind map. For instance, different line types, thicknesses, and colors can help you convey specific meanings and correlations between ideas on the map. It

can help you and your audience better understand and remember the linkages, especially when dealing with complex or interconnected ideas.

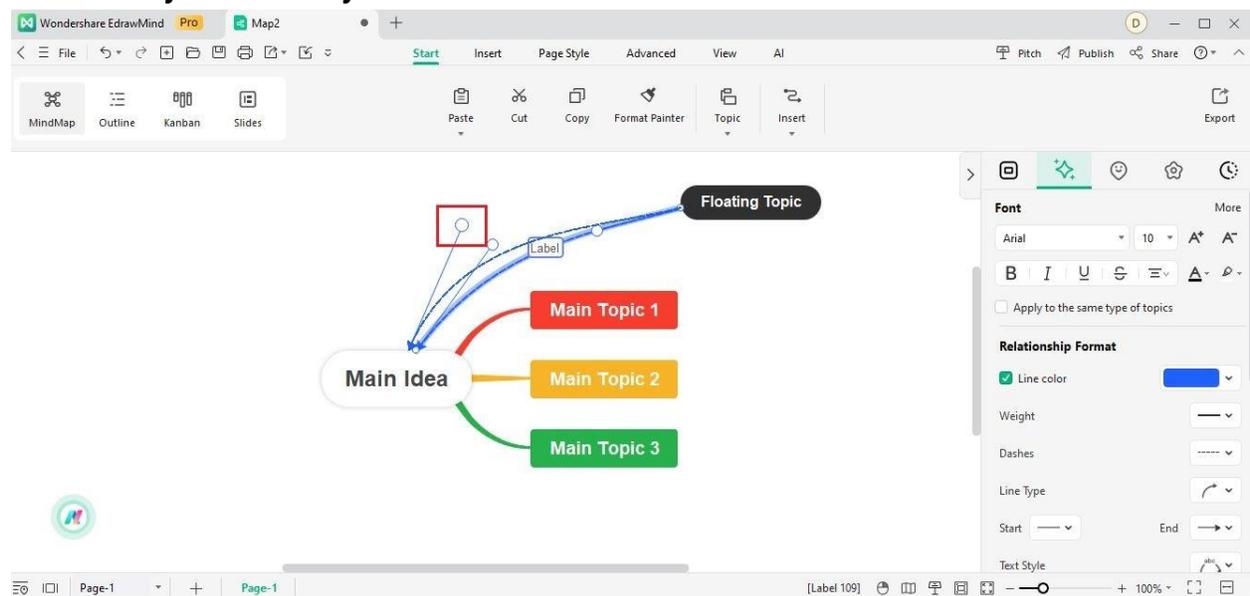

Follow the steps outlined below for each tool to achieve this level of clarity and organization in your mind maps.

1. Adjust Curvature

It can help you make the most of the canvas space and prevent clutter caused by overlapping lines.

Step1Click a relationship line.

Step2Next, locate the edit points (indicated by a small white circular shape) and drag them until you achieve your desired arc.

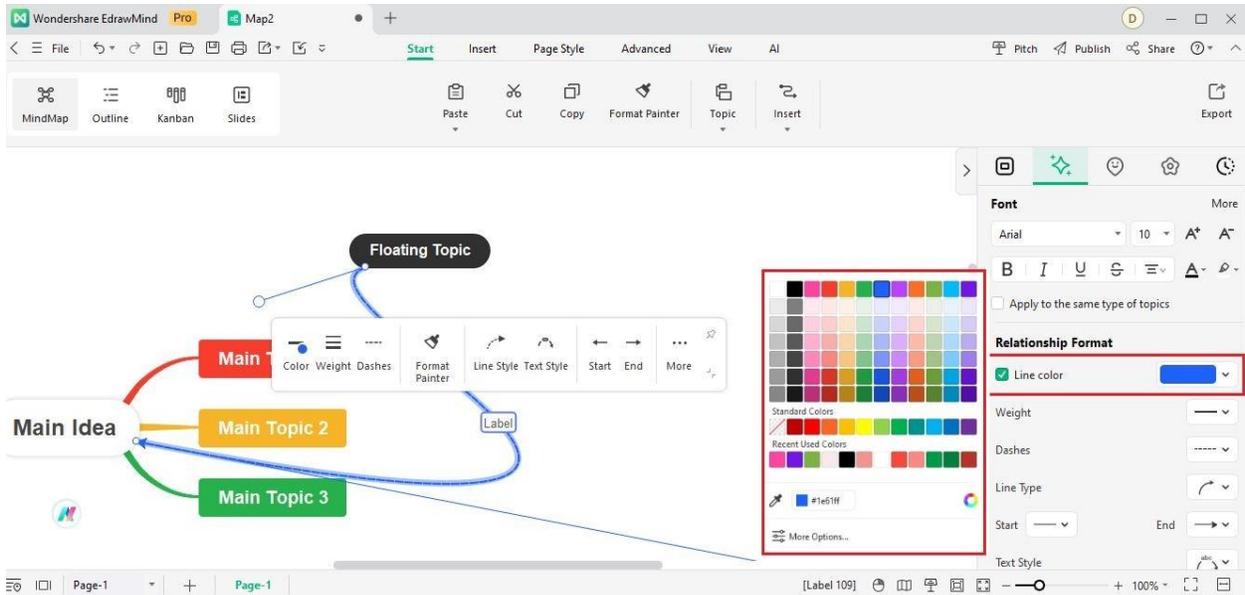

2. Line Color

Using a different line color can highlight a specific category. It can also help you visually differentiate between associations and add meaning.

Step1Click the relationship line.

Step2Click the Line color dropdown list in the Relationship Format section.

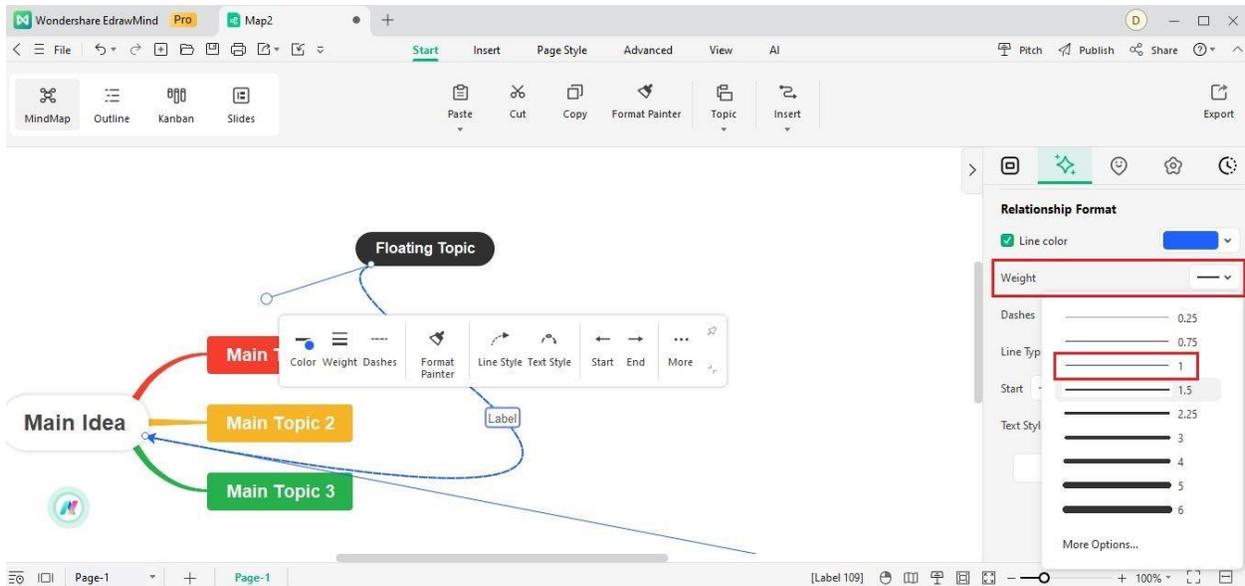

Step3 Select a color from the color palette. Alternatively, click More Colors to specify the HSV color scale.

3. Weight

Using a thicker line can indicate a more significant relationship. Conversely, a thinner line can imply a weaker or less meaningful connection.

Step1 Click to choose a relationship line.

Step2 Click the Weight dropdown list in the Relationship Format section, and select the line width.

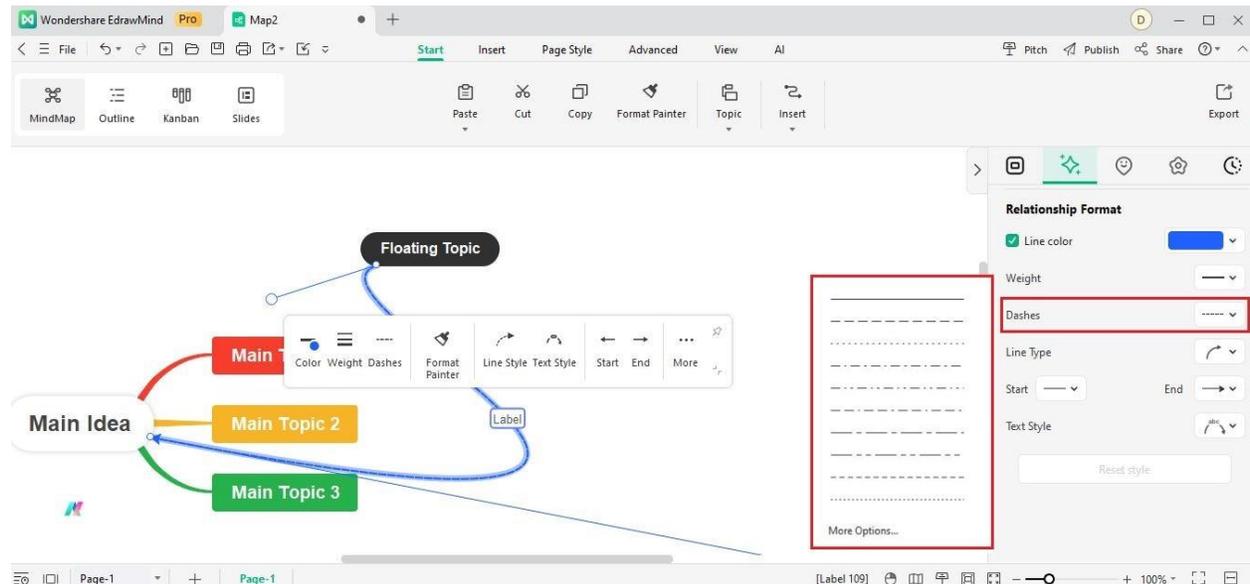

4. Dashes

Using a dashed line can indicate a temporary or uncertain relationship between elements. A solid line can imply a permanent or more established connection.

Step1Click the relationship line.

Step2Click the Dashes dropdown list in the Relationship Format section, then select whatever style you want the line to be.

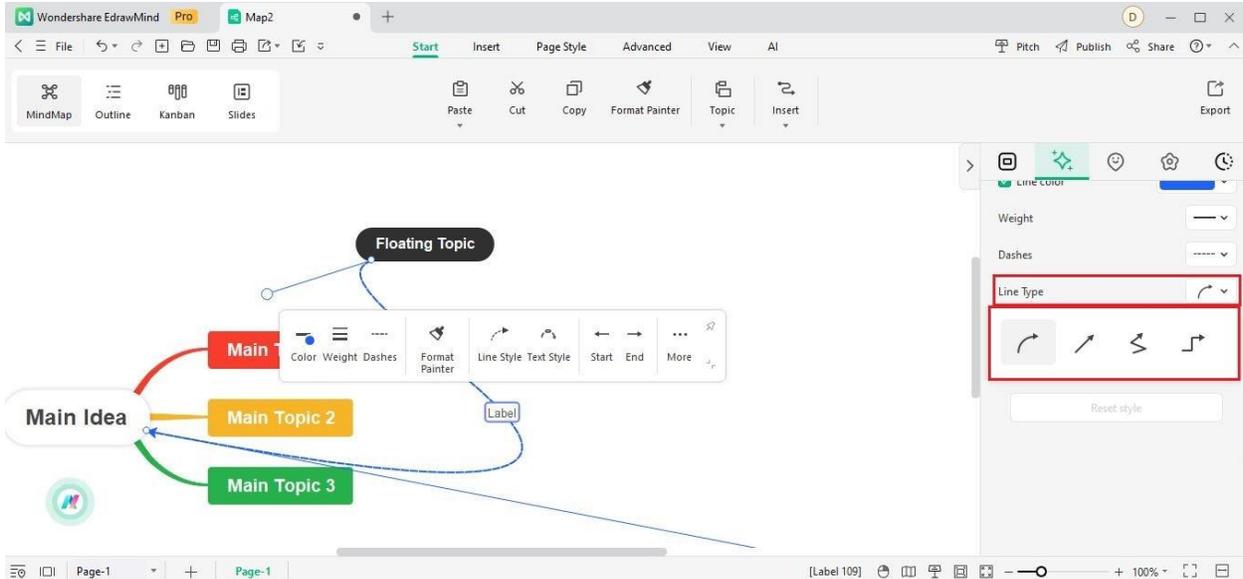

5. Line Type

Curved lines give the mind map a softer and more organic look. Straight lines can indicate a direct connection between two ideas. Zigzag lines may be helpful when conveying more dynamic or unconventional associations between different concepts.

Step1Click the relationship line.

Step2Click the Line Type dropdown list in the Relationship Format section, then select the type of line you want.

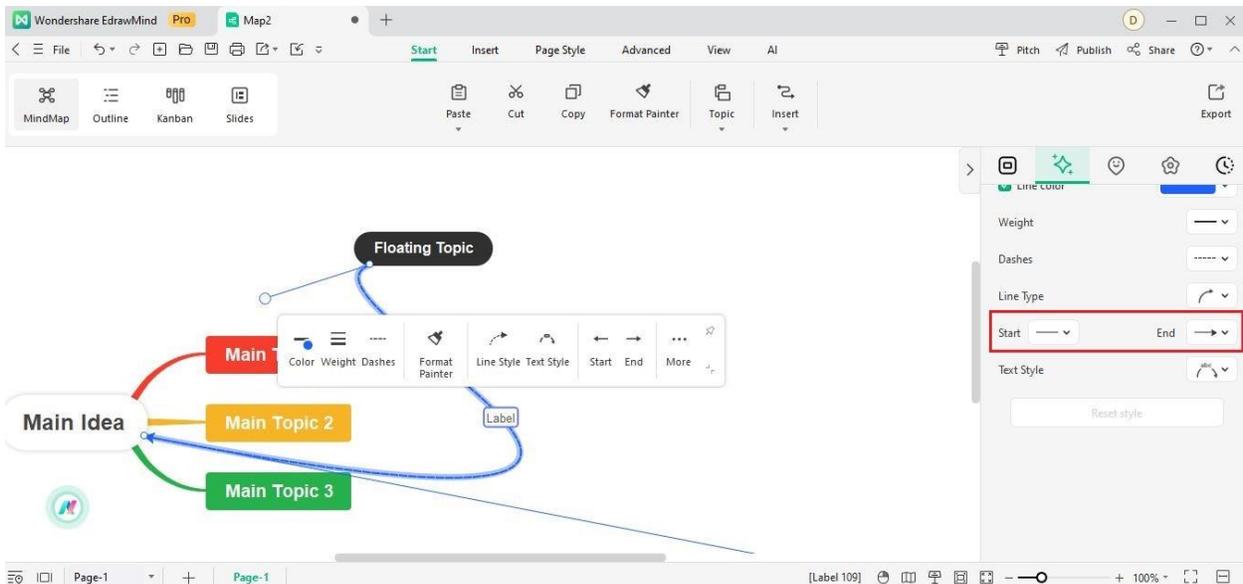

6. Start and End

Customizing the start and end of the relationship arrow in a mind map by indicating an arrowhead can help your team or audience better understand the direction of the connection. This visual cue can help clarify the starting point and the end point, making it easier to follow the flow of ideas and understand relationships within the map.

Step1Click the relationship line.

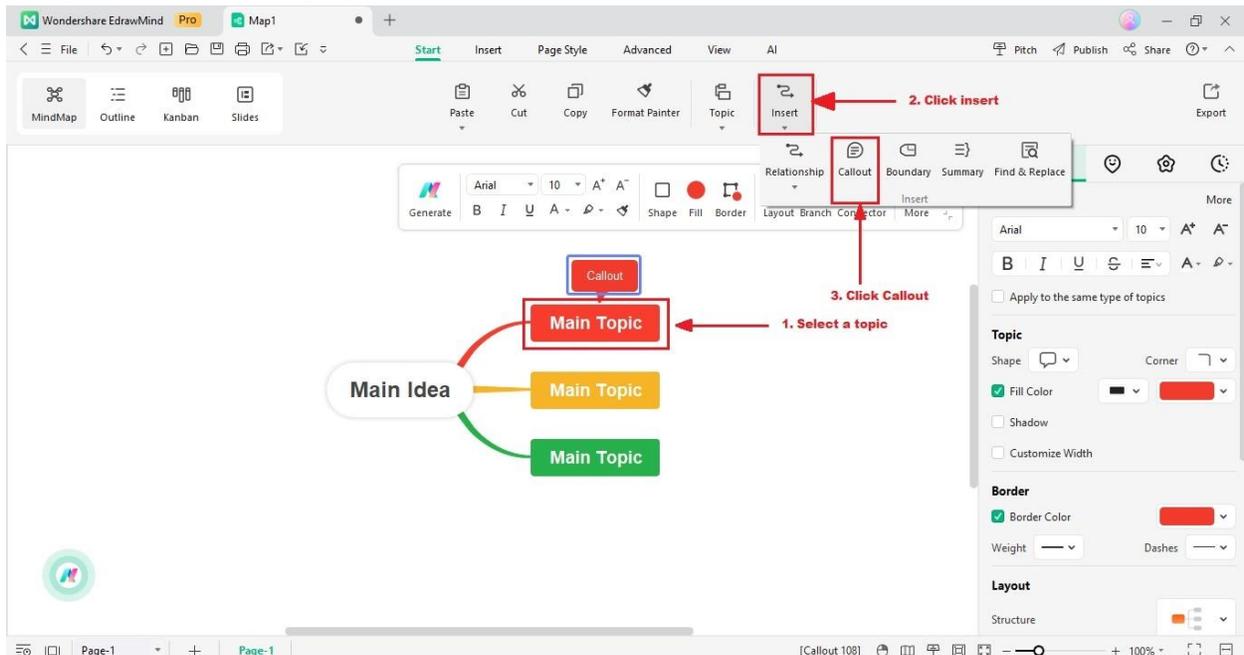

Step2Click the Start and End dropdown list in the Relationship Format section, then select the arrowhead suitable for the map.

Insert Callouts

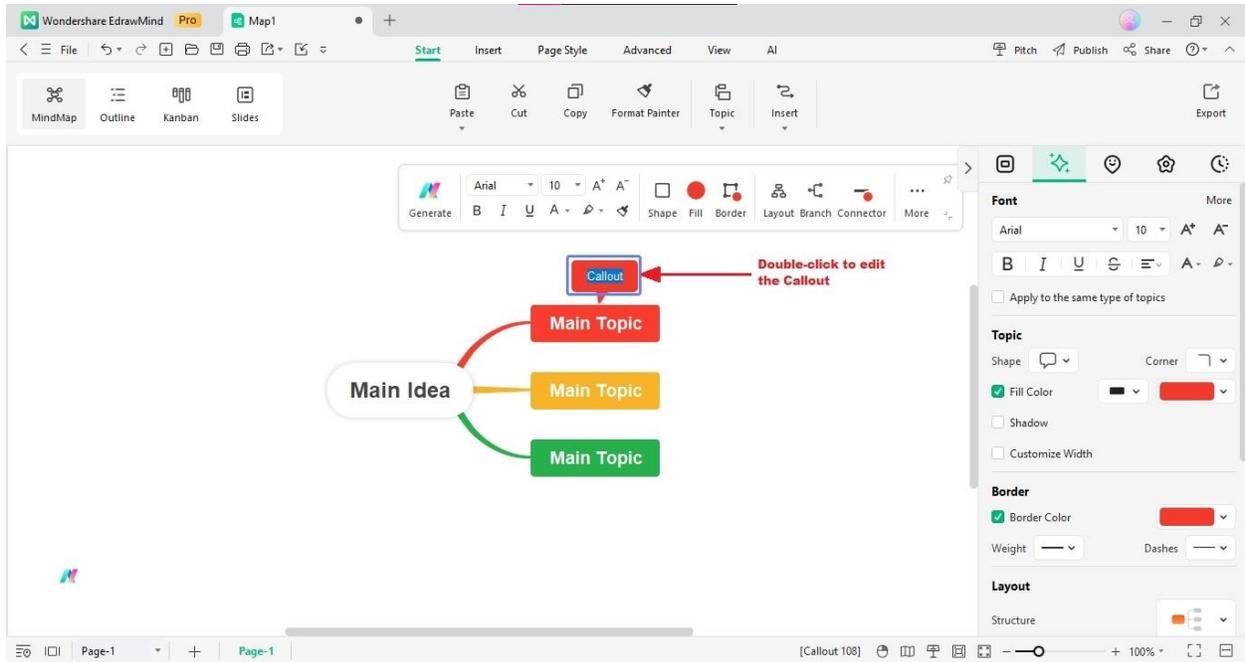

Callouts are additional information on a particular topic that can form their branches. They can also be used as sticky notes to remind map readers to request feedback, highlight the importance, add notes, and more. Here's how.

Step1 Launch EdrawMind. Click Create to get a new mind map or Open the file saved on your computer. Choose a topic, click Insert, and choose Callout in the Start menu.

Note: You can create a callout label by right-clicking a topic and selecting Insert > Callout.

Step2 Enter text or annotations in the Callout box.

Note: Like floating topics, callouts can have their branches and subtopics, whose formatting can be adjusted in the right-side panel > Style.

Insert Boundary

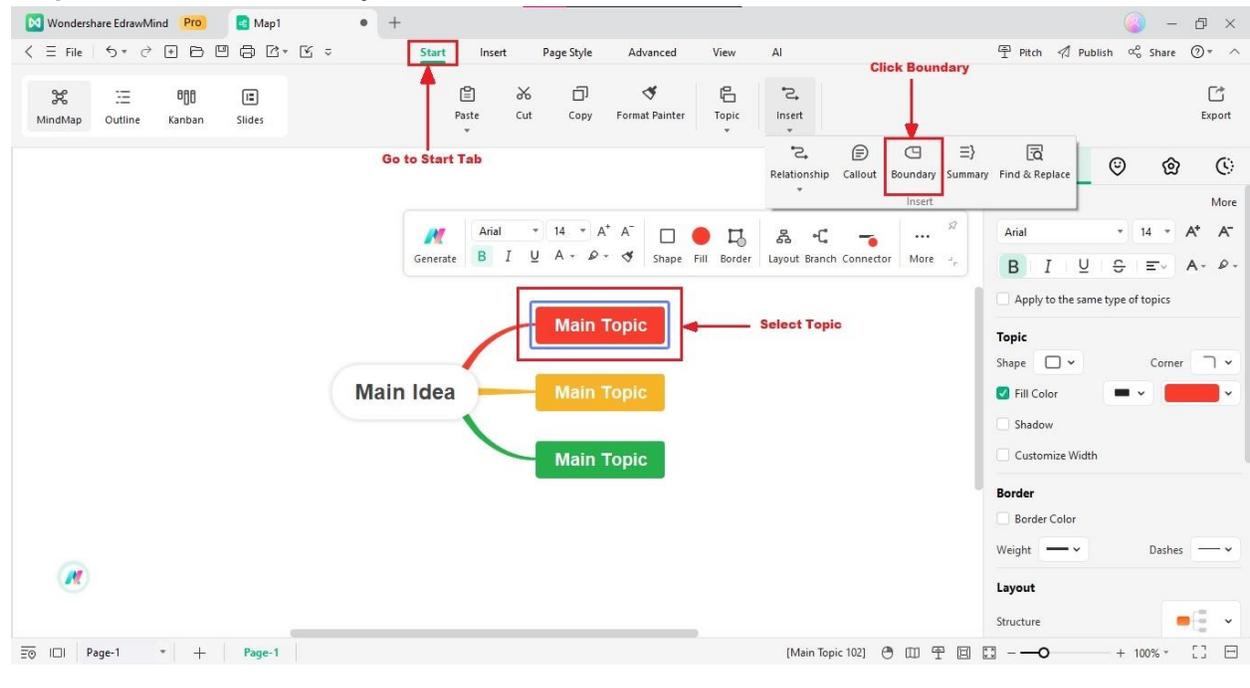

One practical use case for adding a boundary line to specific topics in your mind map is to create a clear border between information sections. By separating topics with a boundary line, you can quickly and easily distinguish them from other content on your mind map. It can help you prioritize information, emphasize main ideas, and streamline your thought process.

Additionally, the default boundary line color in EdrawMind will automatically adjust based on the theme you have selected for your mind map. This allows you to integrate it with your overall design aesthetic. If you want to learn how to add a boundary line to your mind map in EdrawMind, follow the step-by-step guide below.

Step1Select the specific topic(s) you want to highlight with a boundary line.

Step2Go to the Start tab in the upper navigation pane.

Step3Click on the Boundary command button to activate the feature.

Customize Boundary Line

Customizing the boundary line in your mind map allows you to tailor it to your design preferences and branding. You can use different colors or weights of boundary lines to visually represent various topics, categories, or levels of importance. Follow the steps below to modify a boundary line and make your mind map stand out with a personalized touch.

Step1Click the boundary line in the canvas.

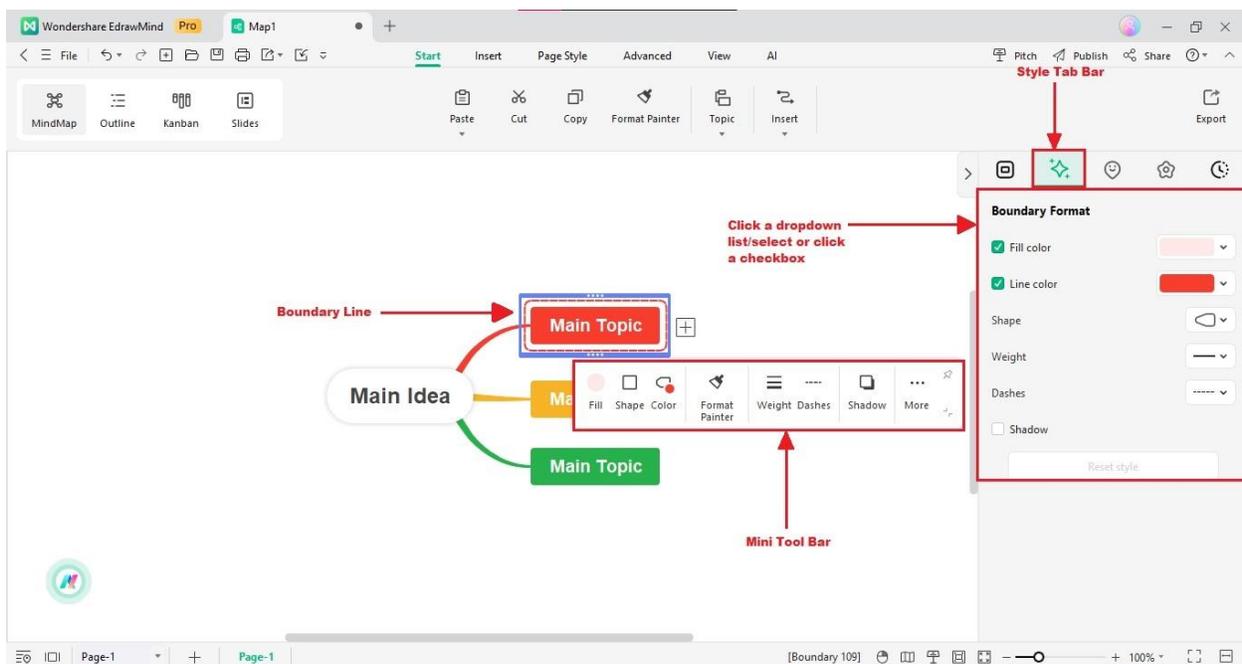

Step2Access the format editing options. You have two options to access the format editing options for the Boundary line:

- Use the mini toolbar or;
- Go to the Boundary Format section in the Style tab bar located in the right-side panel.

Step3Once you have accessed the format editing options, you can modify various visual attributes of the boundary line, such as Fill color, Line color, Shape, Weight, and Dashes, and even add a Shadow.

- By default, the Fill color and Line color checkboxes are selected. Then, click the Fill color and Line color dropdown lists to add a color of your choice.
- For other modifications, click the Shape, Weight, and Dashes dropdown lists to create a cohesive mind map style.
- The Shadow feature is not applied by default. To include a Shadow effect in the boundary, select the checkbox.

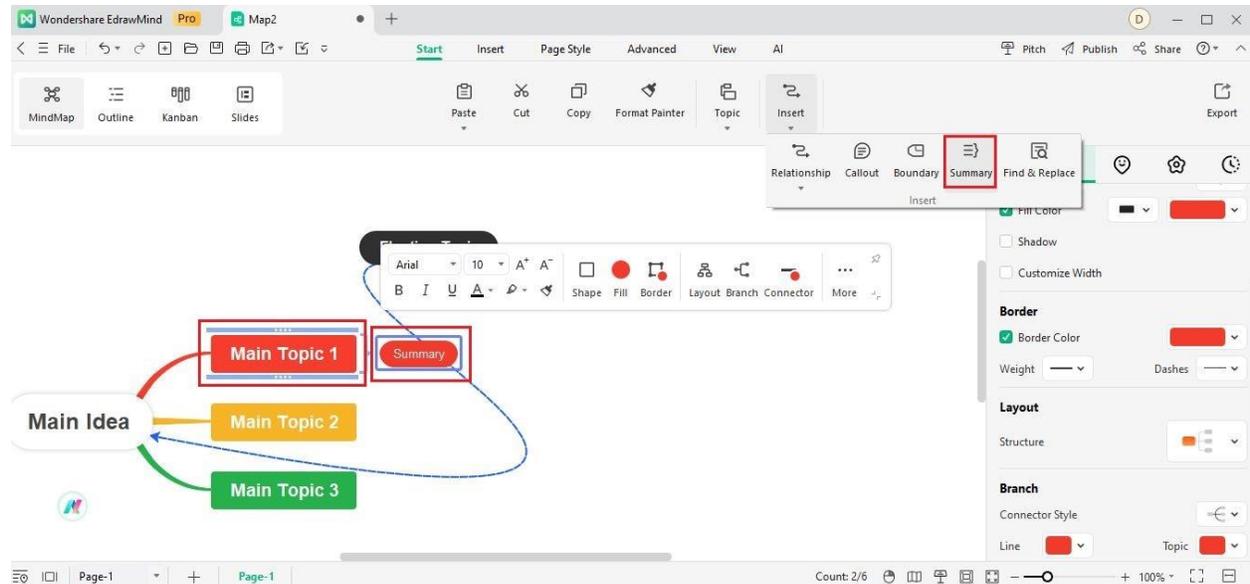

Experiment with different options to achieve the desired visual effect that matches your mind map's aesthetics or conveys the intended meaning.

Insert Summary

Inserting a summary on your mind maps helps you to summarize a particular topic. Here's how.

Step 1 Launch EdrawMind. Click Create to get a new map or Open to launch a file saved on your computer. Select a topic or topics, and choose Insert > Summary in the Start menu to add a summary.

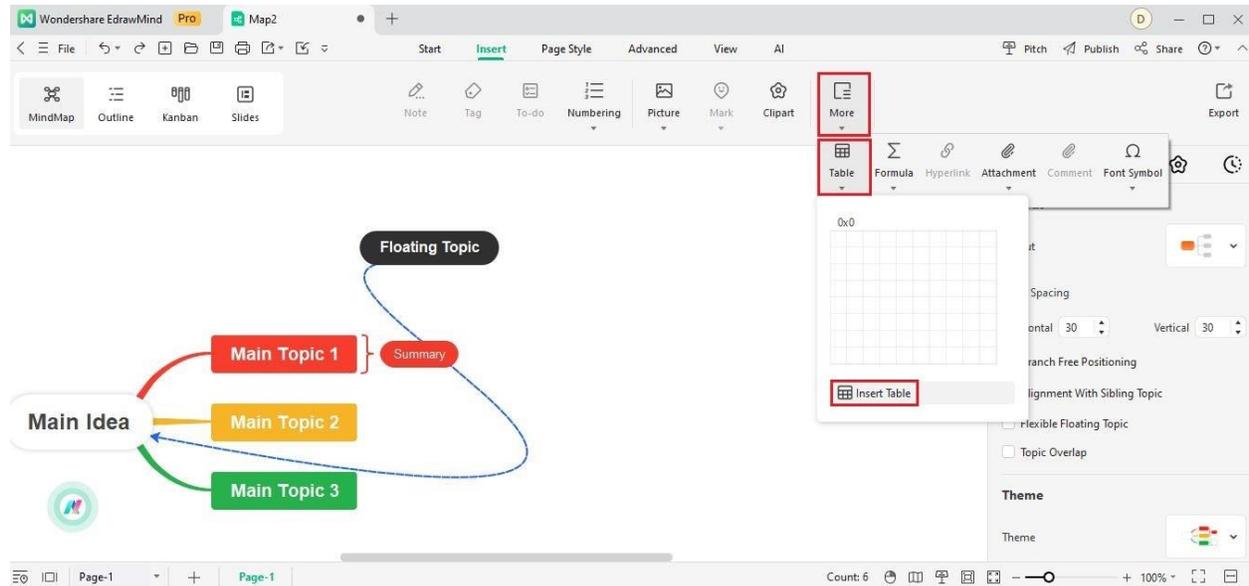

Step 2 Double-click the added Summary topic to edit texts in it.

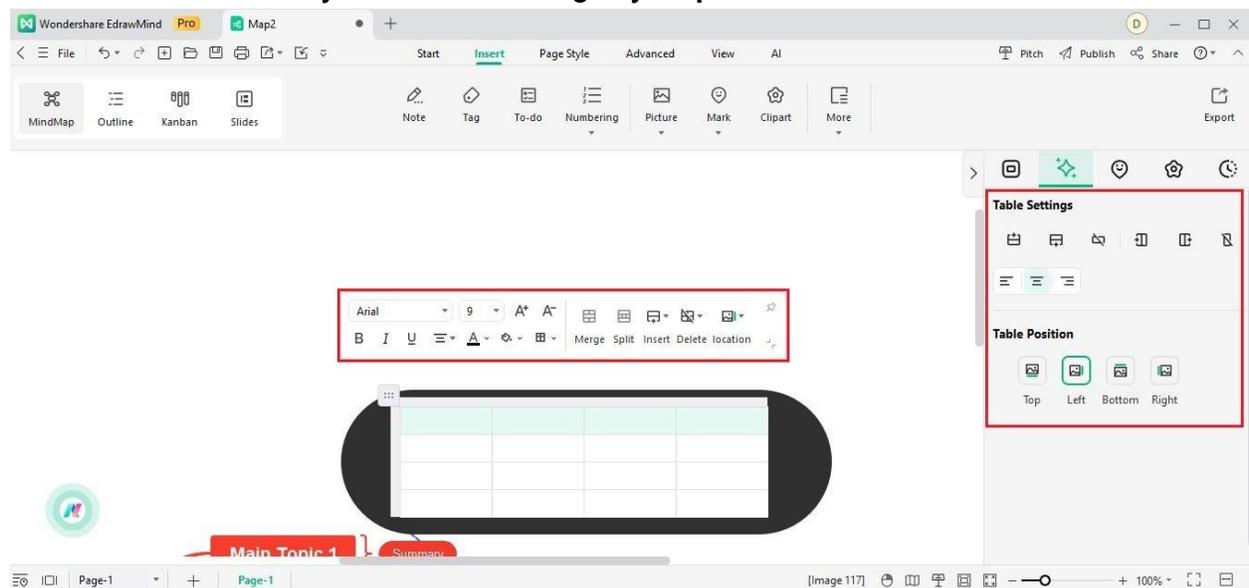

Insert a Table

Inserting a Table allows you to add additional information to your maps. Here are the steps below.

Step1 Launch EdrawMind. Click Create to get a new mind map or Open to launch a file saved on your computer. Next, go to the Insert toolbar and choose More > Table. Select the rows and columns with your mouse or click Insert Table and enter the number of rows and columns of the table you want to create.

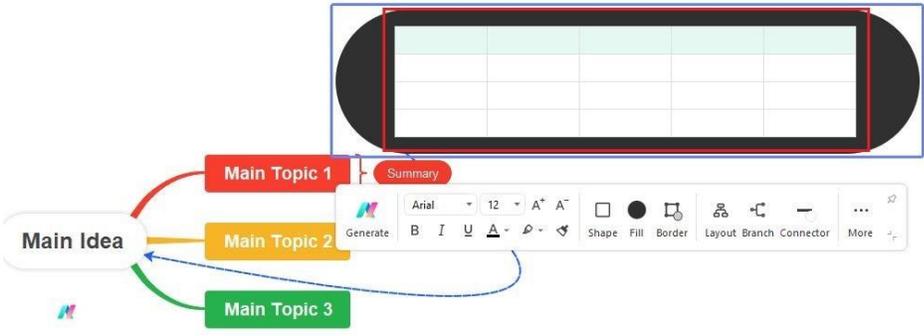

Step2 You may access various editing options, including Insert Above, Insert Below, Delete Row, Insert Left, Insert Right, and more from the floating bar or the Style panel at the right-side corner. Customize your table according to your preference.

Step3 After that, the changes will be automatically applied to your table.

MindMap Outline Kanban Slides Note Tag To-do Numbering Picture Mark Clipart More

Topic: Shape, Corner, Fill Color, Shadow, Customize Width

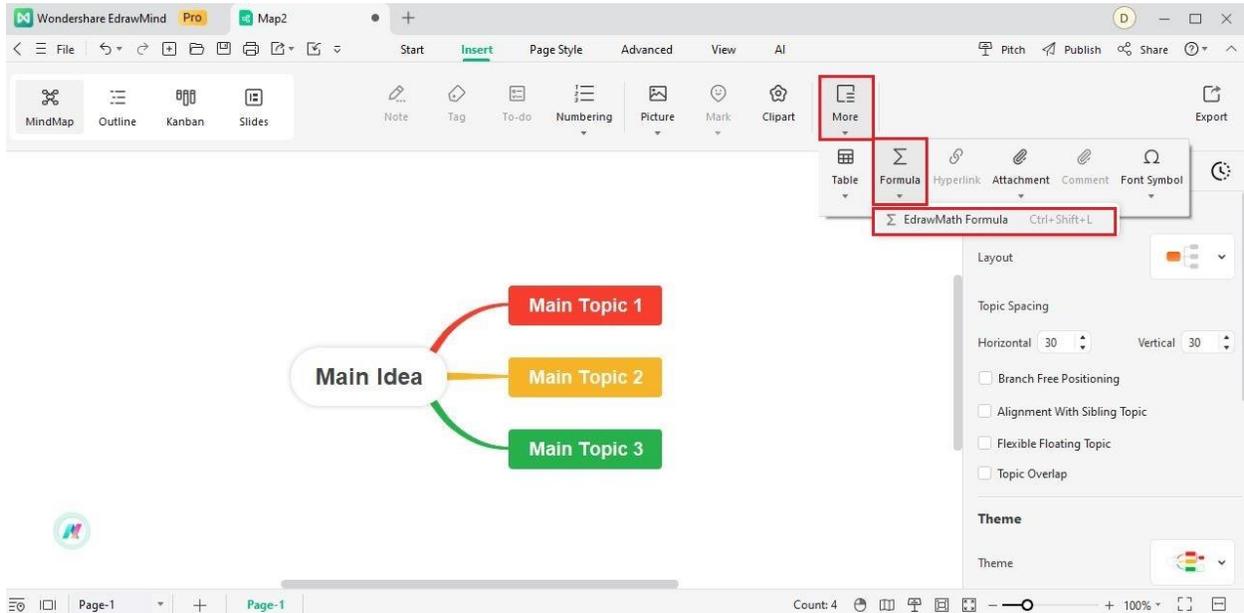

Border: Border Color, Weight, Dashes

Insert Formula

Here are the steps to insert a Formula on EdrawMind.

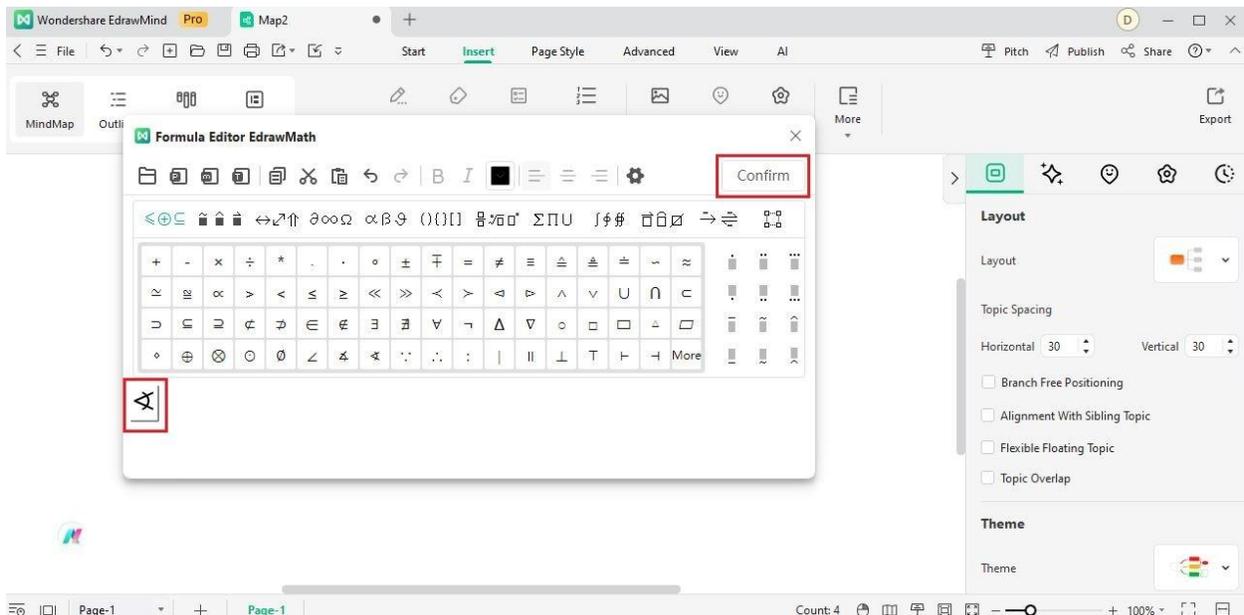

Step1

Open or create a new mind map. Go to **Insert > More > Formula** and select **EdrawMath Formula** in the toolbar.

Step2

Enter the formula characters in the Formula Editor EdrawMath pop-up window. You can also choose to insert various built-in symbols. After completing the formula input, click **Confirm** to add the formula.

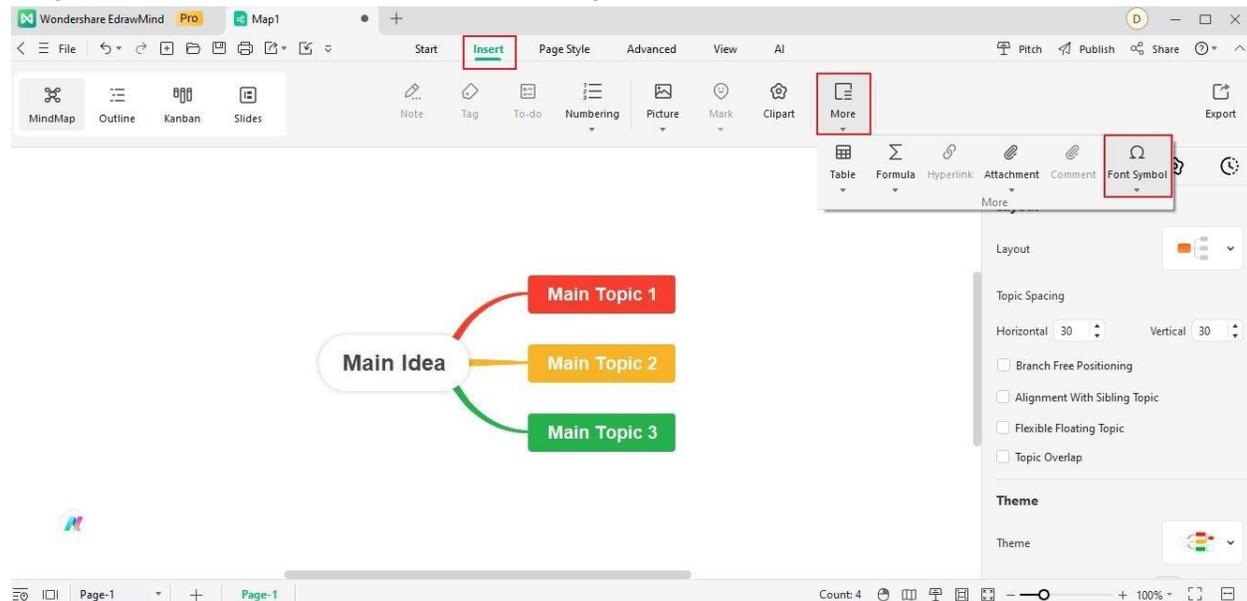

Insert Font Symbol

EdrawMind's font symbol feature includes various fonts, such as Times New Roman and Wingdings. Along with basic symbols, these fonts provide Greek capitals, lowercase, figures, punctuation, mathematical symbols, and universal Pi characters. In addition, it offers an extensive collection of icons for various objects, such as file folders, documents, mail, windows, and the clipboard.

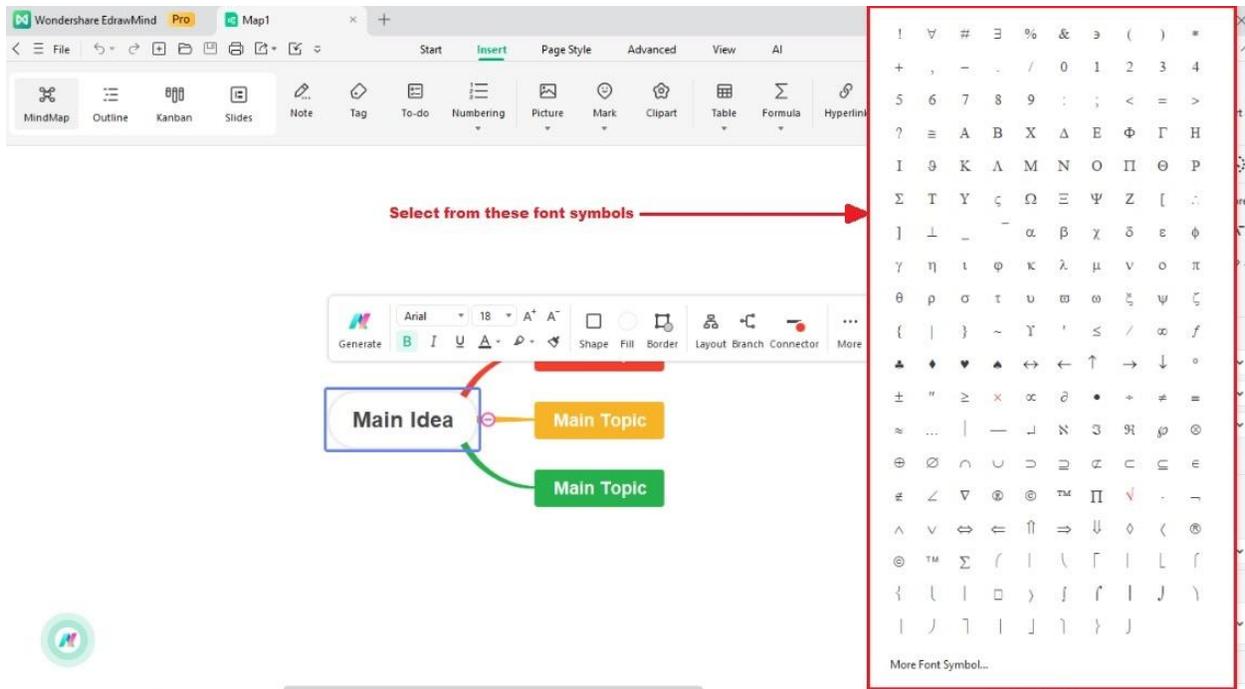

They also provide icons for PC, keyboards, hard drives, printers, fax, weather signs, astrological indications, and more. Adding font symbols can enhance mind map editing for complex mathematical topics or technical content. Follow the step-by-step instructions to utilize the font symbols and create visually compelling mind maps in EdrawMind.

Step1Select one or multiple topic(s) where you want to include a font symbol.

Step2From the Home tab, click the More dropdown list.

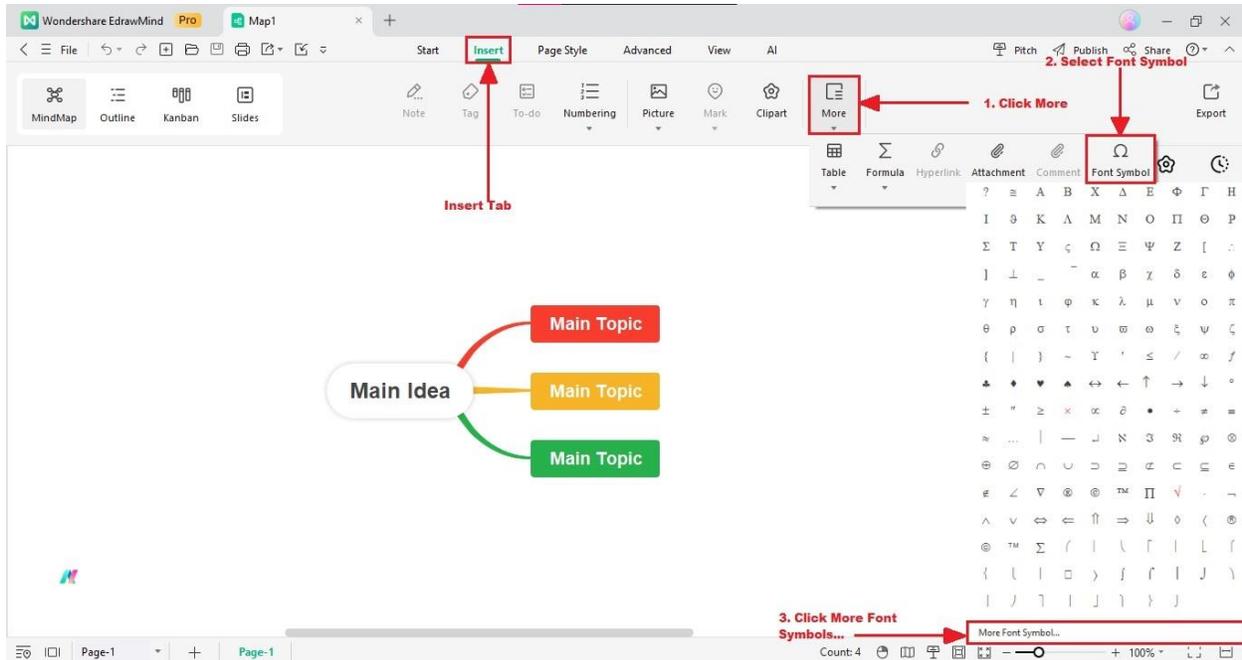

Step3Select Font Symbol and choose from the available options.

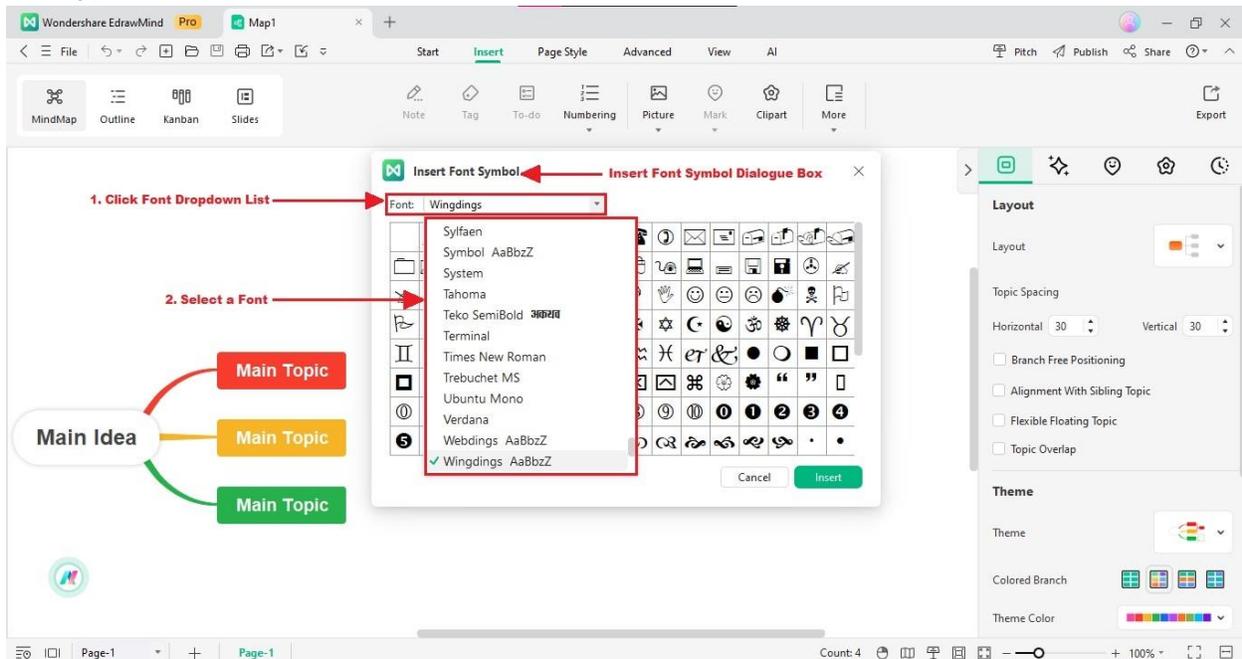

Access More Font Symbols

In EdrawMind, you can use an extensive range of font symbols, offering more than just the basic options. With various styles of font symbols available from different font families, you can explore and use a diverse collection to elevate your mind maps. To discover and add additional font symbols to your mind maps, follow the step-by-step guide below:

- Step1**Select a topic or multiple topics to which you wish to add a font symbol.
- Step2**From the Insert tab and click on the More dropdown list.
- Step3**Select Font Symbol.
- Step4**Click More Font Symbol... to open the Insert Font Symbol dialogue box.

Step5In the upper left corner of the dialogue box, click on the Font dropdown list to choose a font type.

Step6Scroll down to view the available symbols and select the one you want to use.

Step7Click Insert to add the desired font symbol to your mind map.

Note:

With one click, you can easily insert a font symbol to the selected topic in your mind map. This allows efficient and convenient insertion of multiple font symbols into your mind map as needed.

Step8Close the Insert Font Symbol dialogue box.

Numbering

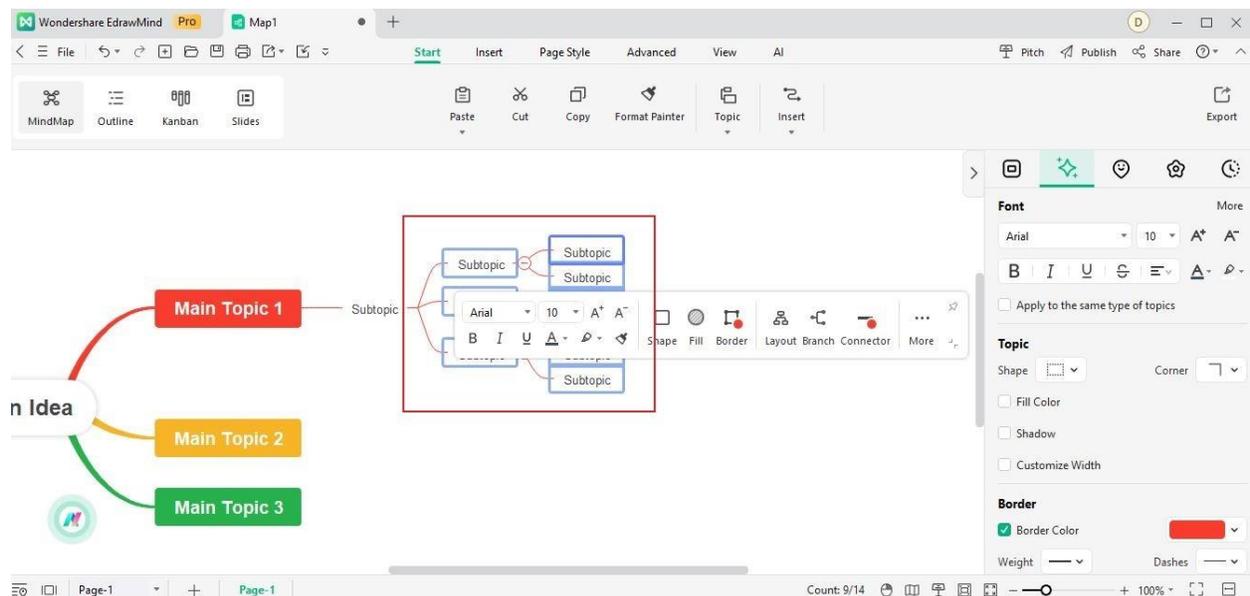

Numbering provides a systematic approach to organizing complex concepts, which makes it ideal for educational or professional settings where clarity and precision are crucial. For instance, in an academic context, using numbers like 1, 2, 3, or I, II, and III can help learners follow a logical sequence in their notes, ensuring they grasp the material in a structured manner.

01 Insert Numbering

In a business environment, using A, B, C, or Roman numerals can help delineate different sections of a project plan or outline, making it easy for team members to understand the hierarchy and flow of ideas. Learning how to add them to a mind map in EdrawMind is a simple process you can do in just a few steps.

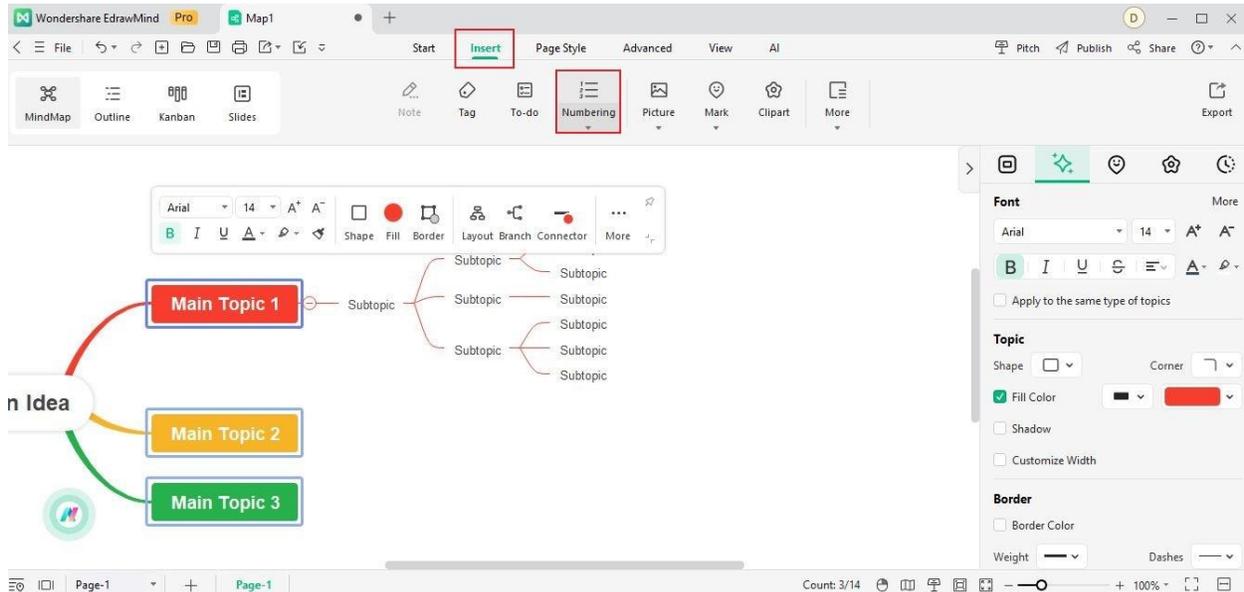

Step 1: Select a topic in several ways.

- **Option 1: Click a single topic.**
- **Option 2: Click and hold a space in the canvas, then drag your cursor to encompass the desired items for selection.**

- **Option 3: Right-click a topic, choose Select Topics > Select Same Type.**

Step2 From the Insert tab, click the Numbering command button. Then select a numbering style and level from the drop-down menu.

Step3 Select Font Symbol and choose from the available options.

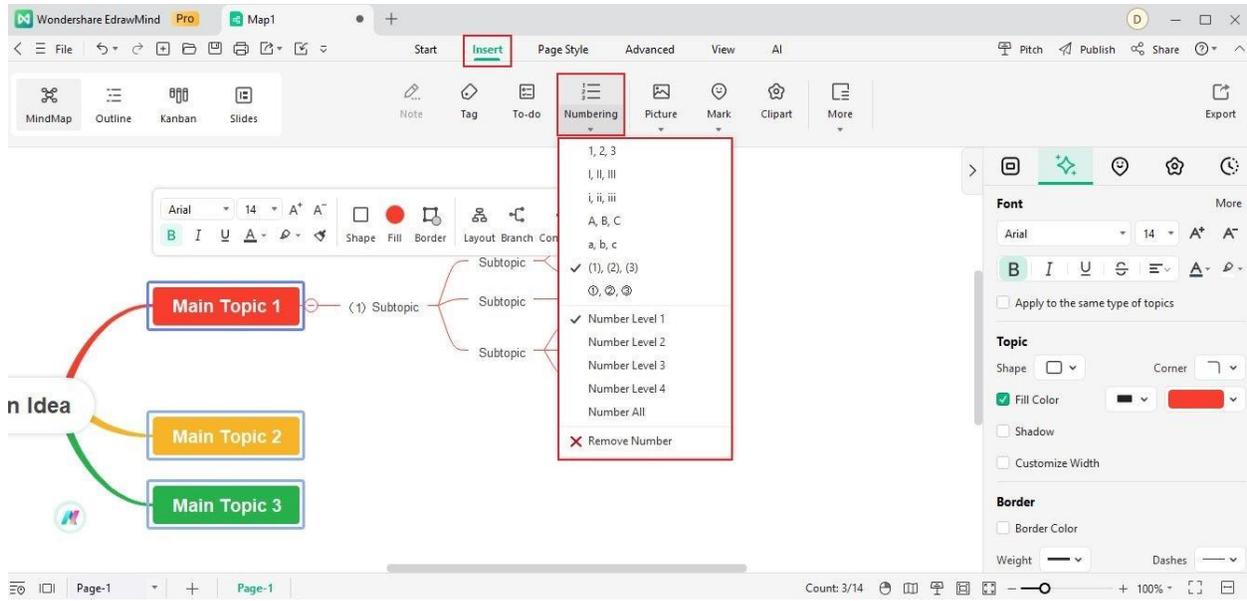

02 Change Numbering Style

Further customization is available in the numbering drop-down list, allowing you to change the numbering style to suit your preference. Options include counting numbers, Roman numerals, letters, and more. Personalize your mind maps in EdrawMind with the numbering style that best fits your needs, adding a professional touch to your visualizations. Here's how.

Step1Select the main topic or the main idea that has connected subtopics with existing numbering.

Step2Go to the Insert tab, then click the Numbering drop-down list.

Step3Select a numbering style. You can choose from different numbering styles, including counting numbers (1, 2, 3), Roman numerals (I, II, III), and capital and small letters (A, B, C / a, b, c).

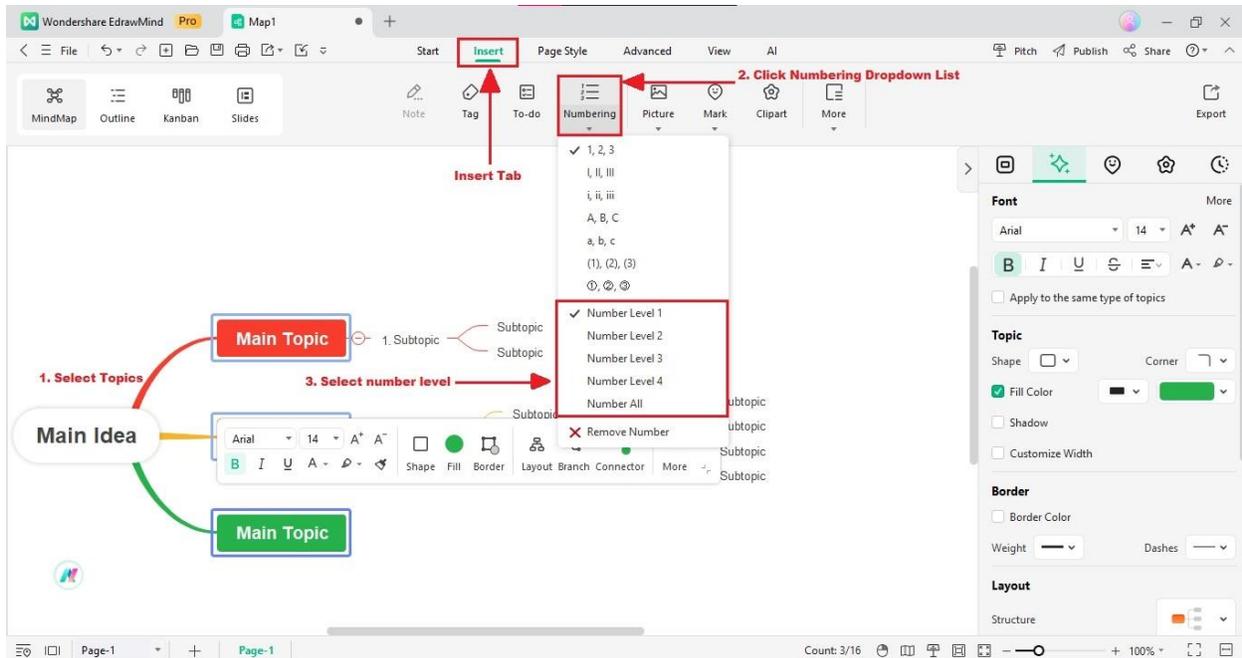

03 Change Numbering Level

The default numbering for a selected shape in EdrawMind is number level 1. Selecting a topic and clicking the numbering command button numbers the subtopics as 1, 2, 3, and so on. Here's how you can customize the numbering level in the mind map.

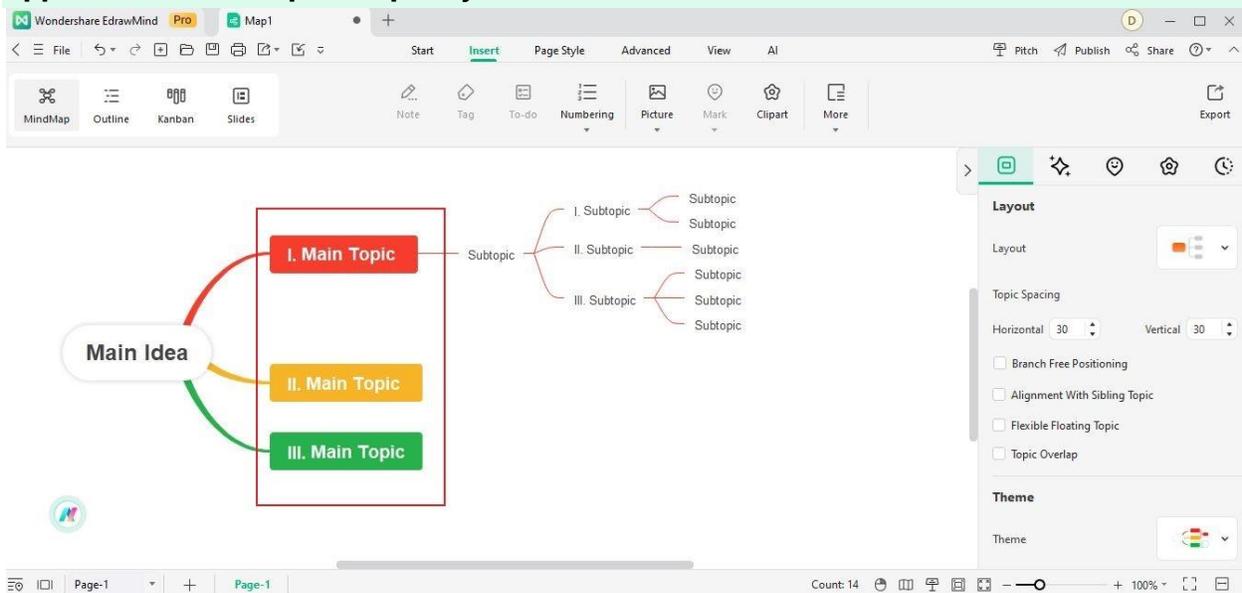

Step1Select the main topic or the main idea that has connected subtopics with existing numbering.

Step2Go to the Insert tab, then click the Numbering drop-down list.

Step3Select from Number Level 1 to Number Level 4 options. Alternatively, choose Number All to apply sequencing from main topics to subtopic shapes.

Note:
 When using Number Level 1 in EdrawMind, selecting only the main topic shape applies numbering exclusively to its Level 1 subtopics. Similarly, the sequencing will be applied to a main topic shape if you select the main idea.

04 Remove Numbering

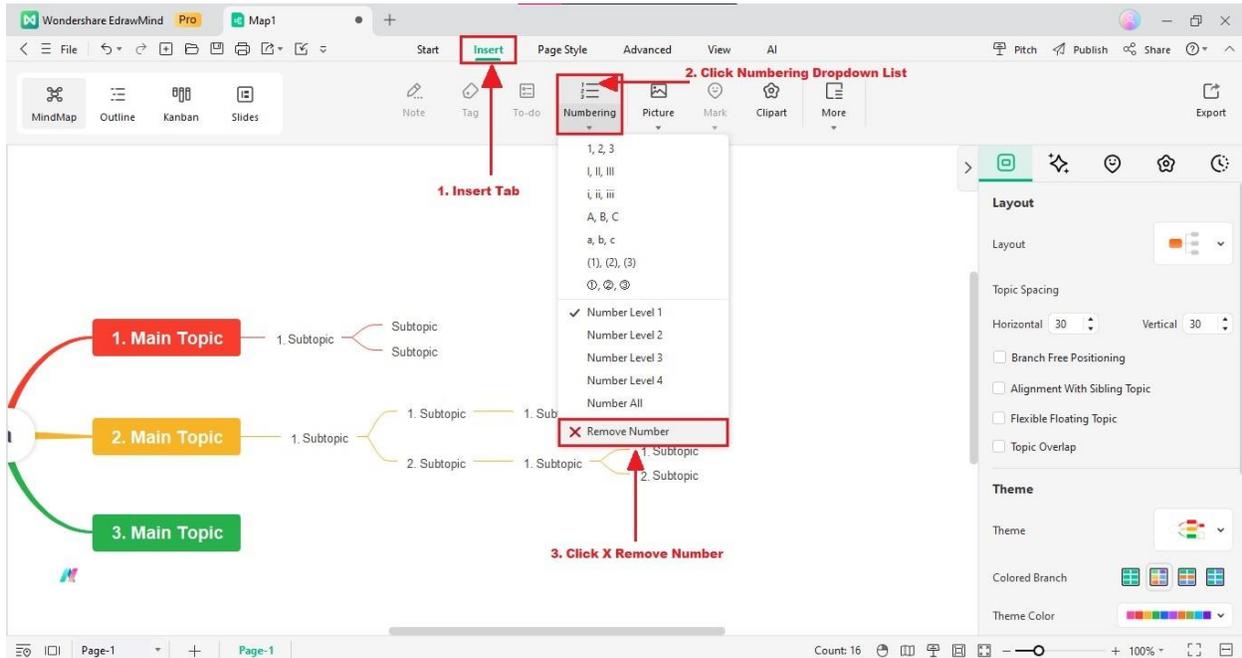

In some cases, you may want to remove numbering from your mind map. For example, if you decide to rearrange the order of your ideas or you prefer a visual layout without

it. Additionally, you can reset the numbering to commence from a different level. Here's how you can remove existing sequencing from your mind map.

Step1Select a topic with subtopics that have pre-applied numbering.

Step2Navigate to the Insert tab in the upper navigation pane.

Step3Click the Numbering drop-down list, then select X Remove Number.

Layout

Change General Map Layout

One of the features distinguishing EdrawMind from other mind-mapping tools is that it allows users to switch layout styles within seconds, giving them more flexibility and control over the project. EdrawMind eliminates the need to manually rearrange your mind map elements, saving you valuable time and effort.

The best part is that this feature helps you switch between layout styles without losing the content of the original layout. It's an effortless way to update the look of your mind map and update it to suit different purposes and audiences.

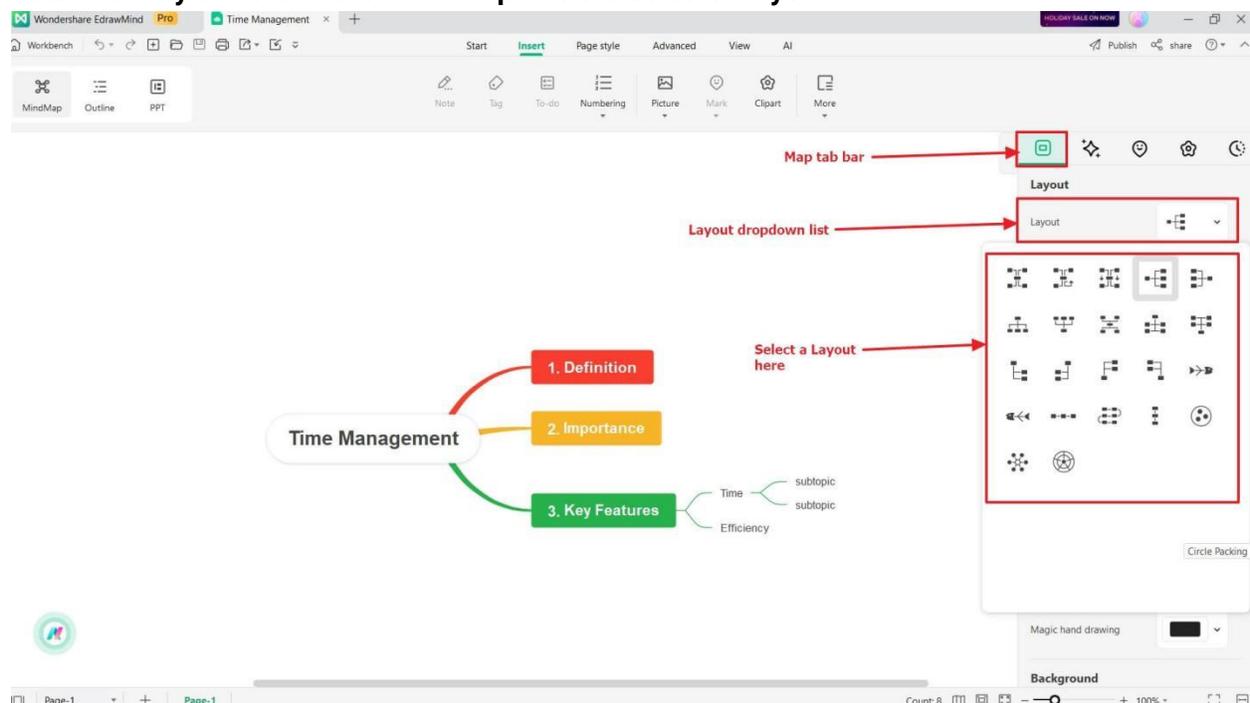

For example, the horizontal timeline layout would be a good choice when presenting a project timeline. But the classic map layout would be more suitable if you are still collating ideas for a presentation. Try it out by following the step-by-step instructions below.

Step1Open the mind map you wish to edit.

Step2Go to the Map tab bar on the right-side panel.

Step3From the Layout section, click Layout dropdown list.

Step4Select the layout style you wish to use from the available options. The software will automatically transform the mind map into the selected layout.

Topic Spacing

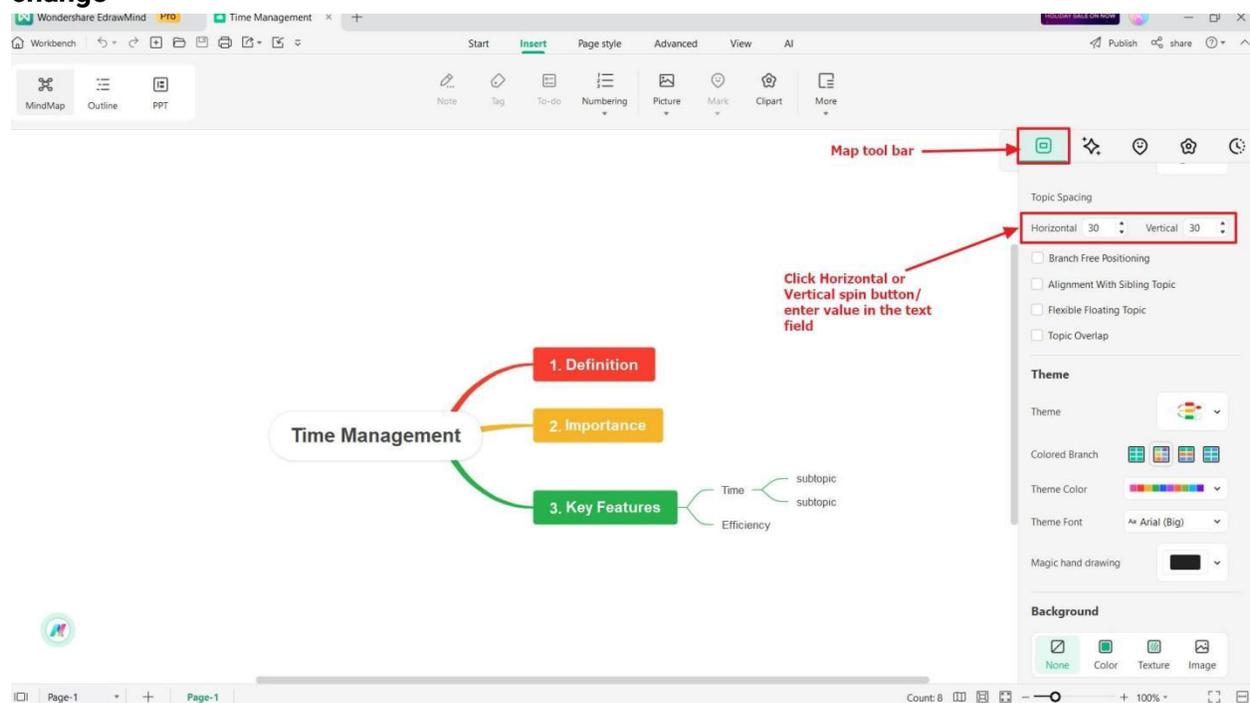

Topic spacing plays a crucial role in mind map editing as it optimizes the layout and visual organization of the mind map. Proper spacing between topics enhances readability and facilitates effective communication of ideas and concepts.

EdrawMind lets you create a mind map with evenly distributed and aligned topic shapes by adjusting the topic spacing. For example, increasing it adds extra white space, reducing clutter and improving understanding. Conversely, reducing spacing can accommodate more content in complex mind maps. Here's how to customize topic spacing in your mind map for optimal visual organization.

Step1 Go to the Map tab bar in the right-side panel.

Step2 In the Topic Spacing section, click the up-down control of the Horizontal or Vertical spin box. Alternatively, manually enter a value in the corresponding text field to set the desired spacing.

Step3 Press the Enter key on your keyboard or click anywhere on the canvas to apply the change

Note:

The initial values in the Horizontal and Vertical spin boxes are set to 30 by default. The maximum value is 100, while the minimum value is 20. You can input values within this range to configure the desired spacing for your mind map topics.

More Layout Settings

There are scenarios where you may need more flexibility in the topic spacing. It includes moving branches around or creating floating topics from existing ones. Fortunately, adjusting these in EdrawMind is easy and intuitive. Here's how you can utilize these features in EdrawMind.

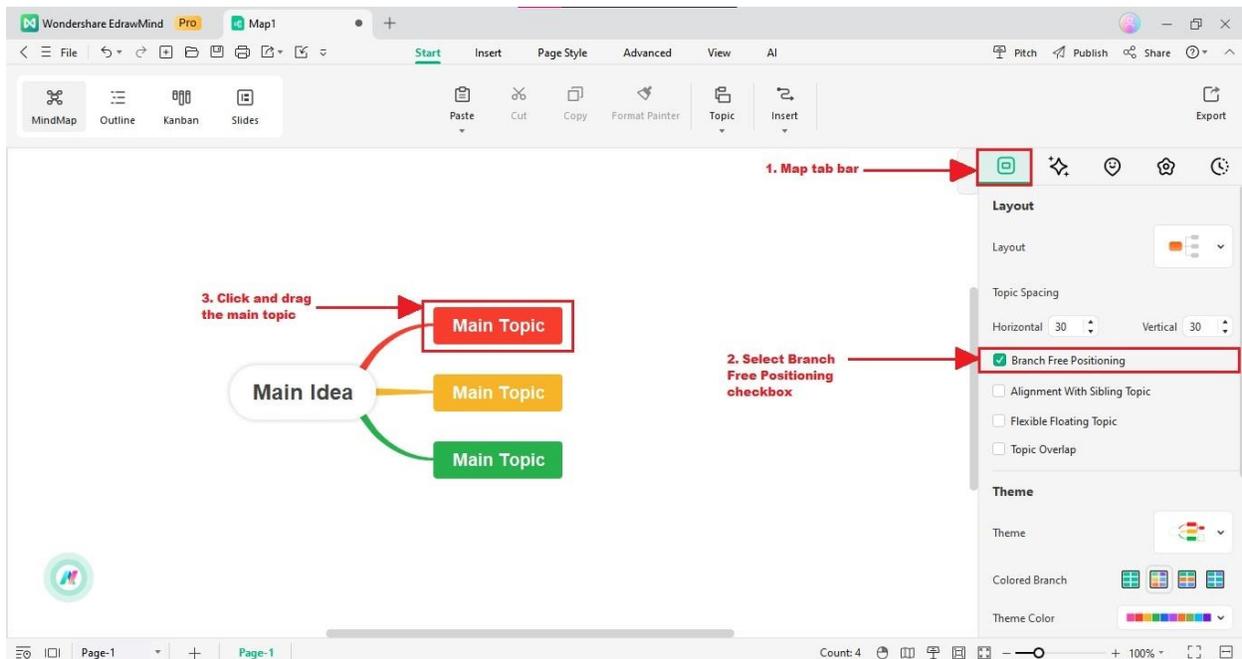

01 Branch Free Positioning

Branch-free positioning is valuable when you want more control over the layout of the mind map. It allows you to position topics freely, anywhere on the canvas, without being constrained by the predefined structure of the mind map. You may need the Branch Free Positioning feature to create a focal point or a mind map with non-linear connections and relationships.

Step 1: Click on the Map tab bar on the panel to the right.

Step 2: In the Topic Spacing section, select the Branch Free Positioning checkbox.

Step 3: Select a main topic, then drag it anywhere on the canvas.

Note:

If you want to align the topics according to their levels, check the Alignment With Sibling Topic box below and uncheck the Branch Free Positioning checkbox.

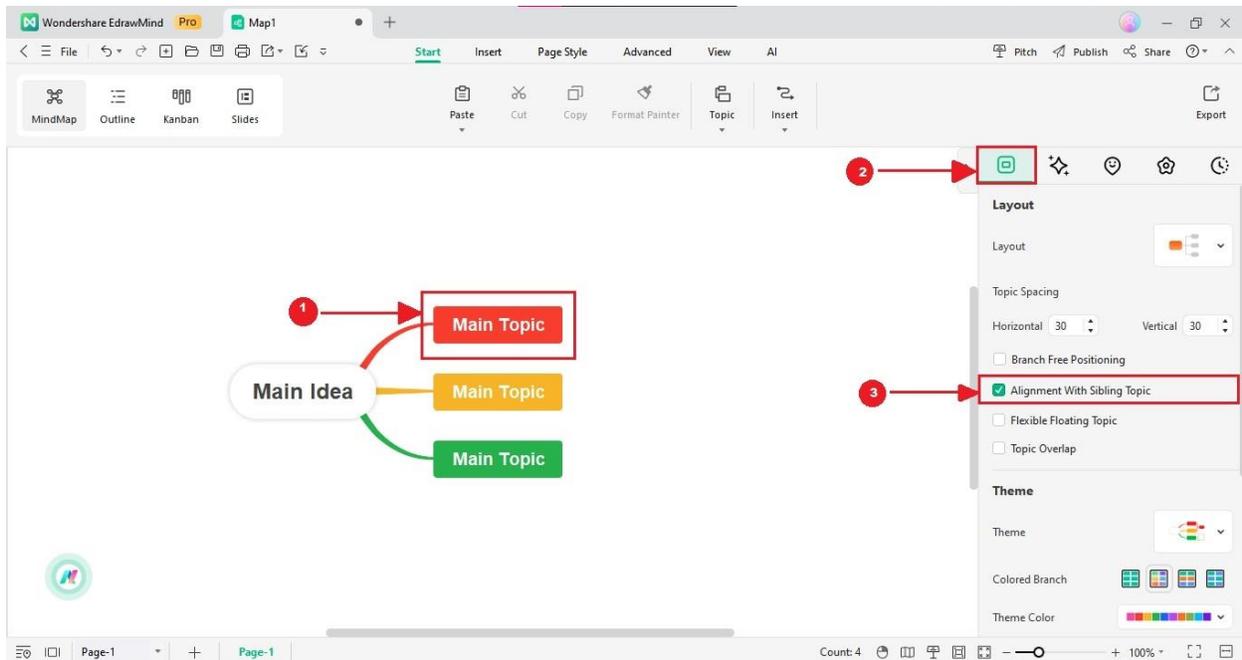

02 Alignment With Sibling Topic

"Alignment with sibling topic" is important to ensure that each topic aligns well with its sibling topics. It helps to create a cohesive structure and flow of information

Step1Select a Topic in your mind map.

Step2Go to Map tab in the right-side panel.

Step3Select the Alignment With Sibling Topic checkbox in the Topic Spacing section.

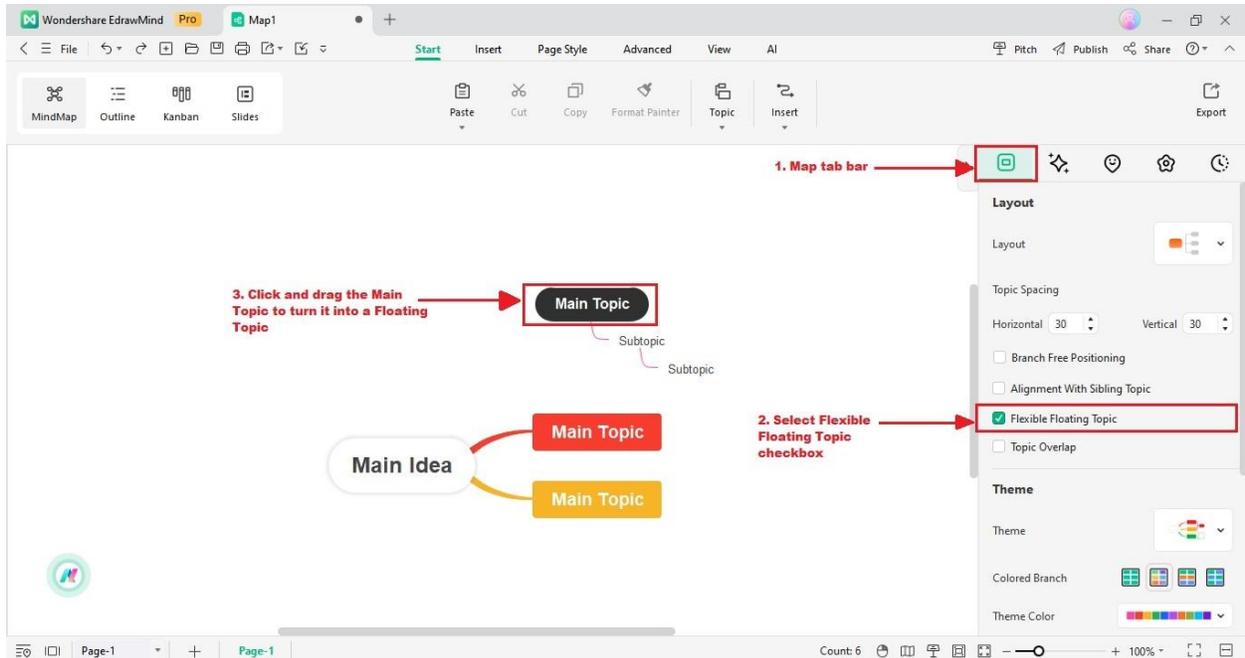

03 Flexible Floating Topic

The flexible floating topic in EdrawMind lets you transform a topic shape into a floating one instead. It empowers you to place it at any desired spot on the canvas, resulting in better visual presentation and mind map layout.

Step1Open the Map tab from the right-side panel.

Step2Select the Flexible Floating Topic checkbox in the Topic Spacing section.

Step3Select a main topic and freely reposition it anywhere on the canvas by dragging it.

04 Topic Overlap

With this feature, you have the ability to layer topics on top of each other, allowing for a more flexible and versatile organization of information. Overlapping topics provide a means to structure and arrange information in a way that accommodates complex relationships and connections.

Step1 Open the Map tab from the right-side panel.

Step2 Select the Topic Overlap checkbox in the Topic Spacing section.

Step3 Choose a topic and easily reposition it to overlap with other topics

Theme and Style

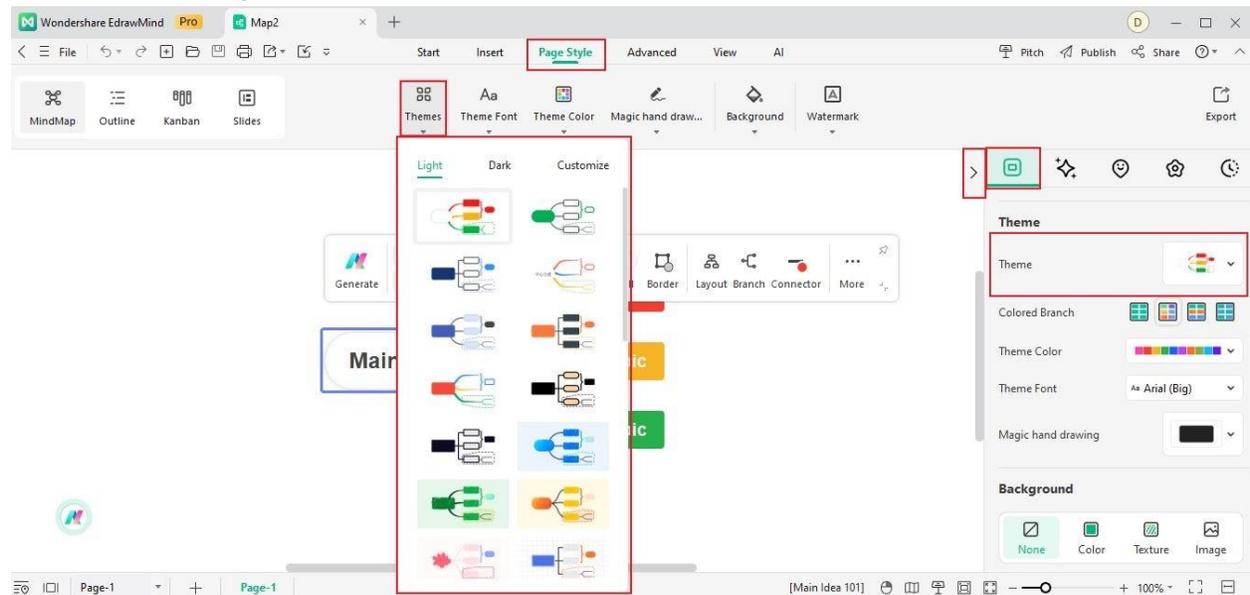

Change and Customize the Theme

The overall appearance of your Mind Map is determined by Theme. A map theme is a collection of default formatting for various types of elements on a map, including a set of theme colors, theme fonts, line and fill colors, etc.

Here are the steps to change and customize themes on EdrawMind.

Step1 Launch EdrawMind and click Create to get a new mind map or Import a file saved on your computer.

Step2 Expand the right-side panel and click the Map button > Theme or go to Page Style > Themes on the top toolbar.

Step3 Drag the scroll bar to browse all themes in the drop-down menu, and click the appropriate theme to apply to the entire map.

The image shows the Wondershare EdrawMind Pro software interface. At the top, there's a menu bar with 'Start', 'Insert', 'Page Style', 'Advanced', 'View', and 'AI'. Below that is a toolbar with icons for 'MindMap', 'Outline', 'Kanban', and 'Slides'. The main workspace contains a mind map with a central node labeled 'Main'. A 'Generate' button is visible on the left. A 'Page Style' panel is open in the center, showing a grid of theme preview cards under 'Light', 'Dark', and 'Customize' tabs. A red box highlights a vertical scrollbar on the right side of this panel. To the right of the panel is a 'Theme' settings panel with options for 'Theme', 'Colored Branch', 'Theme Color', 'Theme Font', 'Magic hand drawing', and 'Background'. The 'Background' section includes 'None', 'Color', 'Texture', and 'Image' options. At the bottom, there's a status bar with 'Page-1', '[Main Idea 101]', and a zoom level of '100%'.

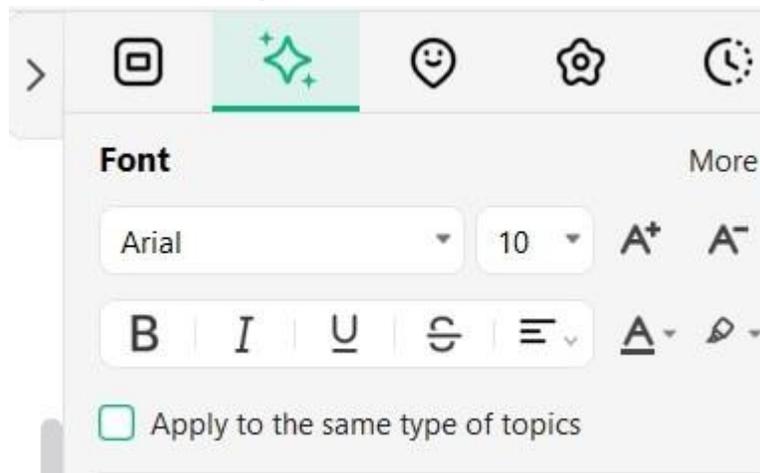

Change Topic Font

Follow the steps below to change the font of topics when creating mind maps.

Step 1 Launch EdrawMind. Click Create to start a map or Import the file saved on your computer. Next, select a target topic or multiple topics and click on the right-side panel to access Style > Font. Alternatively, similar font setting options can also be accessed from the floating bar.

Step 2 From there, you can adjust the font type, font size, alignment, bold, italic, underline, strikethrough, and text color of the topic text.

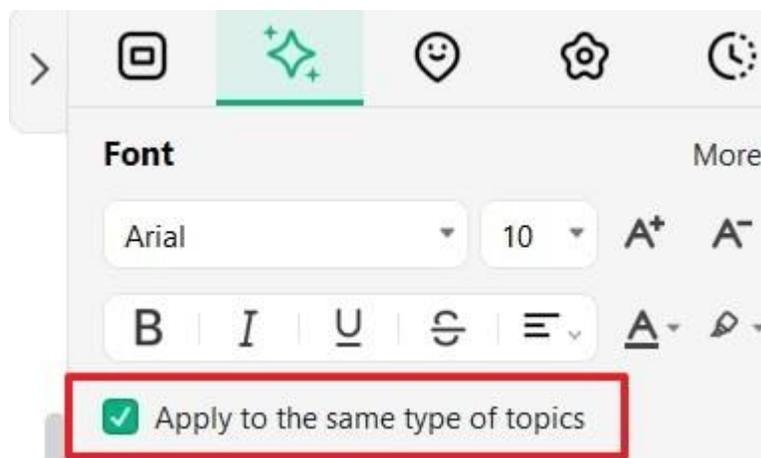

Tips: Click on the following buttons to apply the font effect above:

- **B** Bold the selected text.
- **I** Italicize the selected text.

-  Underline the selected text.
-  Add a horizontal line in the middle of the selected text.
-  Set the alignment format for the selected text.
-  Add a bottom to the selected text. Change the font color of the selected text.
-  Highlight the selected text.
-  Increase the font size of the selected text.
-  Decrease the font size of the selected text.

* After checking the Apply to the same type of topics box, you can modify the font style in all your themes of the same type as the selected theme.

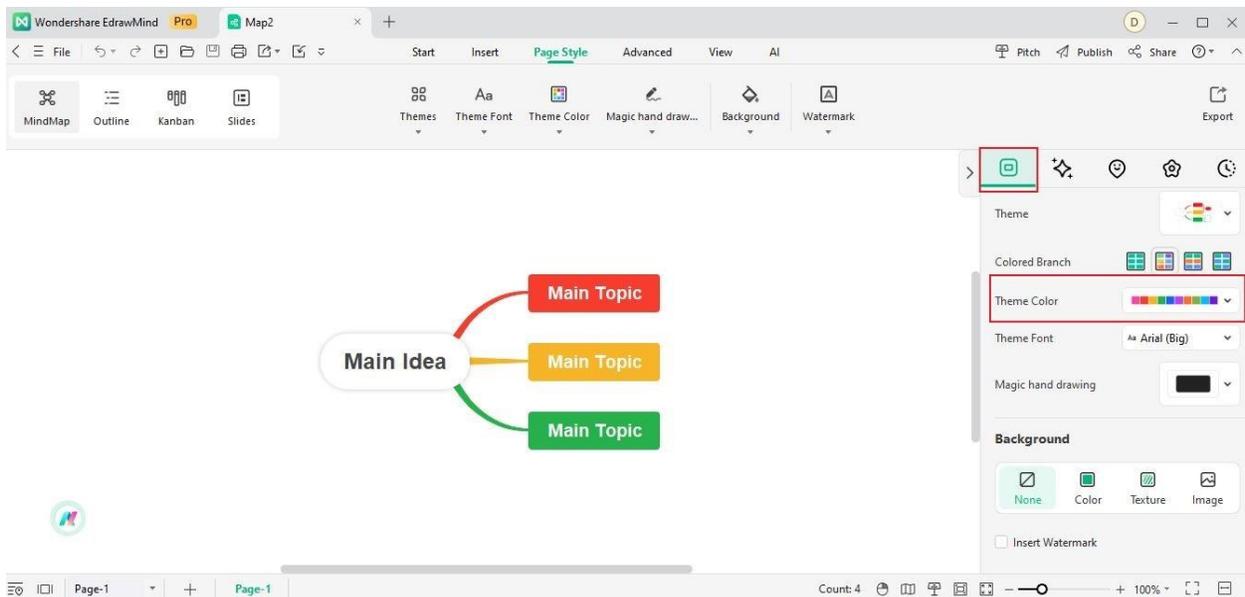

Theme Color and Colored Branch

EdrawMind allows you to adjust the theme color and use the Colored Branches feature to personalize the color of your mind maps.

01 Theme Color

EdrawMind offers dozens of theme color templates for you to choose from. Here are the steps to apply a desired theme color on your mind map:

Step 1: Locate the Theme Color section in the Map panel on the right.

Step 2: Choose a desired theme color to apply it to your mind map.

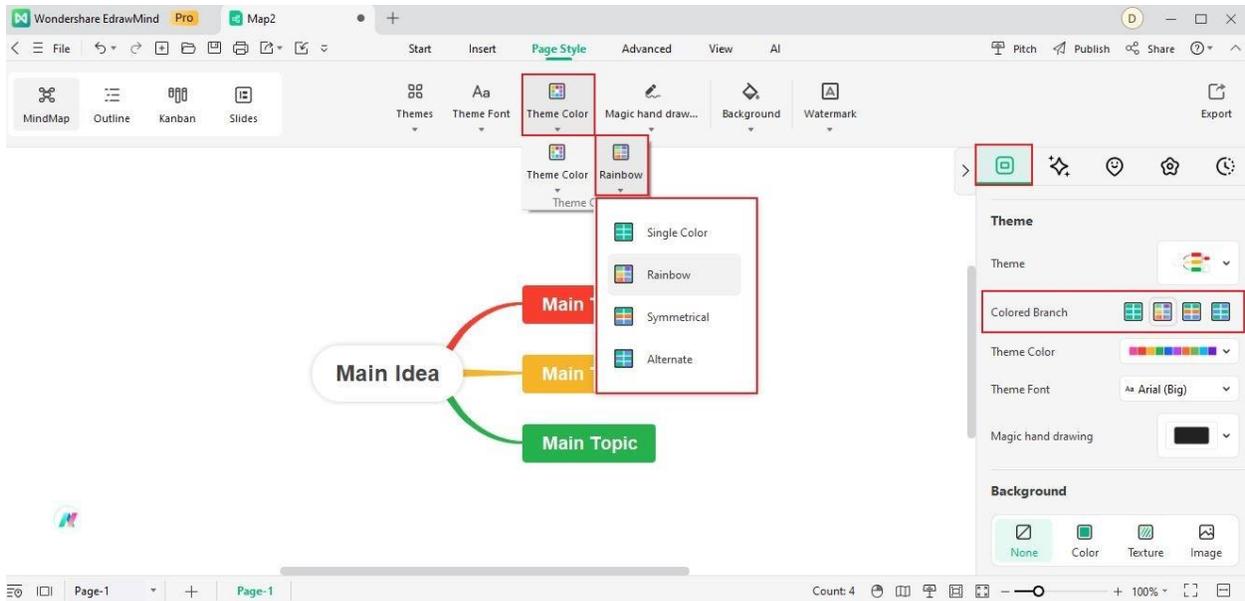

02 Colored Branch

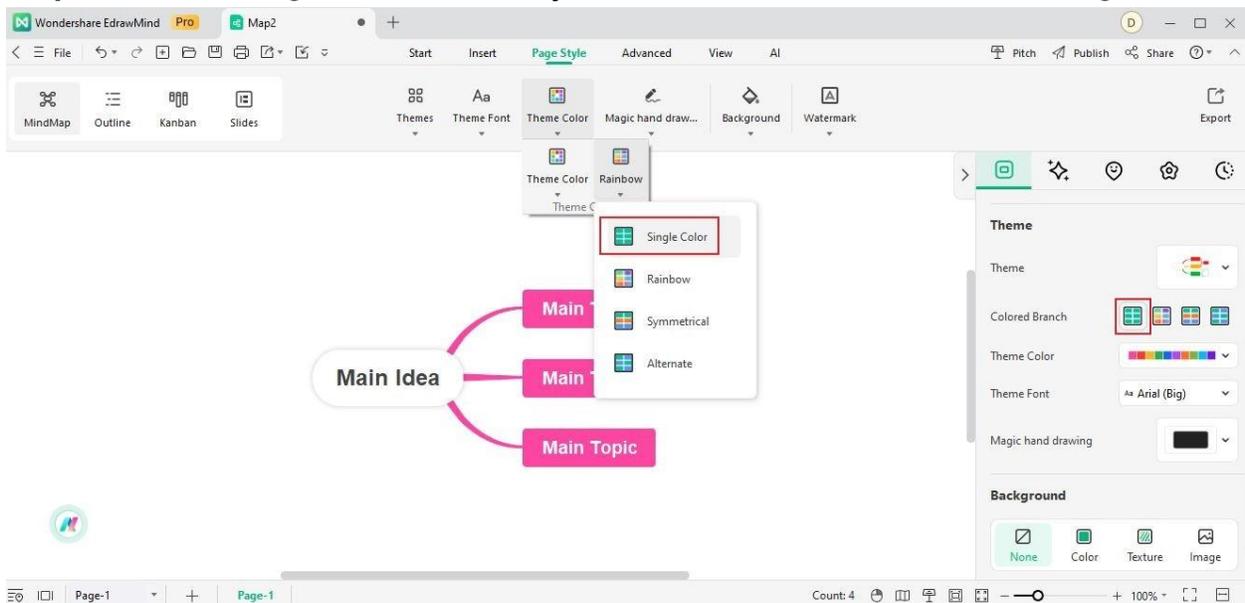

Colored Branches are used to personalize how the theme colors are assigned. There are four available rainbow colors to customize your map branches, such as Single, Rainbow, Symmetrical, and Alternate.

Here are the steps to apply Colored Branches on your mind map.

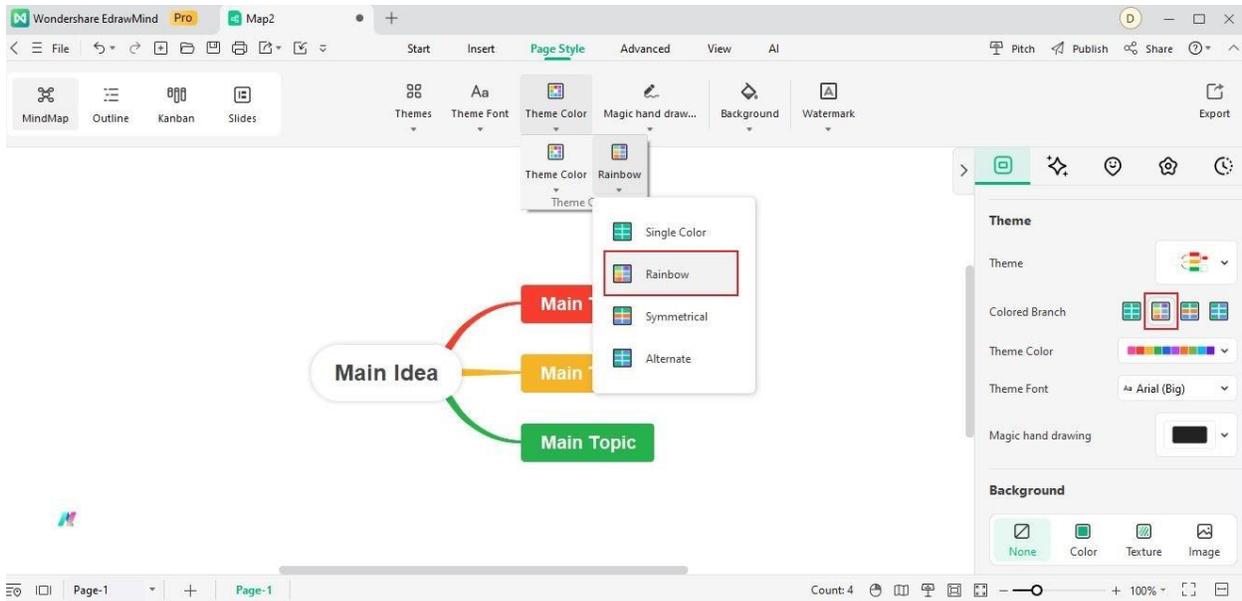

Step 1 Click Create to start a new mind map or Import the file saved on your computer. Go to the right side panel and click on Map > Colored Branch. Alternatively, go to Page Style and click Theme Color > Rainbow.

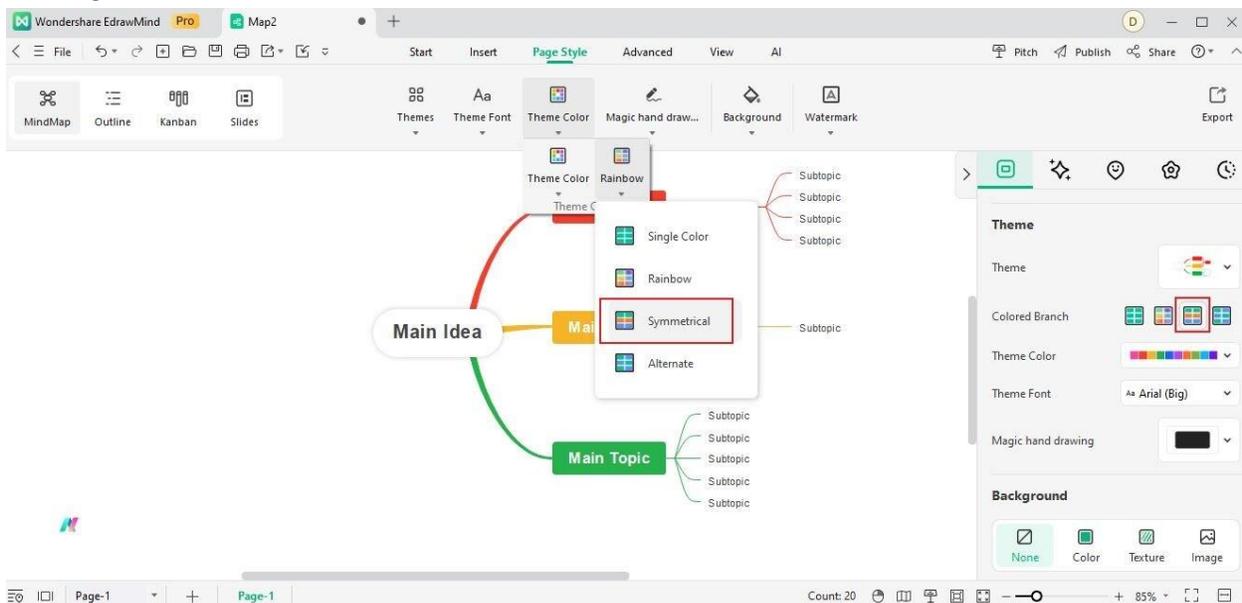

Step2a Click the Single Color button if you want all branches to become a single color.

Step2b Choose the Rainbow button, meanwhile, to display a different color for each branch.

Step2cSelect the Symmetrical button to make the branches symmetrical on the left and right sides.

Step2dLastly, click the Alternate button if you want all branches to use two colors alternately.

85%

The image shows the Wondershare EdrawMind Pro interface. The main workspace contains a mind map with a central node 'Main Idea' (white oval) connected to a 'Main Topic' node (red rectangle). A 'Theme Color' dropdown menu is open, showing options: 'Single Color', 'Rainbow', 'Symmetrical', and 'Alternate' (highlighted with a red border). The 'Main Topic' node has four 'Subtopic' branches. The 'Theme' settings panel on the right includes options for 'Theme', 'Colored Branch', 'Theme Color', 'Theme Font' (set to 'Arial (Big)'), 'Magic hand drawing', and 'Background' (with options: None, Color, Texture, Image). The bottom status bar shows 'Page-1', 'Page-1', 'Count: 20', and a zoom level of '85%'.

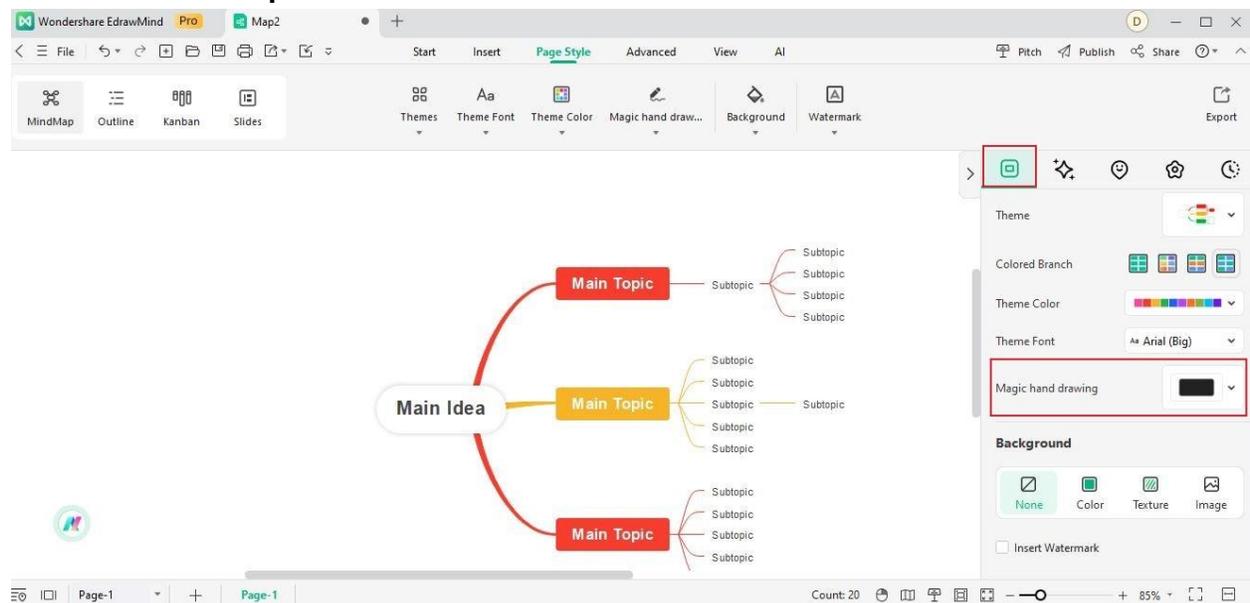

Hand-Drawn Style

The default Hand-Drawn Style effect on your mind map is the Normal Style. Selecting the Hand-Drawn Style turns your map's default line and border shape into a natural handwriting style. Here's how.

Step1 Launch EdrawMind. Select Create or Import the file saved on your computer and click the Page Style > Magic Hand Drawing.

Step2 Alternatively, you can go to the right side panel and check the Magic Hand Drawing checkbox under Map for the same effect.

Change Background and Add Watermarks

The background feature in EdrawMind allows you to easily customize the appearance of your mind maps to reflect your personal preferences or organizational branding.

You can also add a custom or built-in watermark to your mind maps to protect your intellectual property or reinforce your brand. By utilizing these background options, you can elevate the overall design of your mind maps and better communicate your ideas to your audience.

01 Add a Background Color

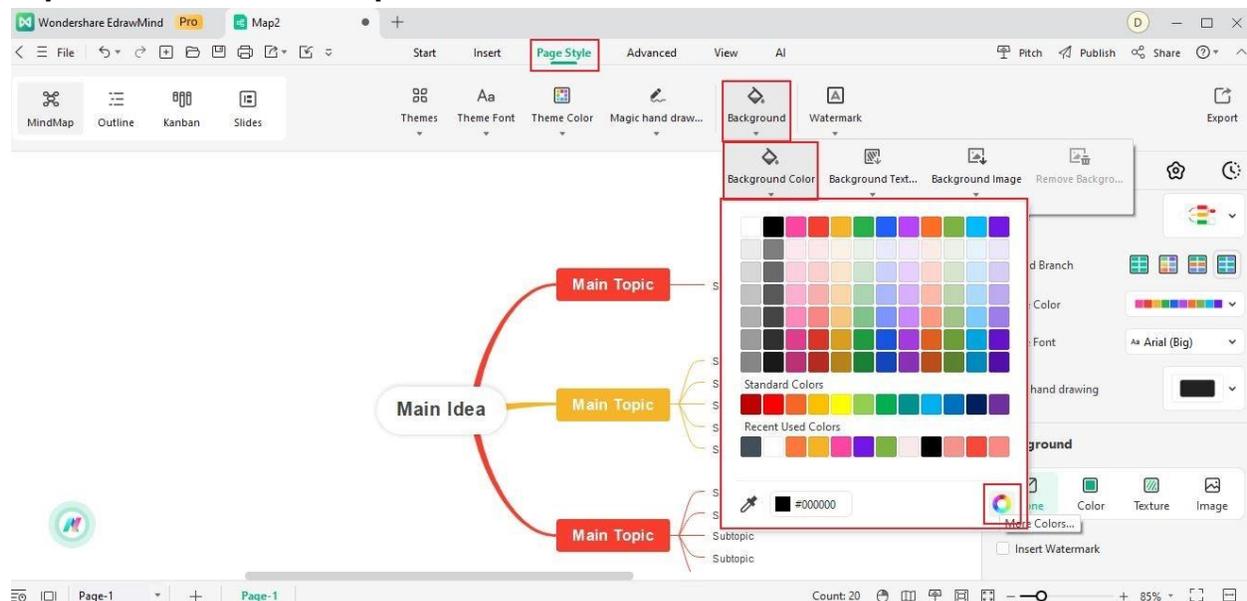

Contrasting colors can highlight key concepts, which reduces visual noise and makes the mind map easier to navigate. Solid colors can also enhance the mood and ambiance of your mind map, allowing you to convey a specific emotion or tone. With just a few clicks, you can transform your mind maps from bland to brilliant by following the step-by-step guide to changing the background color in EdrawMind.

1. Using the Page Style Tab

Learn how to add a background color to your mind map from the Page Style tab.

Step1:Click the Background > Background Color dropdown list in the Page Style tab.

Step2:Choose a color from the color palette. You can also click More Colors... to explore additional color options.

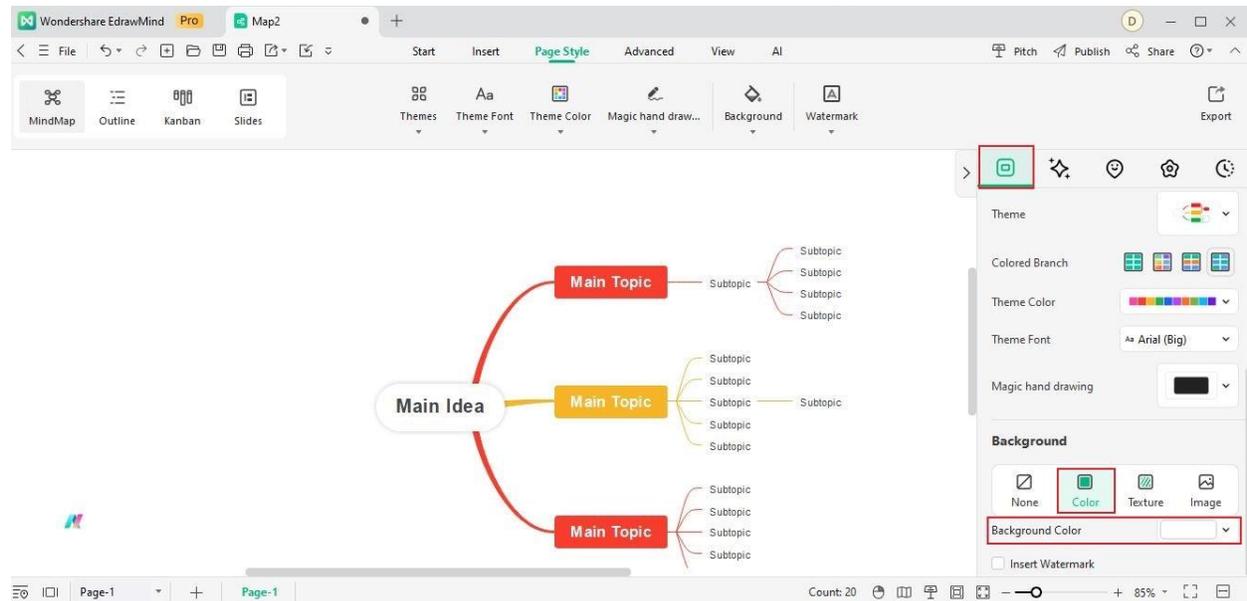

2. Using Map Tab Bar

Here's how to add a background color in the Map tab bar in the right panel.

Step1:Click the Map tab bar in the right-hand panel.

Step2:Select Color in the Background selection.

Step3:Choose your preferred color from the palette that appears.

02 Add a Background Texture

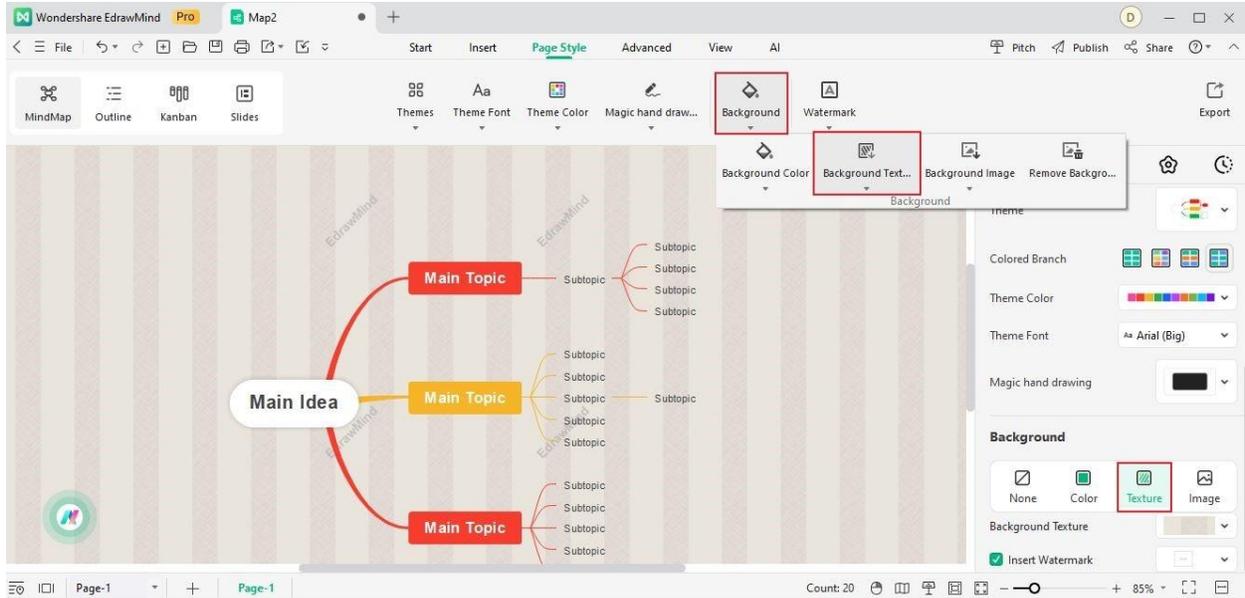

A background texture can be a great alternative to a solid color or an image. It can create a visually stimulating background without overpowering your content. Follow these easy steps to add a background texture to your mind map and create a subtle and sophisticated backdrop.

1. Using Page Style Tab

Learn how to create a more visually dynamic mind map by incorporating a textured background with these easy steps in the Page Style tab.

Step1:Go to the Page Style tab, and choose Background > Background Texture in the top navigation pane. Alternatively, click the Map button on the right-side panel and select Texture under Background.

Step2:Select from the built-in background templates.

2. Using Map Tab Bar

See the steps below to navigate the Map tab bar for a textured background.

Step1:Open the Map tab bar in the right panel.

Step2:Choose Texture in the Background selection.

Step3:Choose from the available textures.

Note: The operation process is illustrated in the last image.

03 Add a Background Image

Whether it's a nature scene, a pattern, or a custom image, a background image can add depth and dimension to your mind map. It provides an extra layer of personalization and catches the viewer's attention. Follow these simple steps to add a background image to your mind map.

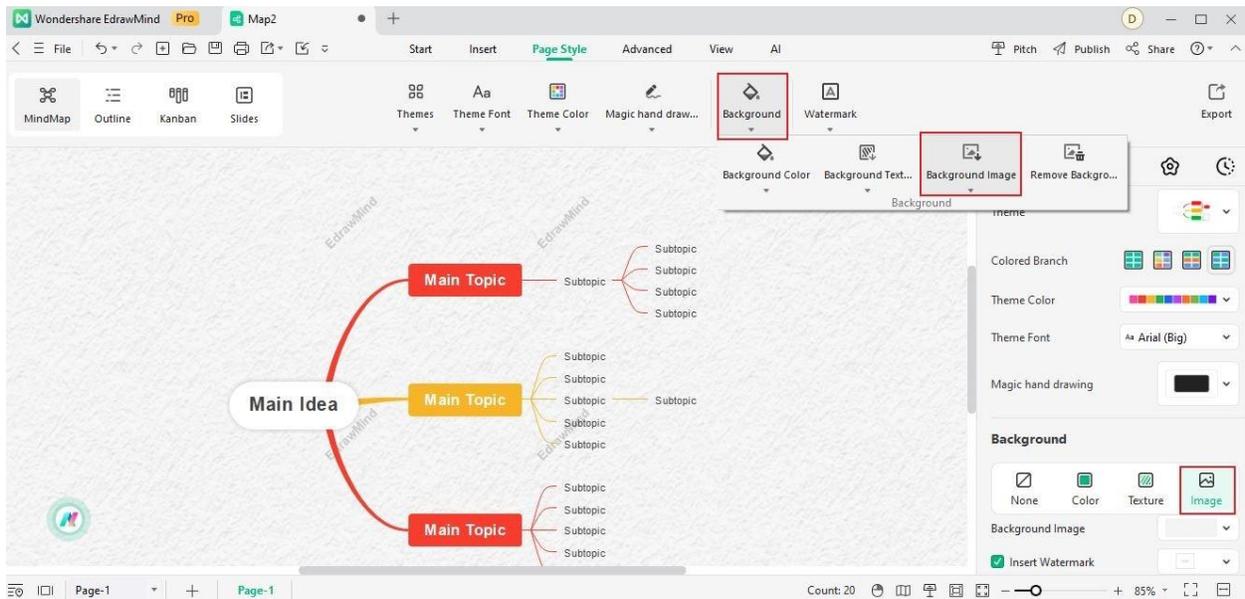

1. Using Page Style Tab

Follow the steps below to add a visually stunning background image to your mind map using the Page Style tab in EdrawMind.

Step1:Click the Background > Background Image from the Page Style tab.

Step2:Select from the pre-made images. Alternatively, click Browse from file to upload an image from your local storage.

Tip: Click the Fit to page screen to fit the selected background image in the entire page as one cohesive mind map.

2. Using Map Tab Bar

Follow the steps below to add a background image in a different way.

Step1:Click the Map tab bar in the right panel.

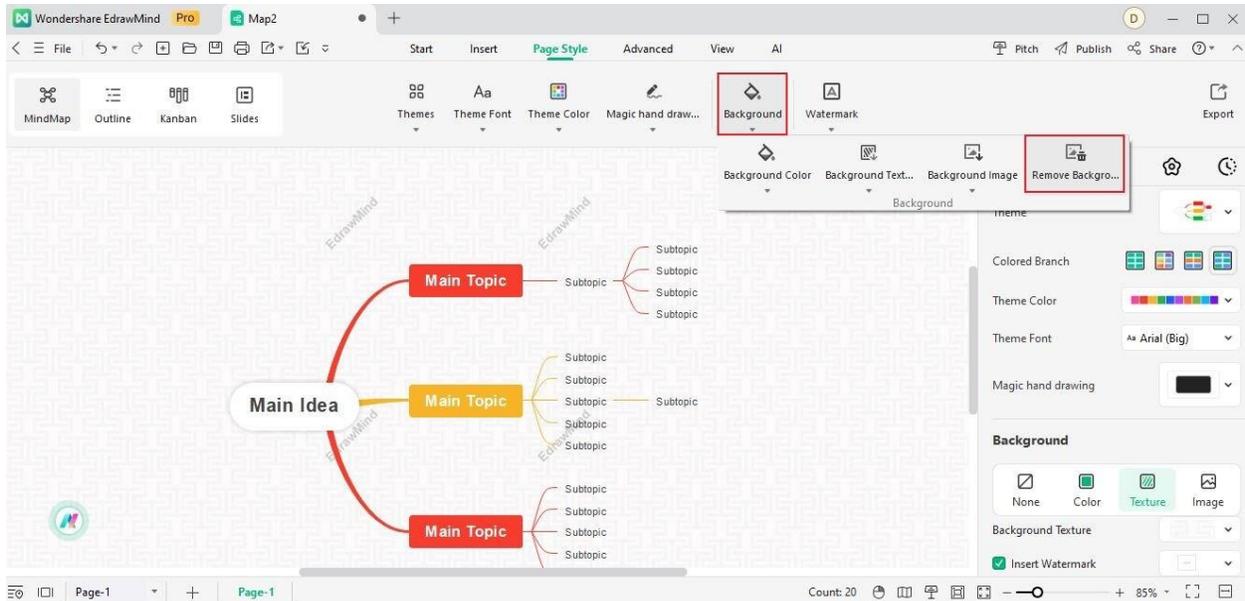

Step2:In the Background selection, click Image.

Step3:Select your preferred Background Image.

Note: The operation process is illustrated in the last image.

3. Remove Background

To remove added background, click **Background > Remove Background** under the **Page Style** tab.

04 Add a Watermark

Adding a watermark to your mind map can be a great way to prevent unauthorized use, copying, or adding branding to your work. With EdrawMind's custom watermark feature, you can choose from several options, like a Text or Image, and even use Built-in watermarks. The watermark won't affect the quality or hinder the mind map. You can also preview it before finalizing your design.

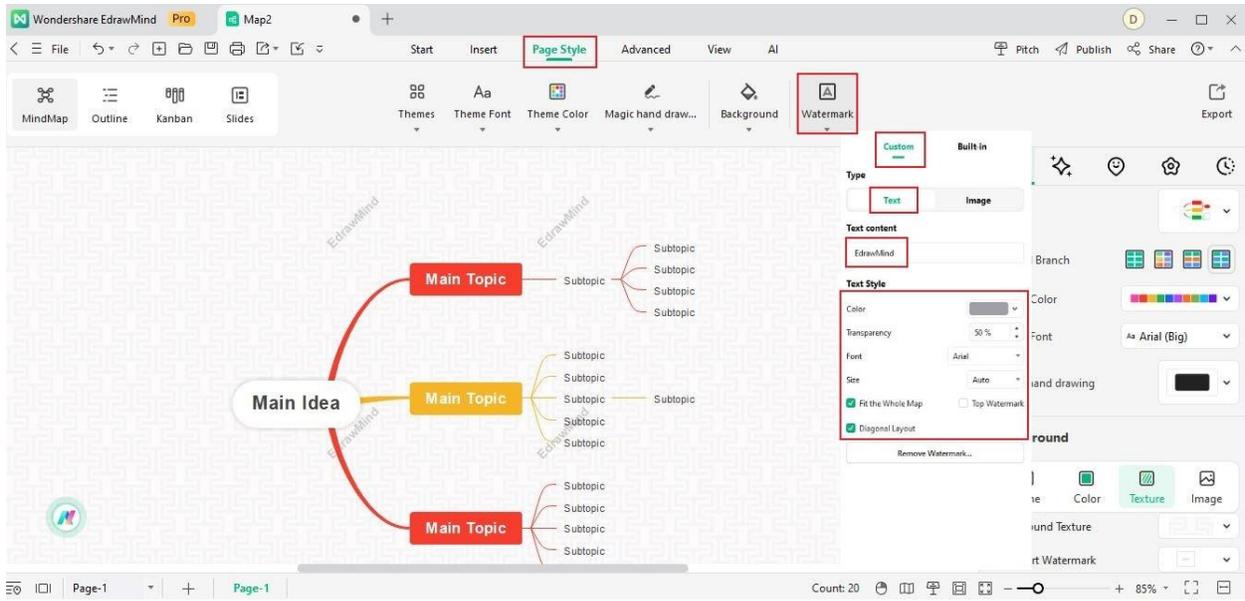

Learn here how to insert a watermark into your mind maps.

Step1:Go to the Page Style tab, then click Watermark.

Step2:From the Custom tab, select Text in the Type selection.

Step3:Enter the watermark content in the Text content text field.

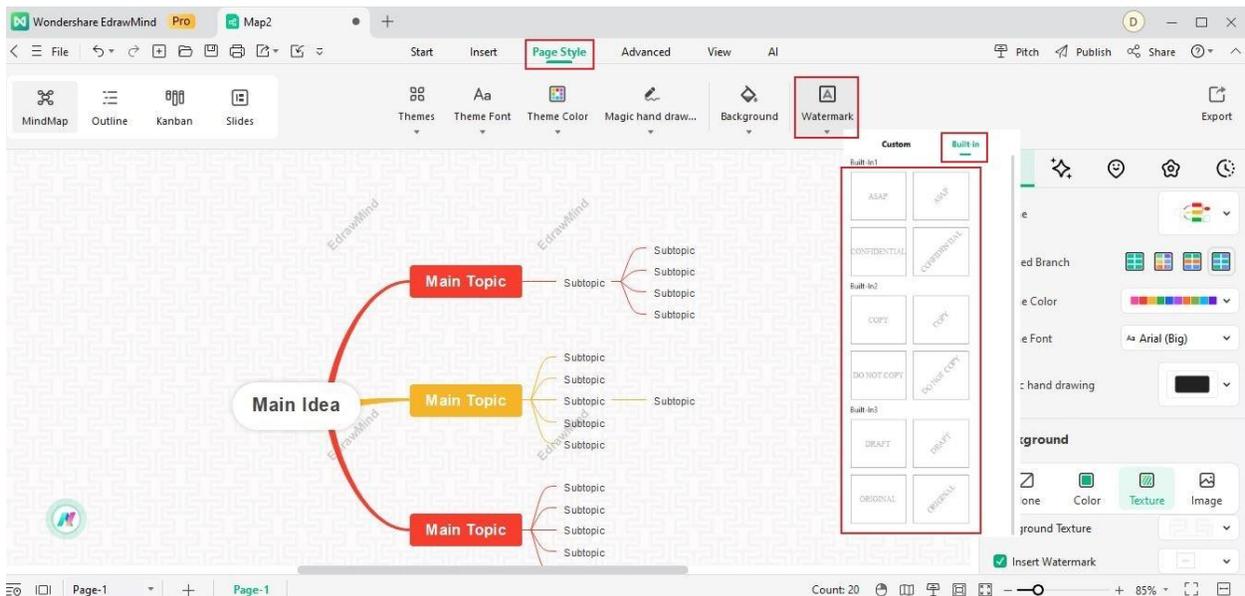

Step4: Click the Color, Transparency, Font, and Size dropdown list in the Text Style selection to customize the watermark.

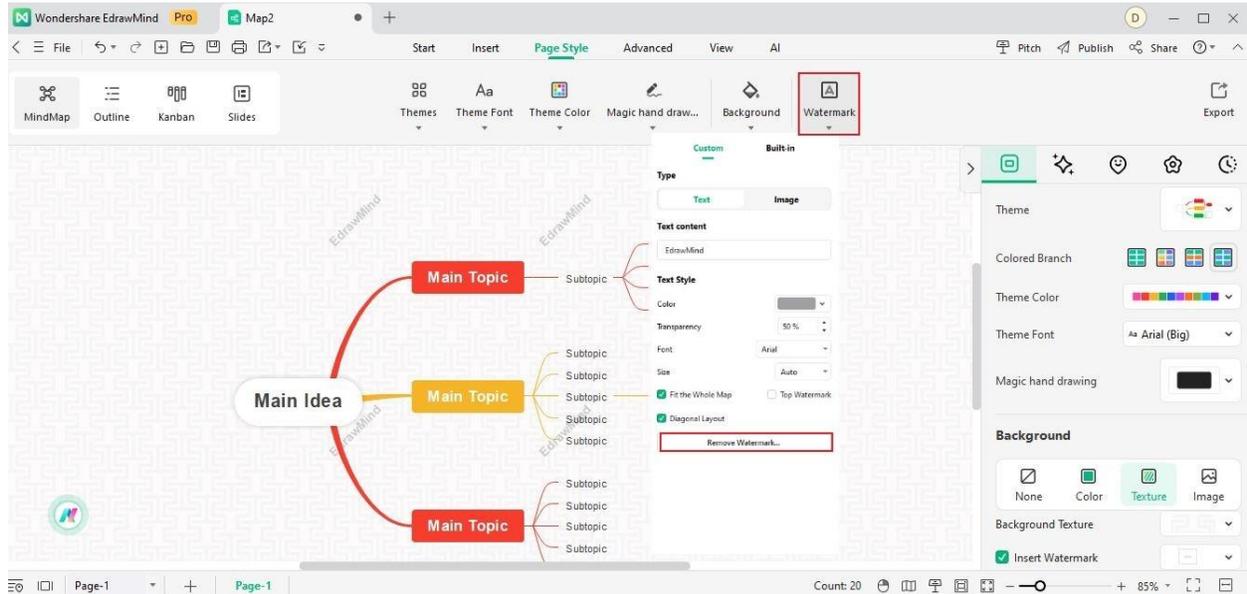

Tip: Select the Fit the Whole Map, Top Watermark, or Diagonal Layout checkbox to adjust the watermark setup.

Notes:

- To access the Built-in options for Watermark, repeat Step 1. Next, click Built-in, and you will see several examples, such as ASAP, Confidential, Copy, and Draft, from which you can choose.
- You can also insert a watermark into your mind map from the right panel. To access this feature, go to the Map tab bar and select the Insert Watermark checkbox.

- To remove the watermark, click Remove Watermark... in the Watermark menu.

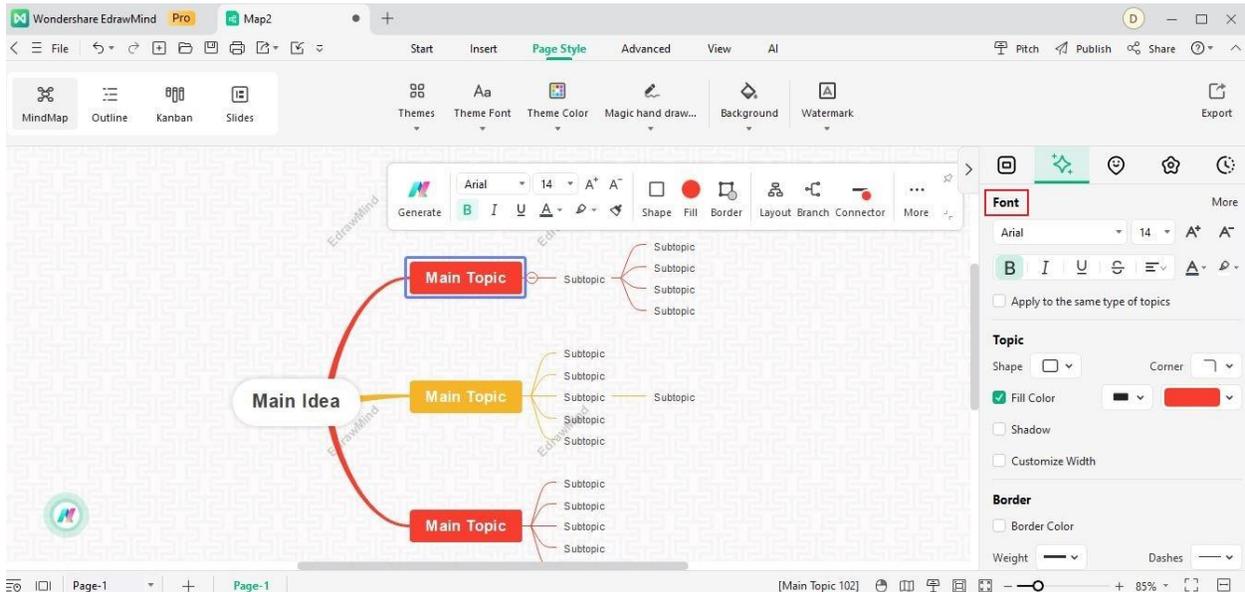

Change Text Style and Color

Here's a guide to changing the font and the color of your Theme Shapes after selecting a Theme Style.

Step1:Launch EdrawMind. Click Create or Import a file saved on your computer and select the theme that needs to be changed.

Step2:Select the topic for which you want to change the font and color. Here are three ways to operate.

- **Method 1:** Adjust in the menu bar Page Style > Theme Font.
- **Method 2:** Go to the right-side panel. In the Style column, click Font and Color to adjust.
- **Method 3:** After selecting a topic, a floating box will automatically appear. Change the font and color with it.

Note:

If you want to set a default font for maps, simply go to File > Options > Format, and choose Use default font instead of theme font. Next, select an appropriate font as the default font for the map.

Change Topic Shape and Border

EdrawMind enables users to easily modify the appearance of topic shapes according to their preferences. With a wide range of customization options, you can personalize the visual style of your topic shapes to create visually appealing and engaging mind maps.

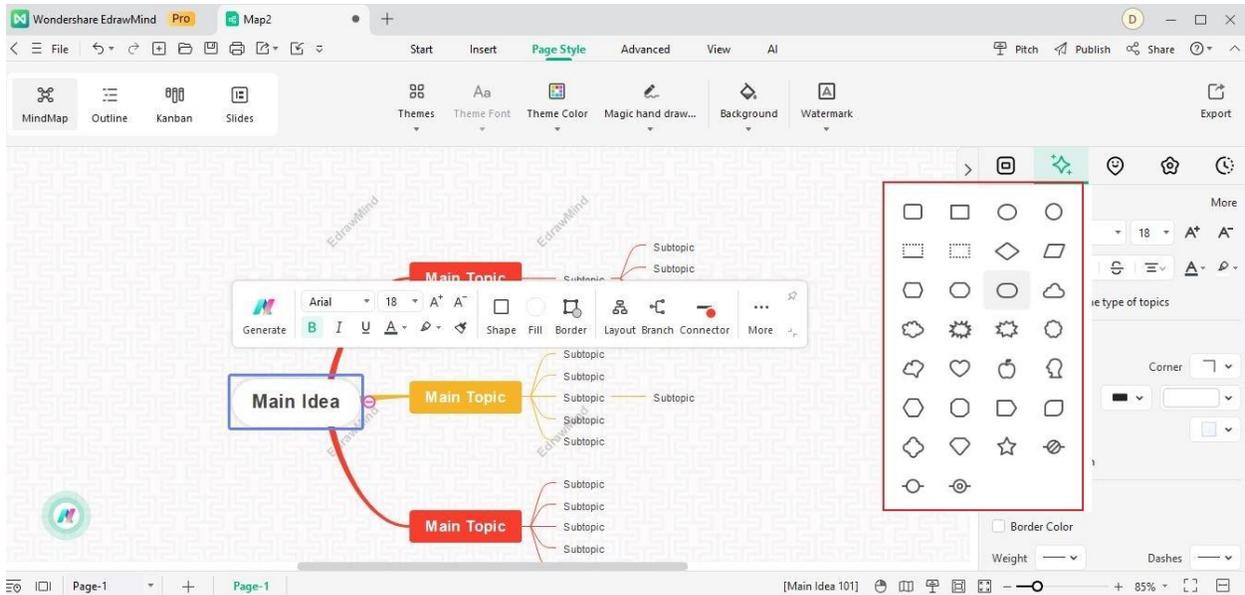

01 Change Topic Shape

EdrawMind provides users with the choice to change the shape elements. You can also change different shapes for the topics from there. Here's how.

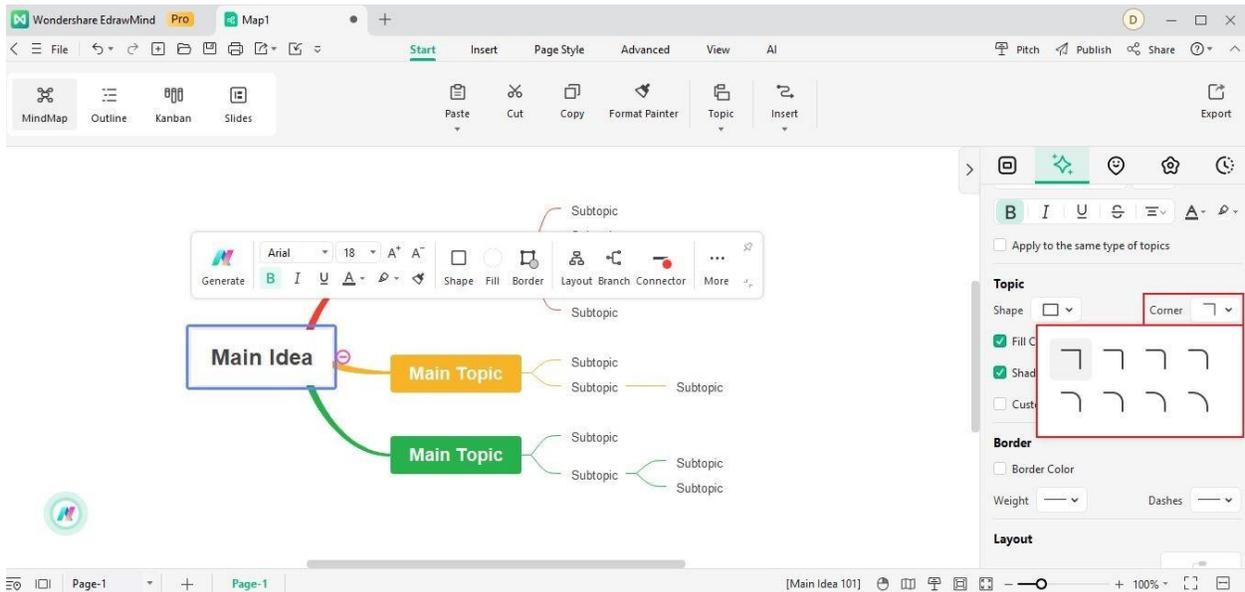

Step1:Select a topic on the mind map and go to Style.

Step2:In the Style column on the right panel, click Shape and select a suitable shape according to your preference.

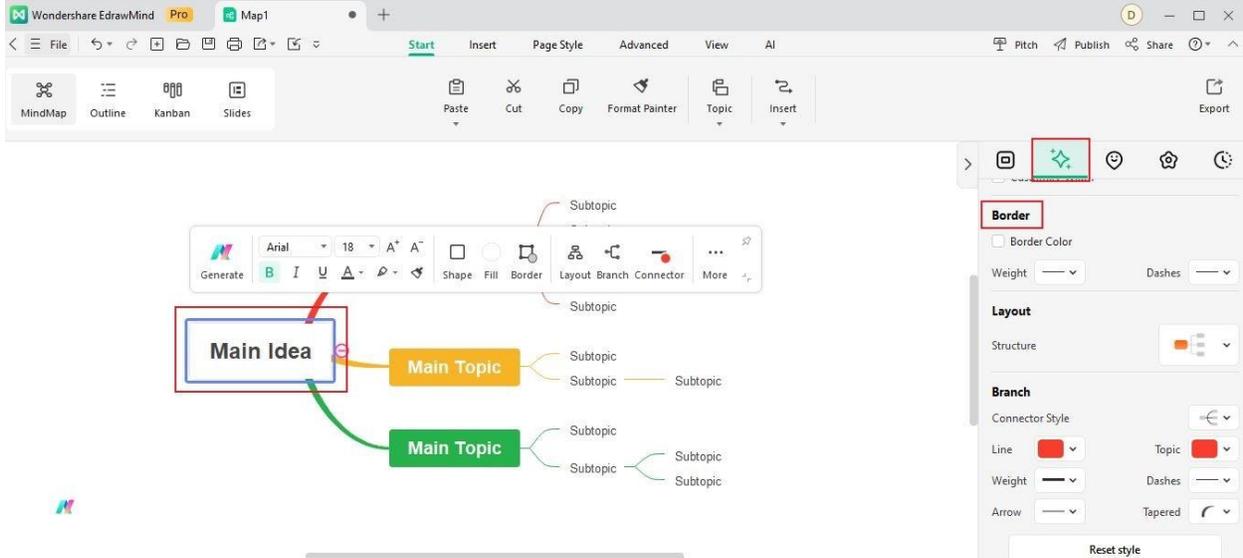

Step3: Once you have defined the shape of your topics, you can further personalize your mind maps by customizing the style of shape corners. Simply click the Corner button and choose your preferred corner style to instantly apply it to the shapes. This feature allows you to achieve the desired aesthetic appeal for your mind map.

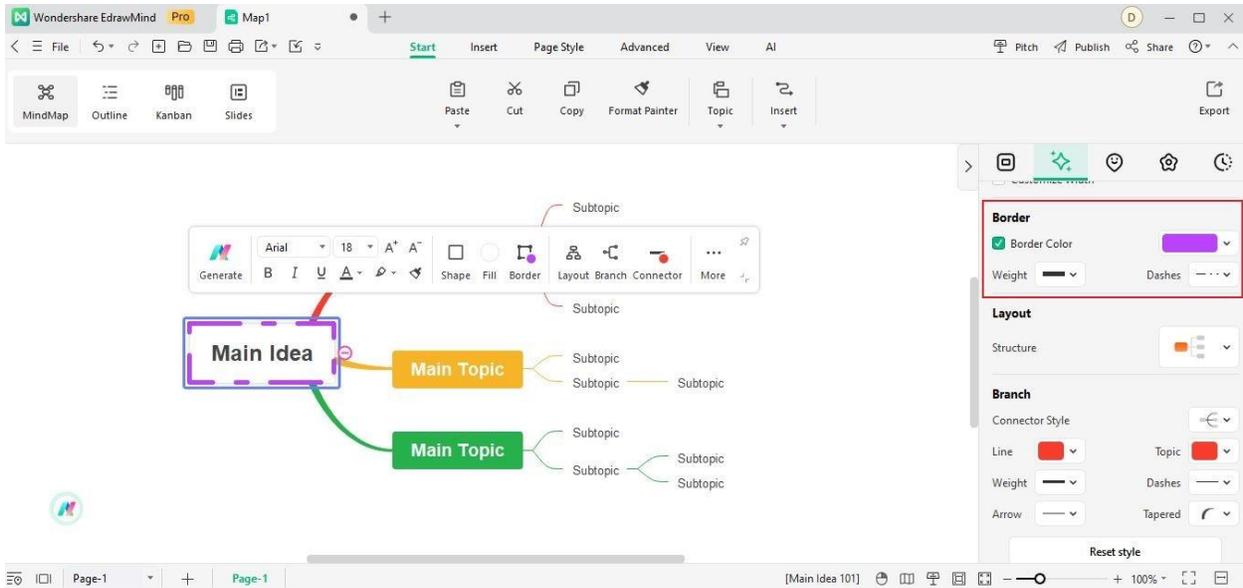

02 Change Topic Shape Border Color and Style

Here's how to change the color and style of the topic shape border when creating your maps.

Step1: Select a target topic and go to Style > Border.

Step2: Choose the Border Color according to your preference. You can also adjust the Weight and Dashes on your target topic by clicking on the appropriate options.

Change Topic Colors

Enhance the visual impact of your mind maps by customizing the colors of the topic shapes. With the ability to personalize the color scheme, you can create visually captivating mind maps that effectively convey information and engage your audience.

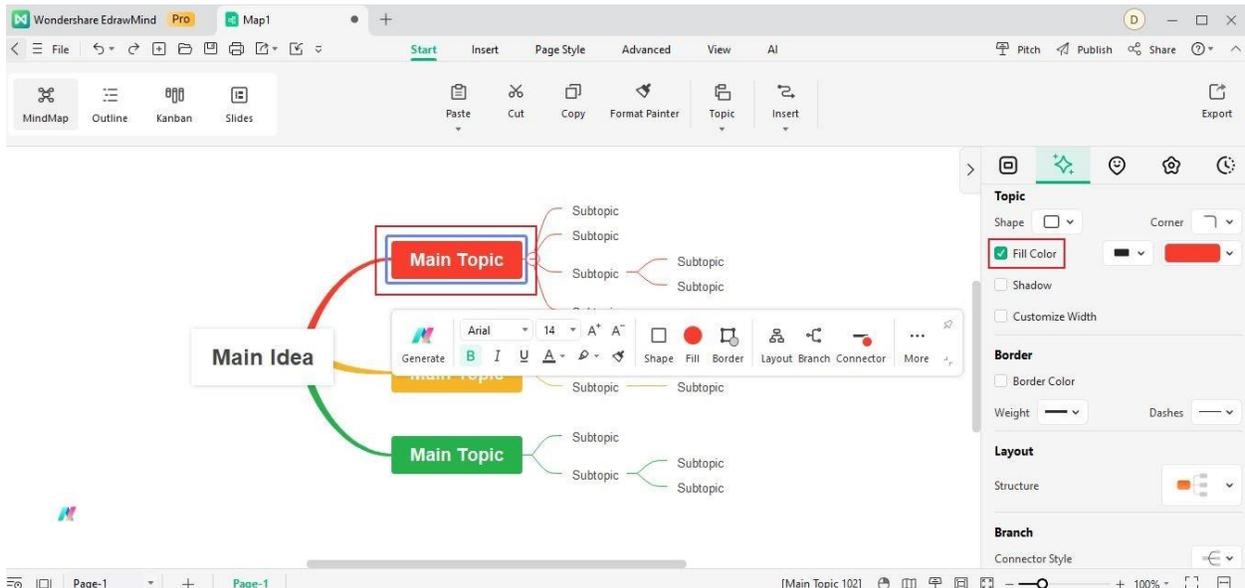

01 How To Change Topic Colors

Changing topic colors of your map refers to filling the interior of topics with a different color. You can change the topic colors of your map by following these steps.

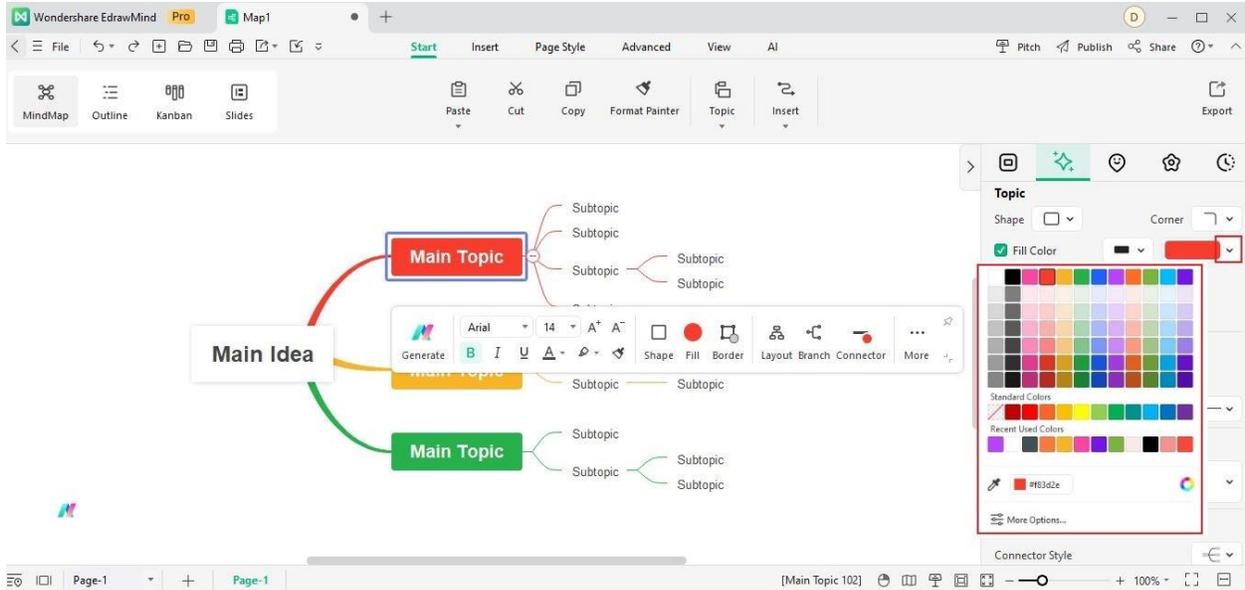

Method 1: Change Topic Colors Through the Right Side Panel

Here is the quick process of setting the topic colors with the right side panel.

Step 1: Launch EdrawMind. Select Create or Import the file saved on your computer. Click the topic you intend to add a color on. Go to Fill Color in the right side panel.

Step 2: Click the down arrow on the right side, and choose an appropriate color in the drop-down menu.

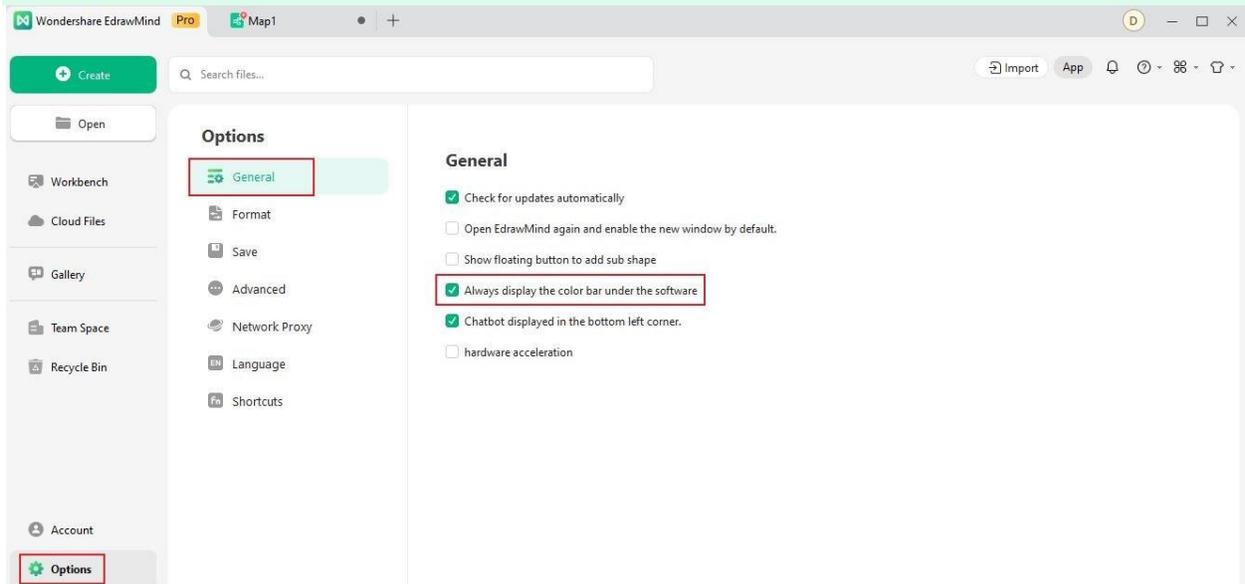

Method 2: Change Topic Colors With the Color Bar

You can set colors for any topic in this convenient way.

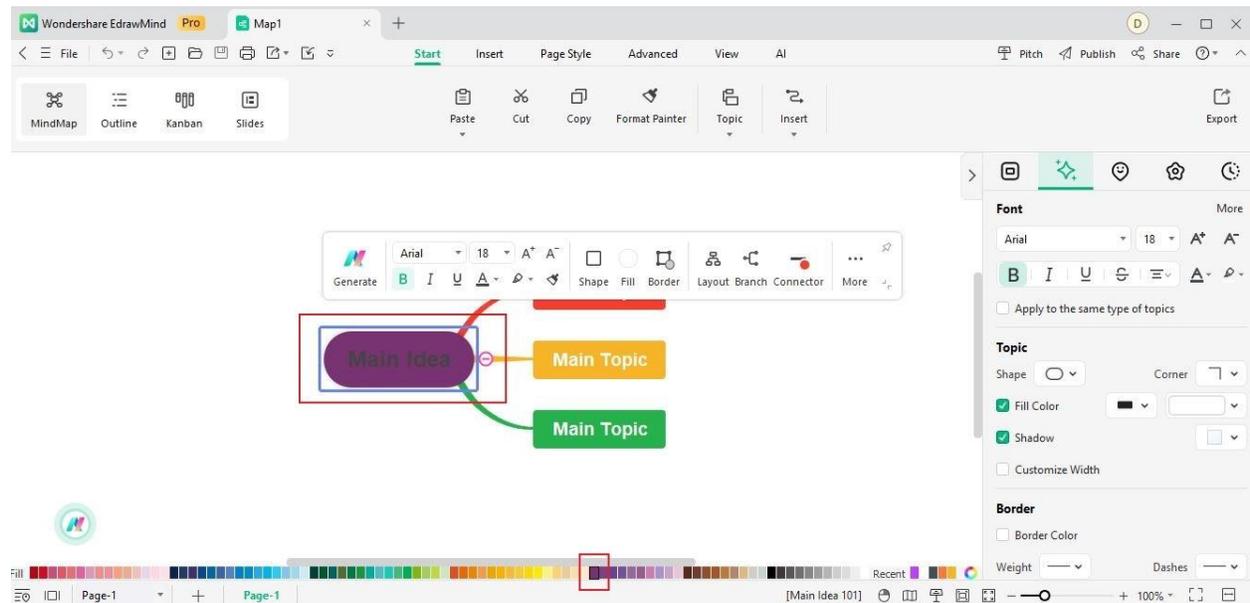

Note:

The color bar is not displayed at the bottom by default. You can go to **Options > General** and check the **Always display the color bar under the software** under the software checkbox. Doing this will automatically display a color bar underneath your mind map for easier customization.

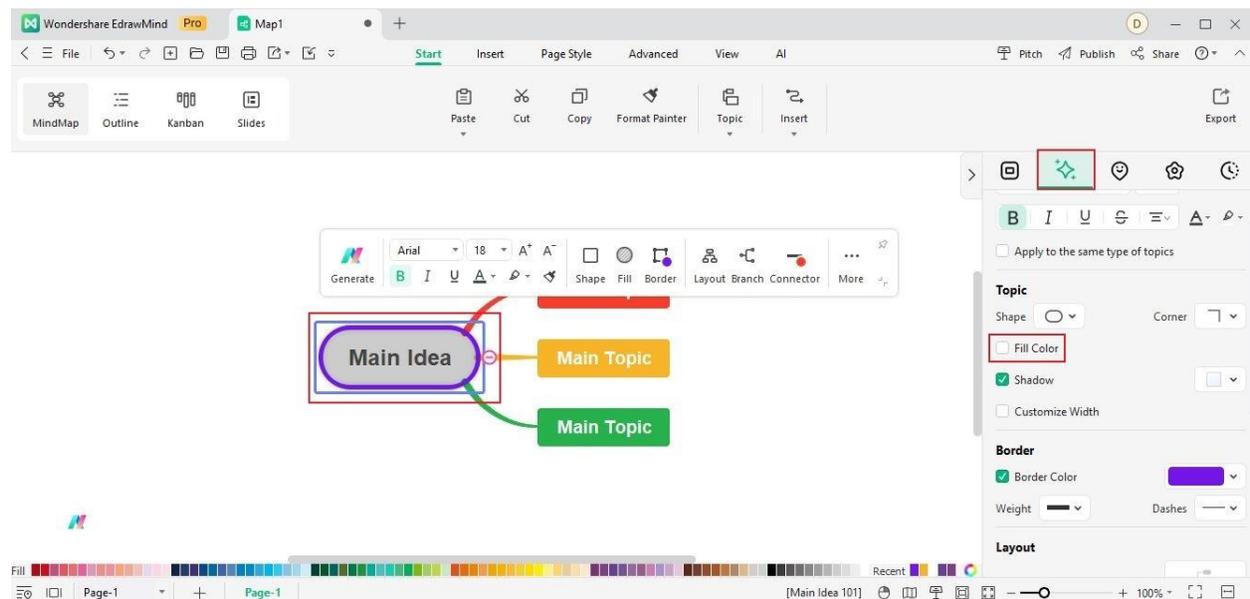

Here is the operation of adding a topic color after displaying the color bar at the bottom of the interface.

Step: Click the topic for which you want to add color. Then, pick a color you like, which will automatically apply to the selected topic.

02 How To Remove Theme Colors

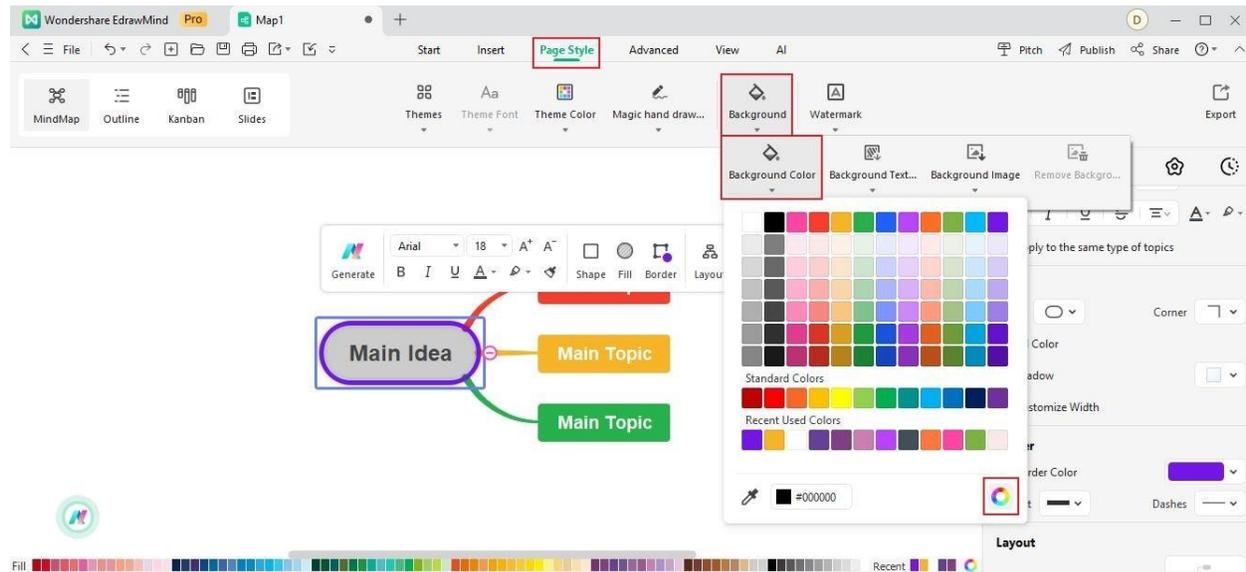

If you want to remove the Theme Color from your topics, go to Style in the right side panel and uncheck the Fill color.

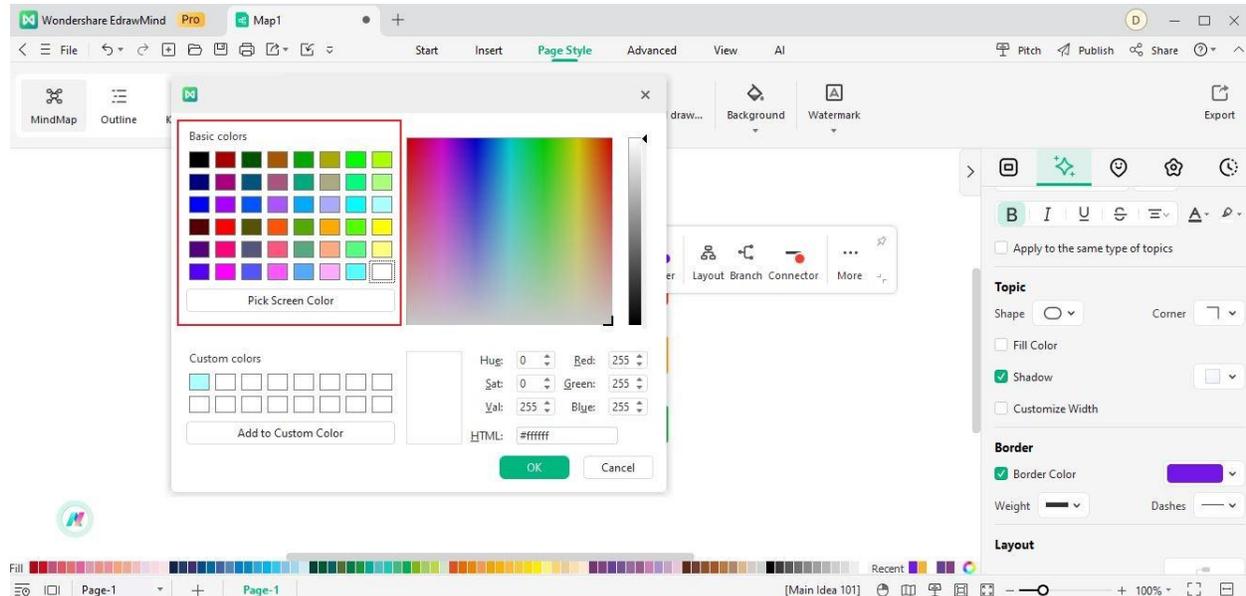

03 More Colors

It's possible to personalize your mind map. If you want to use a color other than the theme color or the standard color available, here are the steps.

Step1:Launch EdrawMind. Click Create or Import the file saved on your computer. At the top toolbar, go to Page Style > Background > Background Color and click More Colors.

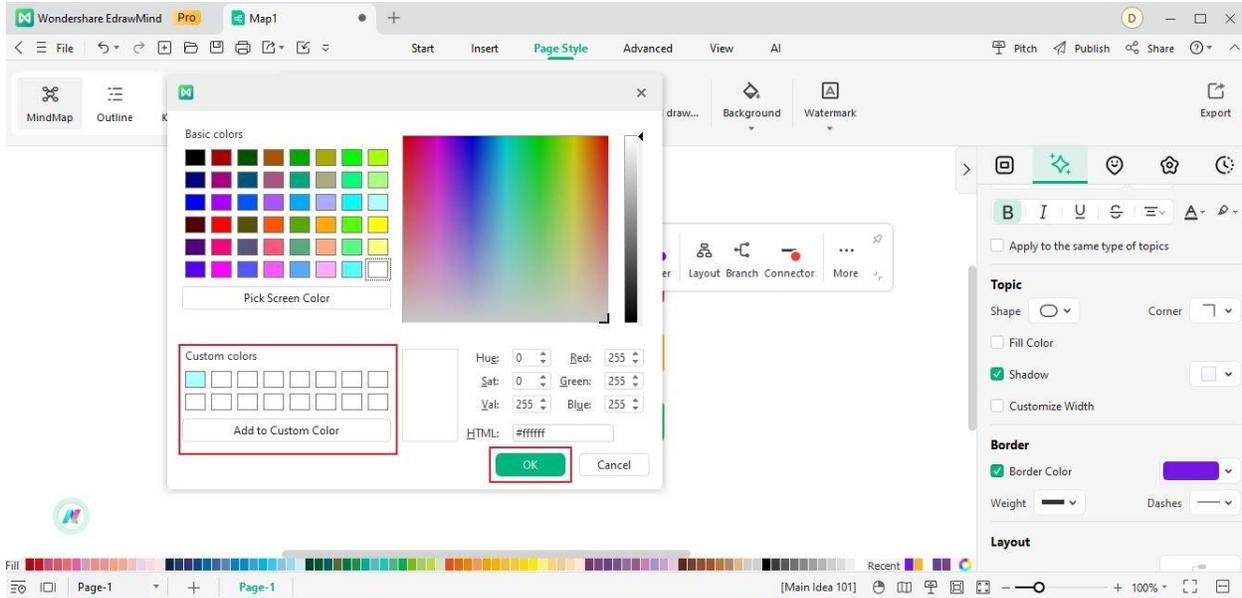

Step2a:In the dialogue box, you can select a Screen Color from the list of Basic colors.

EdrawMind Basic Color

Step2b:Use Custom colors. Choose a color you want to set as background from the palette on the right side, or input its code next to HTML:.. Once done, click Ok, and the color will be applied to your background. After applying the color, the Custom colors will automatically save the color you set.

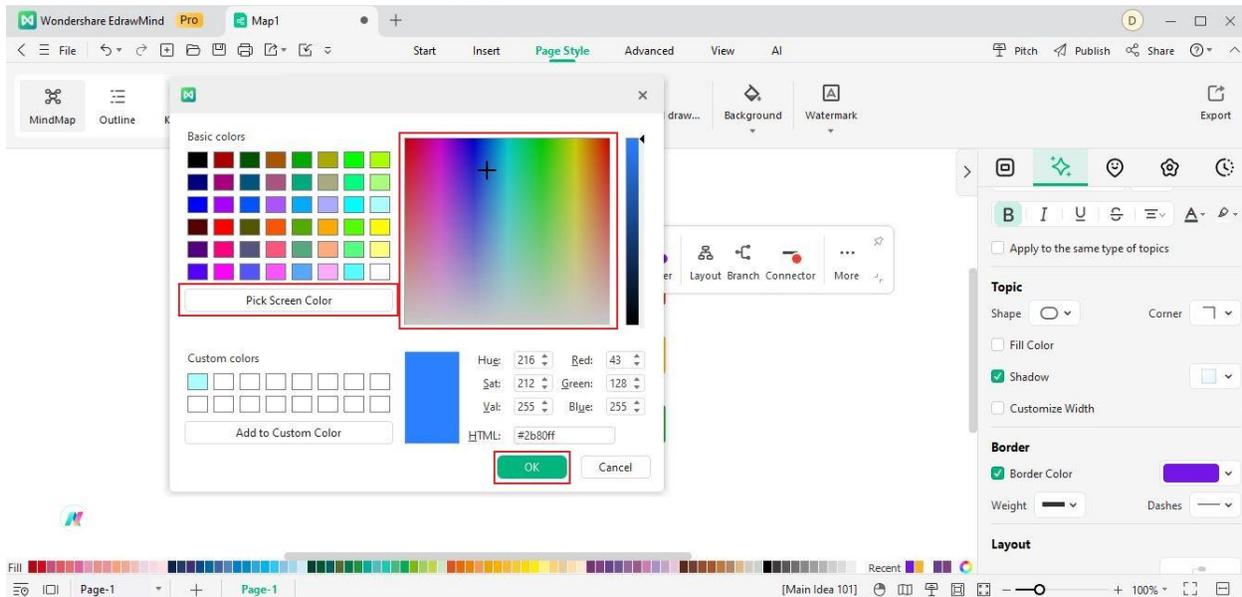

EdrawMind Custom Color

Note:

You can also directly save the chosen color by clicking Add to Custom Colors.

Step2c:Click the Pick Screen Color button and choose the color you want on the right-side palette. Then click OK to apply the color.

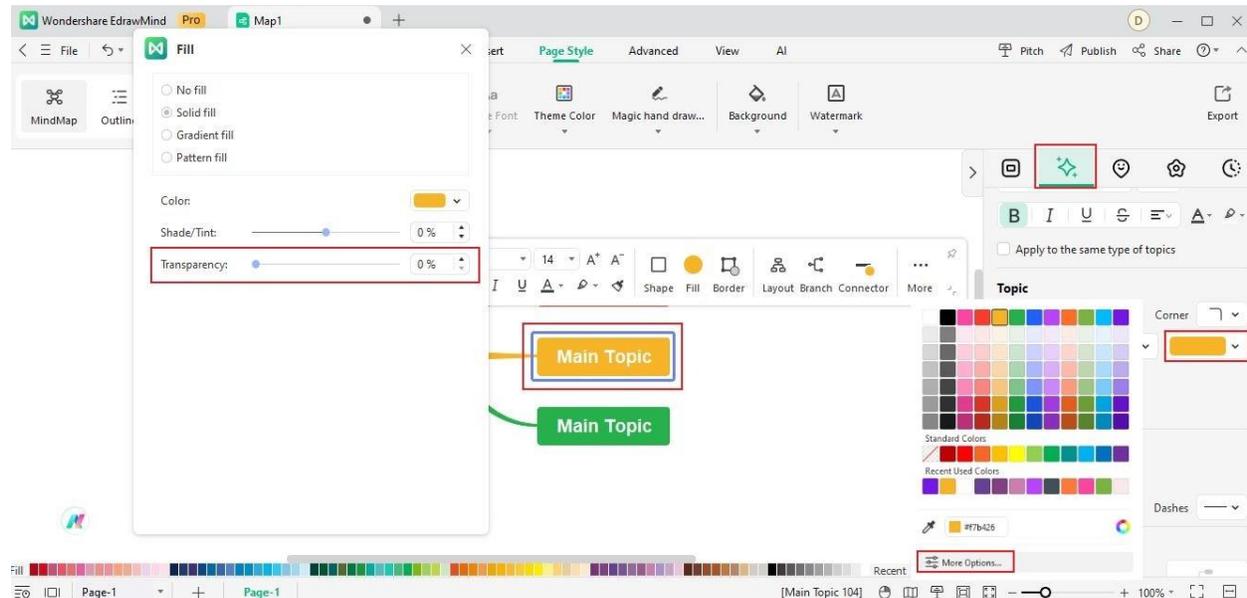

EdrawMind Color Method

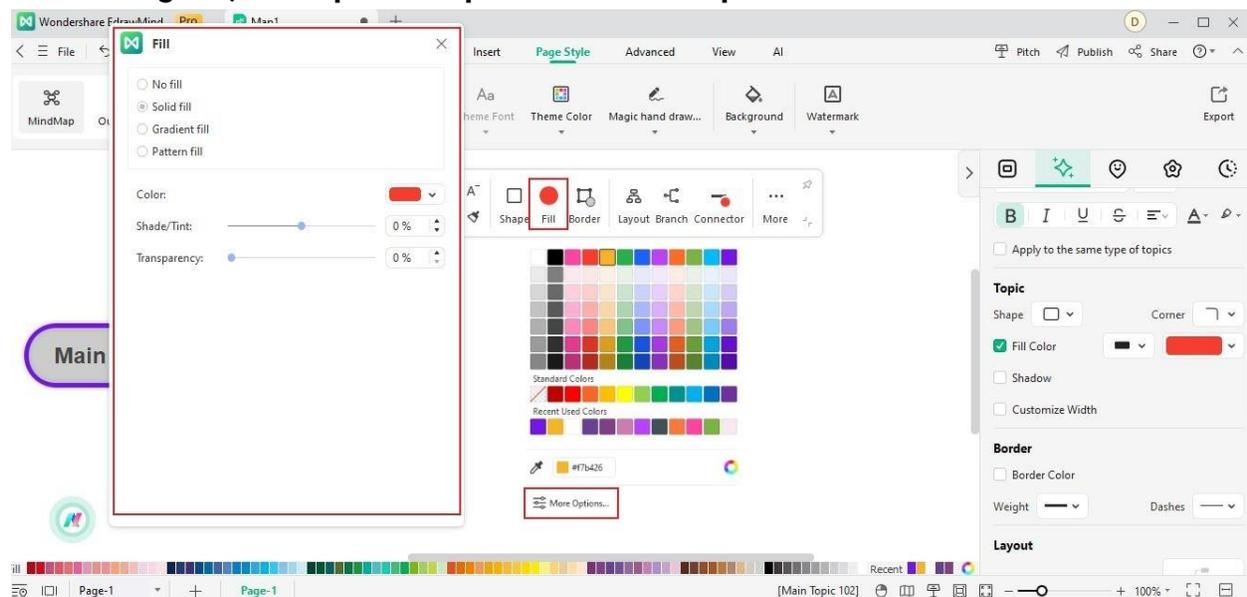

04 Transparency

It's possible to set your theme Transparency to personalize your map. Here's how.

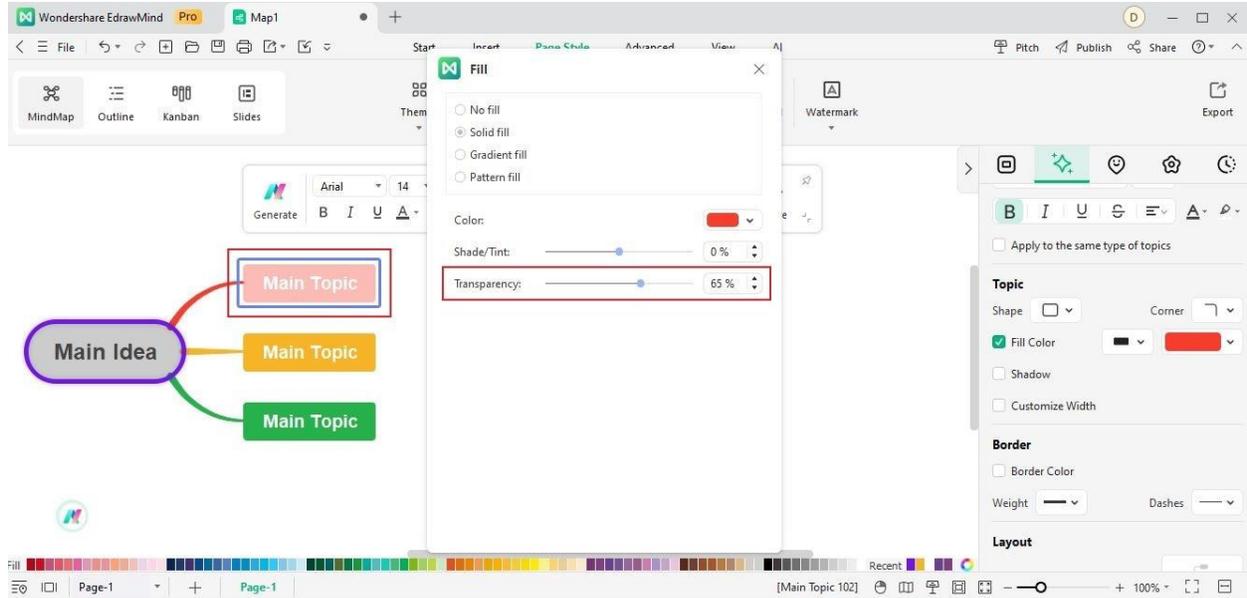

Step1a:Launch EdrawMind. Click Create or Import the file saved on your computer. Choose a topic on your mind map and go to the right side panel and click Style > Fill Color > More Options.

Step1b:Select a topic after opening or creating a mind map in EdrawMind. Click Fill in the floating bar, and tap More Options... in the drop-down menu.

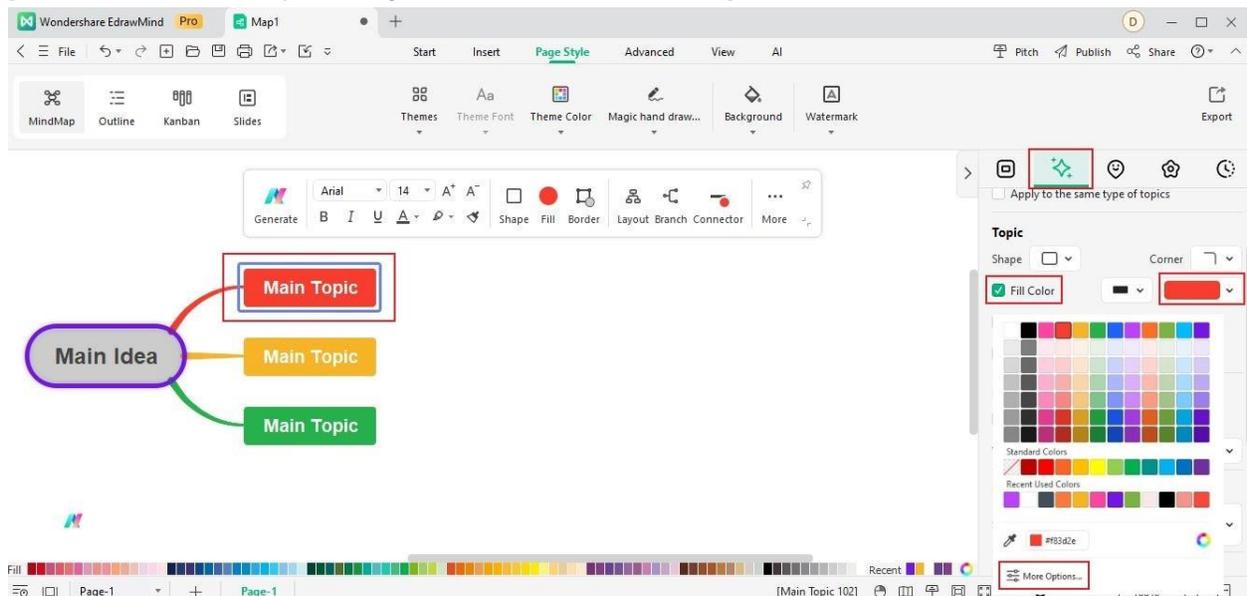

Step2:On the following dialog box, move the Transparency slider. Alternatively, enter a number next to the slider to change the percentage of transparency from 0 (completely opaque, the default) to 100% (fully transparent).

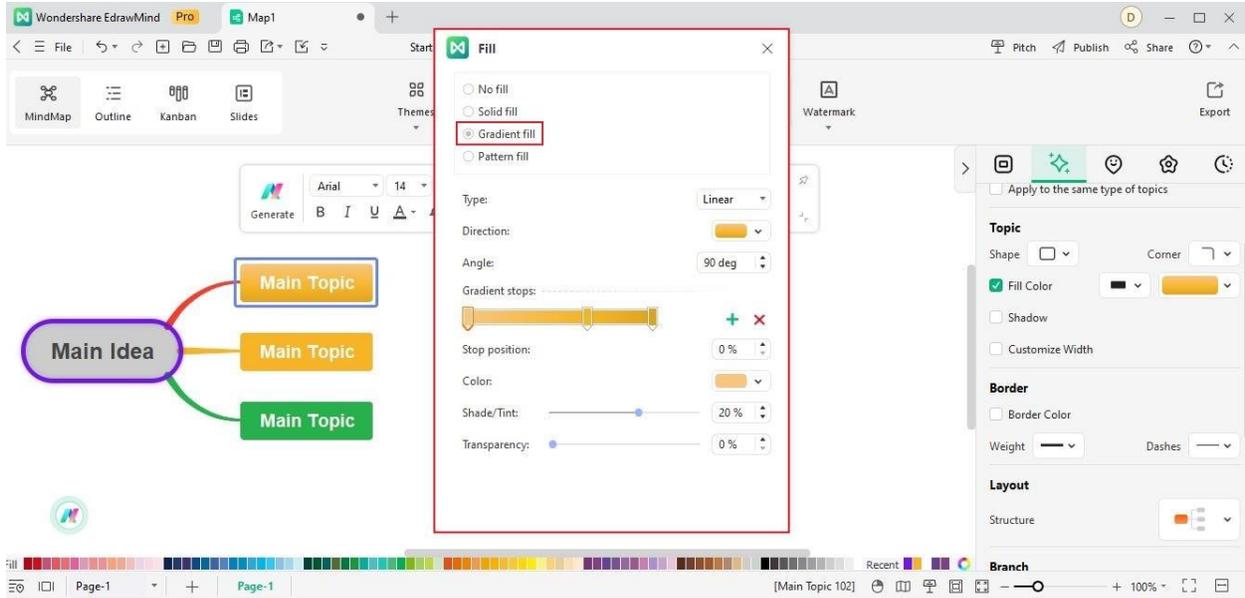

05 Gradient Fill

The gradient fill feature by EdrawMind makes your mind maps more colorful and attractive. Here are the steps to add a gradient fill on your mind map.

Step1:Launch EdrawMind. Select Create to create or Import to load the mind maps saved on your computer. Click on a themed shape on your map and go to the right side panel. From there, go to Style > Fill Color > More Options.

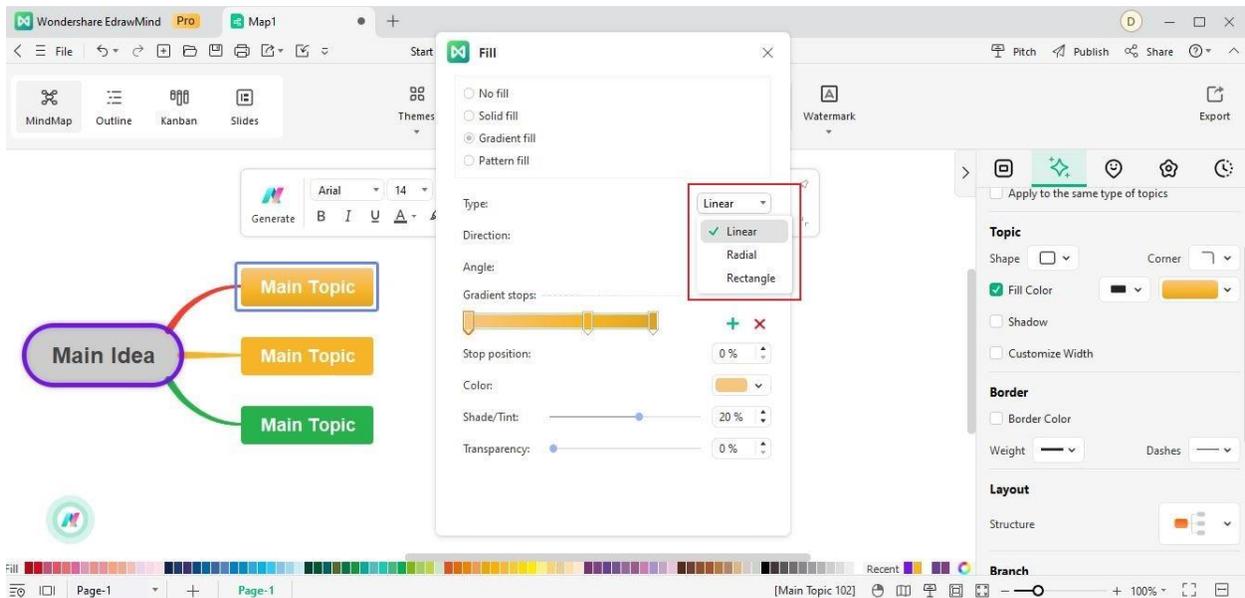

Step2:From the dialog box, set Gradient Fill.

Note:
Applying Gradient Fill gradually increases your theme's color and tone. From light to dark or from dark to light, there's a slow transition from one color to another. It can also transition from one color to another shade of color.

Step 3-A Gradient Type

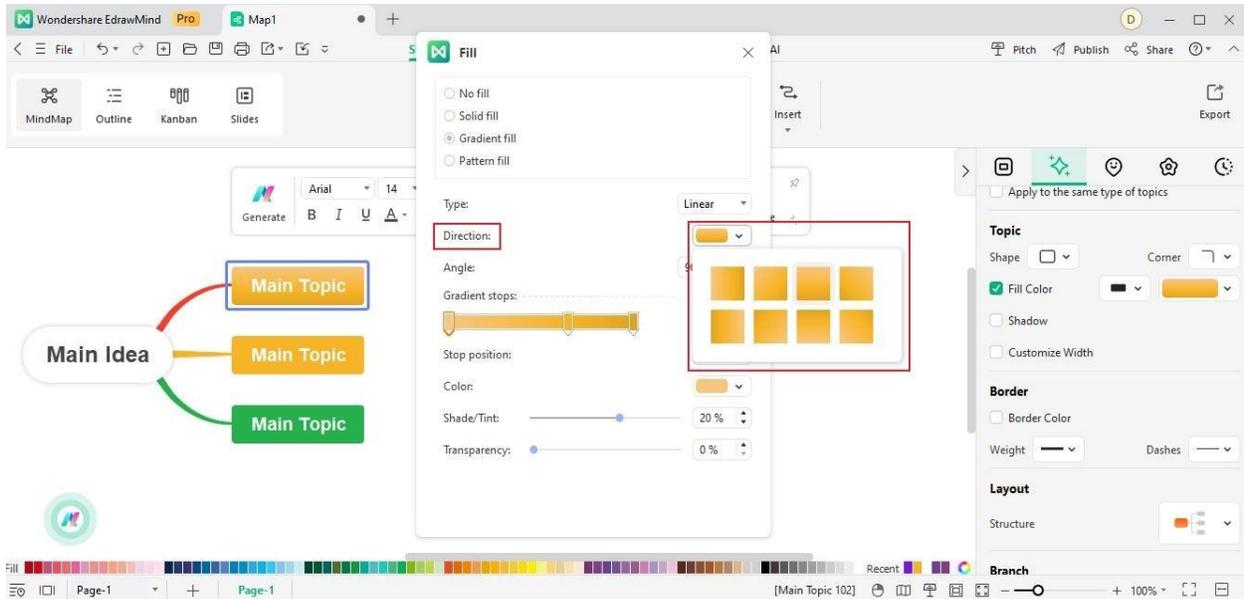

Select a gradient type from the Type drop-down list to specify the direction of the color gradient fill. Next, choose from the Linear, Radial, and Rectangle types that determine your preferred styles.

EdrawMind Gradient Fill Type

Step 3-B Gradient Direction

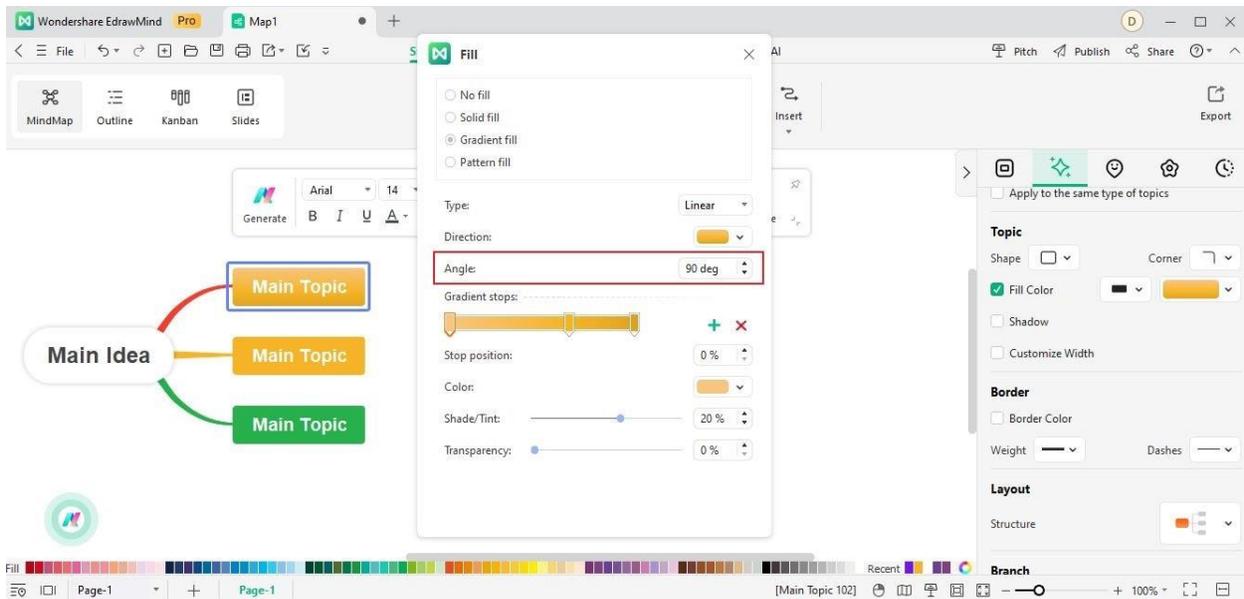

The available directions will depend on your selected gradient type. To choose a gradient direction for colors and shades, click Direction. Afterward, determine the appropriate direction effect.

EdrawMind Gradient Direction

Step 3-CGradient Angle

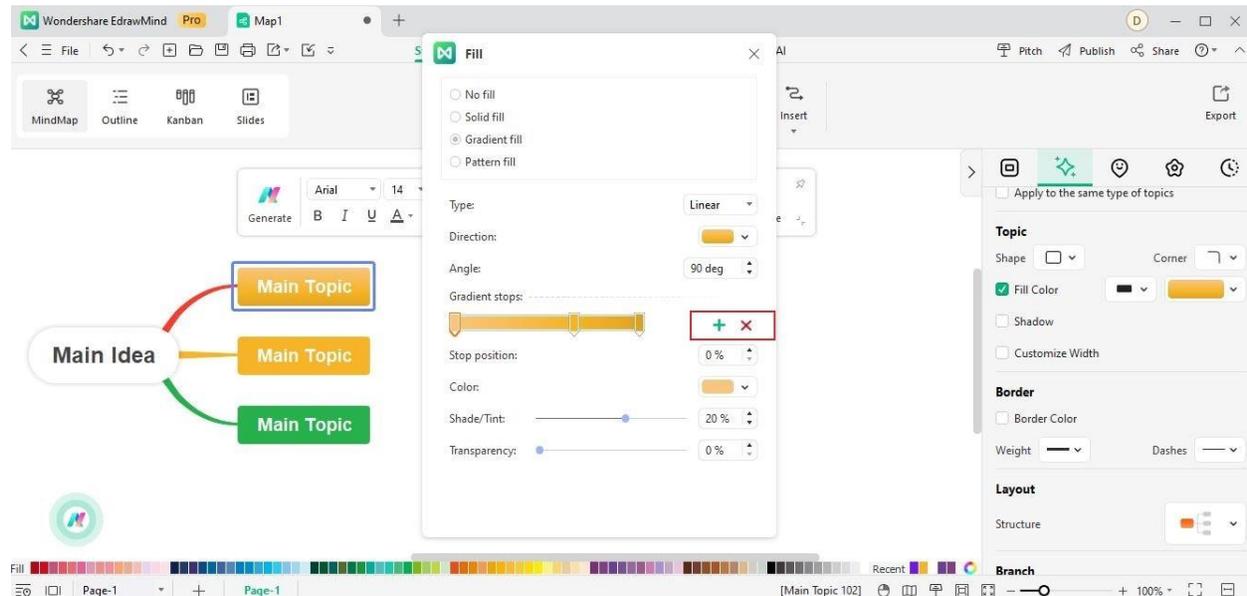

The angle of your shape gradient fill is rotatable. However, this option is available only when the Linear type is selected. Enter a suitable degree value in the dialog box to specify the angle.

EdrawMind Gradient Angle

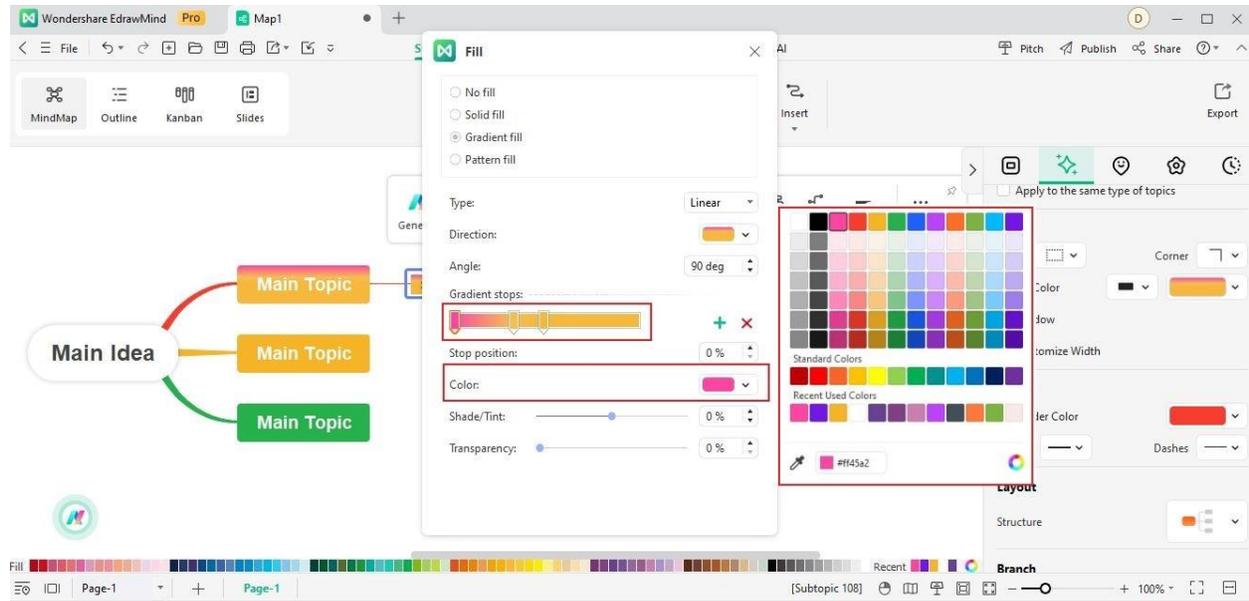

Step 3-DGradient Stops

If you want to create a gradient that only appears at the corners of a shape, you need to use a slider on Gradient Stop to make the gradient non-linear. To add a slider, click the + green plus sign or directly click the bar below Gradient stops. Meanwhile, you can click X, the red cross sign, to delete a slider.

EdrawMind Gradient Stops

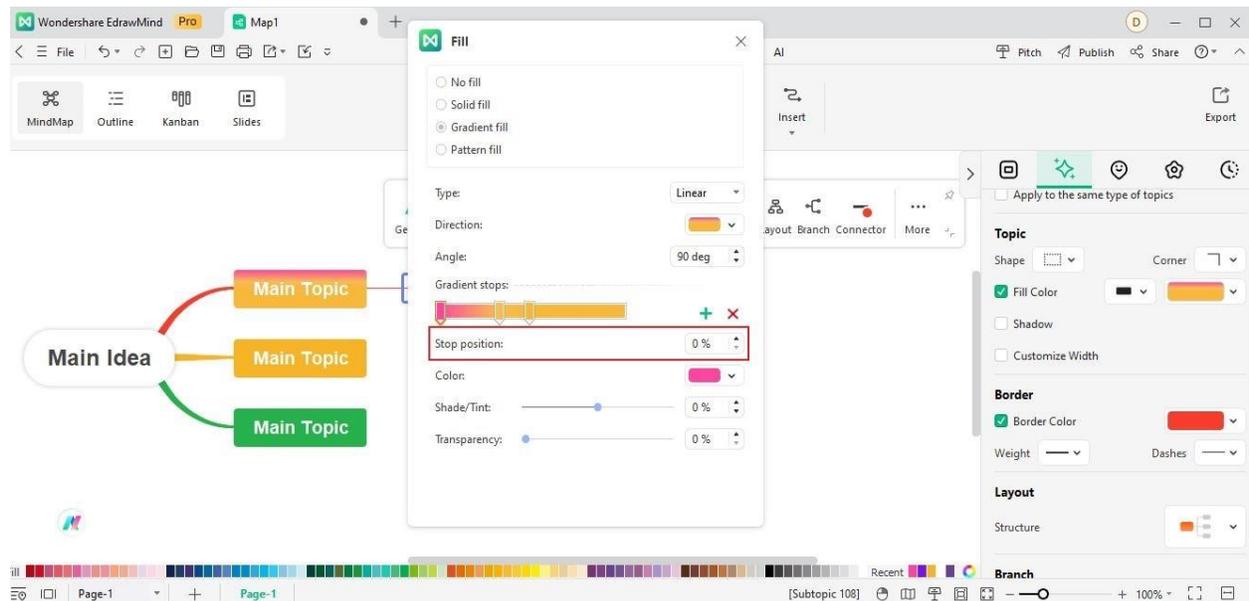

Tip: The Gradient stops bar describes the position and color of transition points in a gradient. It has the elements like position, color, shade/Tint, and transparency values. The transparency value applies to the gradient stops, not the overall fill. The gradient stops can create the non-linear gradient effect. If you want to create a gradient stop from various colors (nine maximum), you'll need to select the stops one by one and choose their colors in the drop-down palette next to Color.

EdrawMind Gradient Angle

Step 3-EPosition

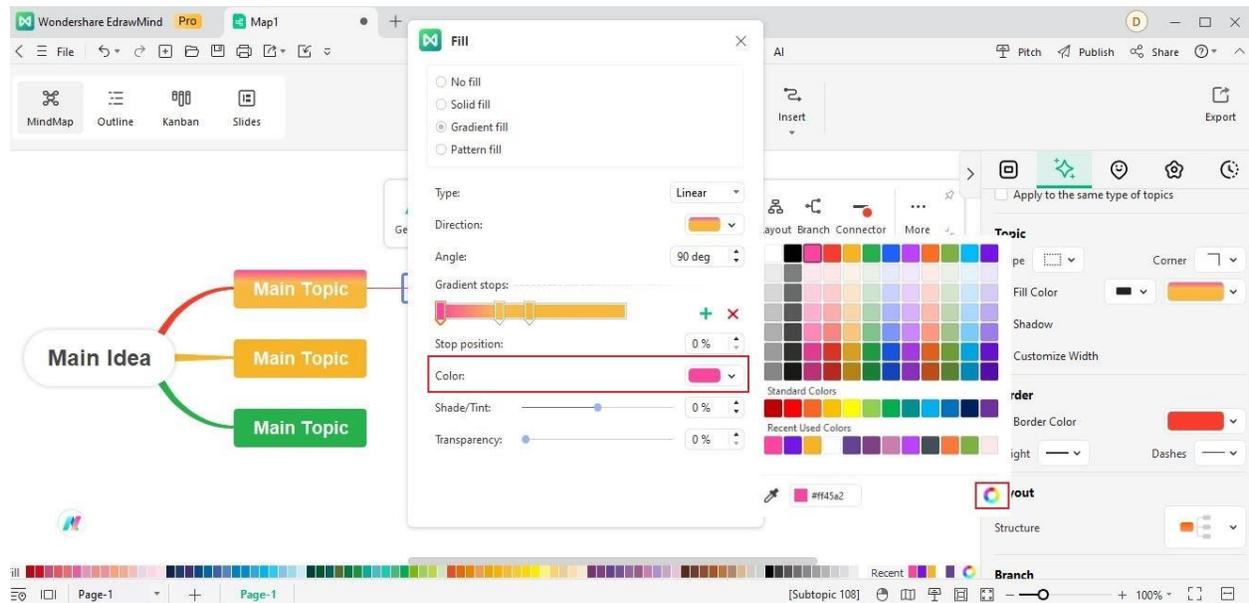

Move the sliders on the Gradient stops bar to set the position where the color and transparency change in the gradient fill. Alternatively, you can enter a number representing the position in the Stop Position box below the slider. Using the up and down arrows, you can also increase or decrease the position.

EdrawMind Gradient Location

Step 3-FColor

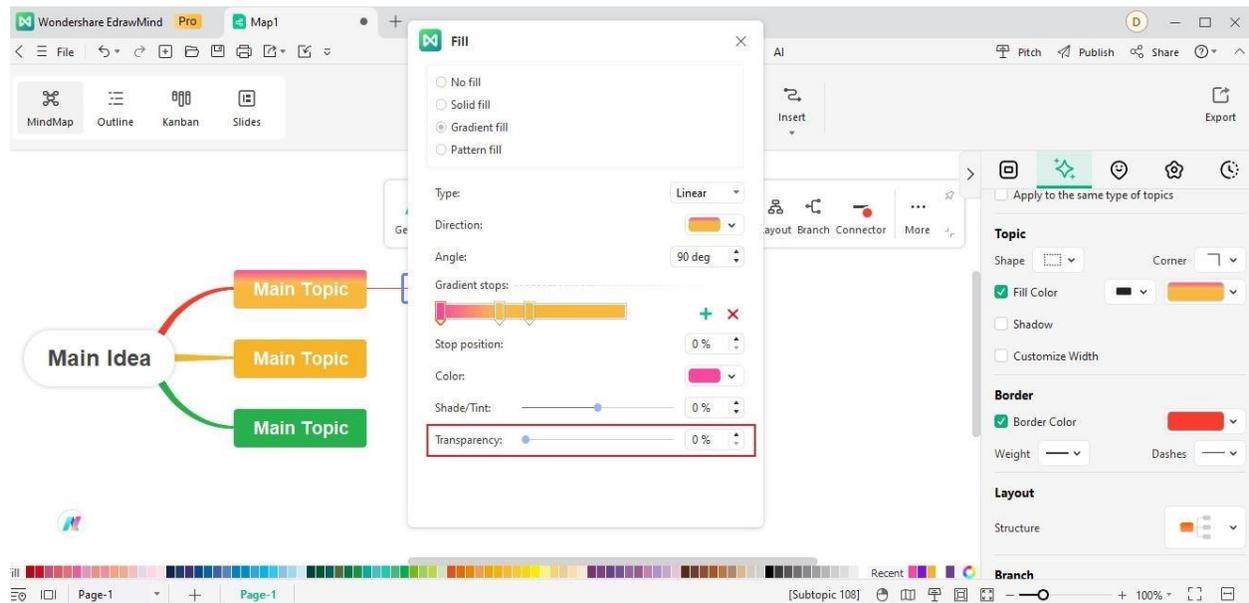

To set the color of the stop point of a particular gradient, select a slider and click Color. You can click More Colors for a wider range of options.

EdrawMind Color

Step 3-Gratpacity

You can set the Transparency by moving the slider, inputting numerical values, or using the up and down arrows.

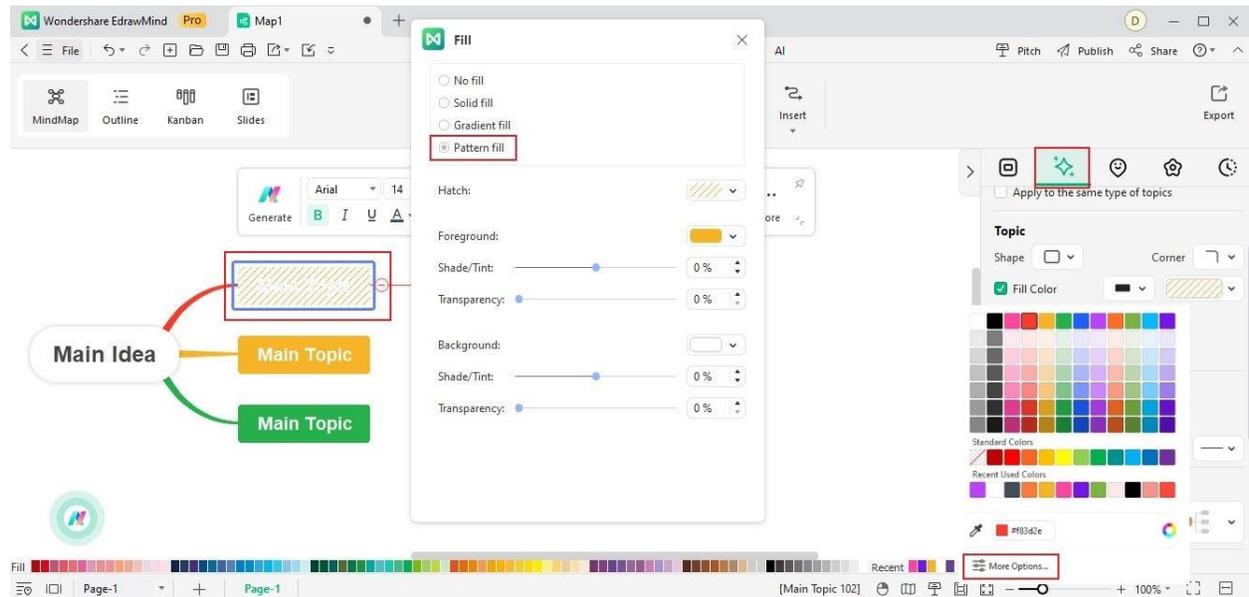

Edrawmind Transparency

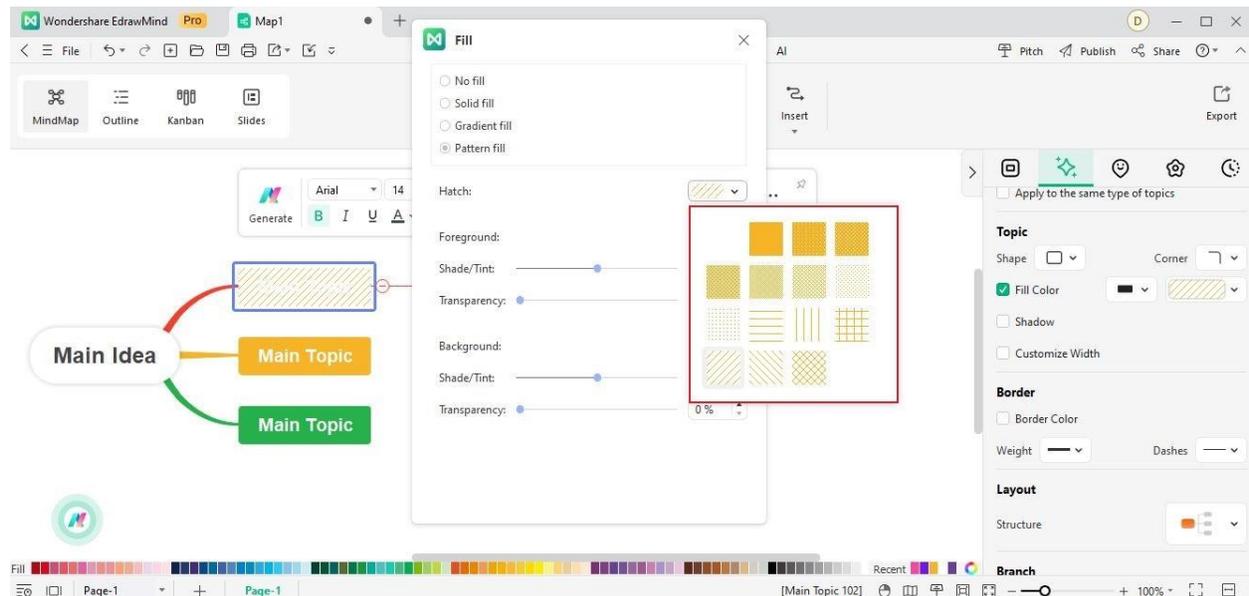

06 Pattern Fill

Here are the steps to add a Pattern Fill on your maps.

Step 1: Launch EdrawMind. Click Create or Import the file saved on your computer. Click on a theme shape and go to Style > the down arrow next to Fill Color > More Options in the lowest place of the drop-down menu. Next, set the theme Fill Color to Pattern Fill.

Step2: In the Fill dialog box, select Hatch. Choose the appropriate pattern from one of the choices available.

Step3: Set the Foreground and Background colors of the selected pattern.

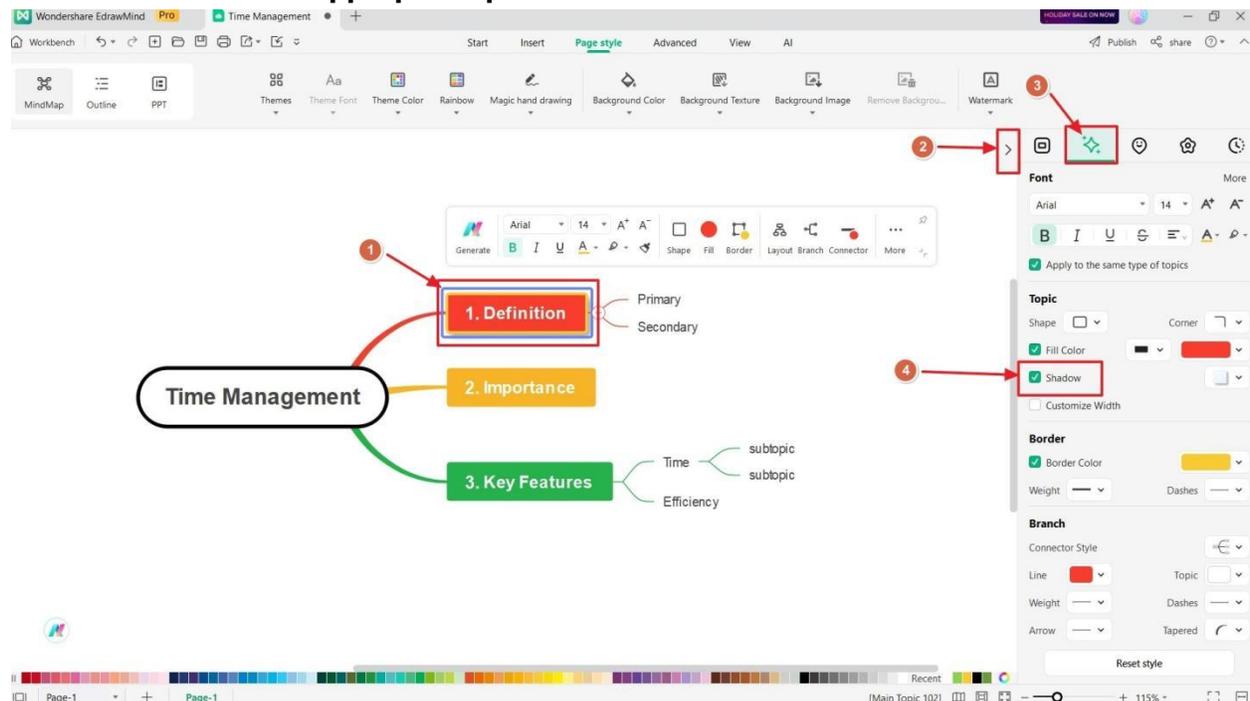

The image shows a screenshot of the Wondershare EdrawMind Pro software interface. The main workspace displays a mind map with a central node labeled "Main Idea" and two branches labeled "Main Topic". One branch is highlighted with a yellow patterned fill, and a "Fill" dialog box is open over it. The dialog box has tabs for "No fill", "Solid fill", "Gradient fill", and "Pattern fill". The "Pattern fill" tab is selected, and a color palette is visible. The palette includes "Standard Colors" and "Recent Used Colors". The "Fill" dialog box also has sliders for "Shade/Tint" and "Transparency" for both "Foreground" and "Background". The software interface includes a top menu bar with "File", "Edit", "View", "Format", "Tools", "Help", and "Publish". The bottom status bar shows the current page as "Page-1" and the zoom level as "100%".

Change Styles of Topic Shadows

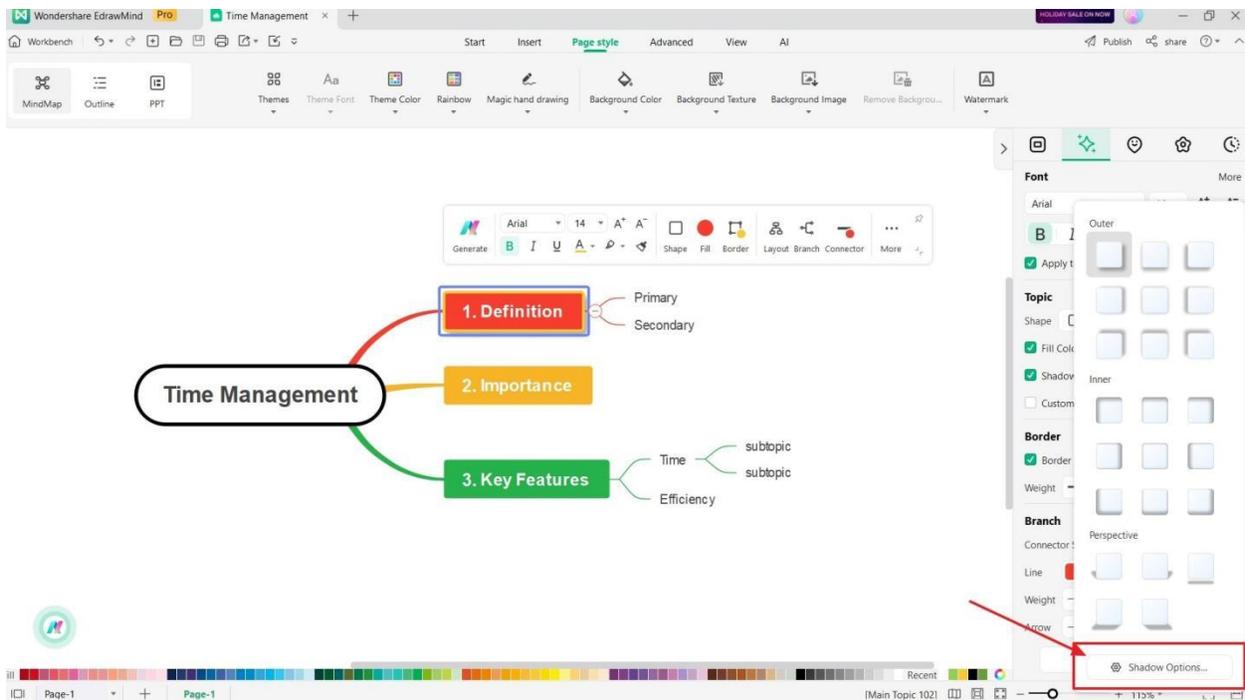

If you hope your mind map has a three-dimensional effect, adding shadow and shadow colors on topics is a good choice. Follow the step-by-step guide below.

01 Set Shadow Options

Step 1: Launch EdrawMind. Click Create or Import the file saved on your computer. Click on a topic on your map and go to the right-side panel. From there, go to Style > Shadow. Choose the appropriate predefined shadow effect.

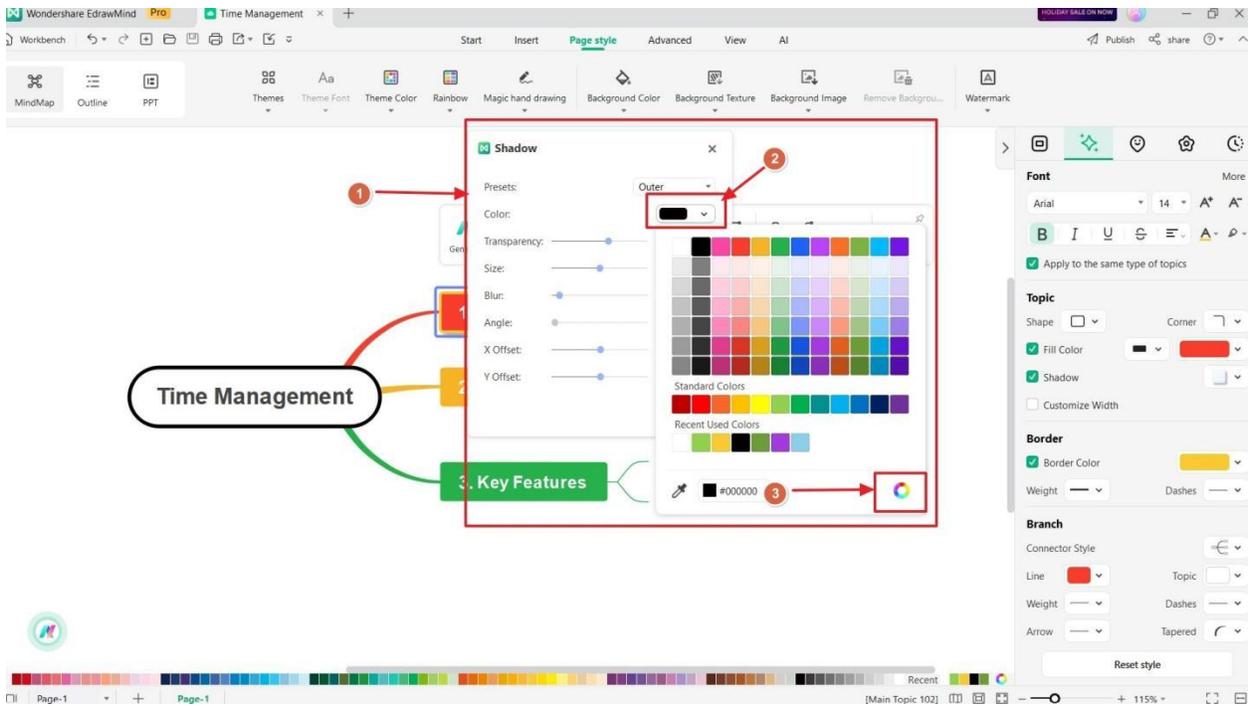

Step 2: To customize the shadow effect, meanwhile, in the drop-down menu, click Shadow Options.... This function sets the custom shadow color, transparency, size, blur, angle, and offset according to your liking.

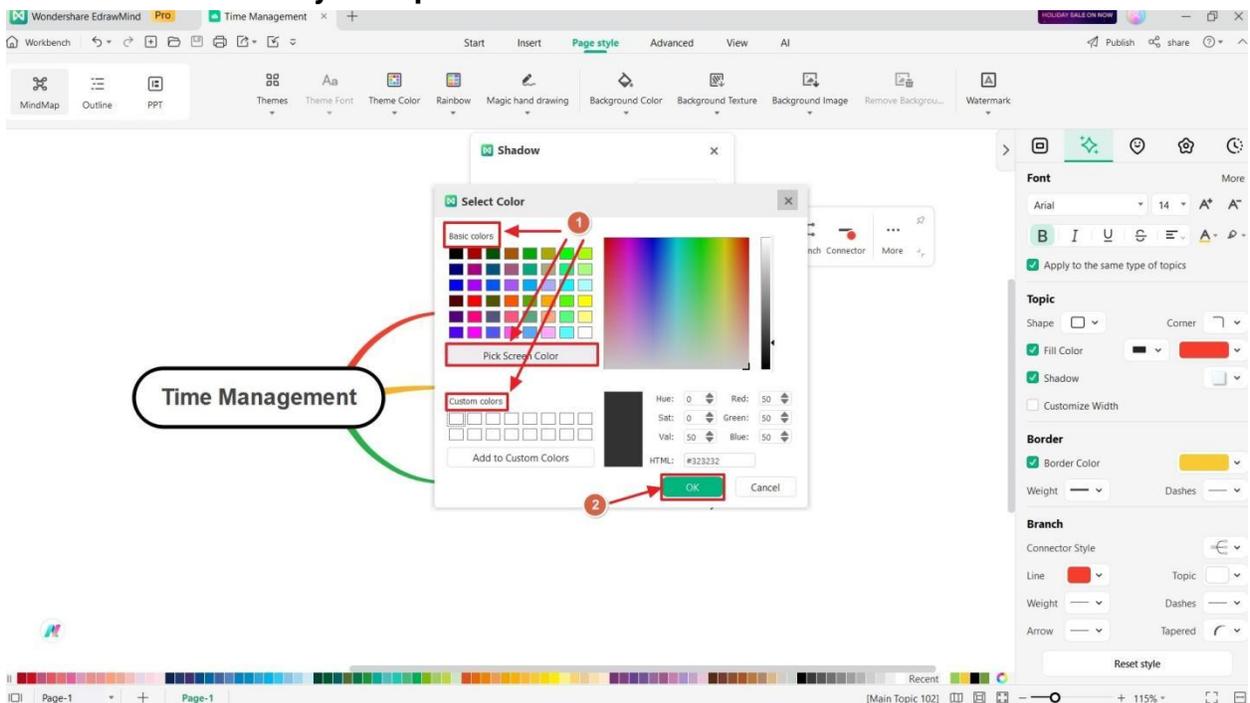

02 Set Shadow Color

Here are the steps for adding colors for the topic shadow.

Step 1: In the Shadow Options... dialog box, click Color and select an appropriate color from the drop-down color list. If the desired color is not in the theme color, choose More Colors.

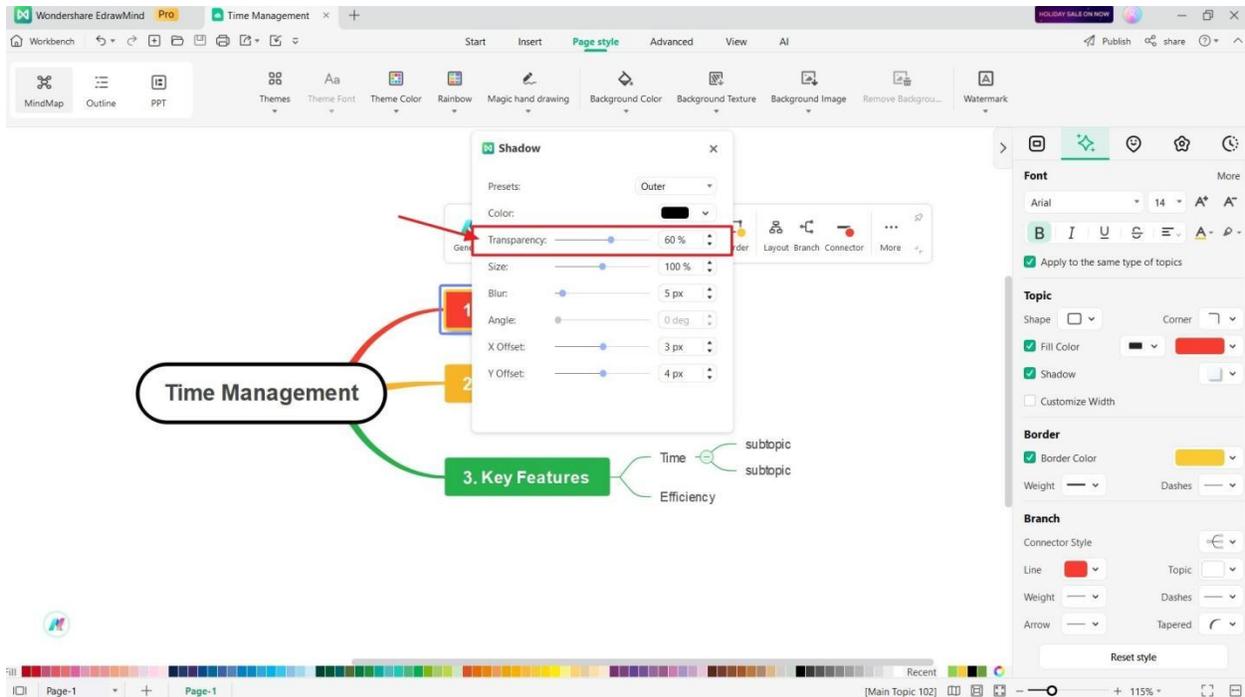

Step 2: In the Select Color window, you can use three ways to customize shadow colors - Basic colors, Pick Screen Color, and Custom colors. Then, click OK to apply the selected color on your topic shadow.

03 Set Shadow Transparency

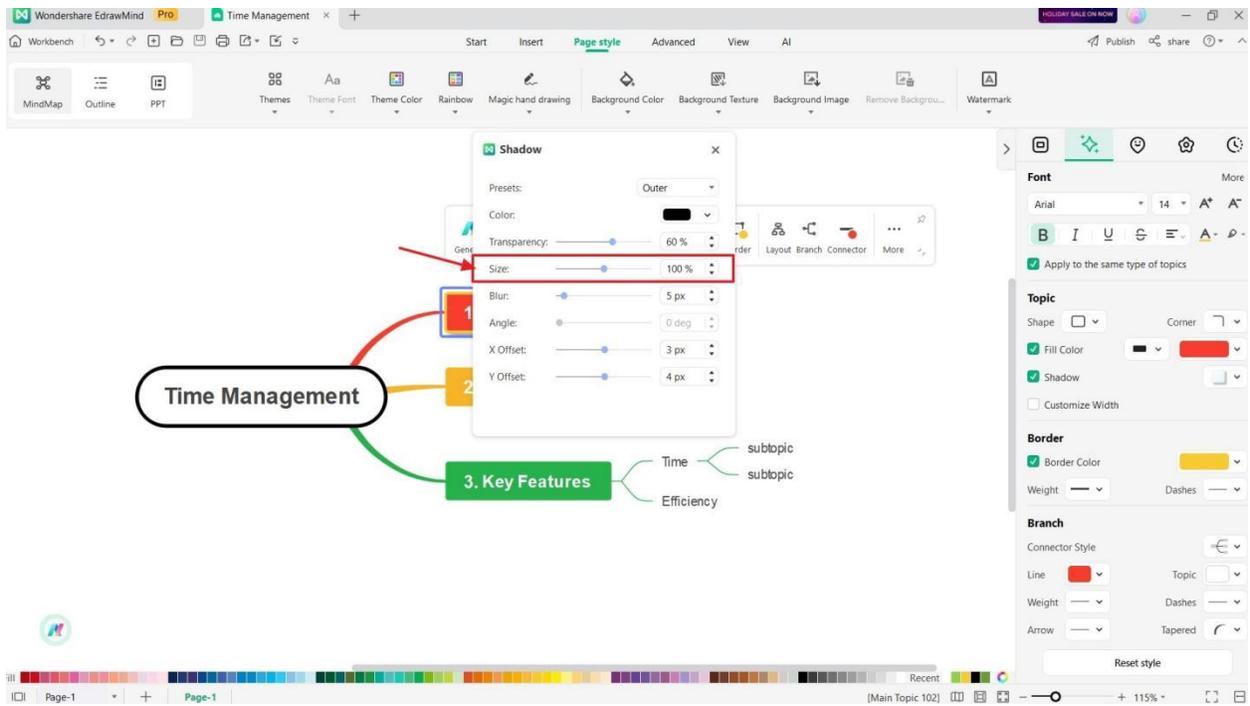

If you want to set the transparency of the shadow of the subject shape, click and drag the Transparency slider in the Shadow windows after clicking Shadow Options....

Alternatively, you can input a value representing it in the box on the right of the slider. You can also increase or decrease the transparency by using the small up and down arrows next to the box. The percentage of shadow transparency can be adjusted from 0 (fully opaque, the default) to 100 (fully transparent).

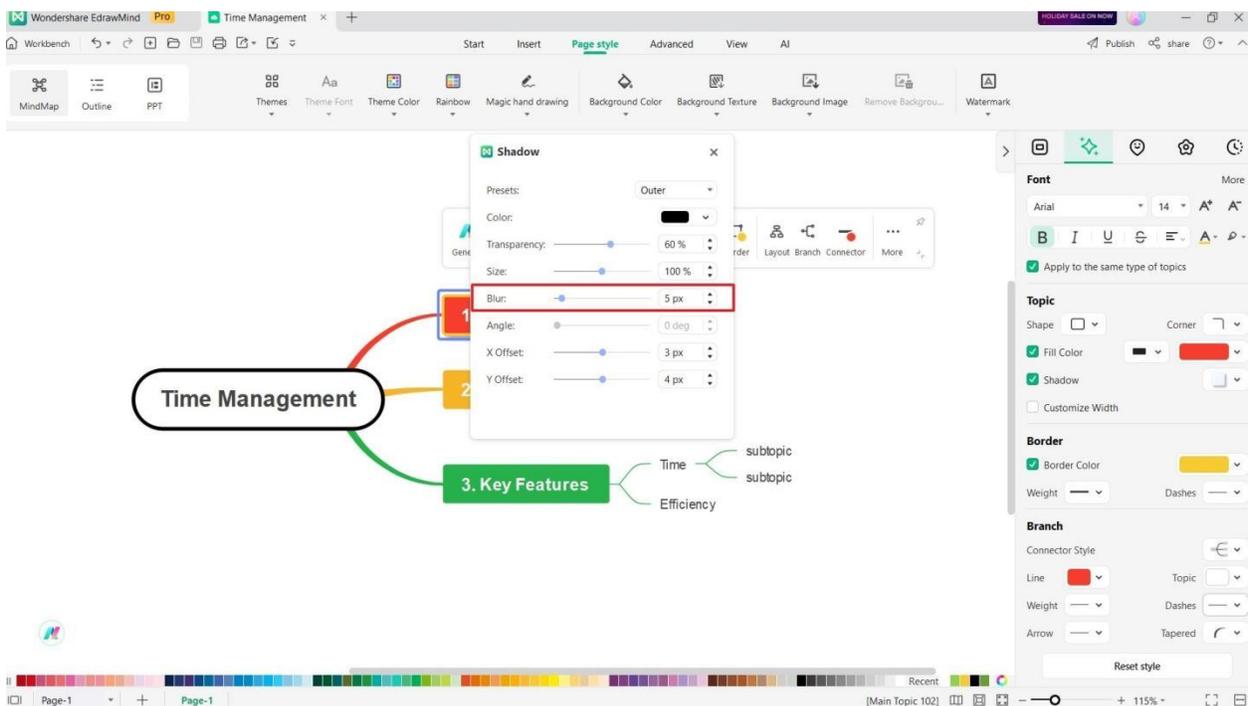

04 Change Shadow Size

In the Shadow window, click and drag the Size slider or enter a value representing the size of the shadow in the box on the right of the slider. You can also increase or decrease the size of the shadow with the small up and down arrows.

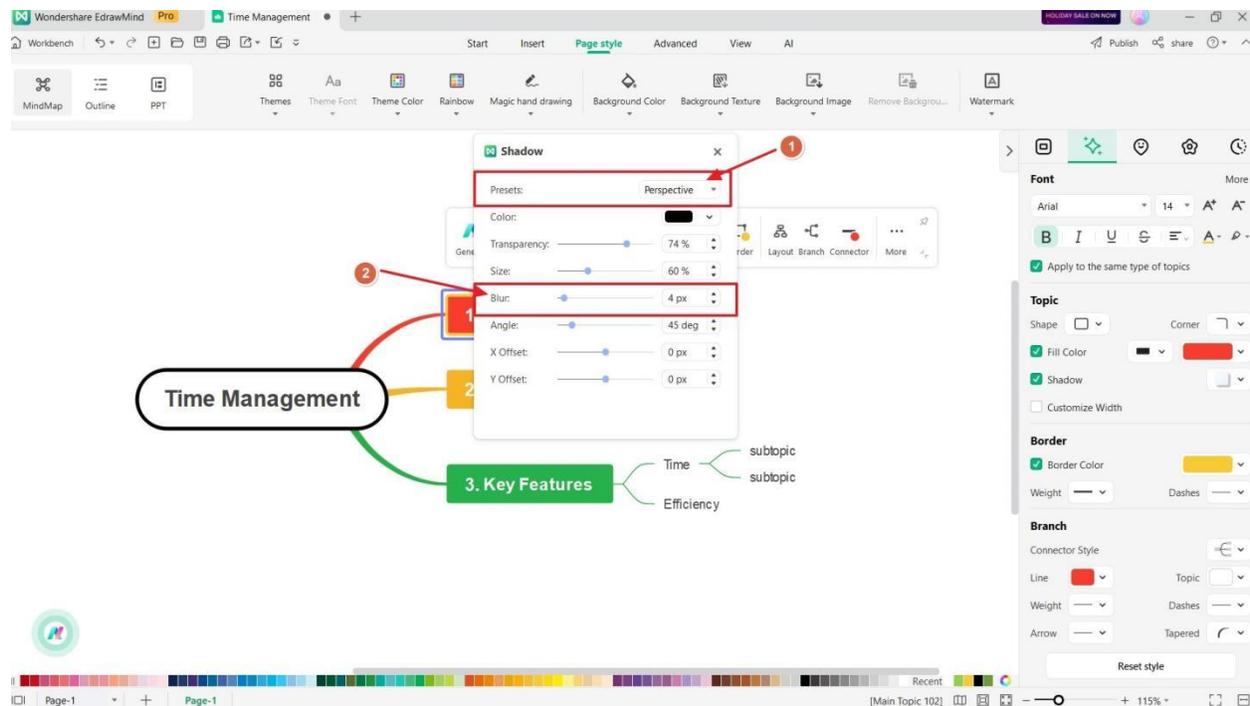

05 Blurring Shadows

To set the shadow blur, click and drag the Blur slider or enter a value indicating the shadow blur degree in the box on the right side. You can also increase or decrease the shadow blur degree using small up and down arrows.

06 Adjust Shadow Angle

If you want to adjust the angle of a shadow, choose Perspective for Presets first. Click and drag the Angle slider with the mouse. You can enter a value representing the angle of the shadow in the box as well. Or, increase or decrease the angle of the shadow by using the small up and down arrows.

07 X Offset and Y Offset of Topic Shadow

Lastly, if you want to set the left and right offset of the shadow, click and drag the Offset sliders or enter the value representing the offset in the boxes on the right of X Offset and Y Offset. The small up and down arrows can also increase or decrease offsets.

Change Branch Style

It's possible to change the Branch Style and the style of some branches on EdrawMind. Follow the guide below.

01 Change All Branches

Step 1: Launch EdrawMind and click Create or Import the file saved on your computer.

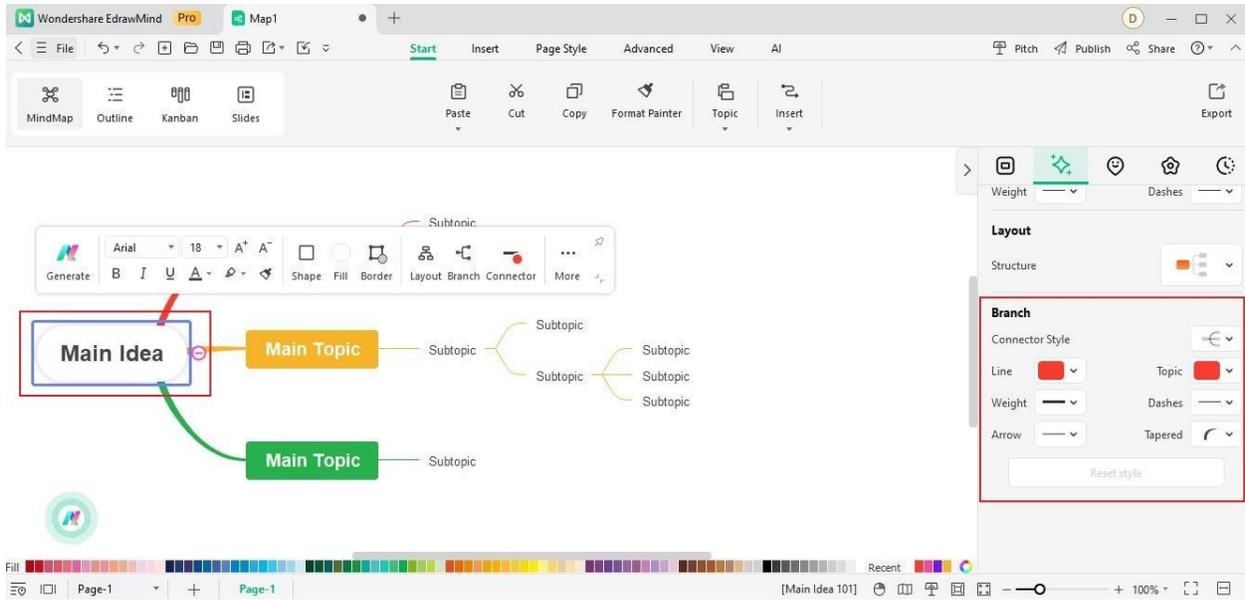

Step 2: In the Map column, go to Theme. From here, you can change the style of all branches in your mind map by adjusting items in Theme.

02 Change the Style of Some Branches

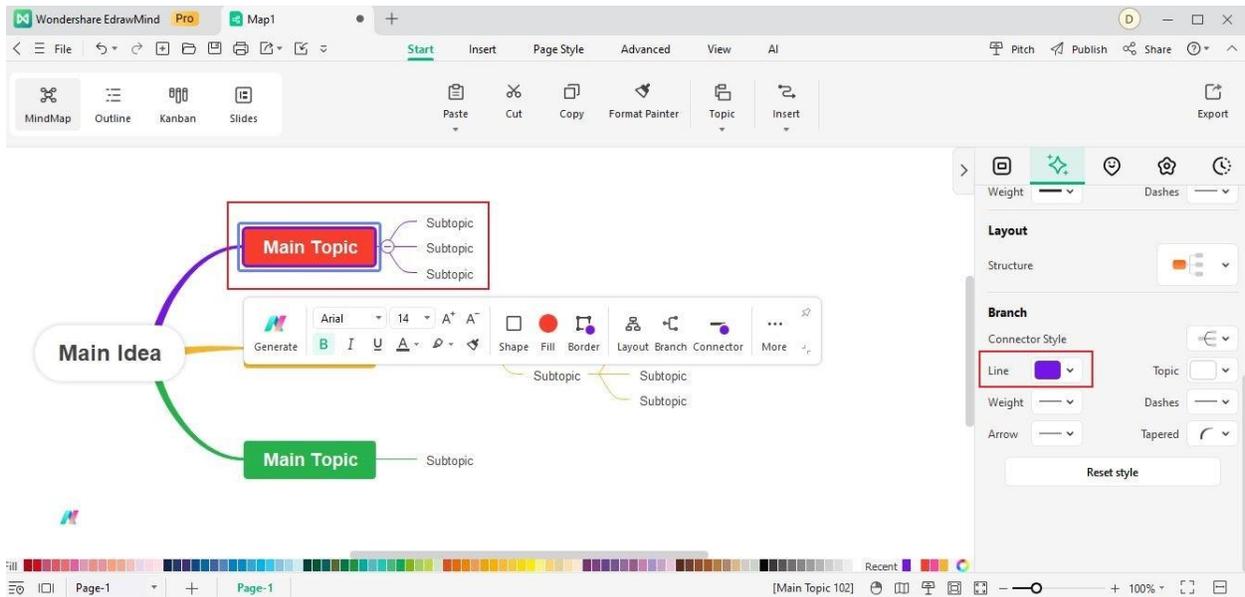

Here are the steps if you want to change the style of some branches in your mind map.

Step 1: Select the parent topic of the target branch.

Step 2: In the Style column on the right-side panel, you can adjust the Connector Style, Branch Fill Colors, Line, Dashes, Tapered, Weight, Arrow, and more.

Note: Changing the style of a parent topic's line color in Branch will change all line's color in this branch.

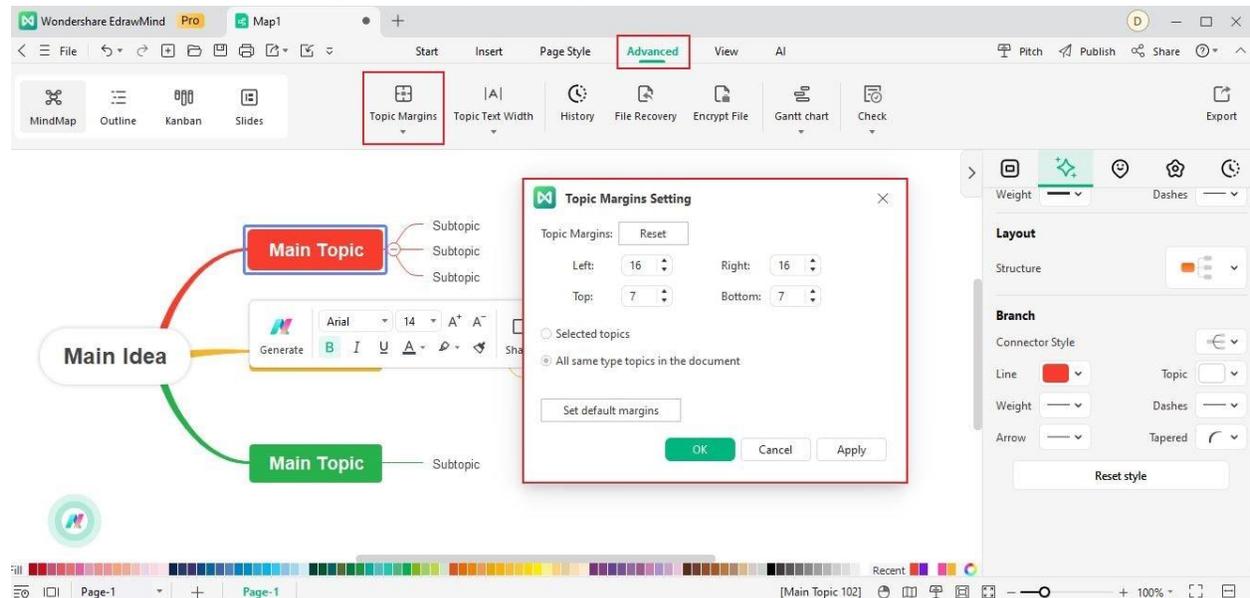

Adjust Topic Margins and Topic Text Width

Changing Topic Margins and topic width allows you to adjust the structure of your mind map slightly. The content below will tell you how to set them quickly and easily.

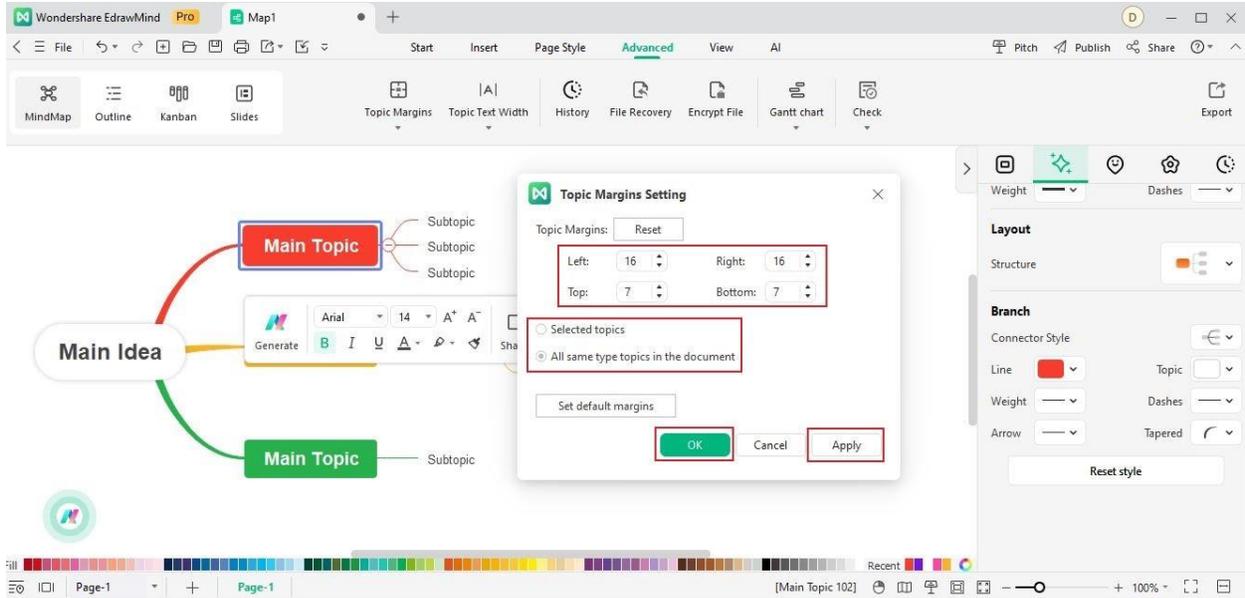

01 Change Topic Margins

Here's how to set topic margins and topic text width on your maps.

Step 1: Launch EdrawMind. Click Create to start a new map or Import the file saved on your computer. Choose a target topic or multiple topics and go to your menu bar. Click Advanced > Topic Margins > Topic Margins.

Step 2: Set Topic Margins by inputting number values of Left, Right, Top, and Bottom margins or click the up and down arrows beside them. Choose between adjusting the margins of Selected topics or All same type topics in the document. Once done, Click Apply > Ok.

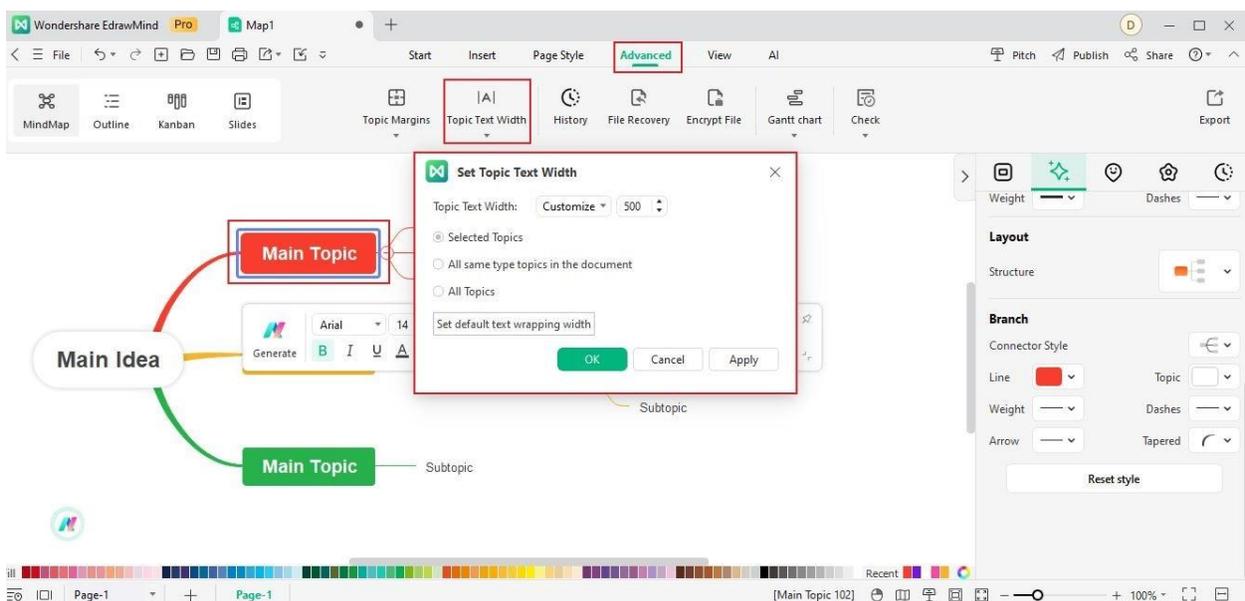

02 Adjust Topic Text Width

When creating your mind map, follow the steps below to change the Topic Text Width.

Step 1: Choose a topic or multiple topics. Go to **Advanced > Topic Text Width > |A| Topic Text Width** in the menu bar.

Step 2: Next to **Topic Text Width**, select **Customize** in the drop-down menu and adjust the number by inputting or clicking the up and down arrows.

Step 3: Choose between setting the topic for **Selected Topics**, **All same type topics in the document**, or **All topics**, depending on your preference. Once done, click **Apply > Ok**.

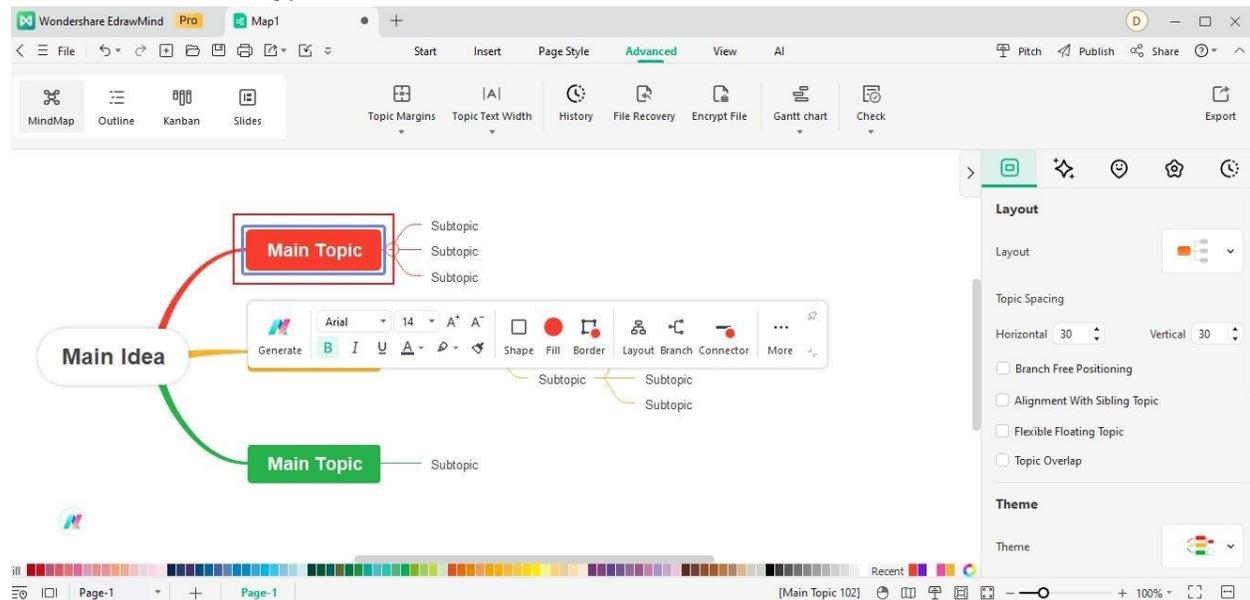

Change Connector Style

Connectors or branches connecting ideas and information contribute to a well-organized mind map, offering a hierarchy and flow of information. It can represent relative connections between ideas, such as cause-and-effect, sequence, association, or comparison. By connecting one topic to another with a connector, you can show how they contribute to a larger concept or theme.

EdrawMind has multiple options to adjust the connector, which gives the flexibility to create a mind map that conveys your message better. Don't settle for a generic mind map. Follow this step-by-step guide to discover the connector style that enhances your diagrams.

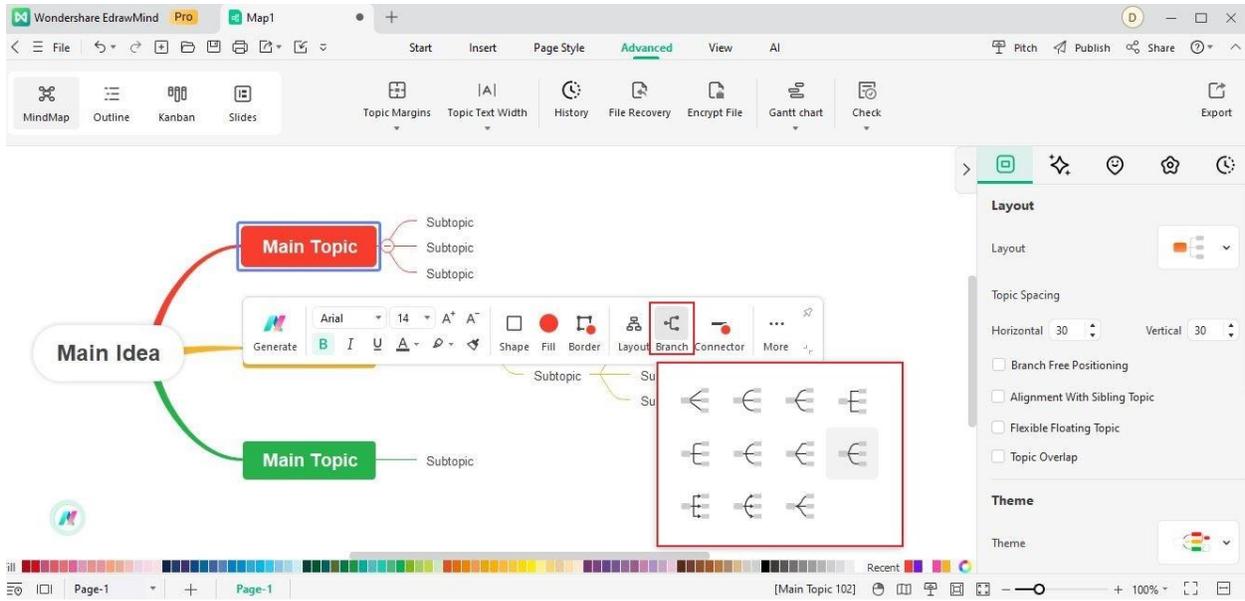

Step 1: Select the items you want to edit, whether a section or the entire mind map (Ctrl + A to select the whole map).

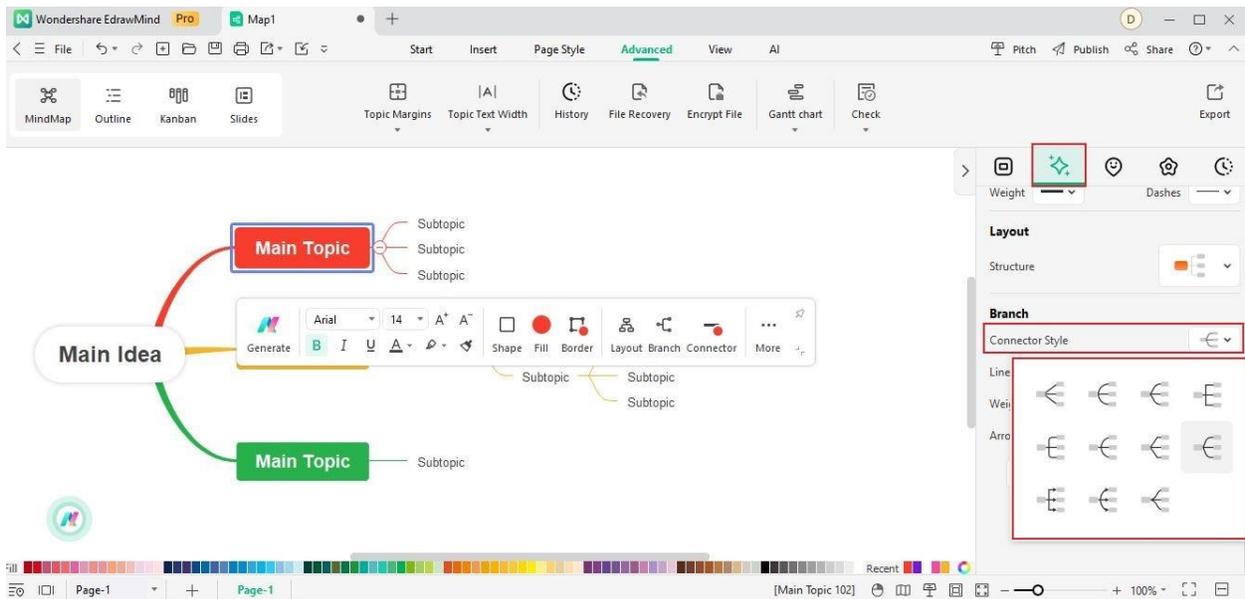

Step 2: Select a Connector Style.

There are a couple of ways to change the style or layout of your branches and connectors.

- Option 1: Click Branch on the mini toolbar, and select a branch style.

- **Option 2: Go to the Style tab bar and navigate to the Branch section. Next, click on the Connector Style dropdown list. Lastly, select a new branch style to switch to another design.**

01 Format Connector Style

Beyond changing connector styles, EdrawMind enables you to format them in multiple ways. Adjust the thickness, color, and arrowhead to create organized and visually appealing diagrams. Read on to learn more.

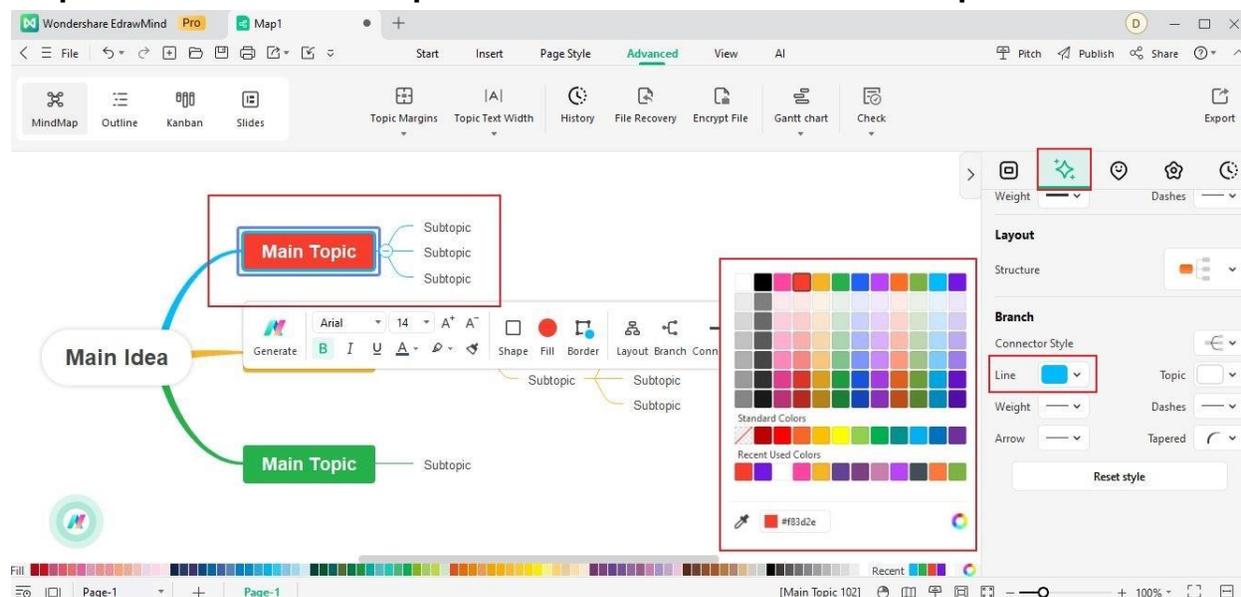

Branch Line Colors

Changing the color of your connector line can help you visually distinguish between different types of connections and add emphasis on the flow between topics. It is as simple as adding color to your mind map to make your diagram more visually appealing.

Step 1: Choose either a single or multiple topic(s).

Step 2: Go to the Branch section in the Style tab bar of the right side panel.

Step 3: Click on the Line dropdown list and select a color from the palette.

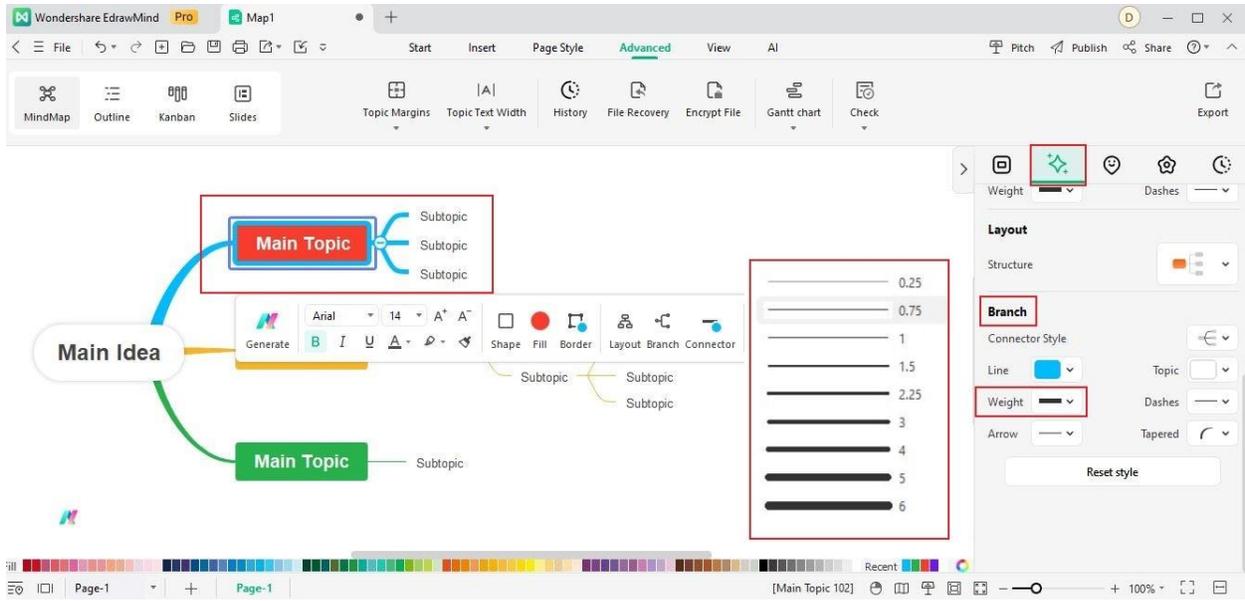

Branch Weight

Varying the weight of a branch in the mind map can help distinguish between main topics and subtopics, especially in complex diagrams with multiple connectors. Additionally, adjusting the branch weight can create a sense of depth and perspective in the mind map.

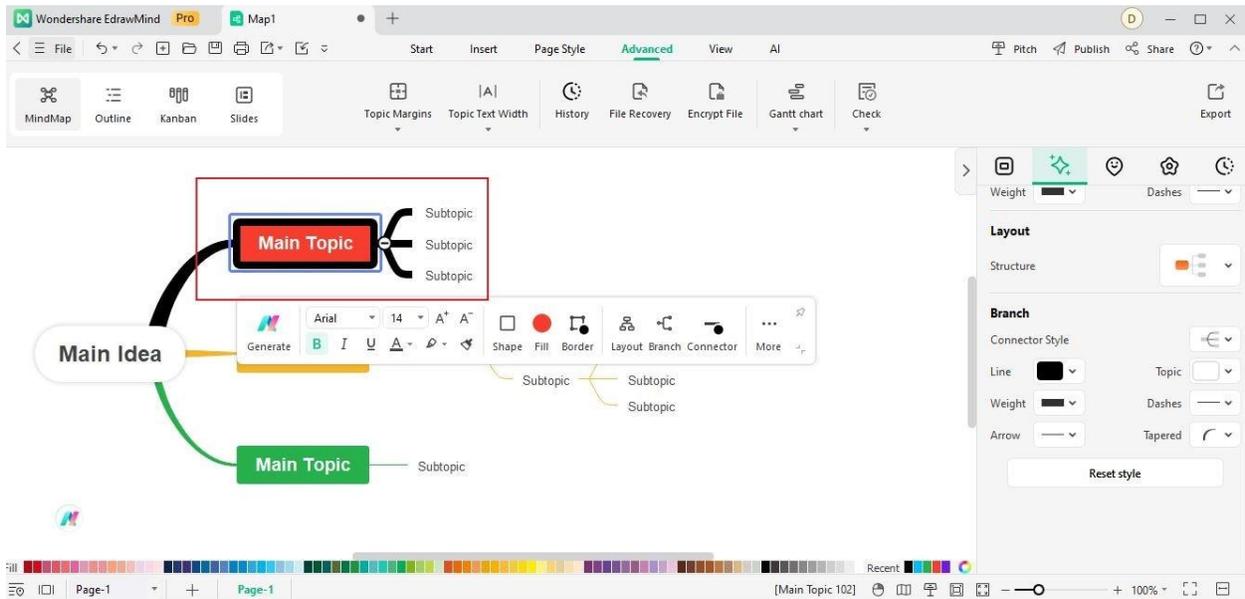

That is where thicker branches appear closer, and thinner branches recede into the background. It can make your diagram easier to understand and give it a more three-dimensional look and feel.

Step 1: Select a Topic and access the Style tab in the right-side panel.

Step 2: Navigate to the Branch section and click the Weight dropdown list.

Step 3: Select from a range of line thickness options, including thin and thick.

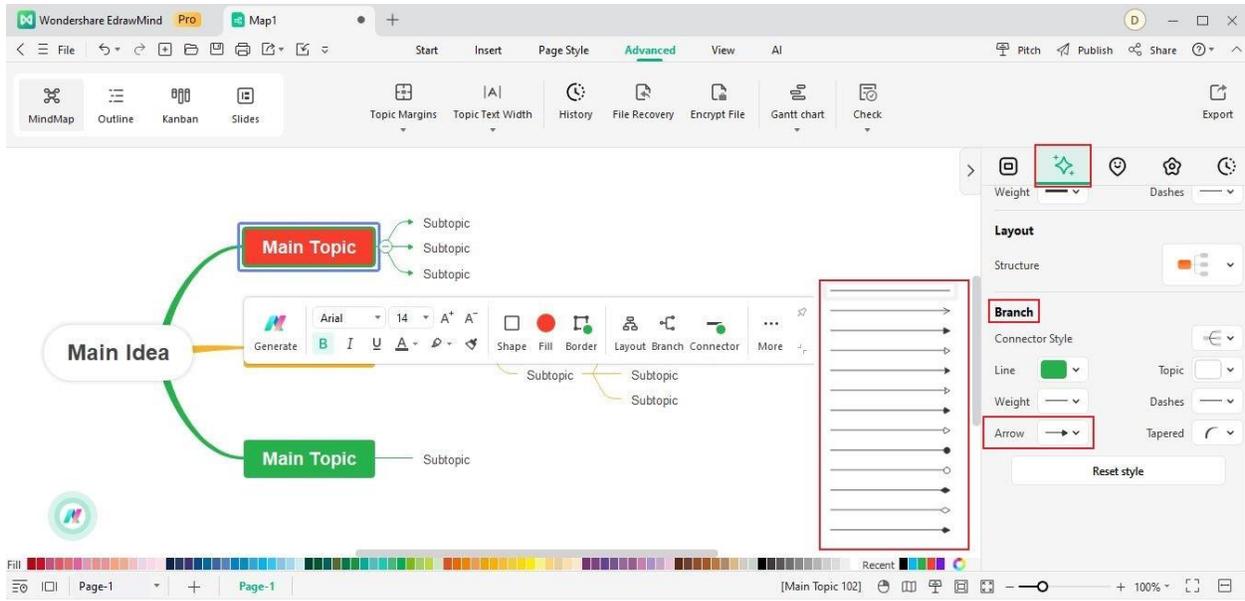

Branch Arrows and Branch Dashes

By customizing the arrow of a branch, you can guide the reader's eye and make it easier to follow the flow of information.

Step 1: Choose a Topic you wish to modify the connector cap head.

Step 2: Navigate to the Branch section in the Style tab bar in the right side panel.

Step 3: Click the Arrow dropdown list, and select a connector cap head that fits your needs from the available options.

Note:
From the Style tab bar, click the Dashes dropdown list in the Branch section. Then, select a connector you need - a straight line or a dashed line.

Format Painter and Style Follows

EdrawMind enables you to easily maintain consistent formatting and streamline the creation of mind maps.

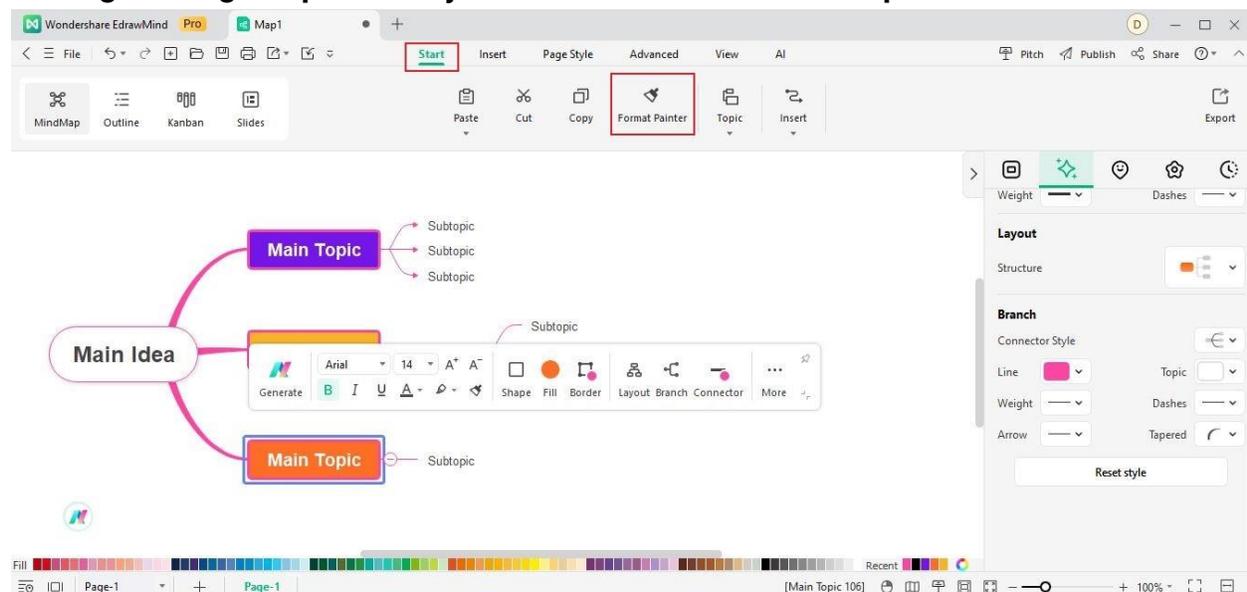

01 Format Painter

The Format Painter tool allows you to quickly apply formatting styles from one element to another. Whether you want to maintain consistent formatting throughout your mind map or make specific elements stand out, the Format Painter tool simplifies the process.

Step 1: Select the topic from which you want to copy the formatting style.

Step 2: Locate the "Format Painter" button. Click on it. The Format Painter tool will capture its formatting style.

Step 3: Identify and click the target topic in your mind map to which you want to apply the copied formatting style. EdrawMind will instantly apply the formatting style, making the target topic visually consistent with the source topic.

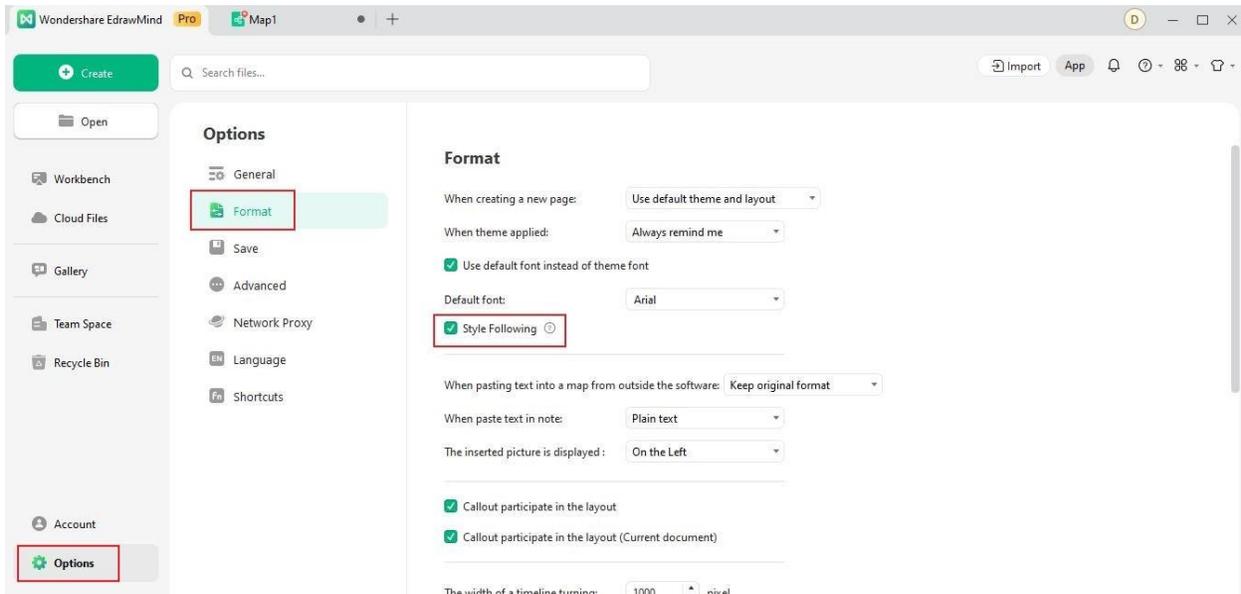

02 Style Follows

The Style Follows feature in EdrawMind is a convenient option that allows you to automatically apply the style of the last added topic to newly generated topics. By enabling this feature, you can maintain consistent formatting and save time when creating mind maps.

Step 1: Navigate to the Options tab in the File menu.

Step 2: Locate the Style Following option in the Format section. Tick the checkbox to activate the Style Follows feature.

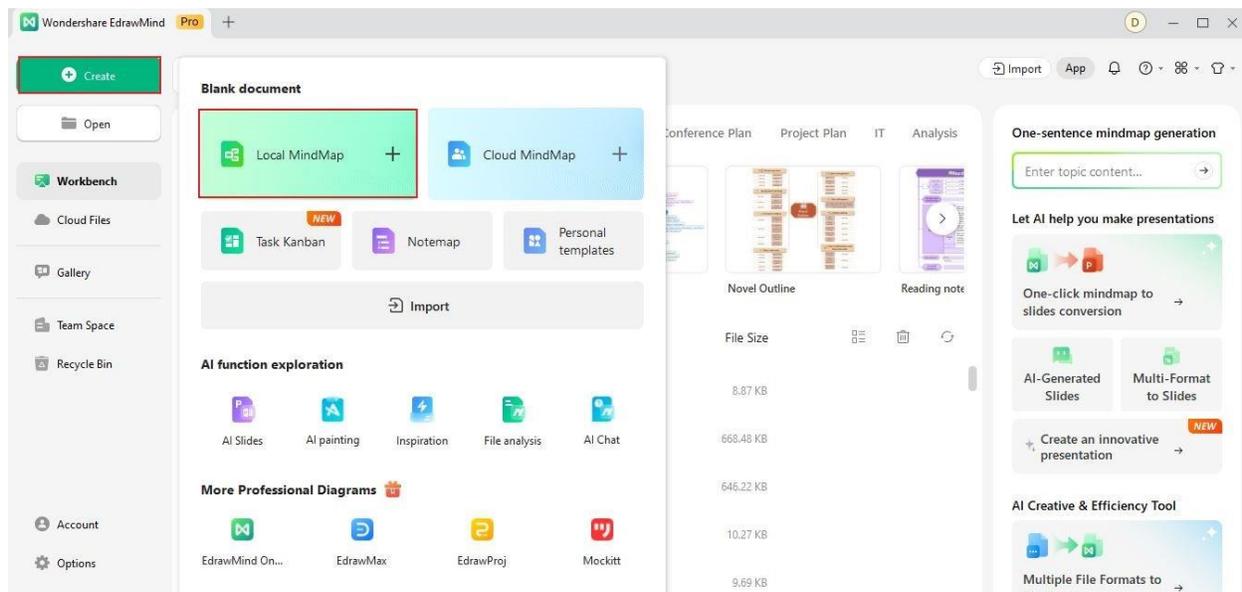

AI & OCR

One-Click Mind Map

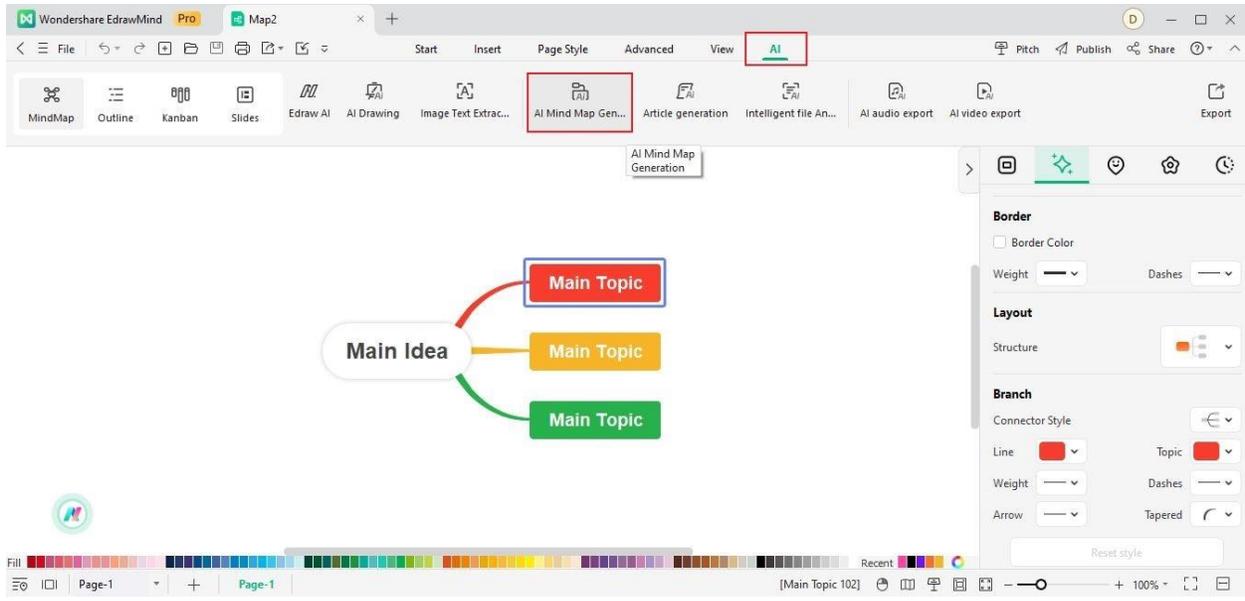

EdrawMind allows you to generate mind maps quickly and effortlessly with just one click. This powerful feature saves you time and simplifies the process of creating mind maps. Here's a step-by-step guide on how to generate mind maps using Edraw AI:

- Click the Create button and select the Local MindMap.

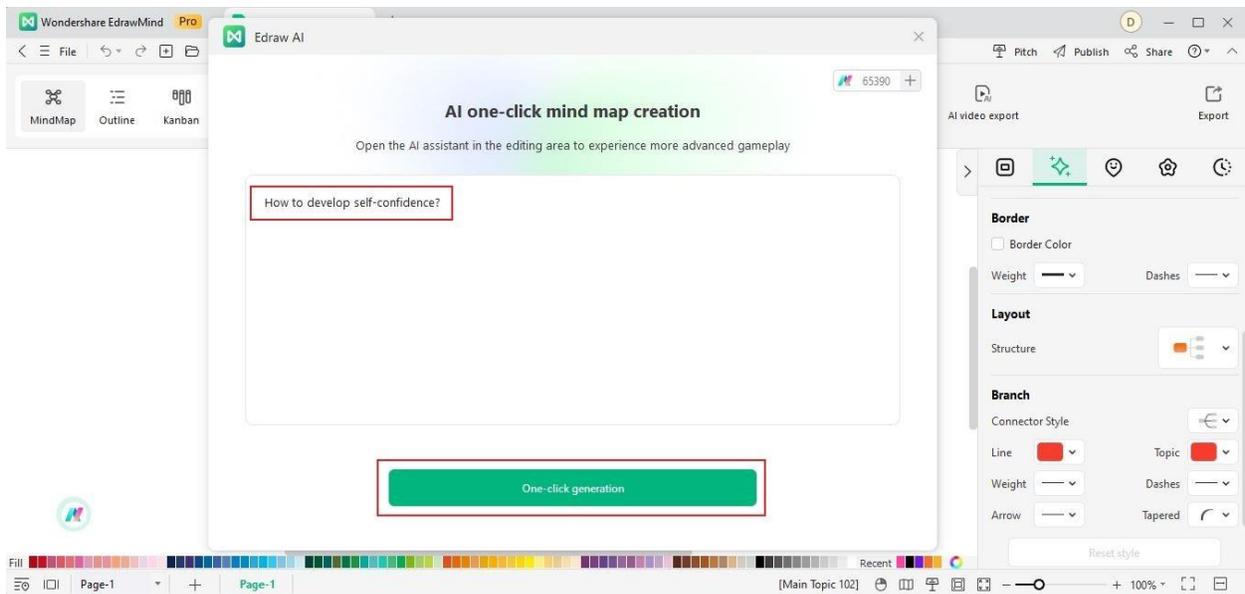

Edraw AI Homepage Button

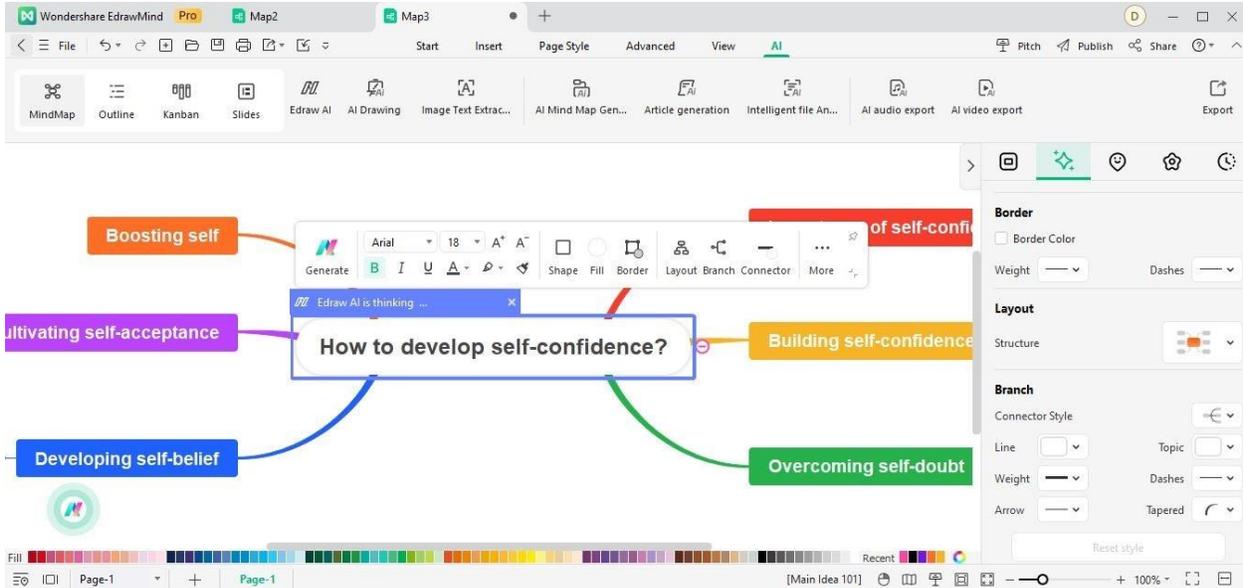

- Click AI on the top menu bar and select AI Mind Map Generation. Alternatively, you can right-click on any topic in the workspace and click the AI Generated Content button. From there, choose the One-click Mind Map option.

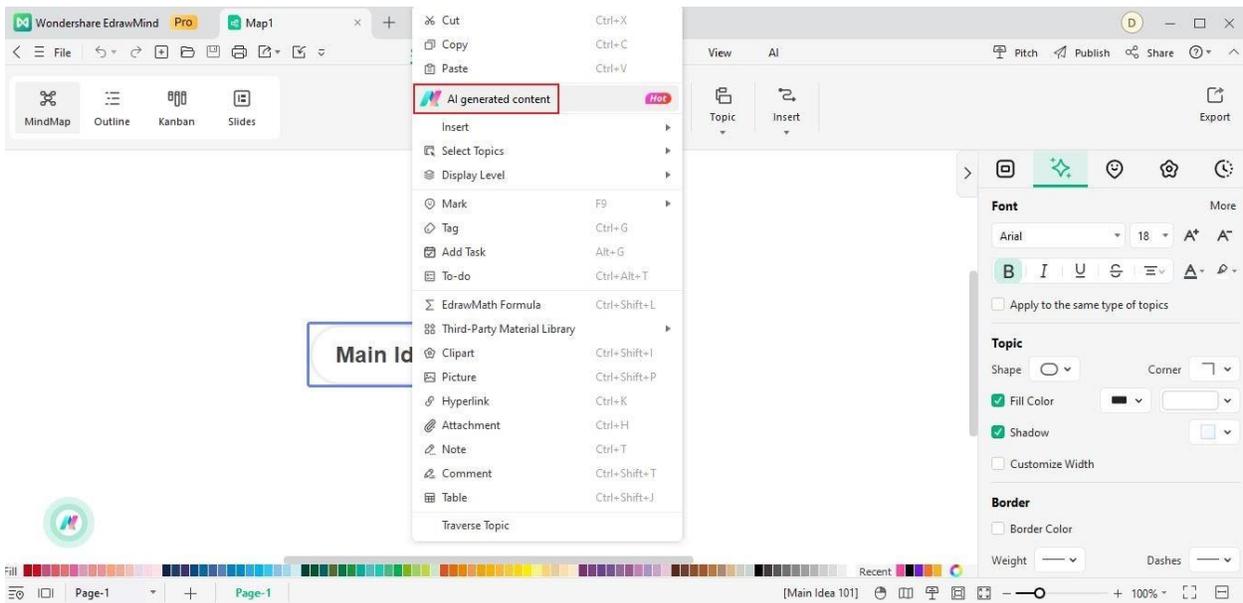

- In the Edraw AI popup window, enter your command or topic, such as "How to develop self-confidence?" Click the One-click generation button.

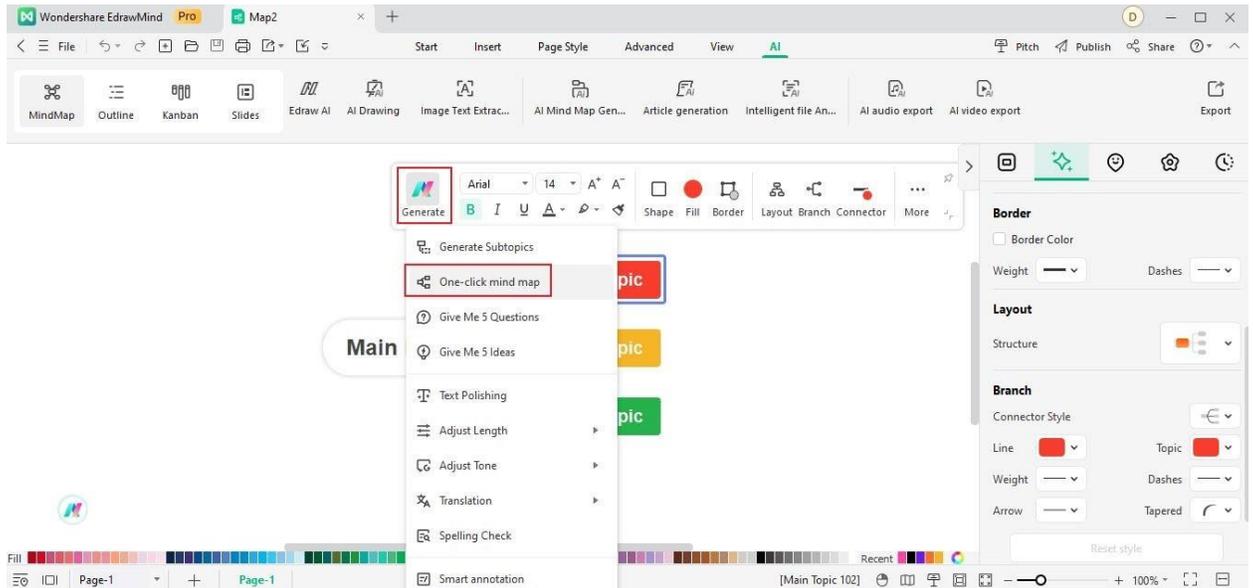

- Edraw AI will analyze your input and generate a mind map specifically tailored to your command.

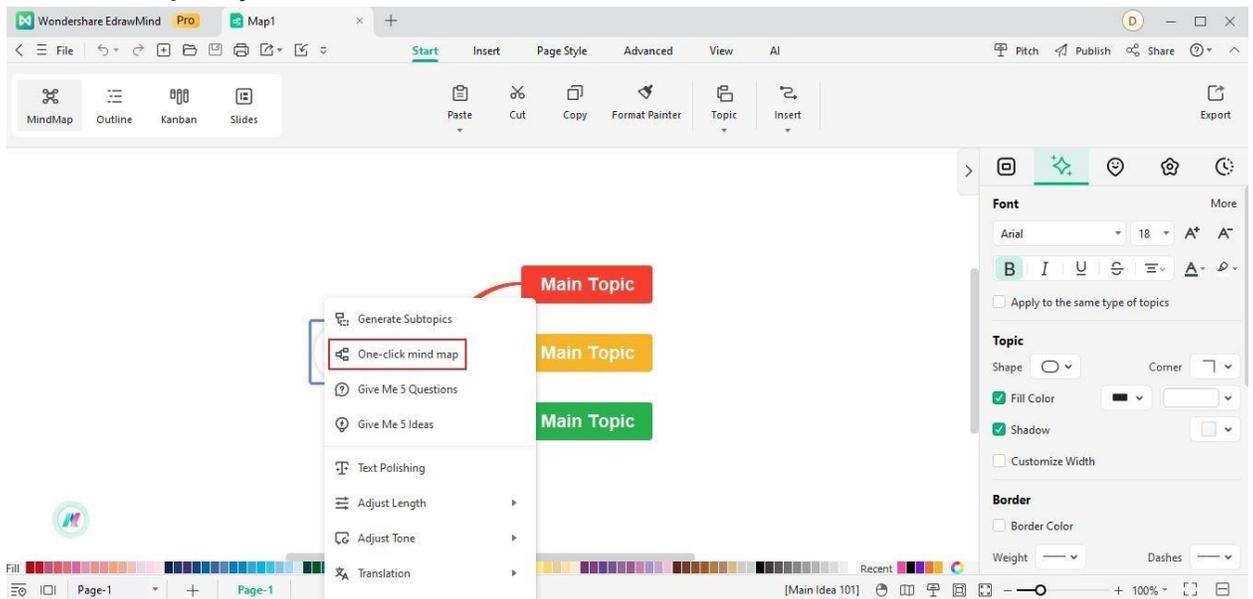

- You can also initiate the One-click Mind Map process from the floating bar. Simply select any topic in the workspace and click the Generate button. From the drop-down menu, choose the One-click Mind Map option.

- **Alternatively, you can right-click on any topic in the workspace and select AI Generated Content.**

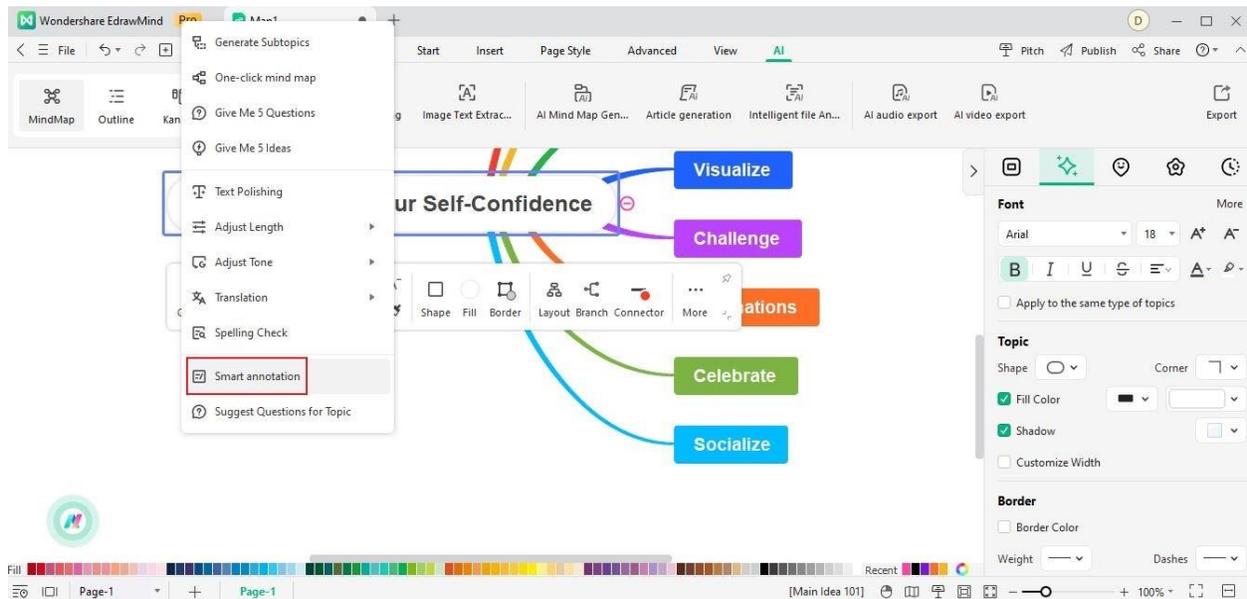

- **In the popup menu, choose One-click Mind Map, and Edraw AI will automatically create the mind map for you.**

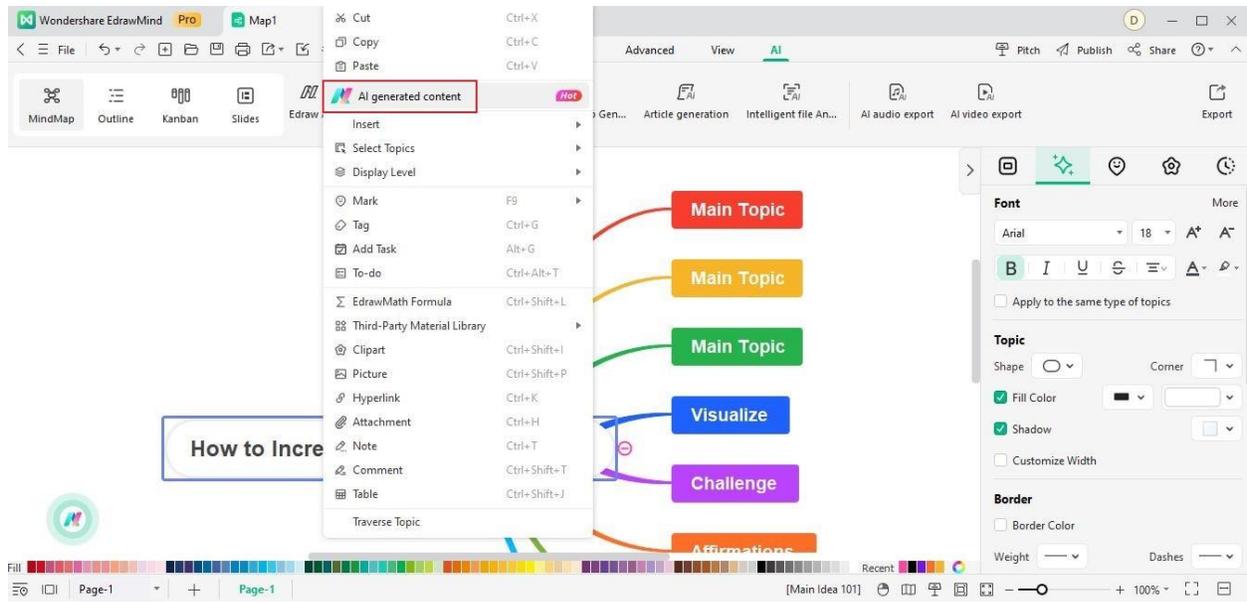

Smart Annotation

EdrawMind's Smart Annotation feature uses AI to generate informative annotations that enrich your mind maps. These annotations offer valuable insights and information related to a specific topic, elevating your understanding and organization of your mind maps. Here's a user-friendly guide on how to use the Smart Annotation feature effectively:

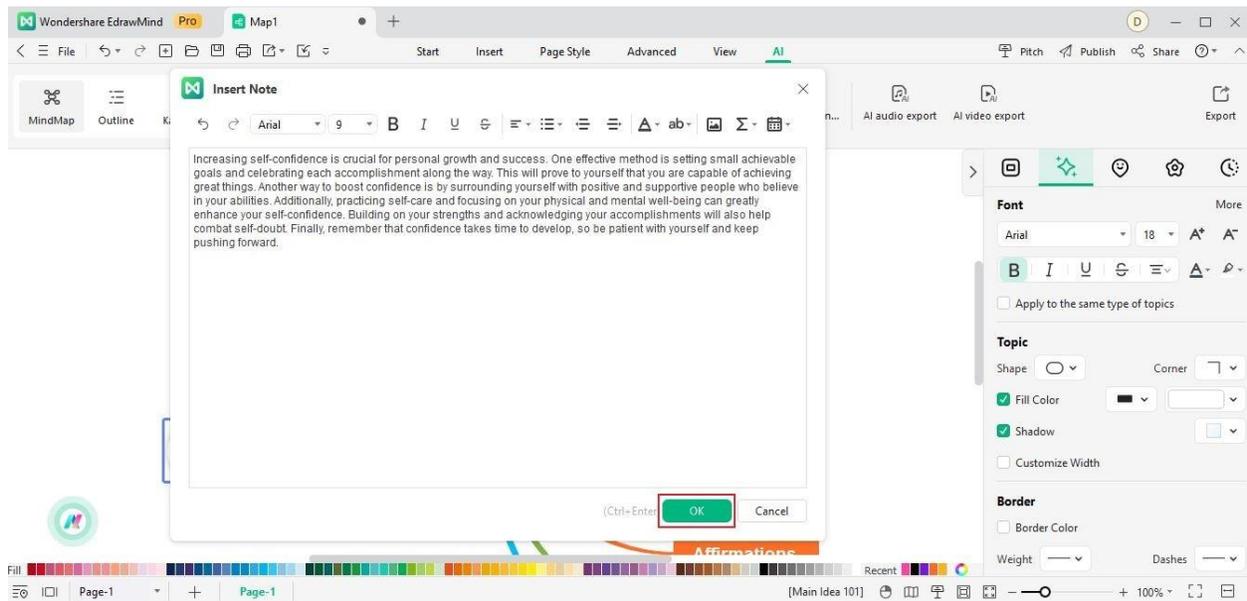

- Start by selecting the topic to which you want to add an annotation within your mind map. Look for the AI Intelligent Creation button in the toolbar. Click on it and choose the Smart Annotation option.

- Alternatively, you can simply right-click on the topic and select AI Generated Content from the menu. Then, choose Smart Annotation.

- **Edraw AI will analyze the selected topic and generate a customized annotation tailored to it. Click OK to insert the generated annotation. It will appear as a note attached to the selected topic, providing you with additional insights, explanations, or relevant details.**

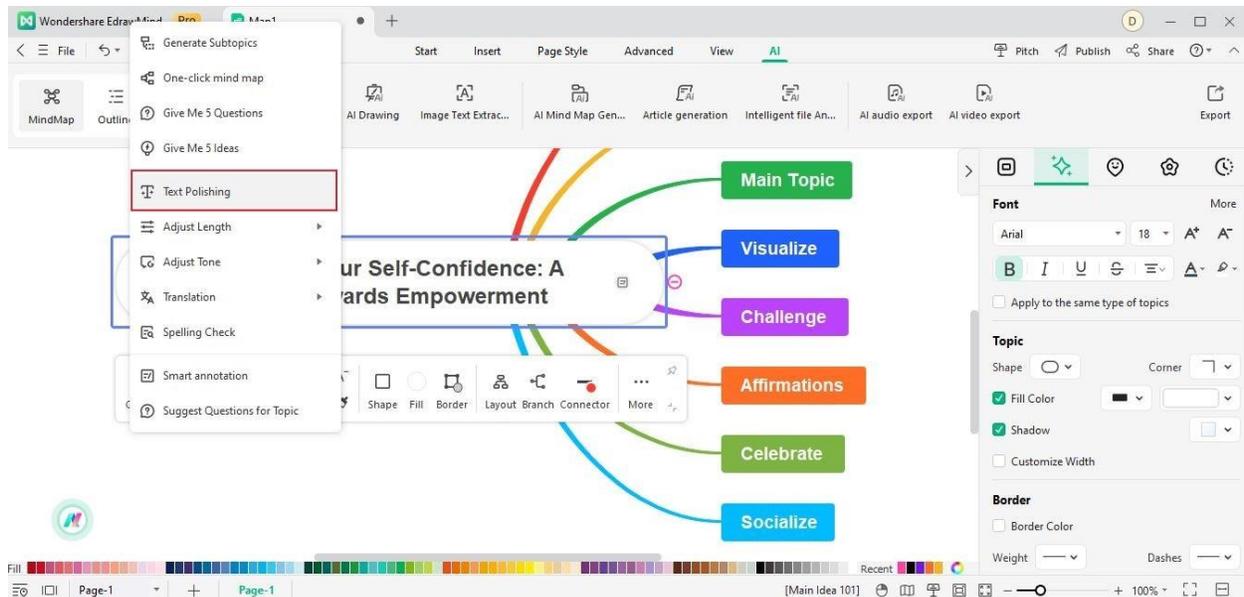

Copywriting & Simplified Copywriting

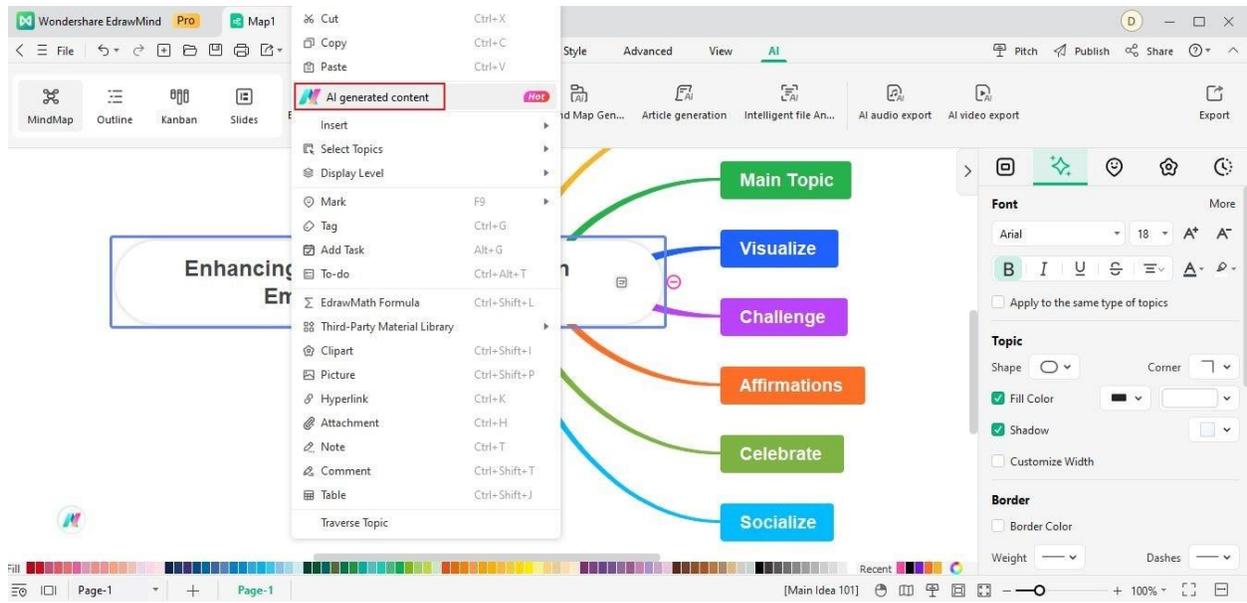

01 Copywriting

EdrawMind's Copywriting feature uses AI to enhance and refine your written content within mind maps. To optimize your experience with this feature, follow these user-friendly steps:

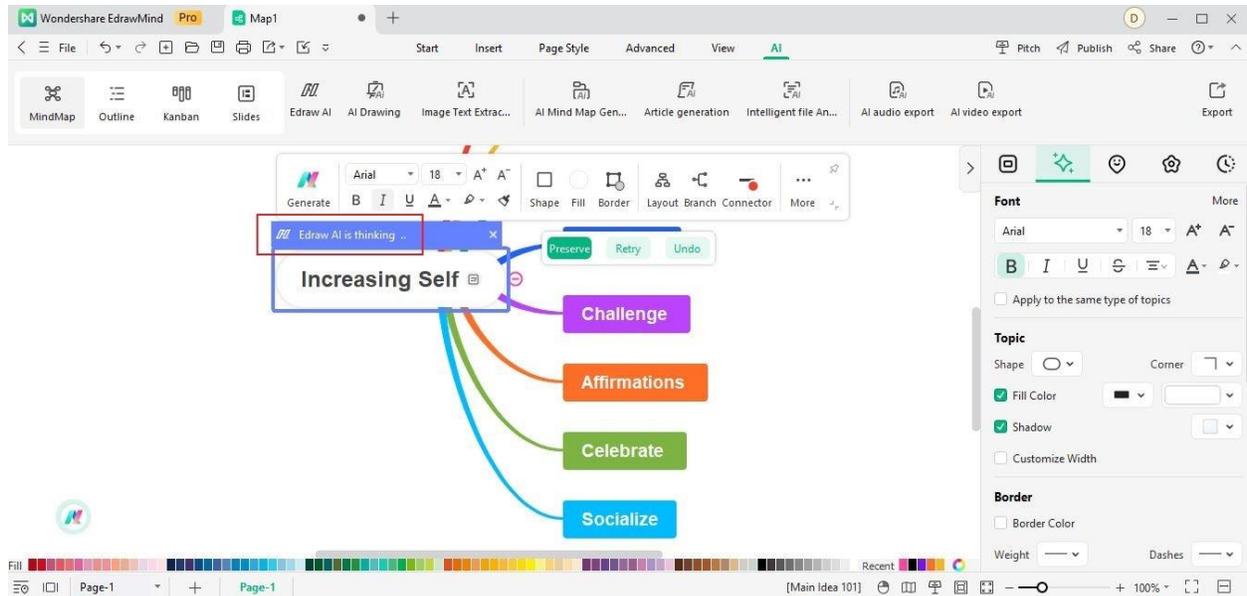

- Identify the topic text within your mind map that you want to improve or polish. Look for the Generate button in the floating toolbar. Click on it and select Text Polishing from the options presented.

- Alternatively, you can right-click on the topic text you wish to improve and choose AI Generated Content from the right-click menu. Then, select Text Polishing from the available choices.

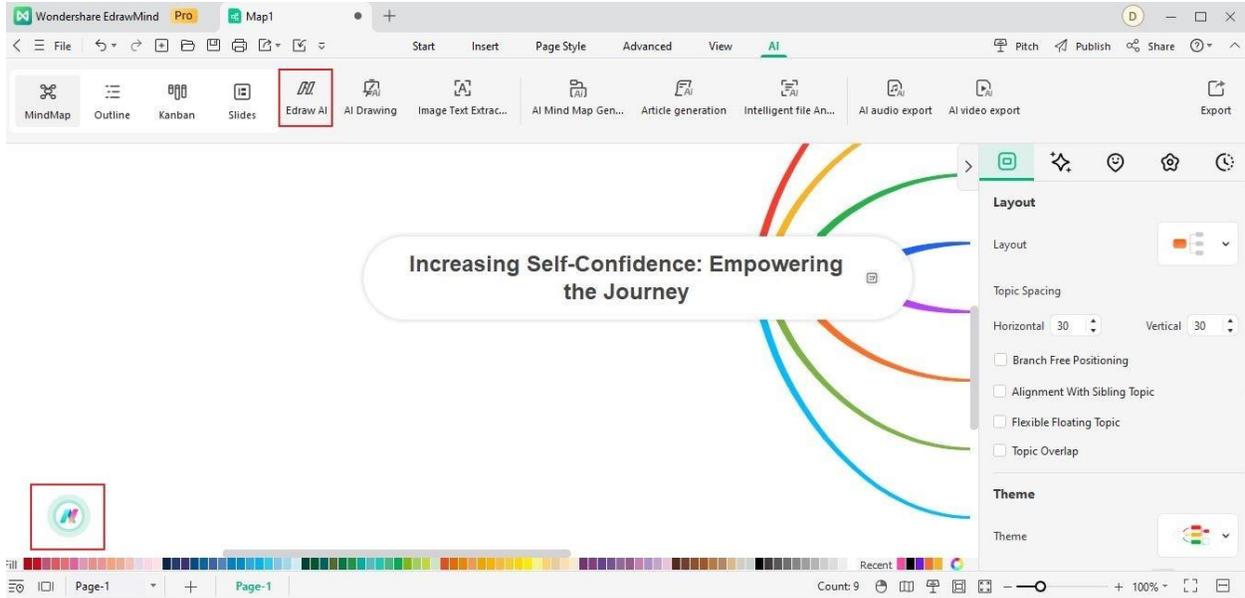

- EdrawMind's AI will analyze the selected topic text and generate a polished version that is more engaging, concise, or persuasive.

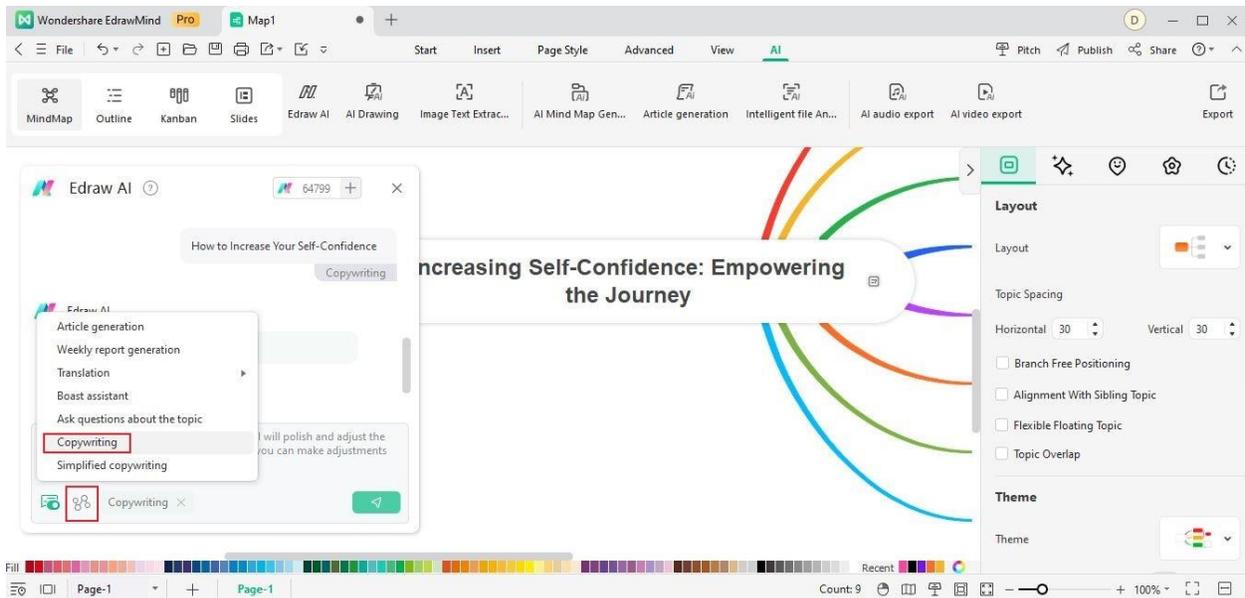

Furthermore, you can also polish and improve text outside of topics using the following steps:

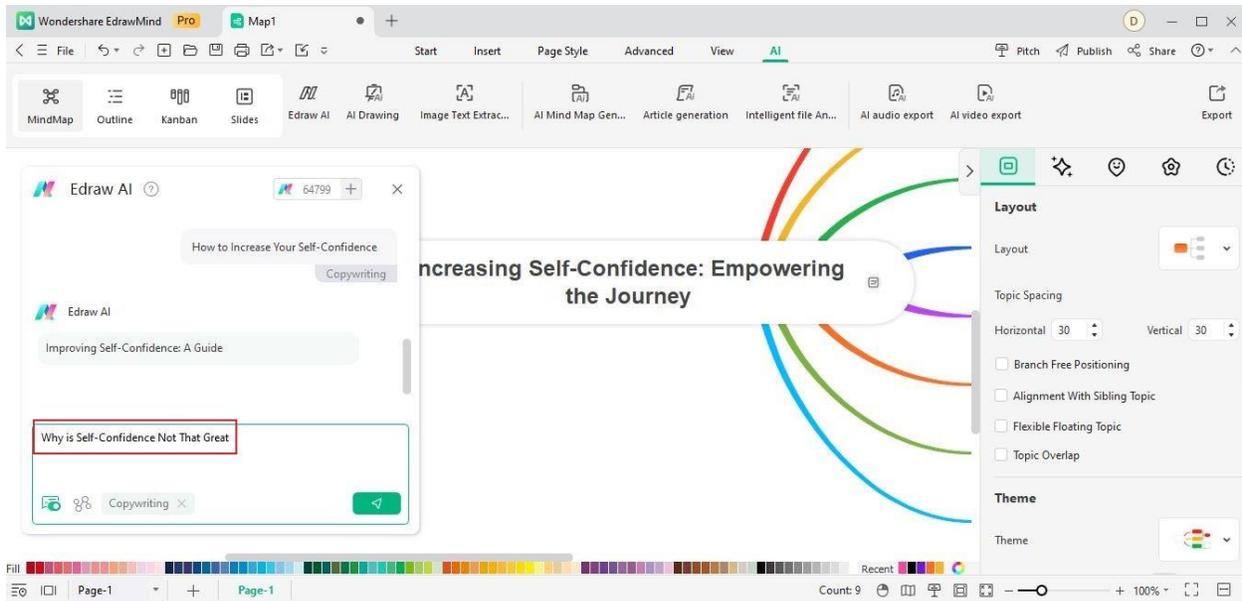

- Click the Edraw AI button located in the AI menu on the top ribbon. Alternatively, you can find the Edraw AI ball in the lower-left corner of the workspace.

- In the popup Edraw AI window, navigate to the Pre-scene Setup menu and choose the Copywriting option.

- Enter the text you want to polish, and Edraw AI will improve and adjust the copy to enhance its quality.

02 Simplified Copywriting

EdrawMind's Simplified Copywriting feature empowers you to effortlessly enhance the clarity and understanding of your text. By utilizing Edraw AI's intelligent analysis, you'll receive suggestions to simplify complex sentences, eliminate jargon, and improve overall readability. Follow these optimized steps to experience the benefits of this feature:

- Open the Edraw AI window. Among the options available in the Pre-scene Setup menu, select Simplified Copywriting.
- Enter the text you wish to simplify. Sit back and let Edraw AI work its magic. It will simplify the text and enhance its readability, making it easier for your audience to comprehend.

Article Generation & Weekly Report Generation

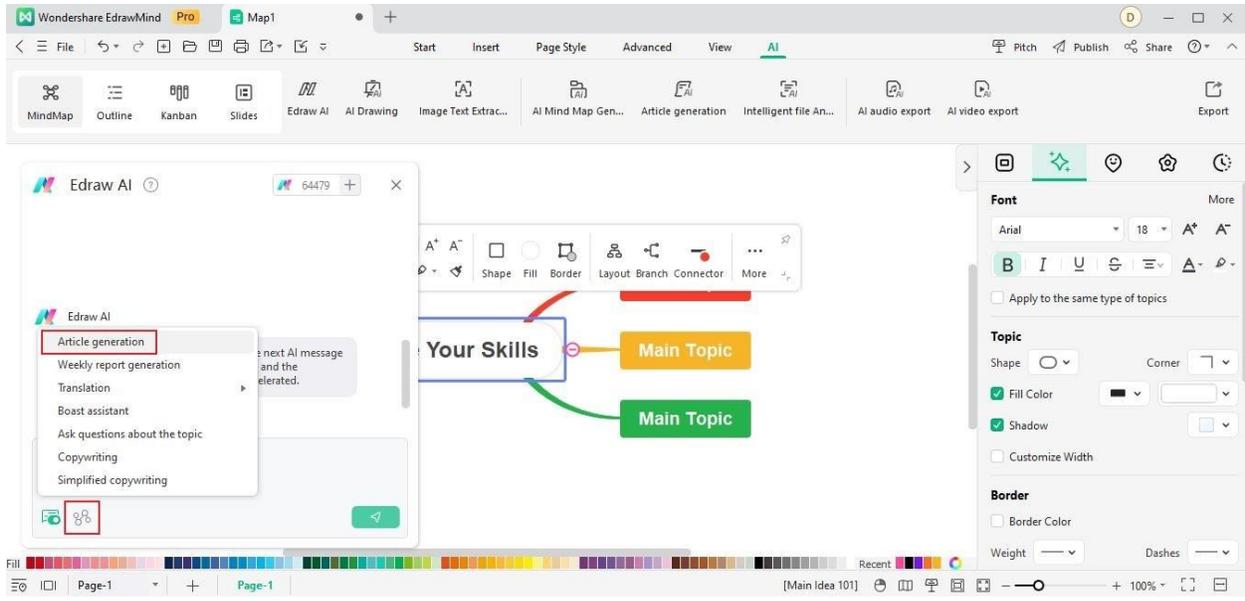

01 Article Generation

EdrawMind's Article Generation feature is an exceptional tool that enables you to effortlessly create articles based on your input command. To optimize your experience with this feature, follow these steps:

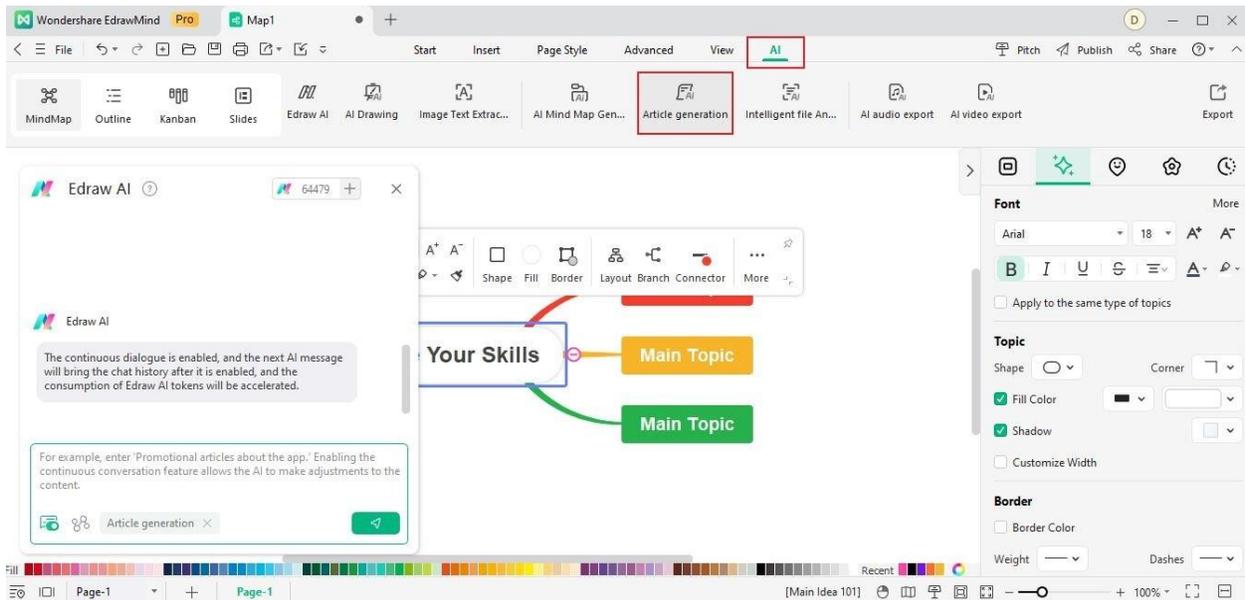

- Access the AI menu located in the top ribbon by clicking the Edraw AI button. Alternatively, you can find the Edraw AI ball in the lower-left corner of the workspace.

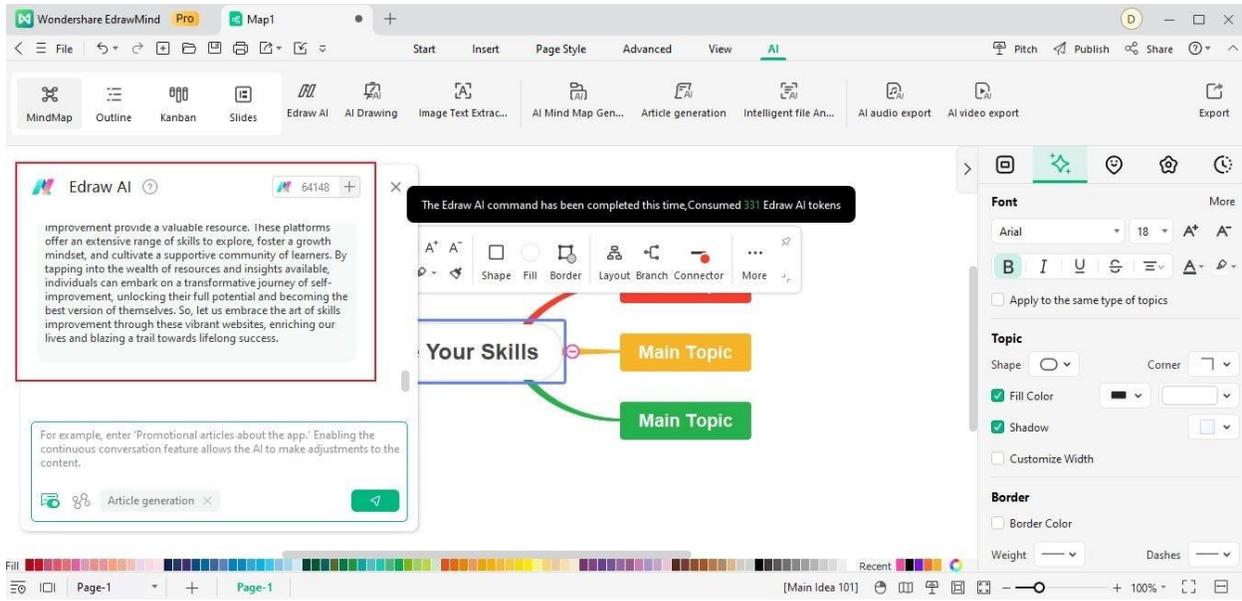

- In the popup Edraw AI window, navigate to the Pre-scene Setup menu and select Article Generation.

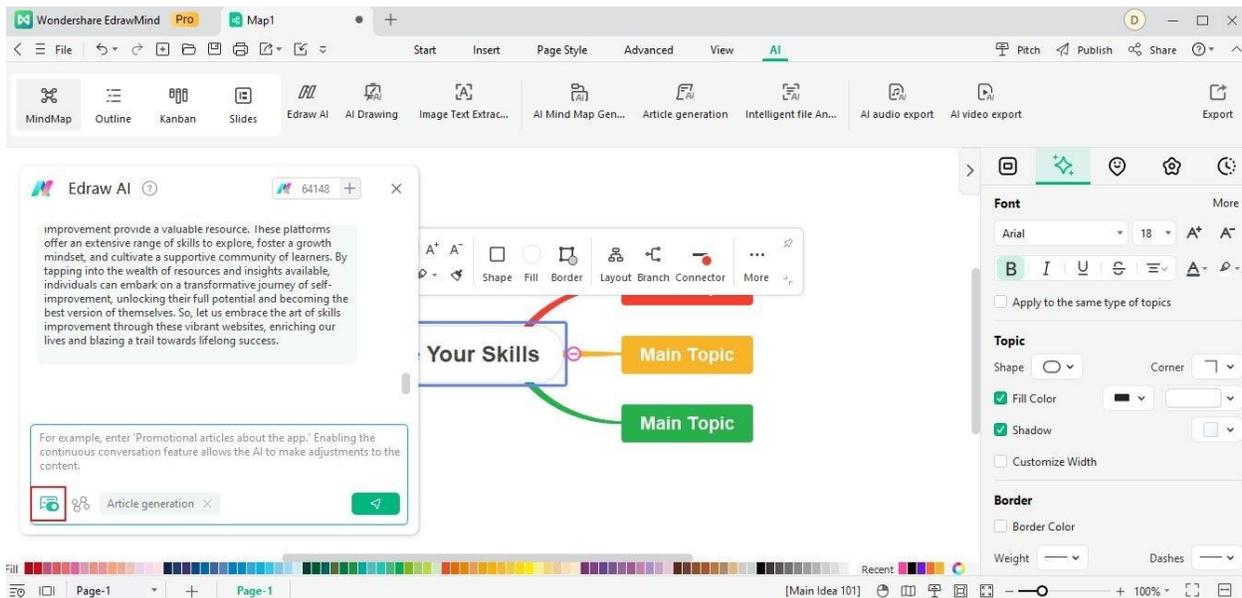

- **Within the AI tab, you'll notice a dedicated entry for Article Generation. Simply click the button, and you will seamlessly transition to the Edraw AI window, with the Article Generation option already selected for your convenience.**

- **Enter your command and provide specific requirements or instructions to guide the article generation process. Clearly communicate what you expect from the article. Edraw AI will analyze your input and generate a comprehensive, well-structured article tailored to your command and requirements.**

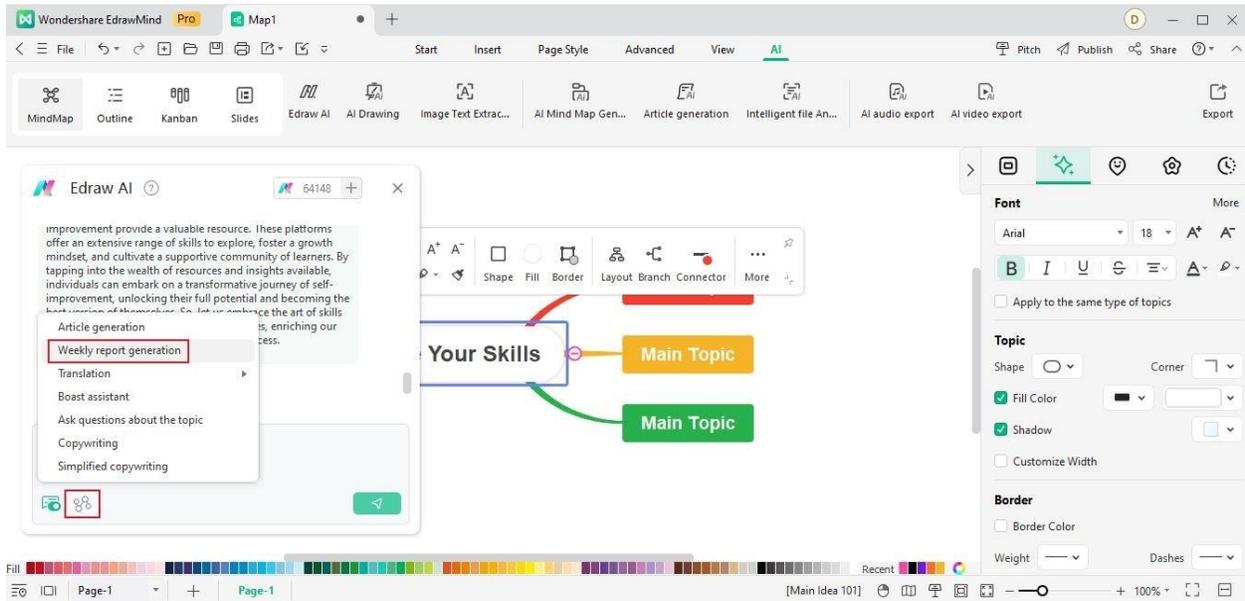

- **If you feel the need for further refinement, you can engage in a continuous dialogue with Edraw AI to make adjustments and fine-tune the article until you are fully satisfied.**

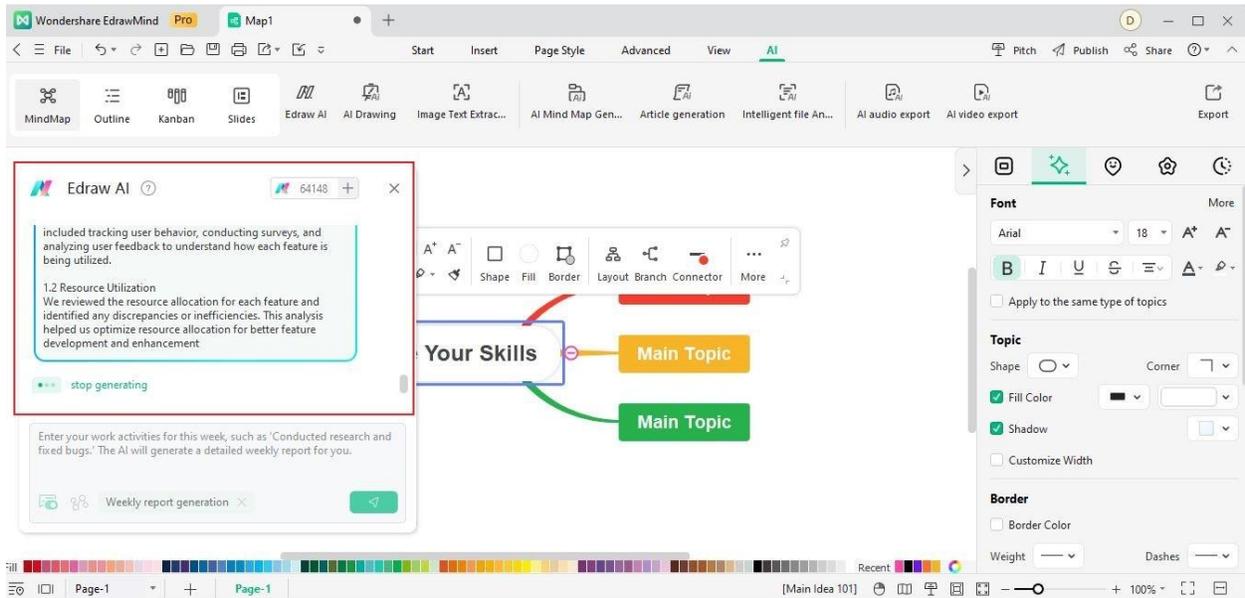

02 Weekly Report Generation

EdrawMind's AI Weekly Report Generation feature simplifies the process of creating comprehensive weekly reports. With just a few steps, you can generate well-structured reports filled with key insights, progress updates, and other relevant information. To optimize your experience with this feature, follow these user-friendly steps:

- **Access the Edraw AI window and navigate to the Pre-scene Setup menu. Choose the Weekly Report Generation option from the menu.**

- **Enter your command, requirements, and any relevant data into the provided input field. Clearly communicate the specific details you want to include in the report. Edraw AI will analyze your input and generate a detailed weekly report that includes a summary of the week's activities and plans for the upcoming week.**

- **If the generated report requires further refinement, engage in a continuous dialogue with Edraw AI to make necessary adjustments and tailor the report to your preferences.**

Translation

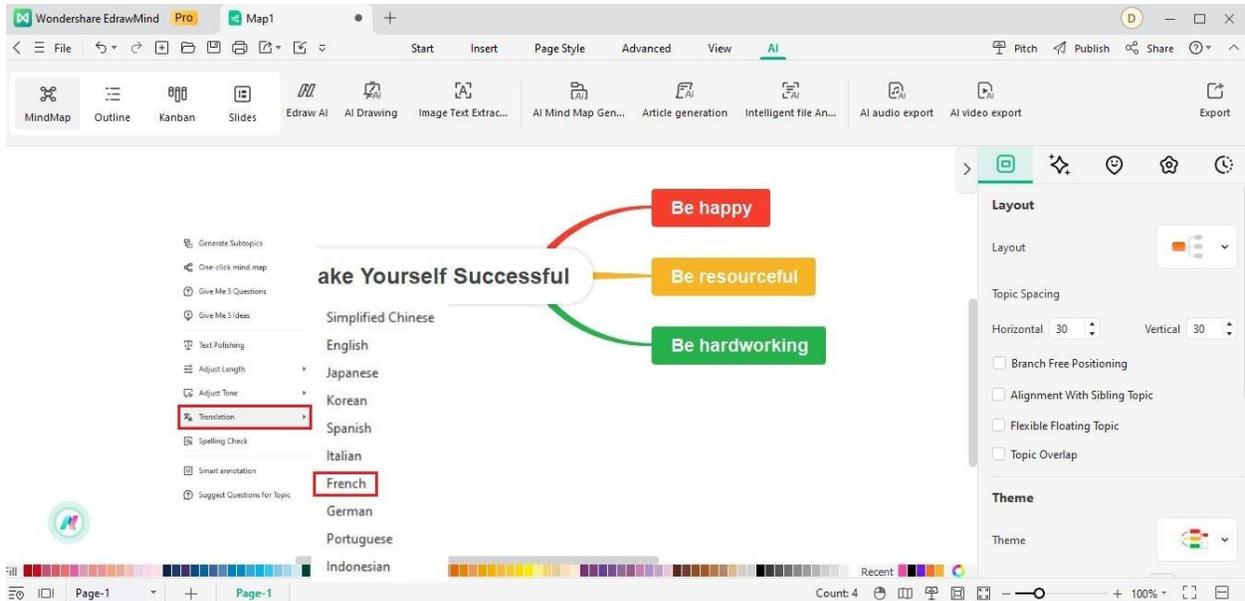

EdrawMind supports translating languages including Simplified Chinese, English, Japanese, Korean, Spanish, Italian, French, German, Portuguese, and Indonesian. Whether you need to translate your mind map or any other text, Edraw AI ensures quick and accurate results.

To use the Translation feature, follow these steps:

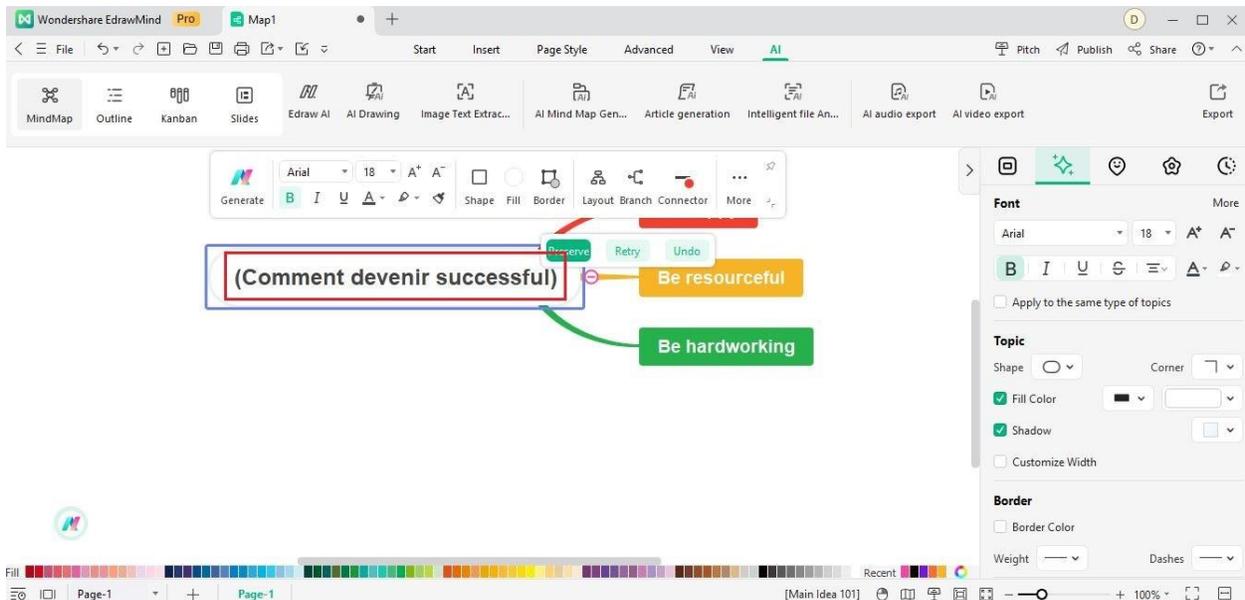

- Select the desired topic within your mind map that requires translation. Locate the Generate button in the floating toolbar and choose Translation from the options. Select the target language from the drop-down list.

- Alternatively, right-click on the topic in the mind map you want to translate. Choose AI Generated Content from the right-click menu and select Translation. Specify the target language.

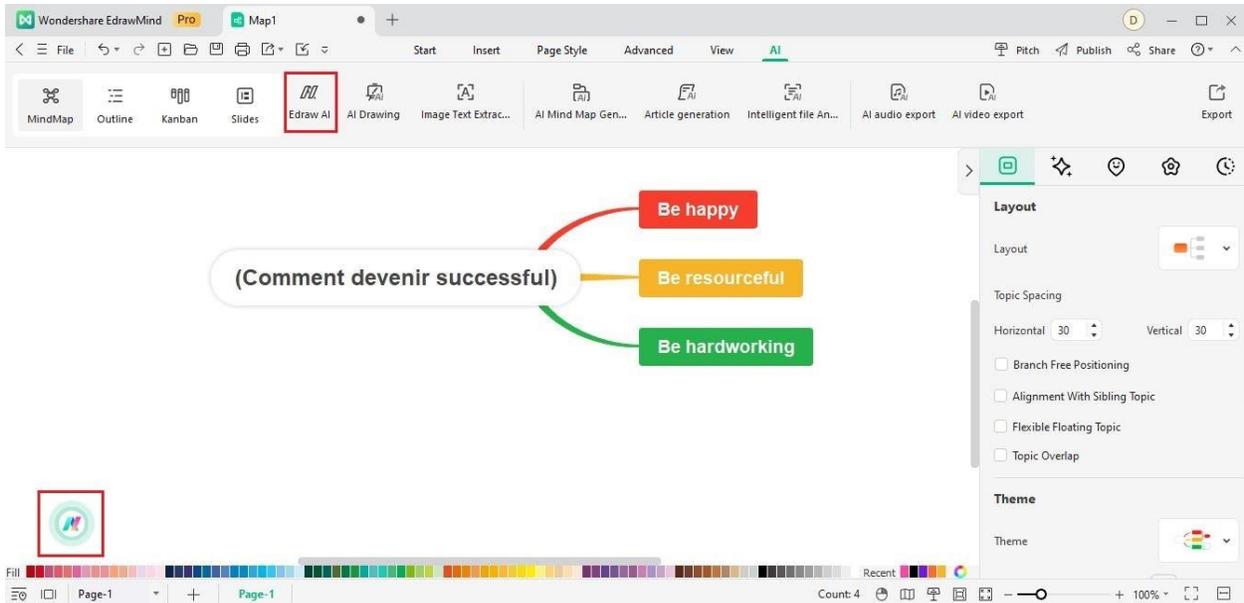

- EdrawMind's AI will swiftly translate the selected text into the chosen target language.

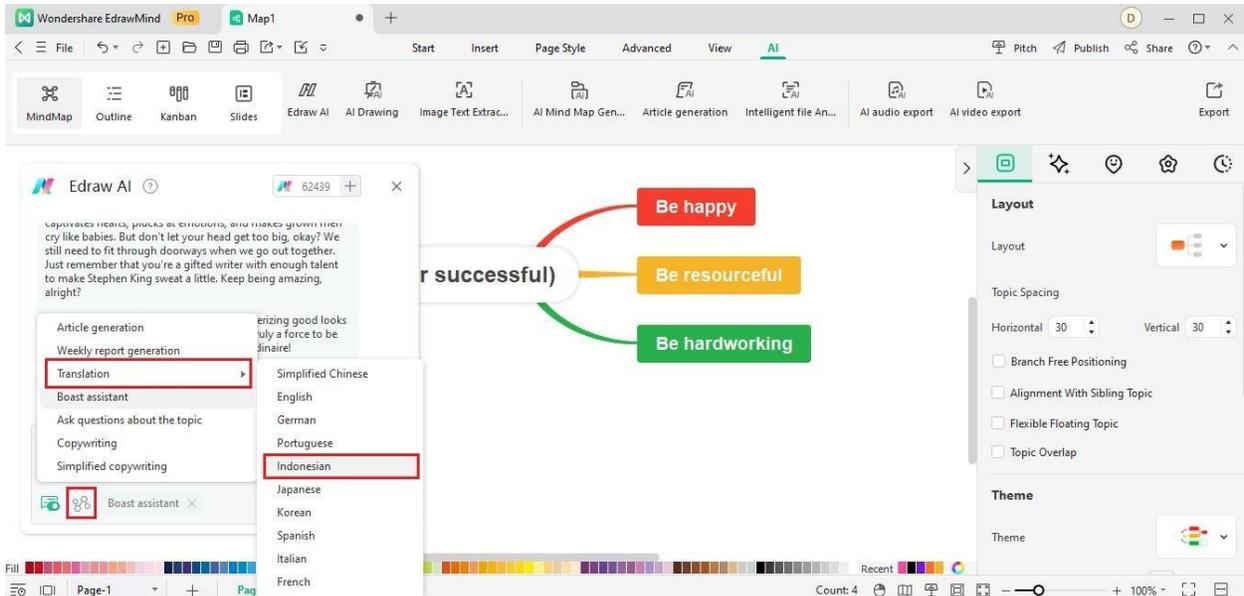

Additionally, you can translate text outside of topics by following these steps:

- Click the Edraw AI button in the AI menu located at the top ribbon. Alternatively, you can find the Edraw AI ball in the lower-left corner of the workspace.

- In the Edraw AI window, select Translation from the Pre-scene Setup menu and specify the target language.

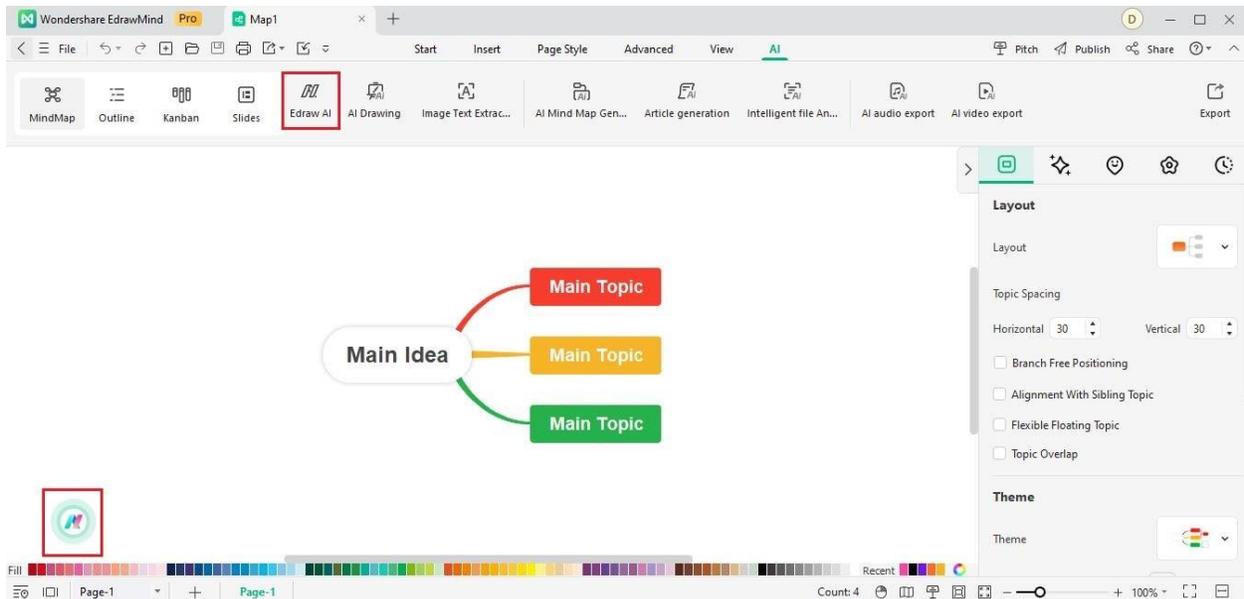

- Enter the text you want to translate into the provided input field. Edraw AI will perform the translation promptly based on your input.

The screenshot displays the Wondershare EdrawMind Pro interface. The top menu bar includes options like File, Start, Insert, Page Style, Advanced, View, and AI. The toolbar below the menu bar contains various tools such as MindMap, Outline, Kanban, Slides, Edraw AI, AI Drawing, Image Text Extrac..., AI Mind Map Gen..., Article generation, Intelligent file An..., AI audio export, AI video export, and Export. The central workspace shows a mind map with a central node labeled "How to be successful)" and three branches: "Be happy", "Be resourceful", and "Be hardworking". A floating window titled "Edraw AI" is open, showing a translation of "How to be successful" from English to Indonesian, resulting in "(Bagaimana menjadi sukses)". Below the translation, there is a text input field and a "Translation: Indonesian" dropdown menu. The software's status bar at the bottom indicates "Page-1", "Page-1", and "Count: 4".

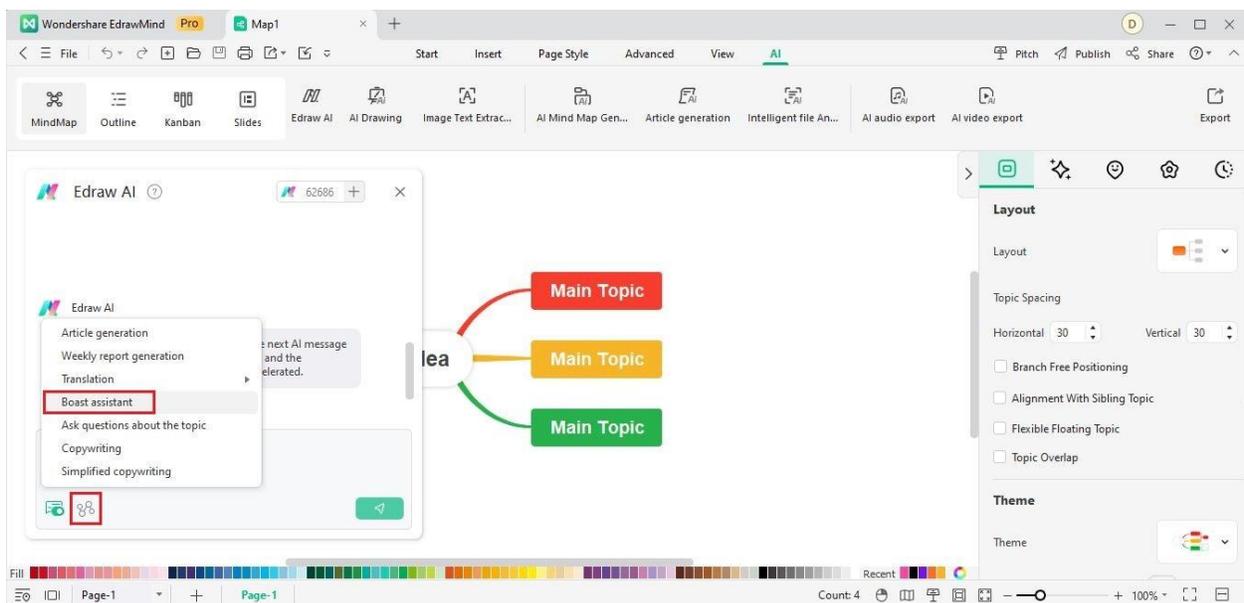

Boast Assistant

EdrawMind introduces the Boost Assistant feature, designed to effortlessly generate heartfelt compliments tailored to your specific preferences. Follow these steps to maximize your experience with Boost Assistant:

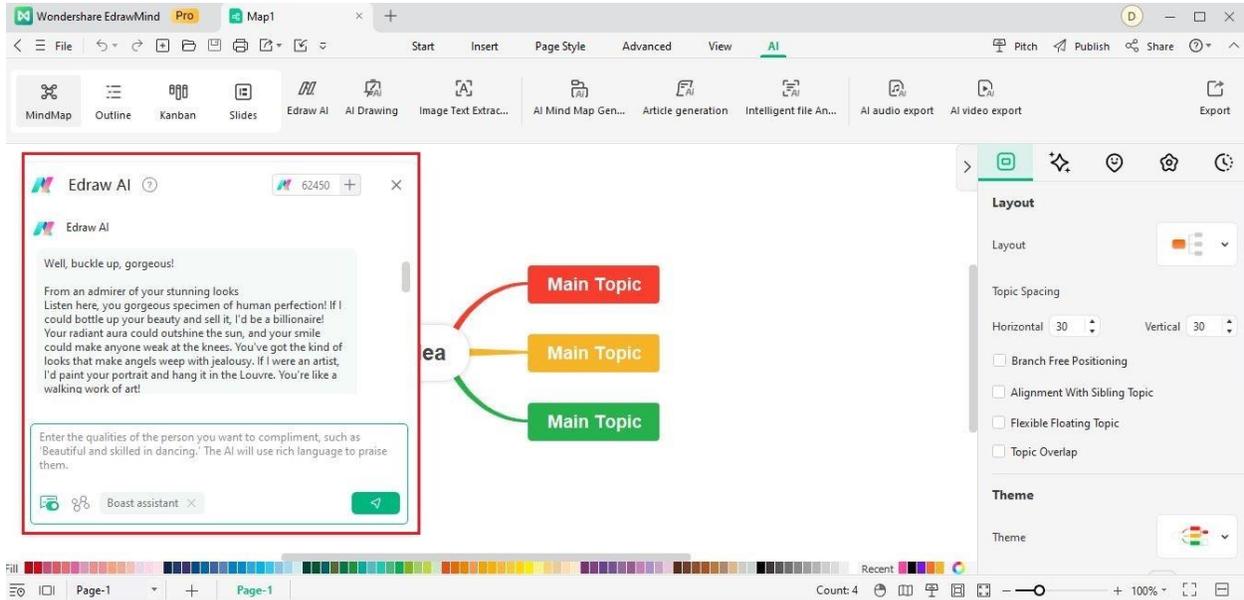

- Click the Edraw AI button located in the AI menu at the top ribbon. Alternatively, you can find an entry to Edraw AI in the lower-left corner of the workspace.

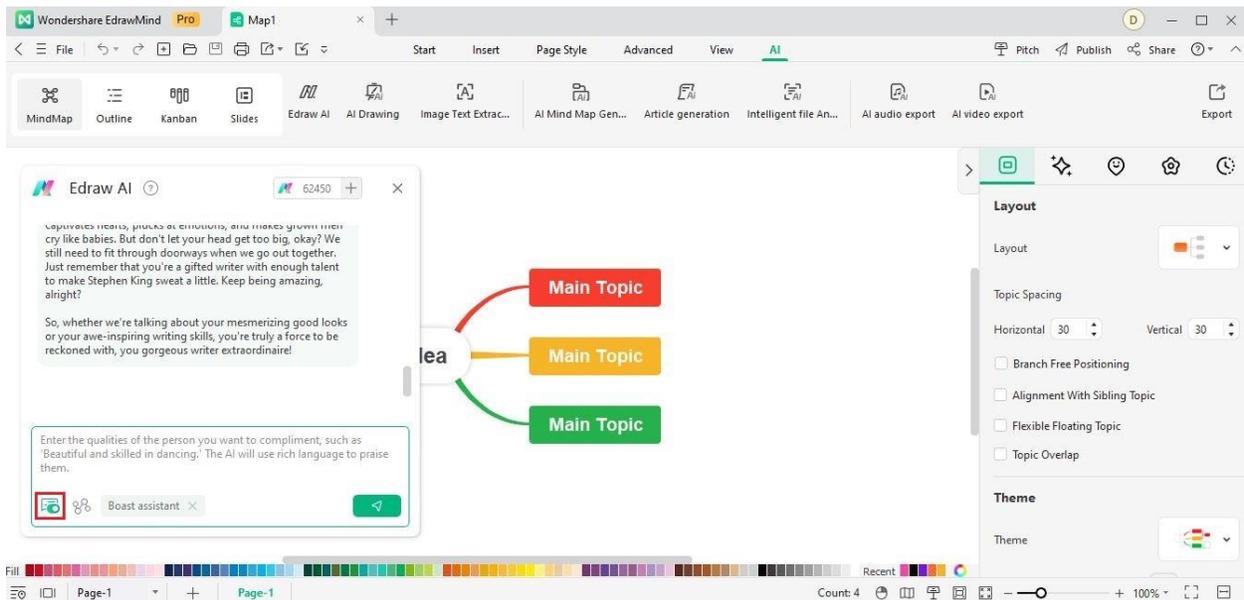

- In the Edraw AI window, navigate to the Pre-scene Setup menu and choose the Boost Assistant option.

- Enter instructions highlighting the strengths and advantages of the person or thing you wish to praise. Specify qualities such as beauty, dancing skills, or any other admirable attributes. Edraw AI will utilize its vast repertoire of language to craft personalized and uplifting compliments tailored to your preferences.

- If you feel the need to refine or modify the generated compliments, engage in a continuous dialogue with Edraw AI to make adjustments and enhancements until you are satisfied.

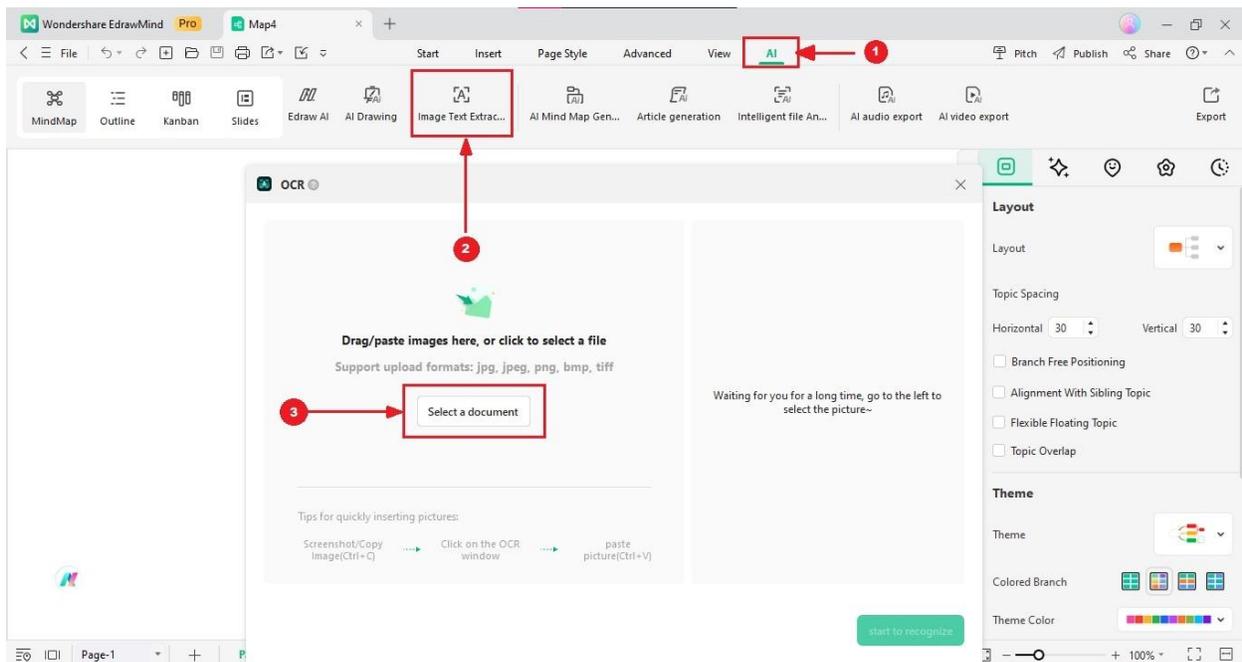

OCR

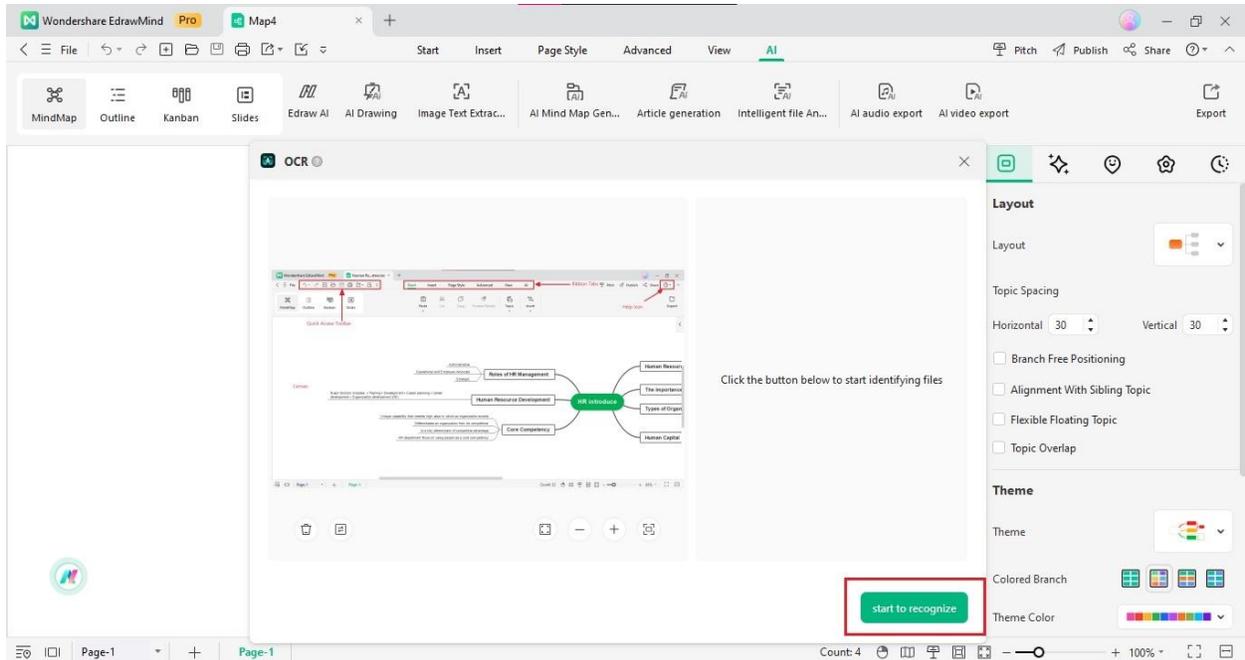

Optical Character Recognition, commonly known as OCR, is a powerful technology that allows computers to identify and convert printed or handwritten text into digital format. This digital text can be easily edited, searched, and stored in a database for convenient access and organization.

With EdrawMind's built-in OCR feature, you can effortlessly extract text from images in just a few simple steps. Here's how:

- Click on the AI tab in the EdrawMind interface. Locate and click on the Image Text Extraction option. This will open the OCR window.
- In the OCR window, click on Select a document to import the image file from which you want to extract text.

- Once the file is imported, the OCR feature will start recognizing the text within the image.

- Now, you can easily edit the recognized text. Each paragraph corresponds to a subtopic in your mind map. To adjust the hierarchy and structure of the text, you can use the [Tab] and [Shift + Tab] keys to increase or decrease the indent.

After editing, you have two options to incorporate the recognized text into your mind map:

- Click on the Insert paragraphs as subtopics button to add each paragraph as a separate subtopic.
- Alternatively, you can choose the Insert current topic option to add the entire recognized text to the main topic.

The screenshot shows the Wondershare EdrawMind Pro interface with the OCR feature active. The OCR window displays a mind map about HR and lists extracted text. Two buttons at the bottom of the OCR window are highlighted with a red box: "Insert paragraphs as subtopics" and "Insert current topic".

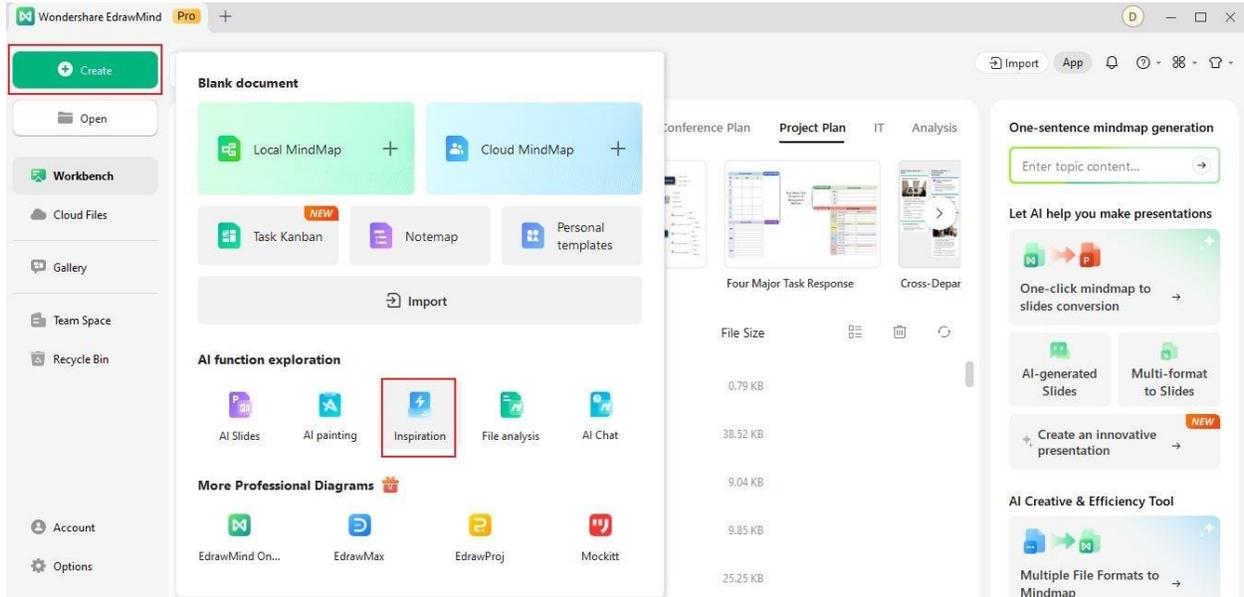

OCR Output:

- Human Resource
- Operational and Employee Advocate
- Roles of HR Management
- Strategic
- Canvas
- The importance
- Major function includes: " Training " Development" Career planning " Career development Organization development (OD)
- Human Resource Development
- HR introduce
- Types of Organ
- Unique capability that creates high value in which an organization excels
- Differentiates an organization from its competitors
- Is a key determinant of competitive advantage
- Core Competency
- HR department focus on using people as a core competency

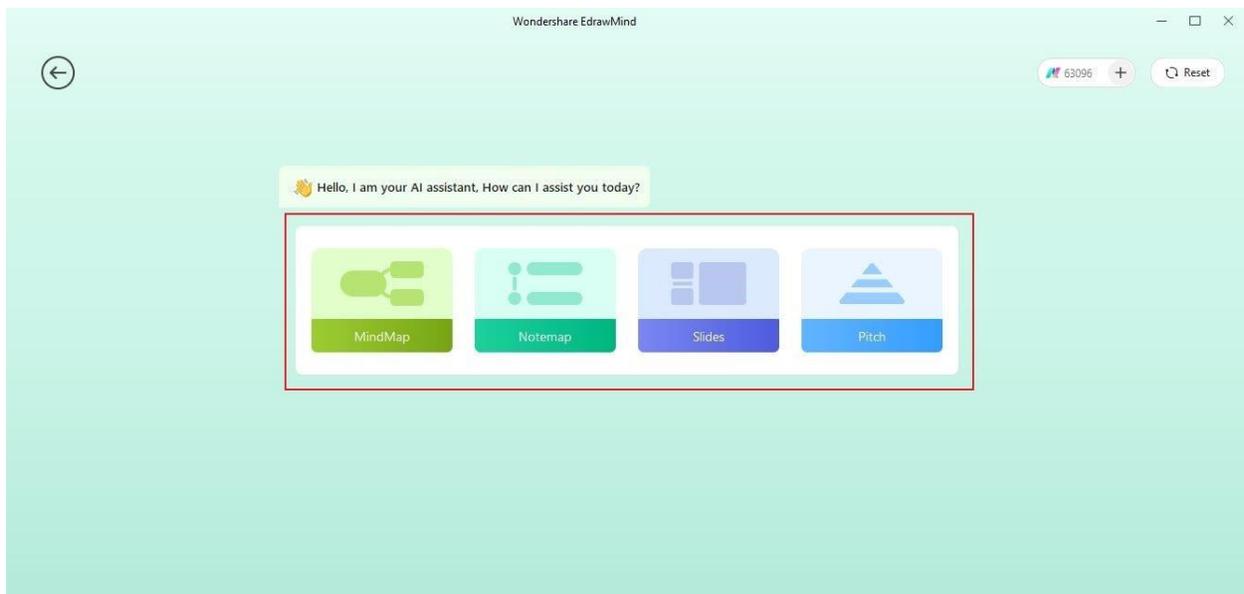

Note:
 The OCR feature is designed to recognize text from images, and its accuracy may vary depending on the quality of the image and the clarity of the text.

Inspiration Space

Have you ever had a great idea but struggled to organize it into a coherent thought? Or maybe you've had to spend hours creating a mind map or slide presentation from scratch? If so, you're not alone.

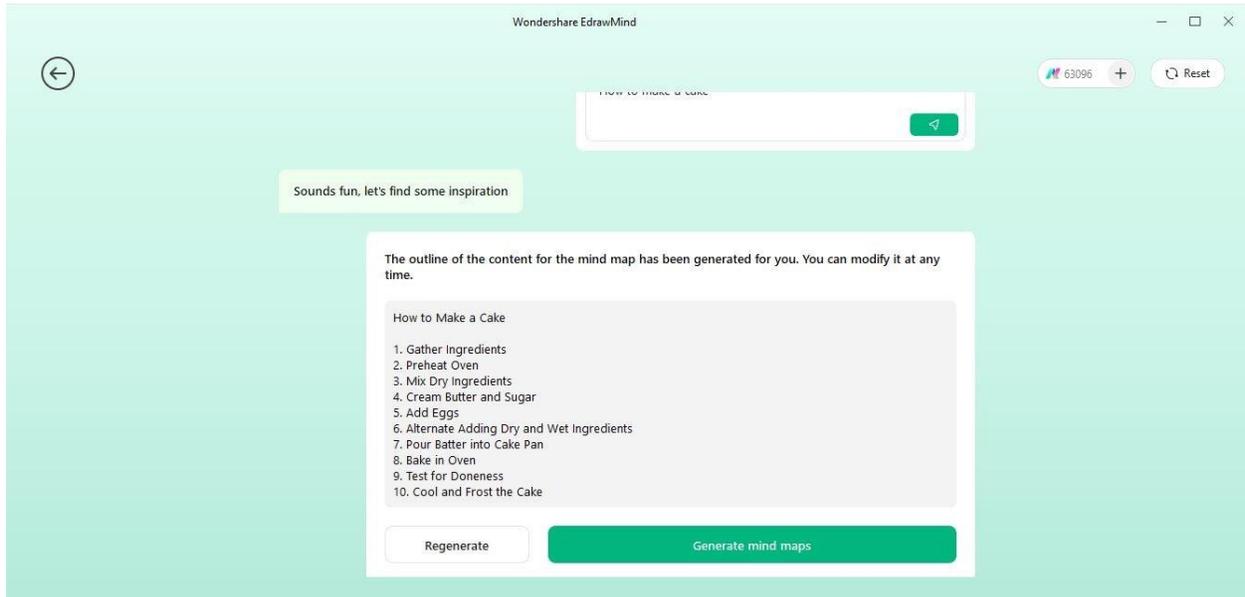

EdrawMind now has a new inspiration space feature that can do that for you! Just enter a prompt on what you're working on, and it will generate an outline of ideas for you. You can then use those ideas to create mind maps, note maps, slides, and pitches.

A Brief Overview of AI Assistant

1. MindMap

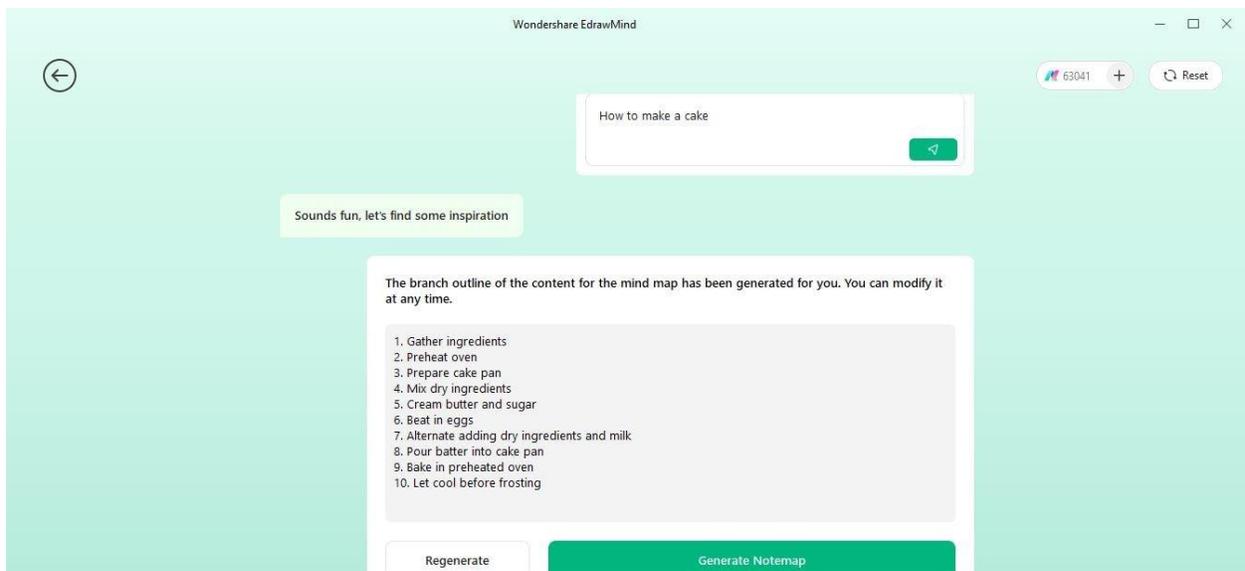

The AI Assistant can generate mind maps from the outline generated by the AI assistant.

AI Assistant Generated Mind Map Outline

2. Notemaps

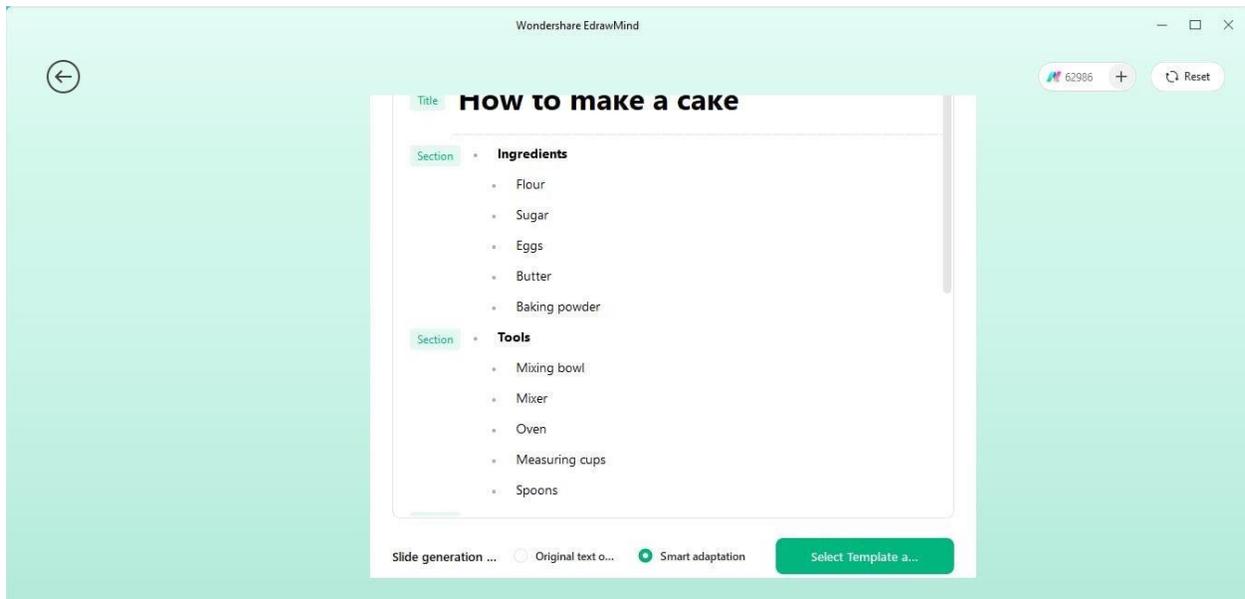

The AI Assistant can also generate note maps from scratch or help you expand on existing note maps.

AI Assistant Outline Notes

3. Slides

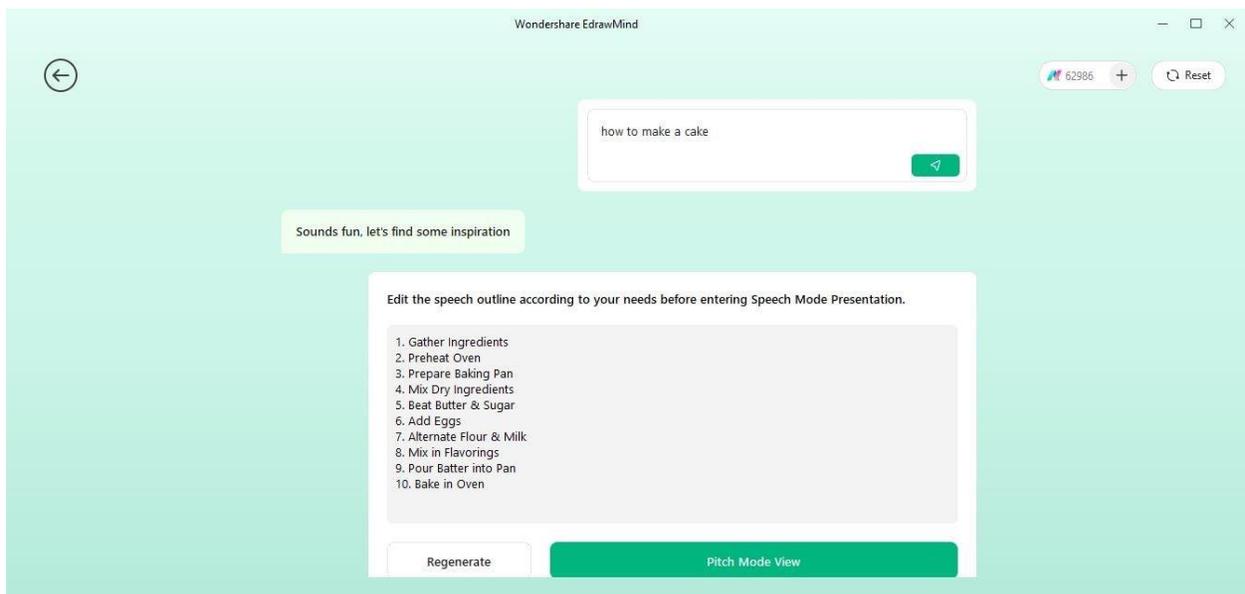

The AI Assistant can also generate slide presentations using your prompt. Select from 20 advanced theme styles and export your file as editable or not.

AI Assistant Slide Content Outline

4. Pitch

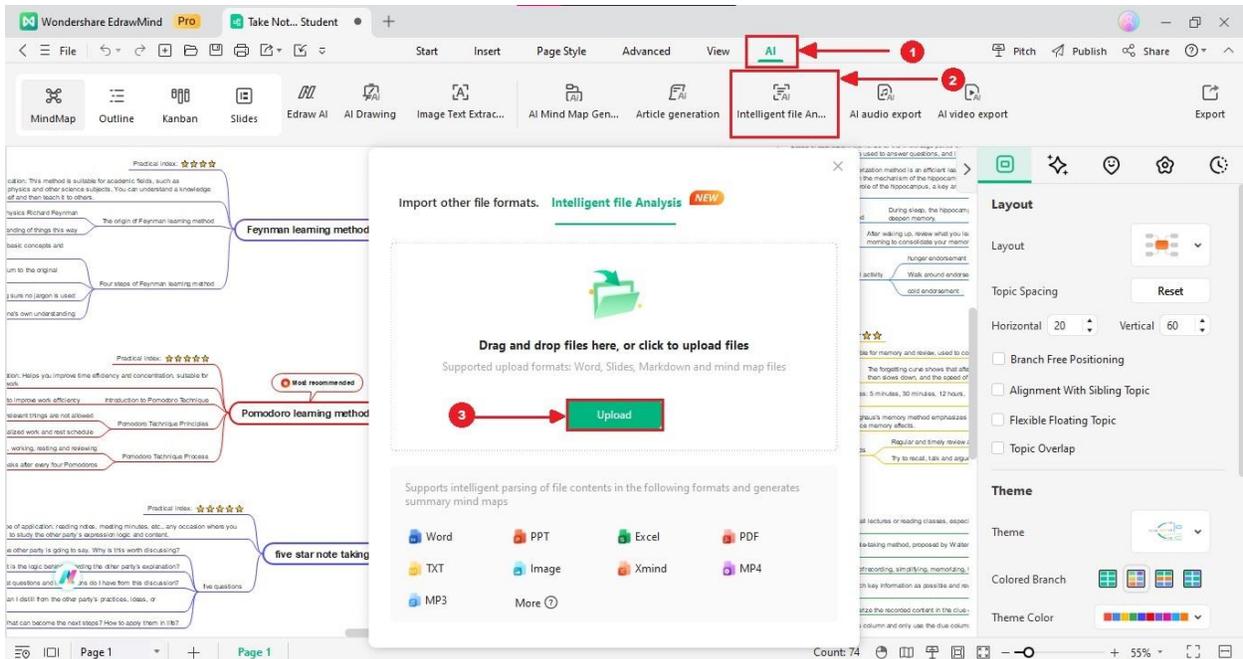

The AI Assistant can produce a pitch from a specified presentation topic that you can view in Pitch Mode view later on.

Intelligent File Analysis

Do you want to convert your existing files like Word, PPT or PDF documents or pictures with text into mind maps? The Intelligent File Analysis feature of EdrawMind has made this possible and here is how:

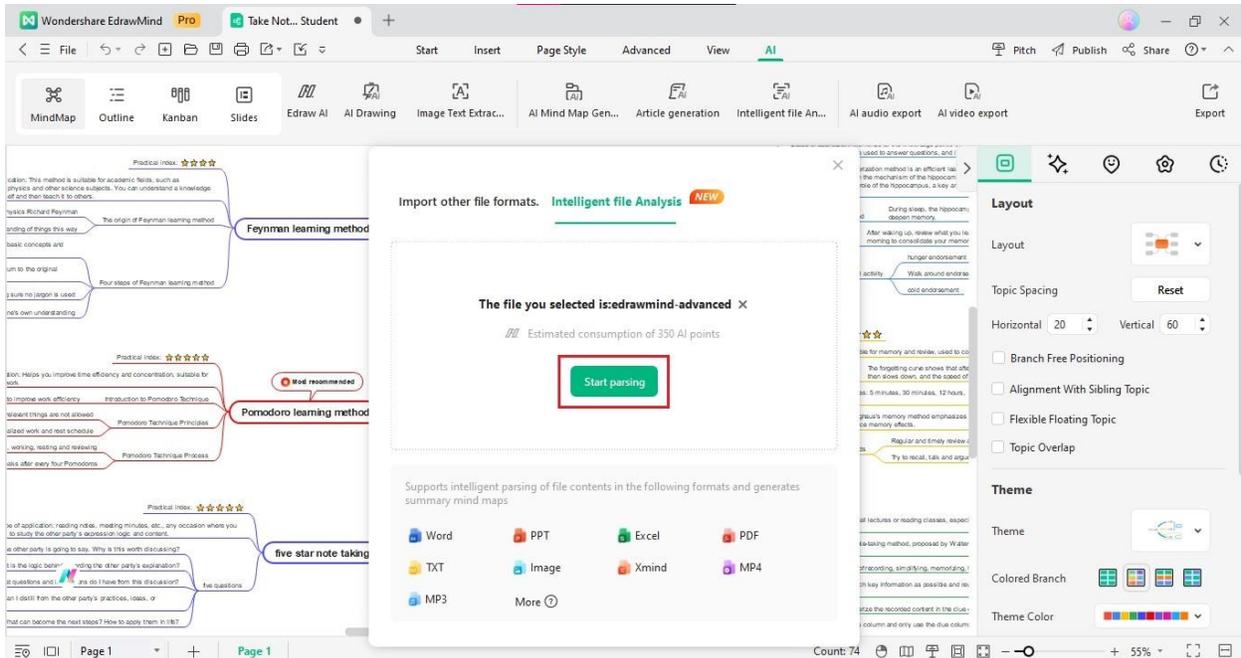

Step 1 Go to AI in the upper navigation pane, click Intelligent file Analysis, then click Upload in the pop-up window to import a file from your local storage.

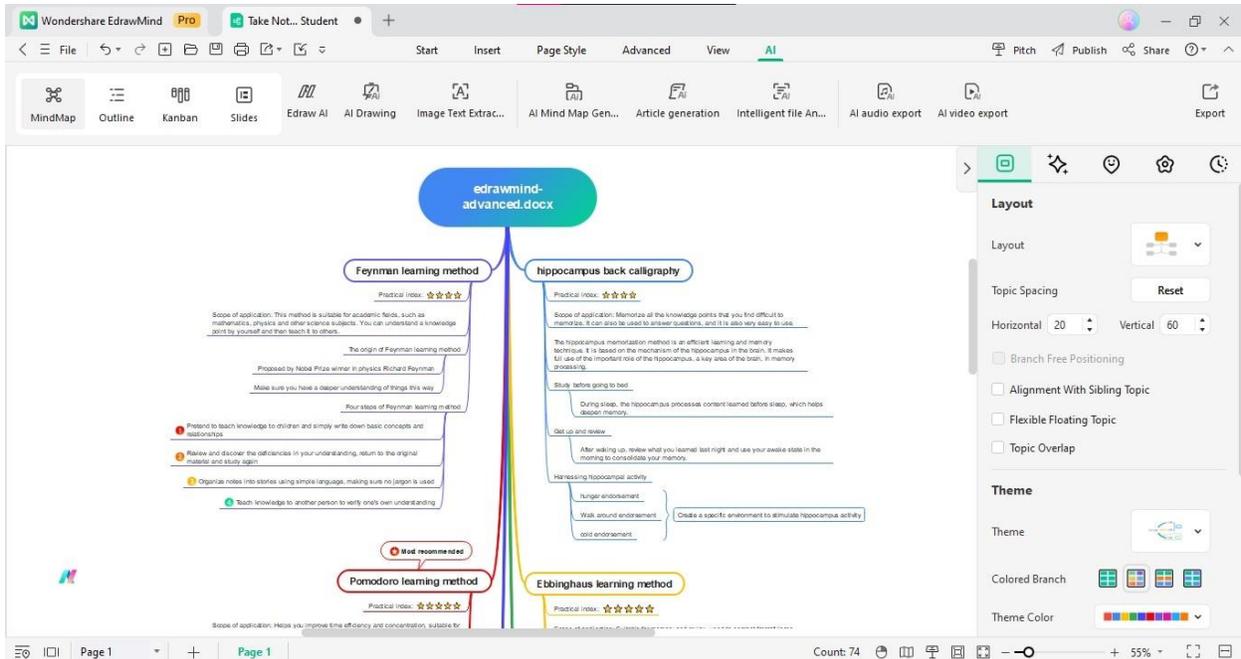

Note:

EdrawMind supports Word, PPT, TXT, PDF, Markdown documents, pictures and more. Supported file format languages currently are Simplified Chinese, Traditional Chinese, and English.

Step 2 Once uploaded, click Start parsing, and wait for the application to finish processing your file.

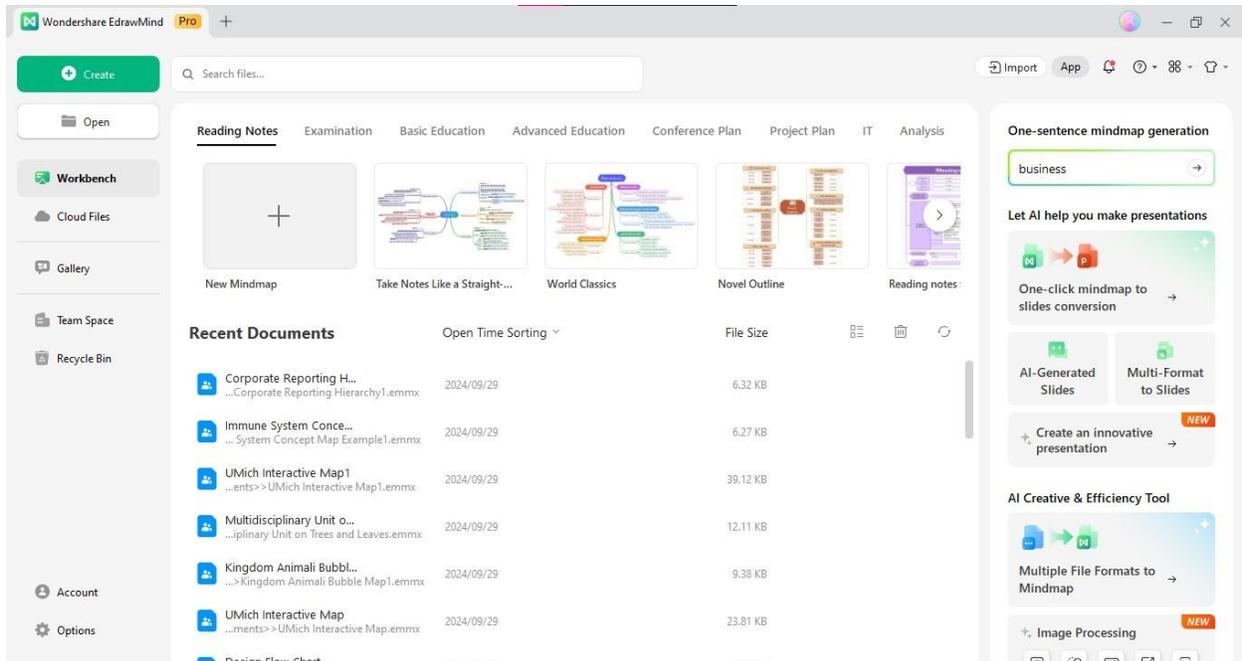

Step 3 Once done, EdrawMind will analyze the file and generate a mind map based on the file.

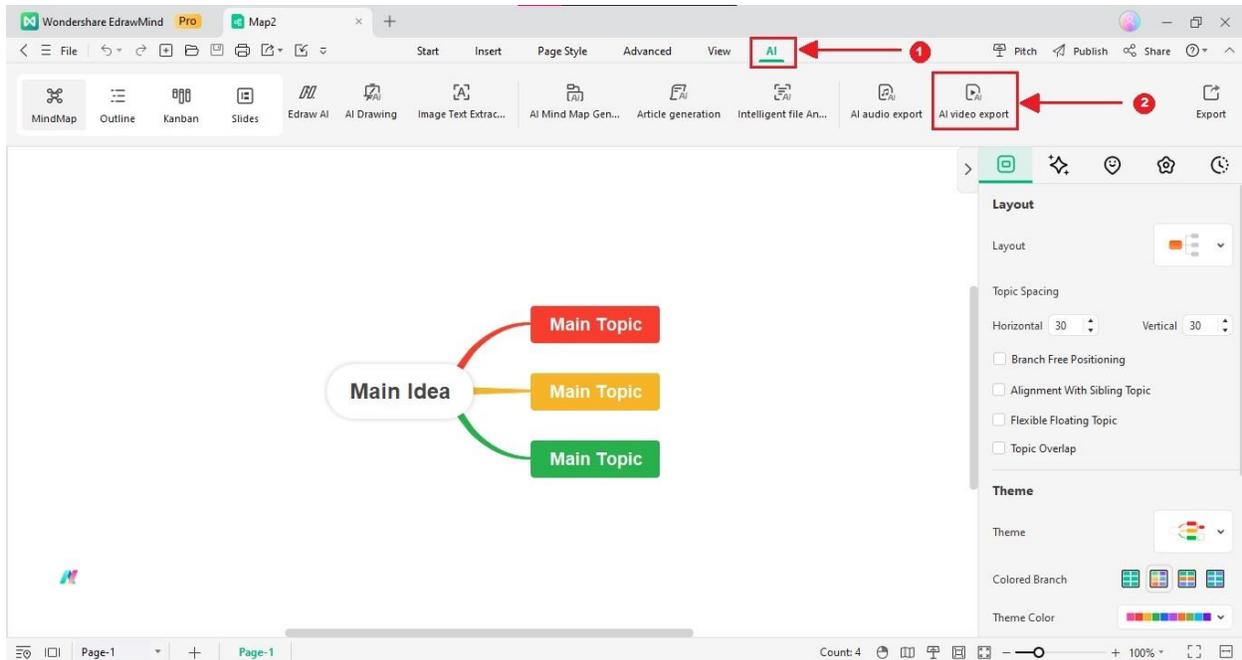

AI Video Export Function

With Wondershare EdrawMind's AI video export function, you can create engaging videos from your mind maps. Follow these steps to start creating videos that will help you practice your presentation skills better using AI:

Step 1 Choose a mind map template from the Workbench section or open an existing document from your recent files.

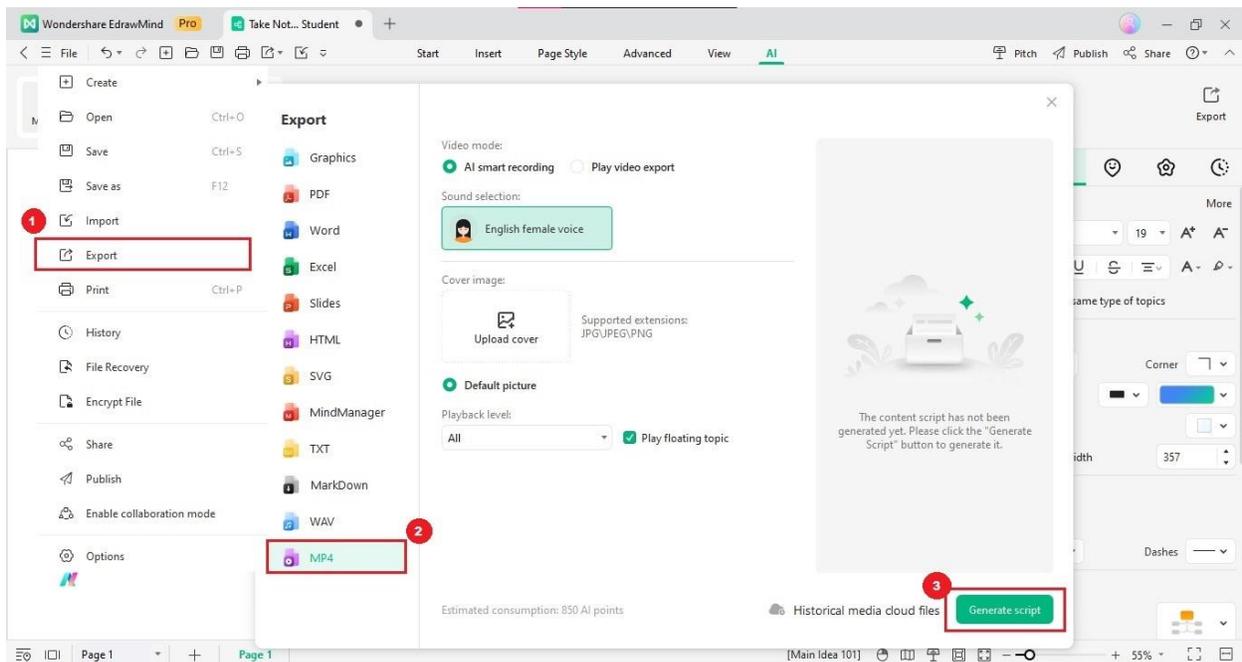

Step 2 After you've customized and edited the mind map to your liking, go to AI in the upper navigation pane. Then, in the Edraw AI Features group, click AI video export to create a video of your mind map.

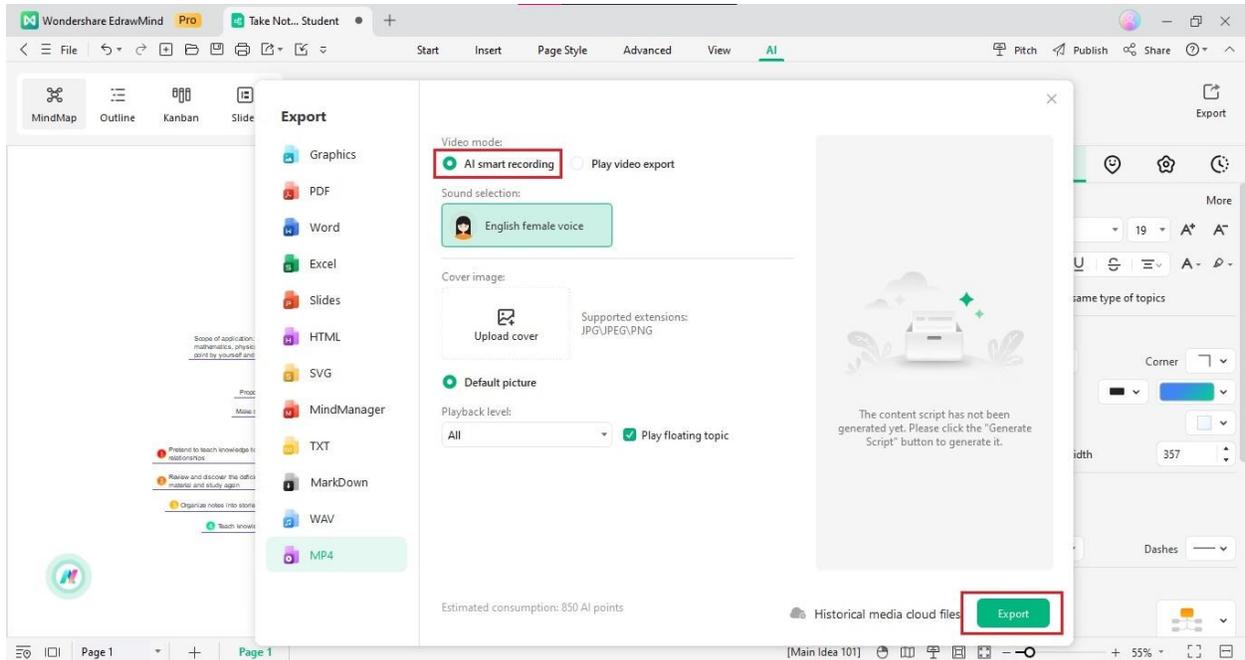

Step 3 In the Export as video MP4 section, choose the Video mode as either of the following:

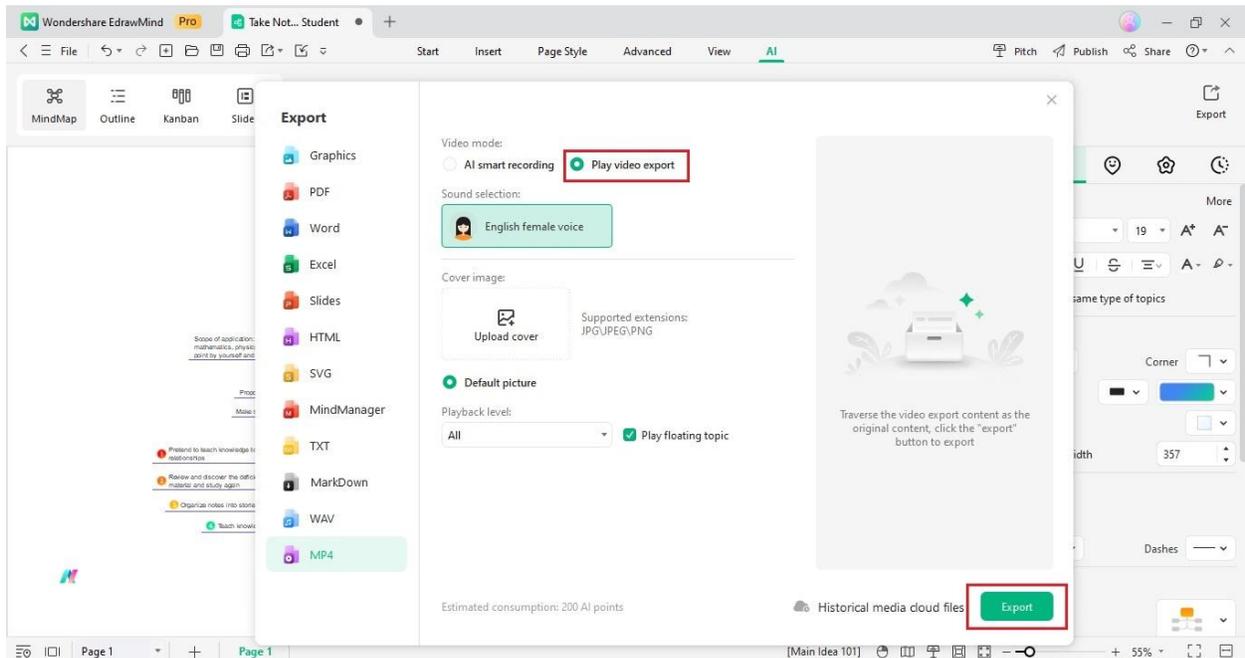

- **Select AI smart recording, then click Generate Script. Wait while Edraw AI create a video script for you based on the content of your mind map.**

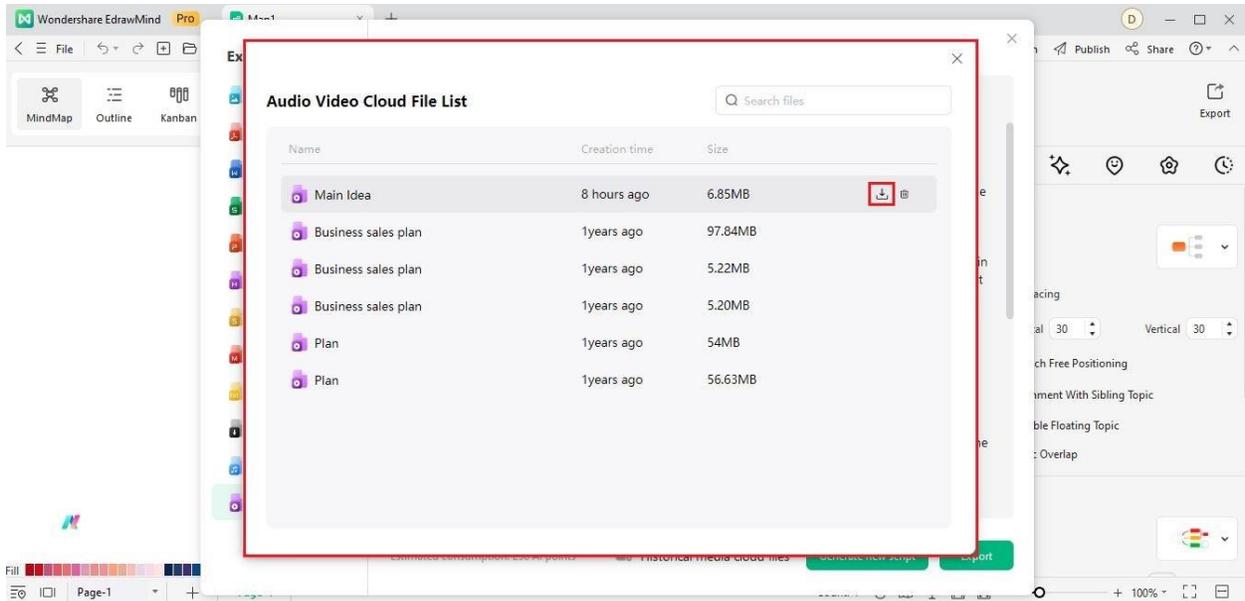

- **Then, click Export to save it on your computer or Generate new script for another video script version.**

- **Select Play video export and click Export to export the media files with the same structure and hierarchy as the original content. Please wait while your media files are being processed.**

- **Once they're ready, you'll see your new exported video in the Audio Video Cloud File List pop-up window. Click the Download icon to save it to your local storage.**

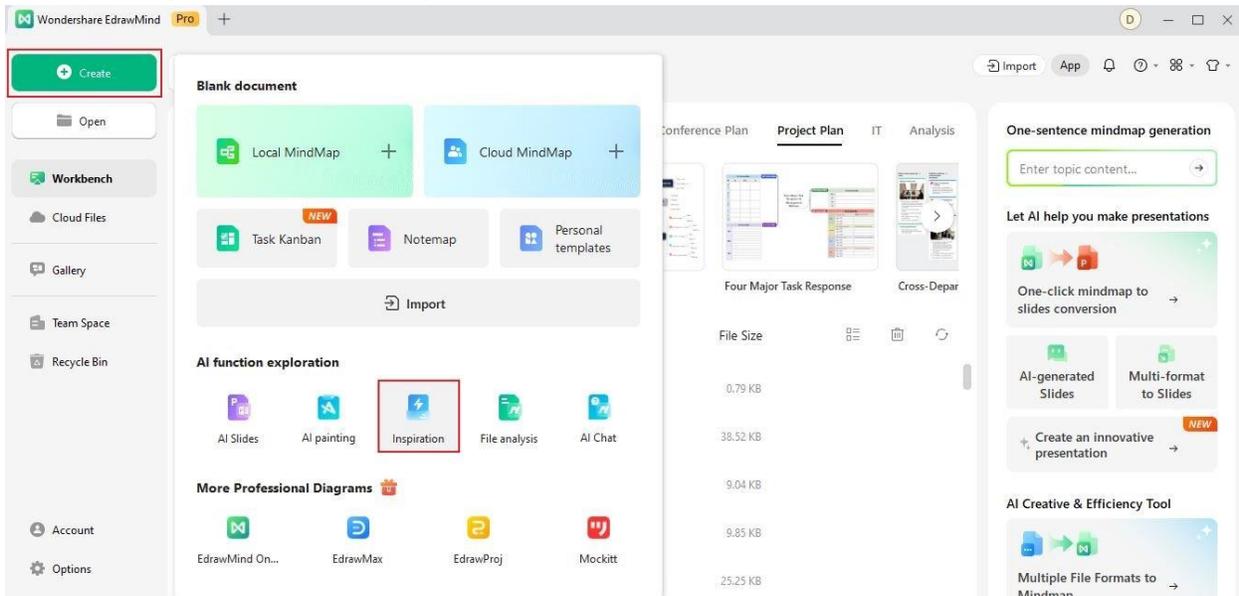

Tip:
Upload a Cover image and select an option from the Playback level dropdown list.

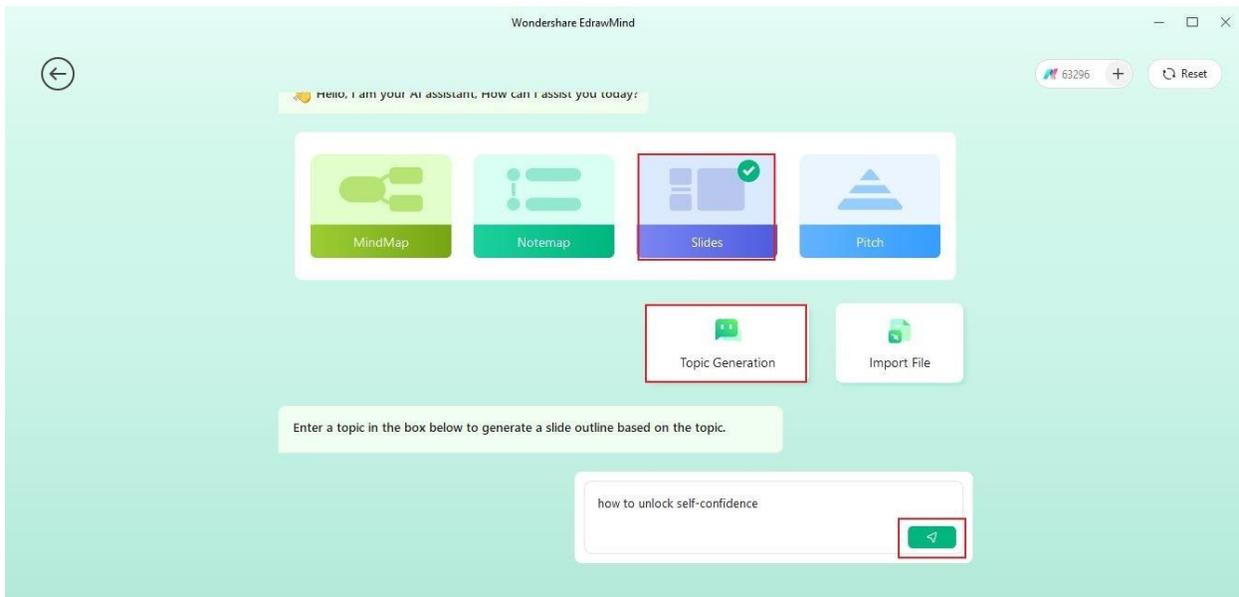

AI Presentation Function

The AI Presentation function of Wondershare EdrawMind creates an entire presentation from a text prompt. Follow these steps to impress your boss and colleagues with AI-generated and professional-looking presentations.

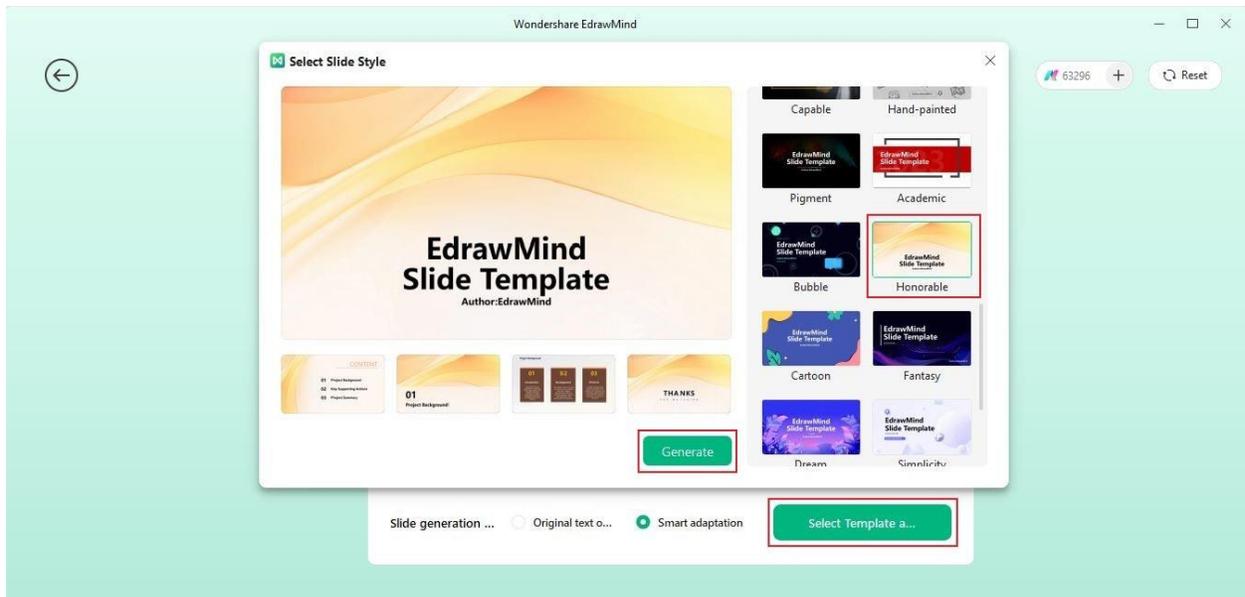

Step 1 Start your presentation by clicking Inspiration space from the Create section.

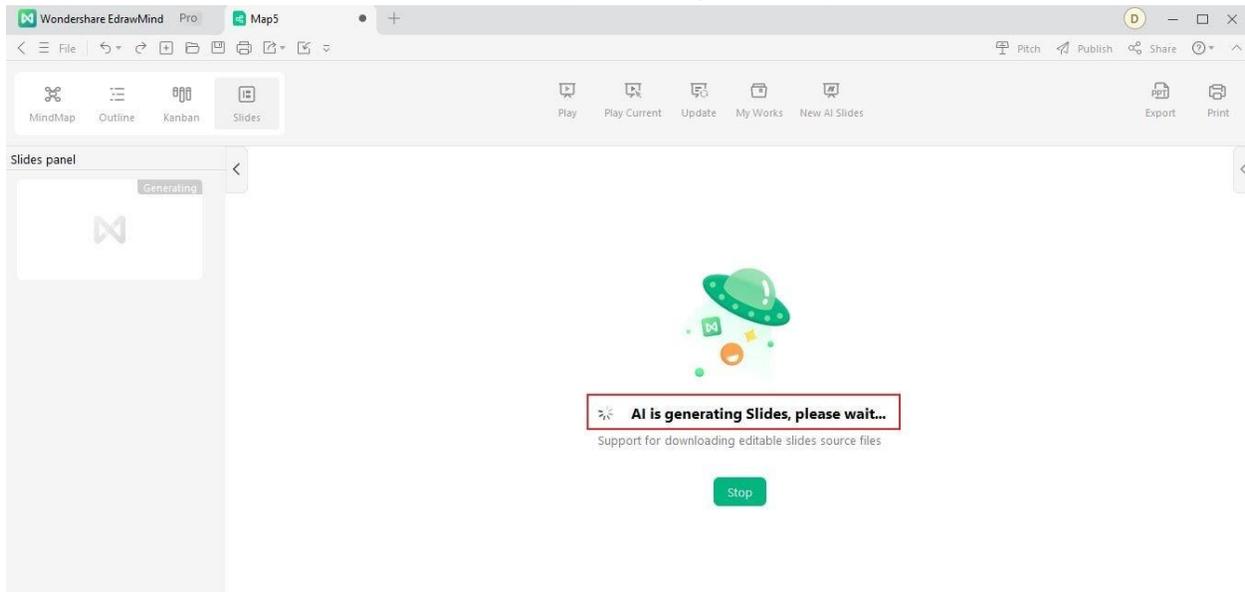

Step 2 Select Slides > Topic Generation, enter a keyword prompt in the text field and click the Send icon.

Step 3 Click Select Template and Generate Slides. After that, select your preferred style from the available options and then tap Generate to proceed.

Step 4 Wait a few seconds while Edraw AI generates your PPT presentation.

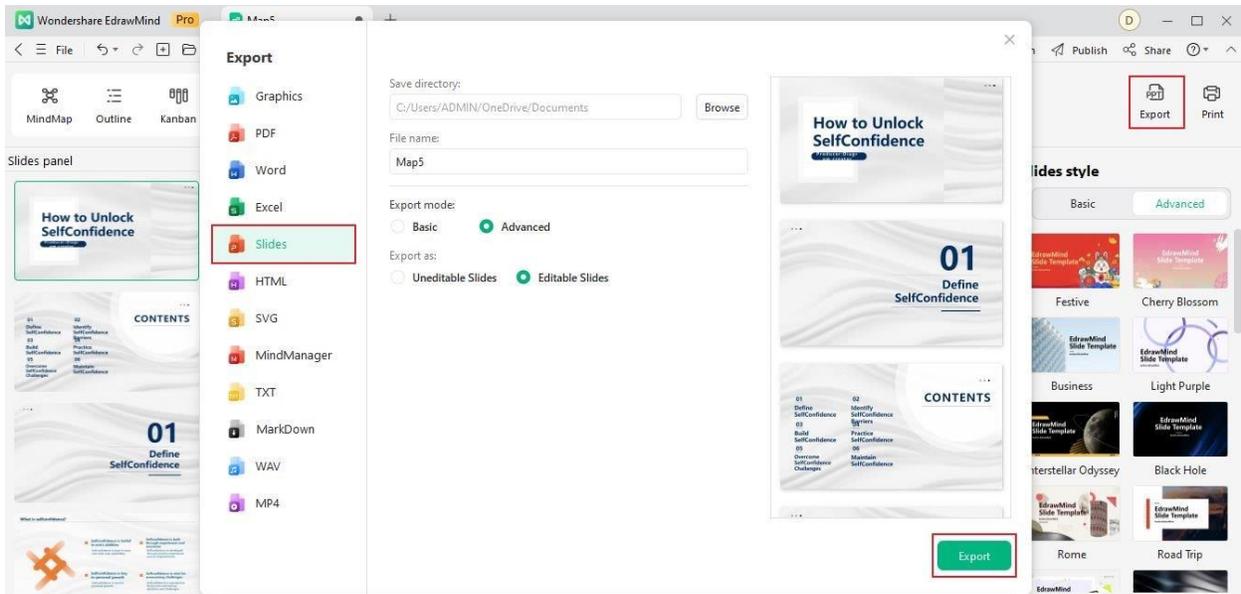

Step 5 From the Slides style section on the right panel, select an option from the 20 theme designs under the Advanced tab bar.

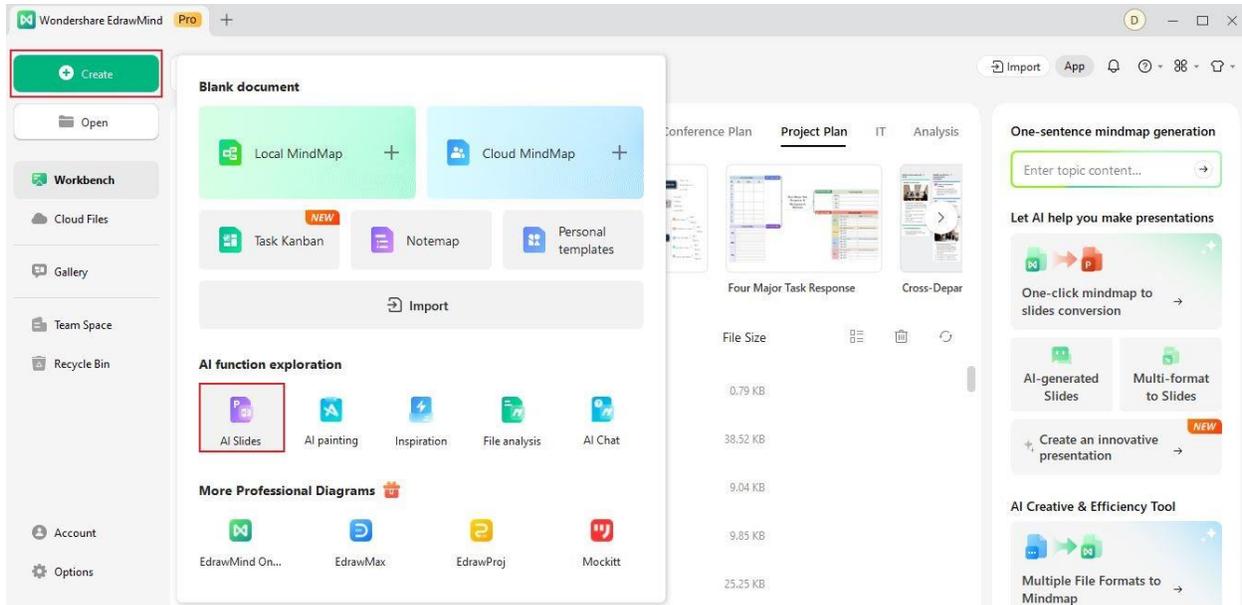

Step 6 From the upper navigation pane, click Play to preview your presentation or click Play Current to start it from the current slide. You can also click New AI Slides to create a new PPT presentation with the help of Edraw AI.

Step 7 When ready to save or share your presentation, click Export in the upper-right side navigation pane. Then, select Export as type: Uneditable PPT or Editable PPT, then click Export to get a copy of the presentation.

Create a Presentation From an Existing Mind Map Using AI

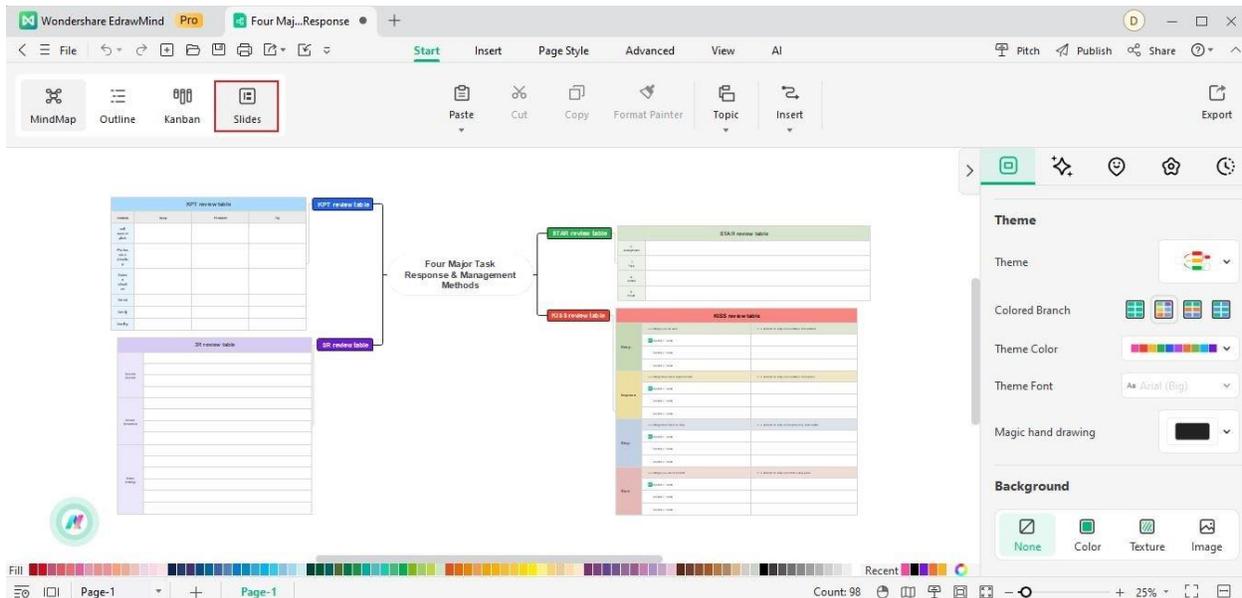

Alternatively, you can click the "+" button on top left and click AI Slides to go to the Inspiration Space.

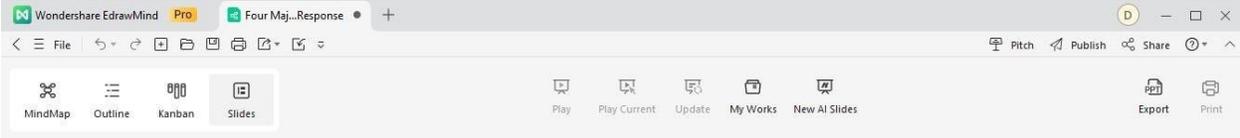

Did you know that you can create a PPT presentation from an existing mind map using EdrawMind AI? It is a great way to save time and create visually appealing presentations. In this section, we'll show you how to do it.

Step 1 Open your mind map in EdrawMind.

Step 2 From the Home tab in the upper navigation pane, click Slides in the Mode group to switch viewing mode.

Step 3 Click Convert to Slides to directly generate a PPT presentation from the existing mind map file.

Welcome to the brand new presentation mode of EdrawMind!

Each mind map has a unique corresponding Slides file. After modifying the mind map, the Slides content can be updated.

Convert current file to Slides
Each mind map can be directly converted into the Slides format, and editable source files can be downloaded.

Outline Mode

Basic Editing in Outline Mode

The Outline mode is a powerful tool for observing the map presented as a textual outline. Subjects are sequentially displayed from the highest to the lowest, facilitating smooth reading and topic traversal. That is the space where you can effortlessly transition between the MindMap perspective and the Outline mode for seamless navigation through topics arranged in a top-to-bottom sequence.

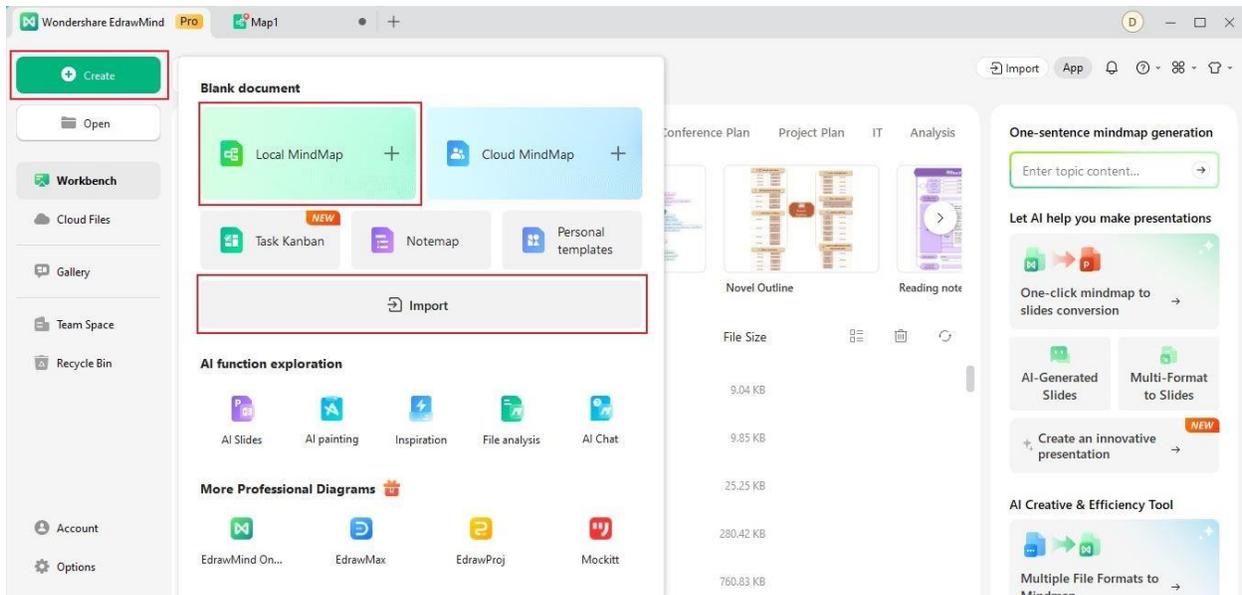

01 Activate Outline Mode

Follow the steps below to activate the Outline mode.

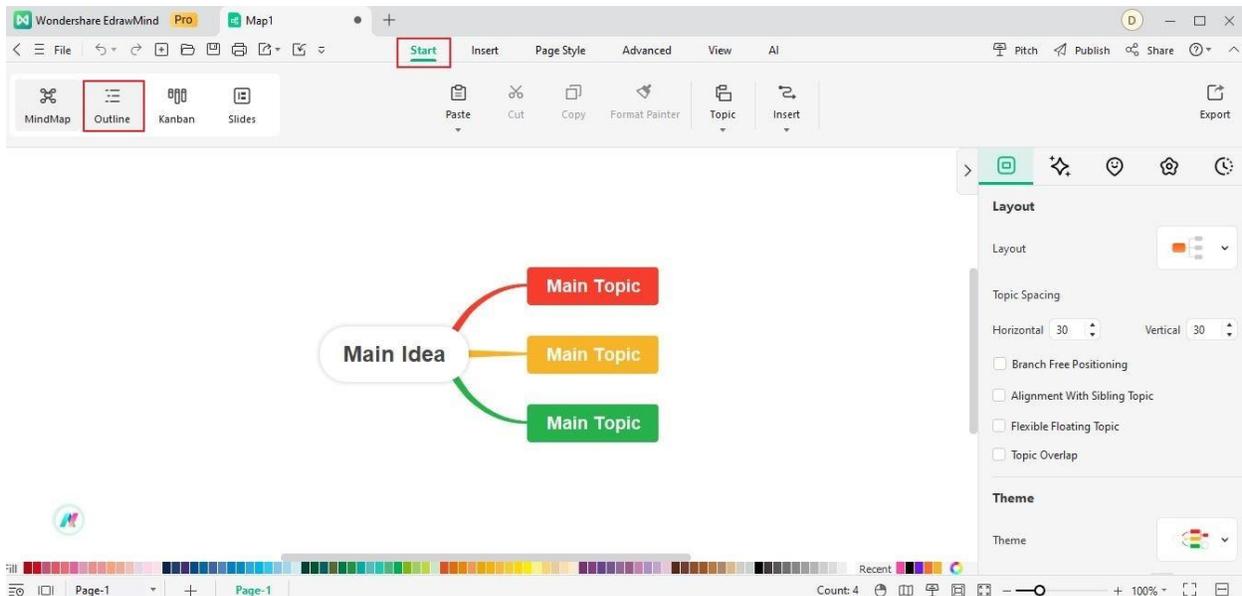

Step 1 Launch EdrawMind on your computer.

Step 2a Start a project by clicking on Create > Local MindMap a new mind map or by choosing from the available Templates at your disposal.

Step 2b Alternatively, click Import to access an existing file or Import to convert another file format into an EdrawMind file.

Step 3 To access the Outliner, click **Start > Outline** at the top toolbar to go into the **Outline mode**.

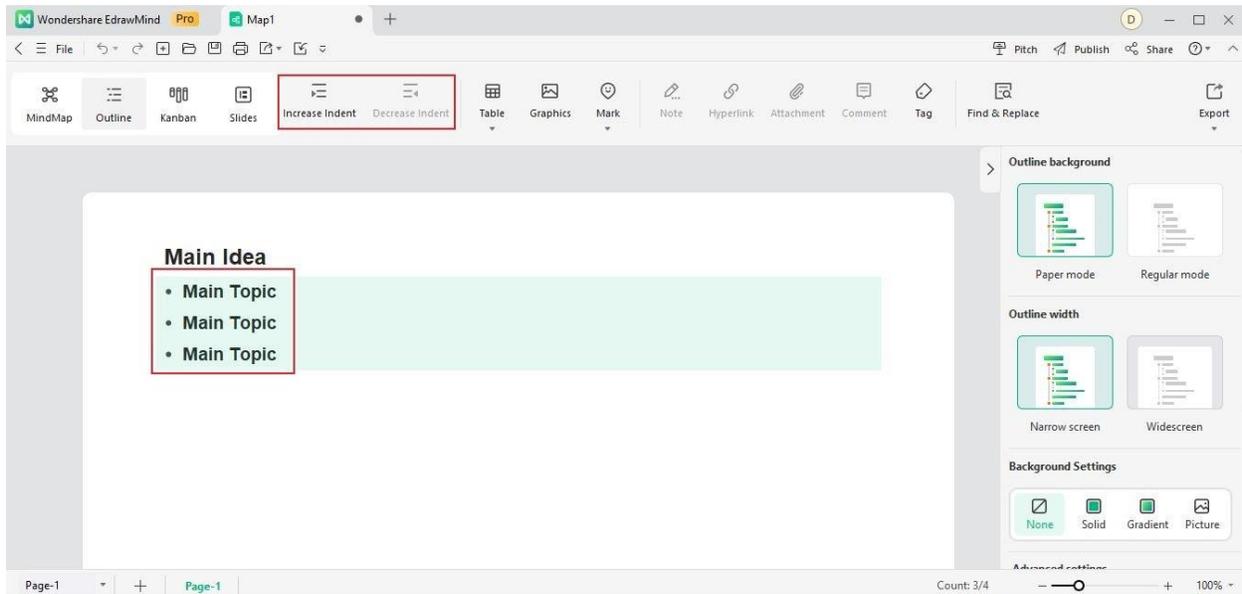

02 Basic Editing

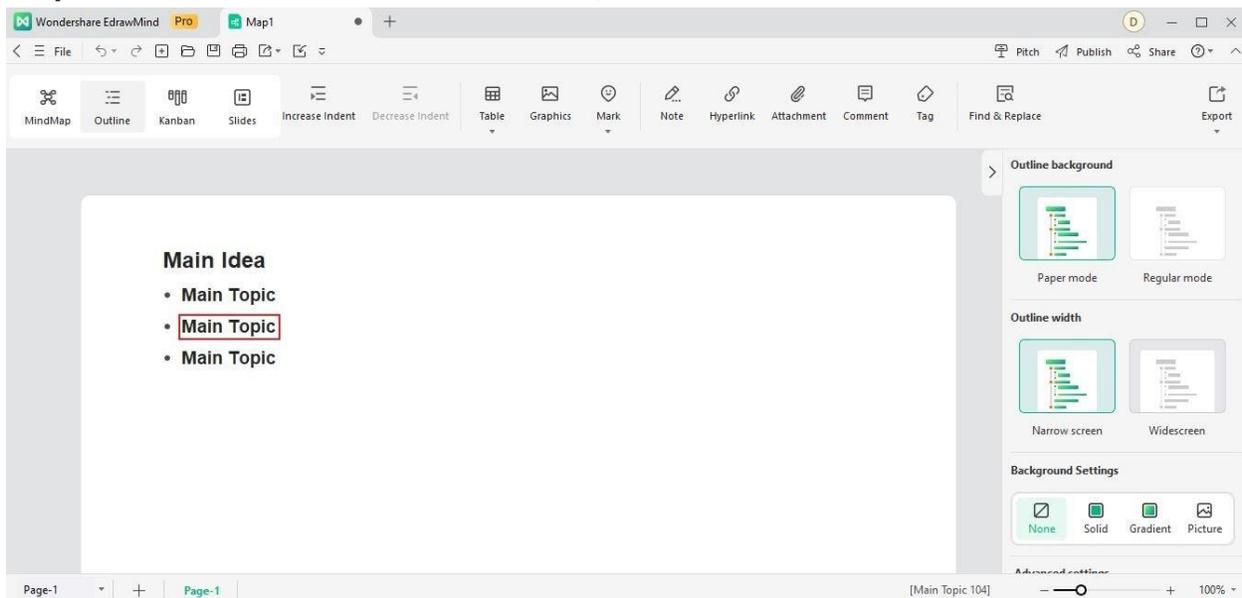

Modifying your outline is straightforward by using the tools in the upper toolbar. Read the guide below to perform basic editing under the Outline mode.

Under the Outline mode, you can enhance organizational efficiency with the platform's editing features. Seamlessly adjust the structure of your content for a more refined visual representation. Here's how.

Step1 Use the top toolbar on your main window under the Outline mode. Click any outline and choose between Increase Indent or Decrease Indent, depending on your needs.

Step2 To edit text under the Outline mode, click text.

03 Change Settings

Incorporate style into your visualizations using EdrawMind's Background Settings section. Customize your outline background and width, and explore the advanced options below. Here's how.

Step1 On the right-side panel, choose between Paper mode and Regular mode for the outline background. Click the background that best suits your preferences.

Step2 Click None, Solid, Gradient, or insert your custom background with Picture to further personalize the background.

Step3 Select your Outline width by clicking Narrow screen or Widescreen.

Step4 In Advanced settings, check Paper transparent to set the transparency of your paper.

The screenshot displays the Wondershare EdrawMind Pro software interface. The main workspace shows a mind map with a central node labeled "Main Idea" and three sub-nodes, each labeled "Main Topic". The right-side panel is open, showing the "Outline background" settings. This panel includes options for "Outline background" (Paper mode and Regular mode), "Outline width" (Narrow screen and Widescreen), "Background Settings" (None, Solid, Gradient, Picture), and "Advanced settings" (Paper transparent, which is checked). The software's top toolbar and bottom status bar are also visible.

Insert Elements

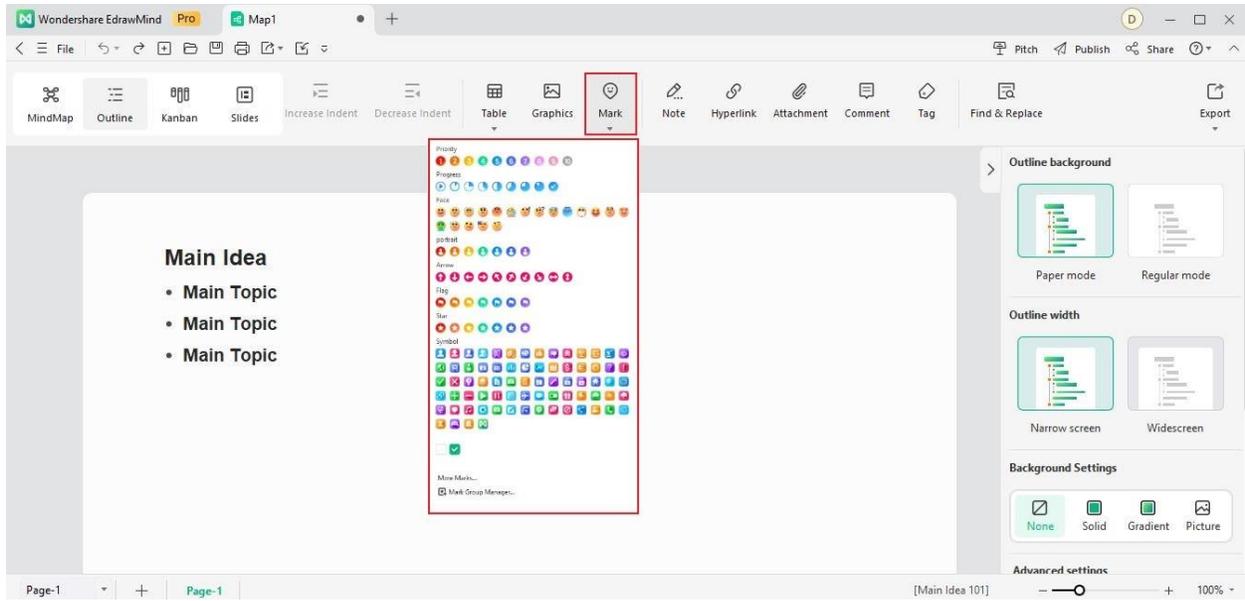

Within the Outline mode, you can enrich your content with Graphics, Table, Marks, Notes, Hyperlinks, Attachments, Comments, and Tags. These elements help you create a comprehensive, interactive visual representation tailored to your unique ideas and concepts. Here's how to do it.

Step 1 Navigate to Outline and access the top toolbar to use elements.

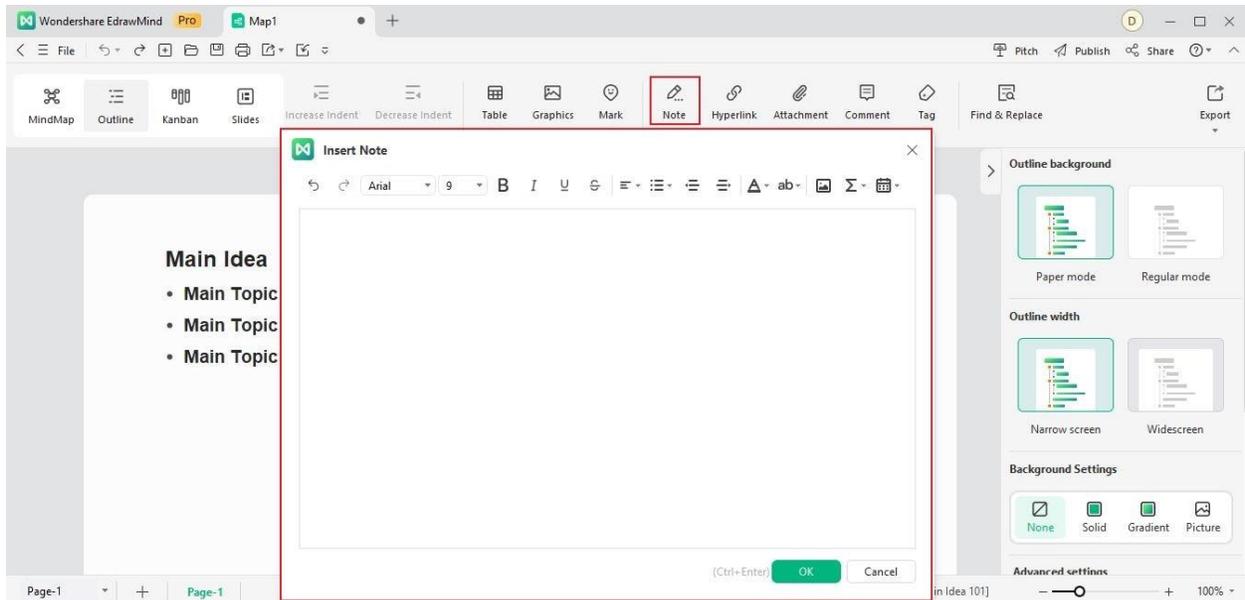

Step 2 Choose from various options to insert into your project.

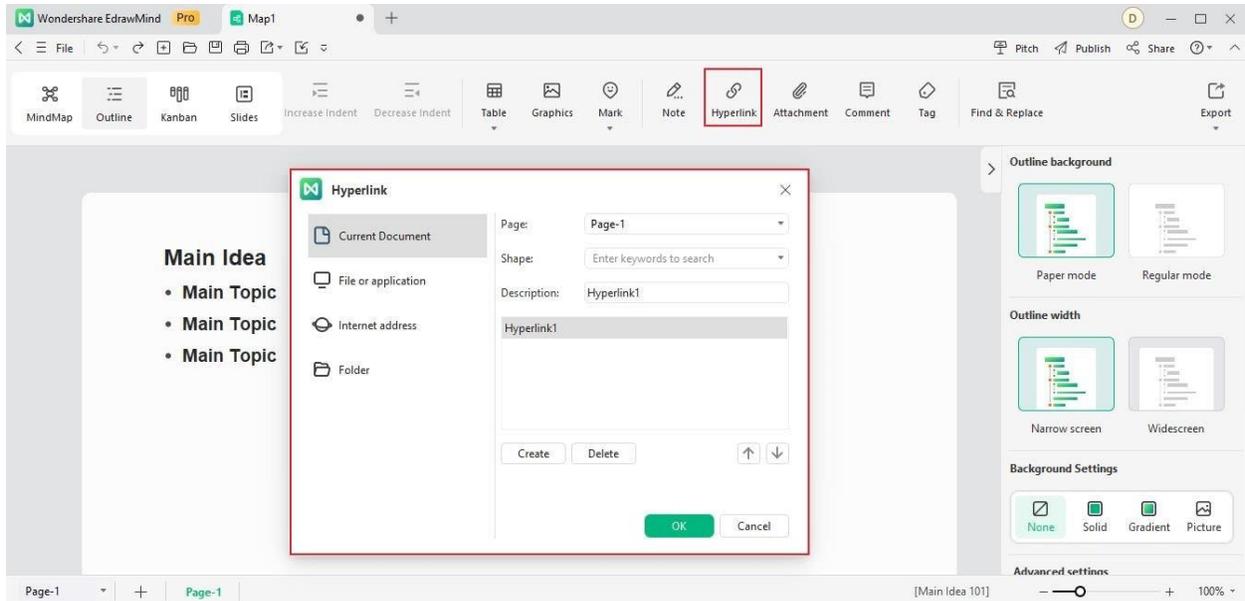

- Click any part of the outline. Then click Graphics or press **Ctrl + Shift + P** to insert a Picture to a selected topic.
- Click on Mark to insert a mark on a selected topic.
- Click on Table to customize and add a table to the outline.

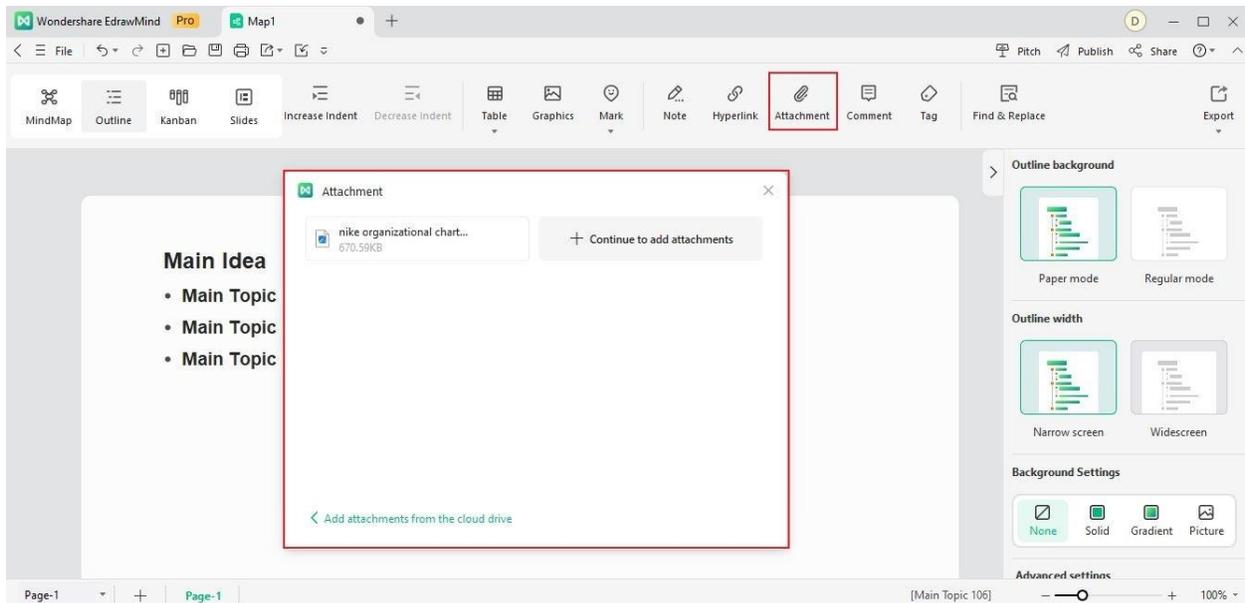

Click Note or press Ctrl + T to insert a note to the selected topic.

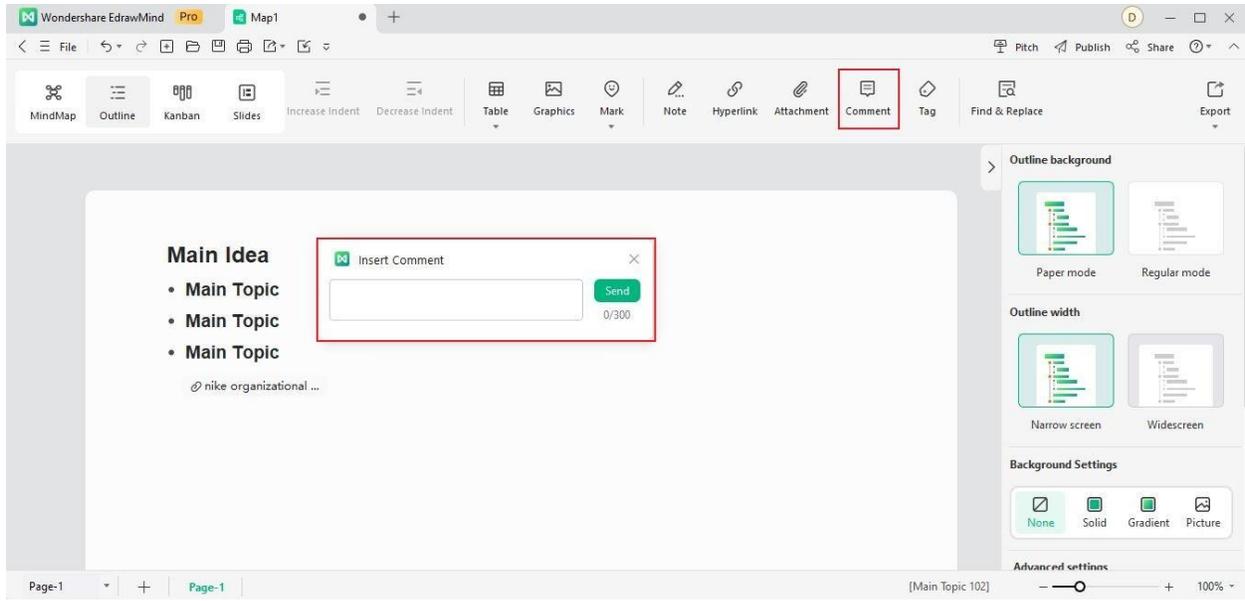

Click Hyperlink or press Ctrl + K to insert a hyperlink to the selected topic.

Click Attachment or press Ctrl + H to insert an attachment to a selected topic.

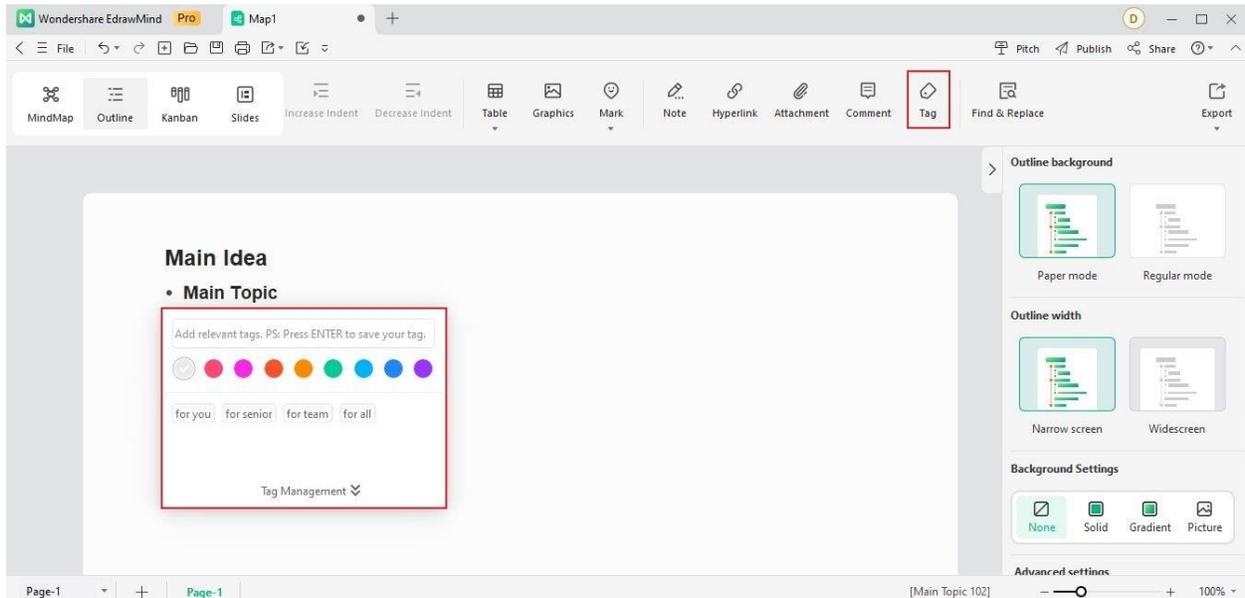

Click Comment or press Ctrl + Shift + T to insert a comment to the selected topic.

Note:
Comments can be up to 300 characters.

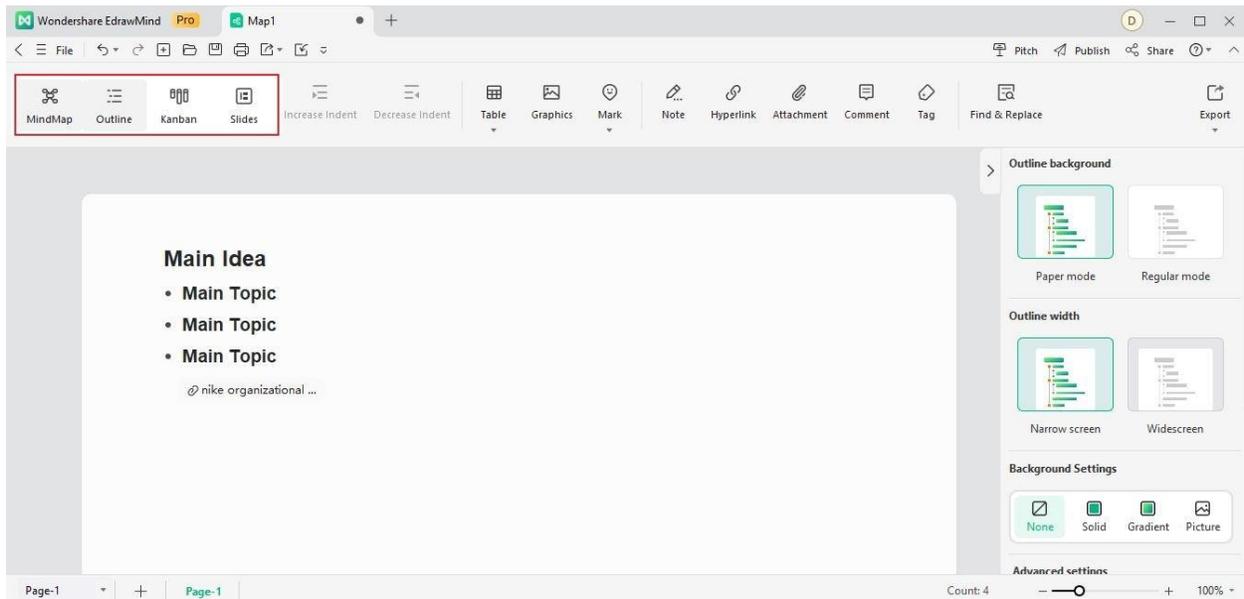

Go to Tag > Tag Manager to insert a tag on a selected topic.

Switch Mode

Transition your creative process with EdrawMind's Switch Mode functionality. Return to the mind map mode or go to Kanban and Slides from Outline mode , ensuring fluid navigation between different visual representations and optimizing your workflow. Follow this simple step below.

On the top-left corner of the Outline mode, click MindMap, Kanban, or Slides. Immediately, the interface will be switched from the Outline to the selected mode.

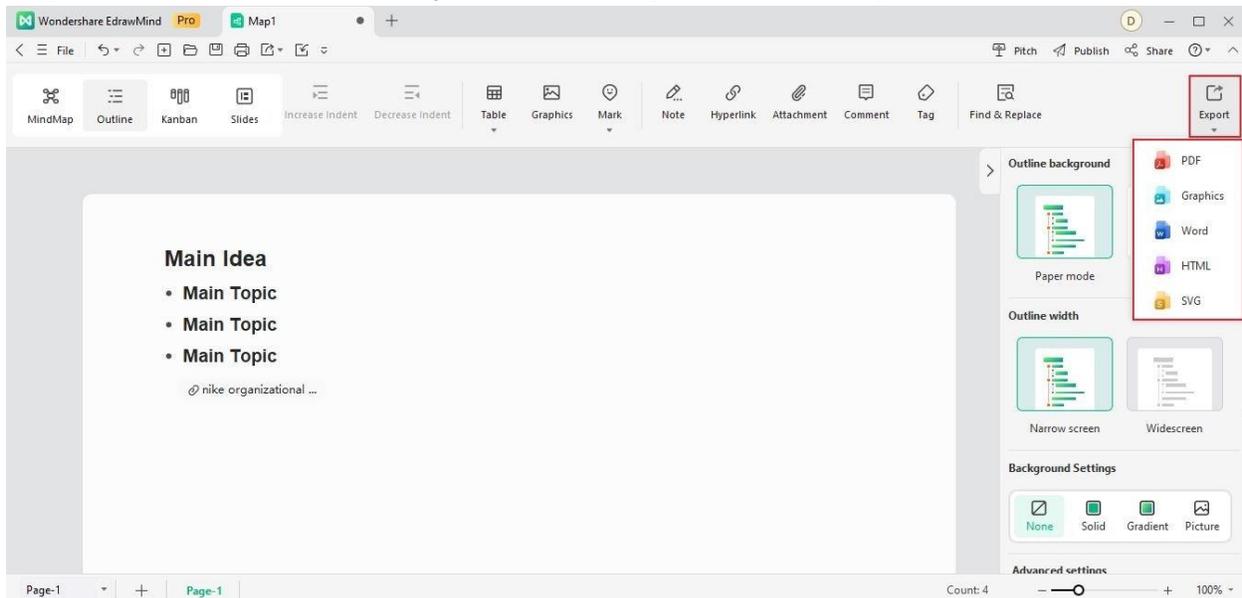

Export Outline

Share your mind maps in various formats with the Export feature. Convert your mind maps into various formats, enabling seamless communication and collaboration with colleagues, friends, or stakeholders. Here's how.

Step1 Click the Export button at the top-right toolbar.

Step2 Choose between different file formats such as PDF, Graphics, Word, HTML, and SVG.

Step3 Choose a save file directory and click on Export to finish the process.

Presentation

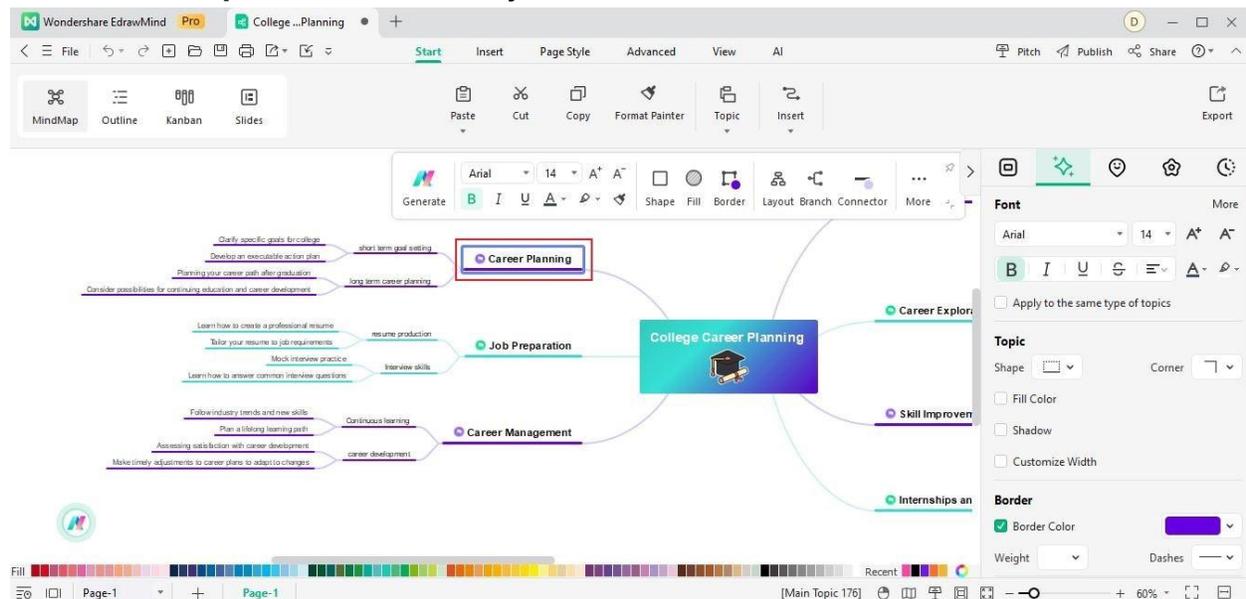

Add/Name/Adjust Order (Slides)

In this section, learn how to effortlessly add, name, and adjust the order of slides. Learning these simple tricks can enhance the flow and organization of your presentations. Discover intuitive techniques and features that will elevate your mind-mapping experience to new heights. Let's get started.

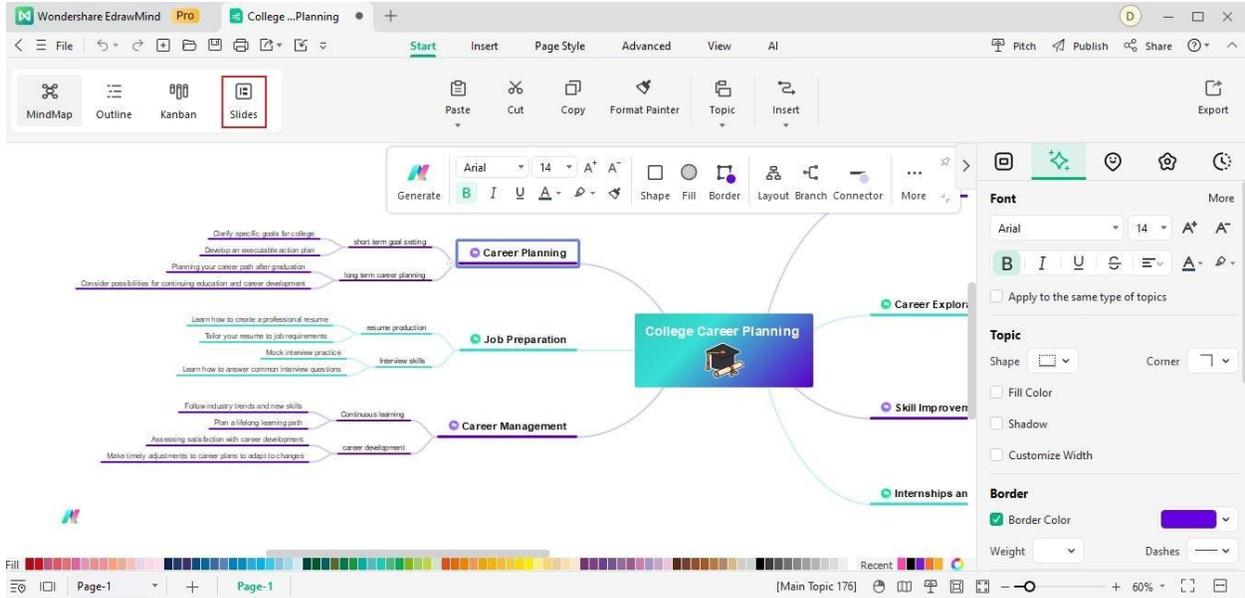

01 Add Slides

In EdrawMind, adding extra slides for your mind map only needs two clicks. Here's how:

Step 1 Click a topic for which you want to add a slide, with at least one subtopic. Then, the selected topic will be marked by the blue case.

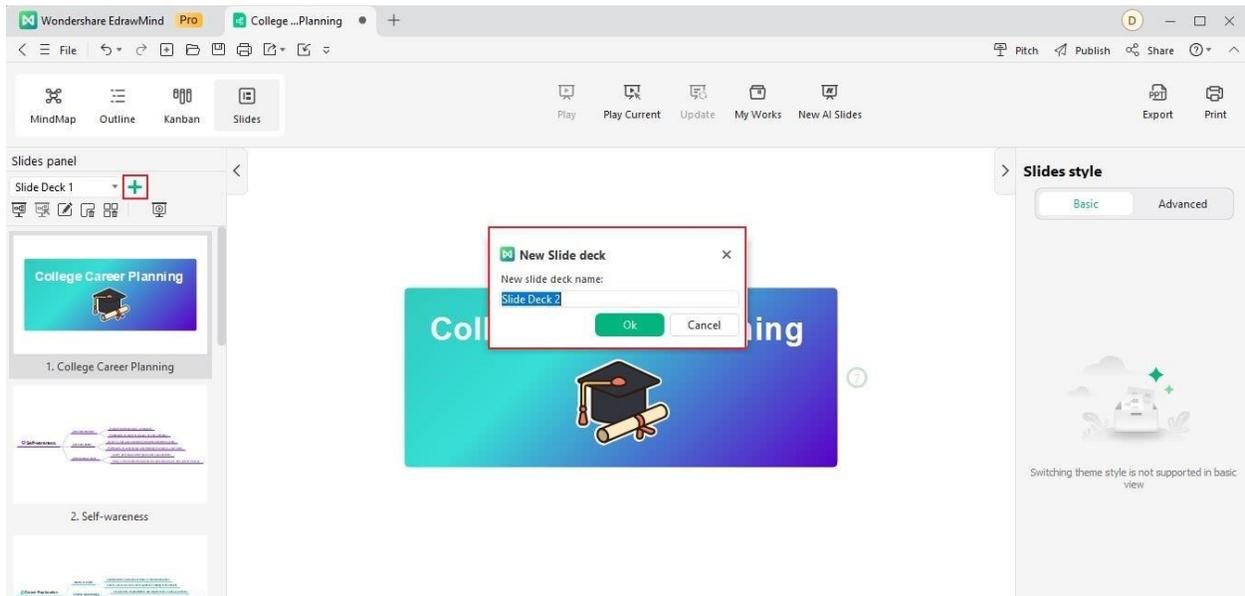

Step 2 Click Slides to add a new slide. After that a page appears where you can choose the presentation mode. Click generate basic slides version. You can also generate AI slides or convert current files to slides. After that, the selected topic will appear on the preview deck.

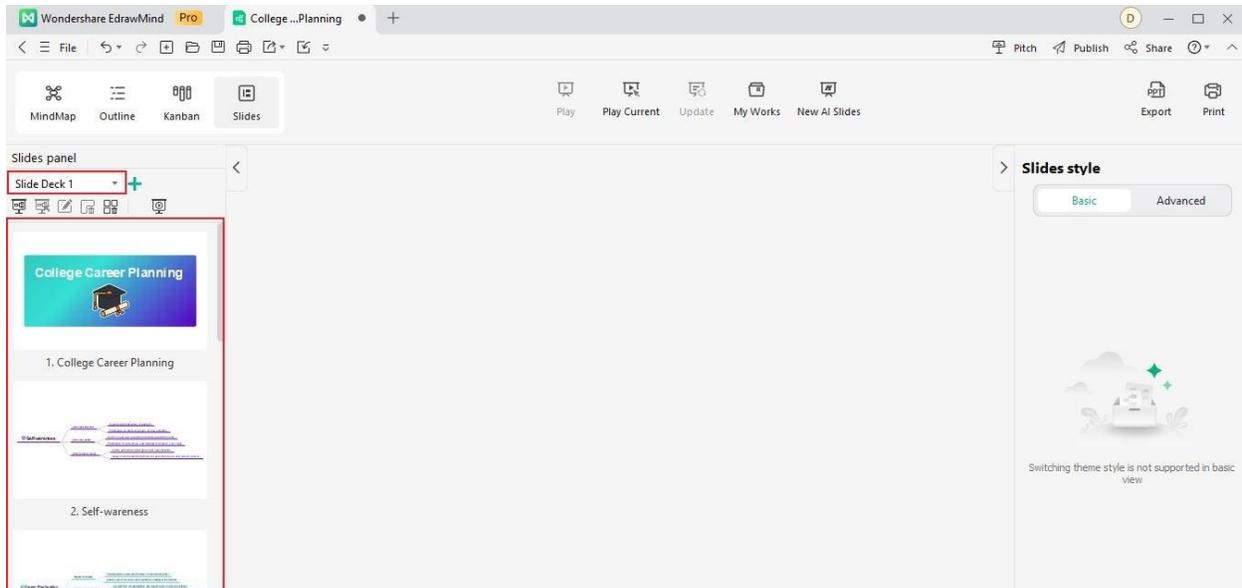

02 Add Slide Deck

Click the “+” icon near to generate a new slide deck. Name it in the pop-up window.

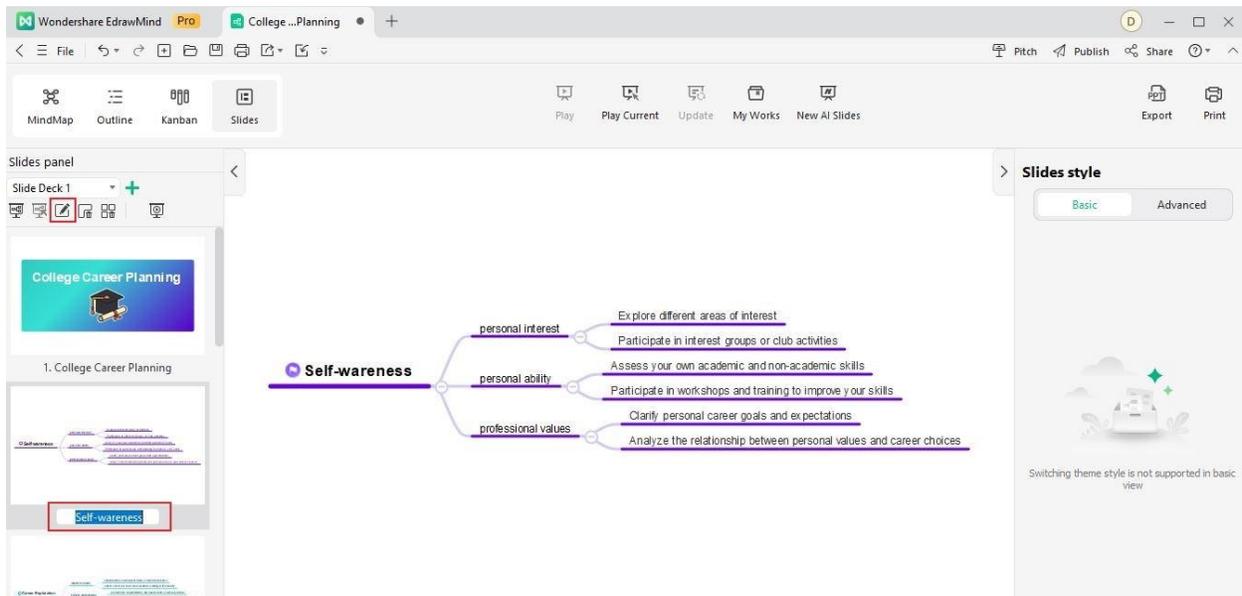

Step2 To edit text under the Outline mode, click text.

03 Name Slides

You can assign a specific name to each slide to identify the topics in your presentation.

- **Right-click on a slide and click Rename to rename it.**
- **Alternatively, you can double-click on the name below each slide to rename them individually.**

04 Reorder Slides

To reorder your presentation slides, you have two options:

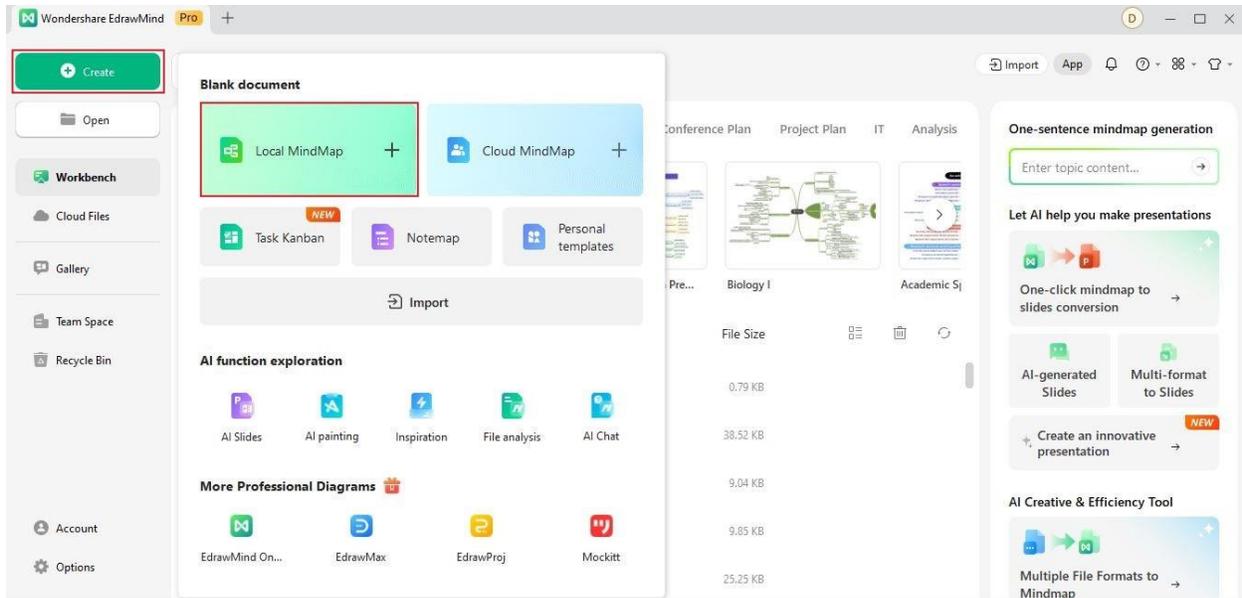

- Use the drag and drop function to slide thumbnails within the Preview Slideshow pane to reorder them as desired.
- Alternatively, right-click on a slide thumbnail. Click the Move Up or Move Down option to adjust the slide's position in the sequence.

The screenshot displays the Wondershare EdrawMind Pro software interface. The main workspace shows a mind map titled "Self-awareness" with three main branches: "personal interest", "personal ability", and "professional values". Each branch has associated sub-branches with text descriptions. A context menu is open over the "Self-awareness" node, listing options: "Start slideshow from current slide", "Move Up", "Move Down", "Rename", "Delete the Selected Slide", and "Delete the Entire Slideshow". The "Move Up" and "Move Down" options are highlighted with a red box. On the left, the "Slides panel" shows a slide deck with a thumbnail for "College Career Planning" and a list of slides including "1. College Career Planning" and "Self-awareness". On the right, the "Slides style" panel shows "Basic" and "Advanced" style options, with a note that switching theme style is not supported in basic view.

Create Slides

Creating slides with EdrawMind allows you to elevate your communication skills. It can also leave a lasting impact on your audience. Here's how to create a slideshow with EdrawMind in simple steps:

Step 1 Launch EdrawMind on your computer. On the main window, click **Create > Local MindMap**.

Step 2 Click Slides on the right side of outline. Go to **Convert to Slides**. Wait for EdrawMind to generate slides automatically.

- The **Preview Slideshow** navigation pane will appear and show the created slides on the left of your screen.
- You can also view the slides manually by clicking them.

Edit Slides

Welcome to the Editing Slides section of EdrawMind.

You can create slides for your mind map from the Slides and manage them from View tab. Each slide can showcase branches or sub-branches of the map. The slides can be expanded or collapsed based on your requirements. This convenient feature allows you to concentrate on a specific map section. To edit your slides, follow the steps below.

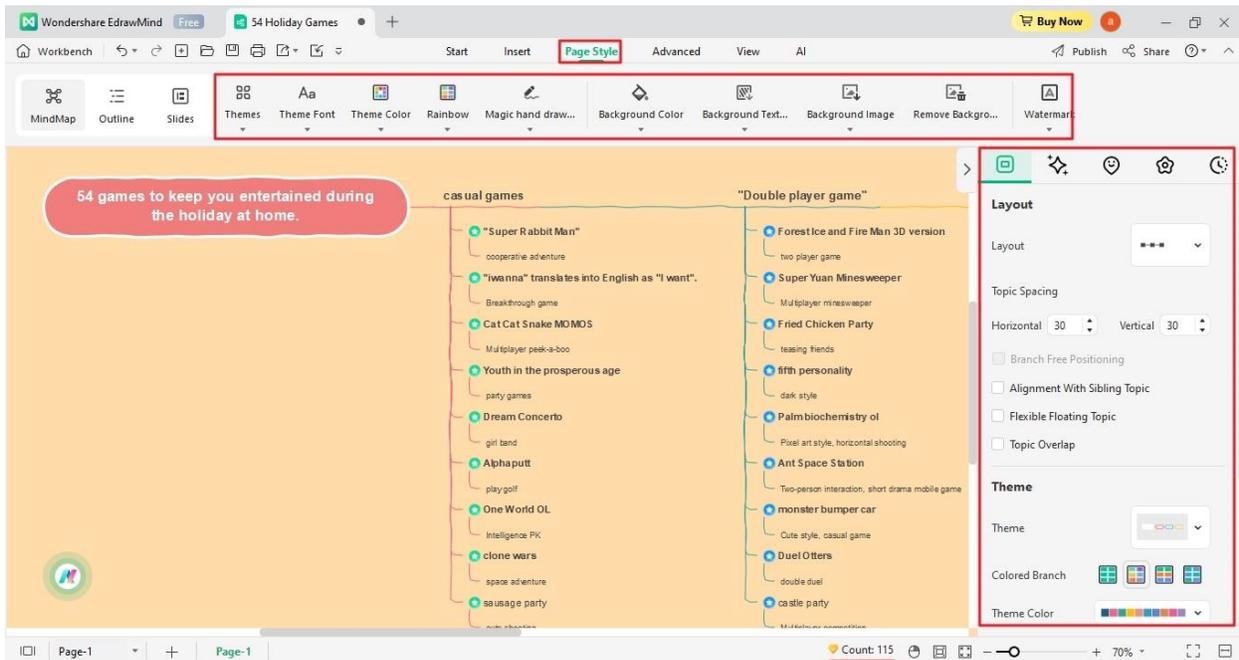

Step 1 Go to the MindMap button, double-click on any topic on your mind map. Input your text, and it will also automatically update on the Preview Slideshow pane.

Step 2 Edit the Layout, Theme, and Background by clicking on the right-side panel. All of the changes on your mind map will also automatically reflect on the Slide Deck.

- Change the Layout and positioning based on your preferences.
- Change the Theme, Colored Branch, Theme Color, and Theme Font under the Page Style option.
- Change the Background Color, Texture, or upload an Image to personalize your mind map's background.

Note:

You can add new slides, rename the current slide or delete the selected slide through the tab bar below the slide deck name.

The screenshot displays the Wondershare EdrawMind interface. The main workspace shows a mind map titled "casual games" with the following branches:

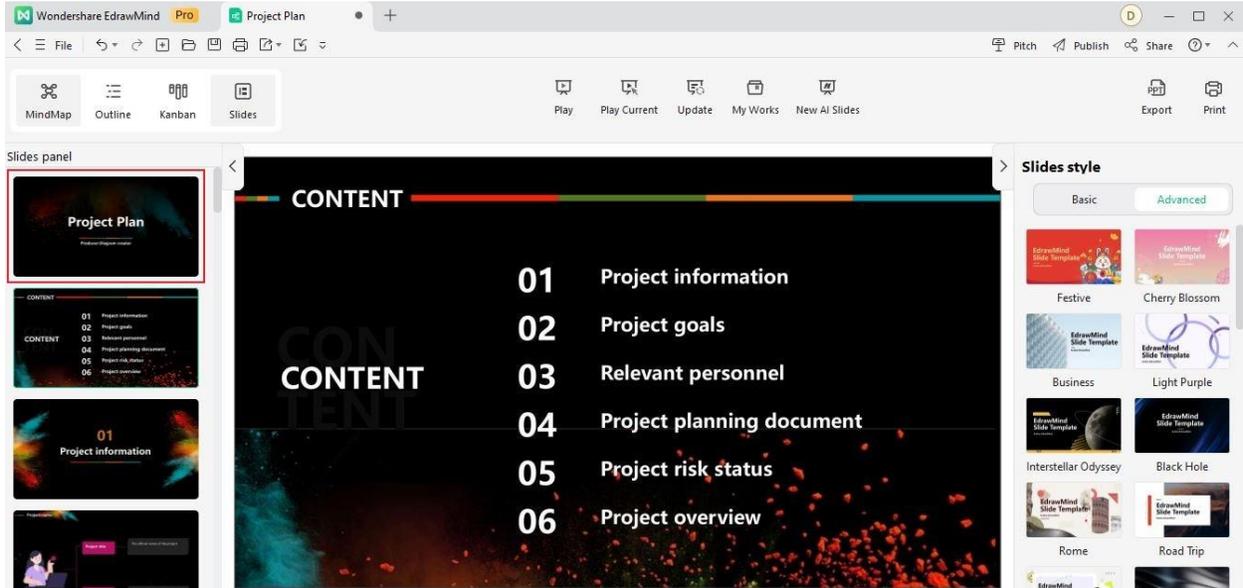

- 1. 54 games to keep you entertained ...
- 2. casual games
 - "Super Rabbit Man"
 - "iwanna" translates into English as "I want".
 - Cat Cat Snake MOMOS
 - Youth in the prosperous age
 - Dream Concerto
 - Alphaputt
 - One World OL
 - clone wars
 - sausage party
- 3. "Double player game"

The interface includes a top toolbar with buttons for "Play", "Play Current", "Update", "My Works", and "New AI Slides". On the left, the "Slides panel" shows a tab bar with icons for adding, editing, deleting, and refreshing slides.

Slides Preview

Before finishing your slides, you could choose to preview them at first. Here's how.

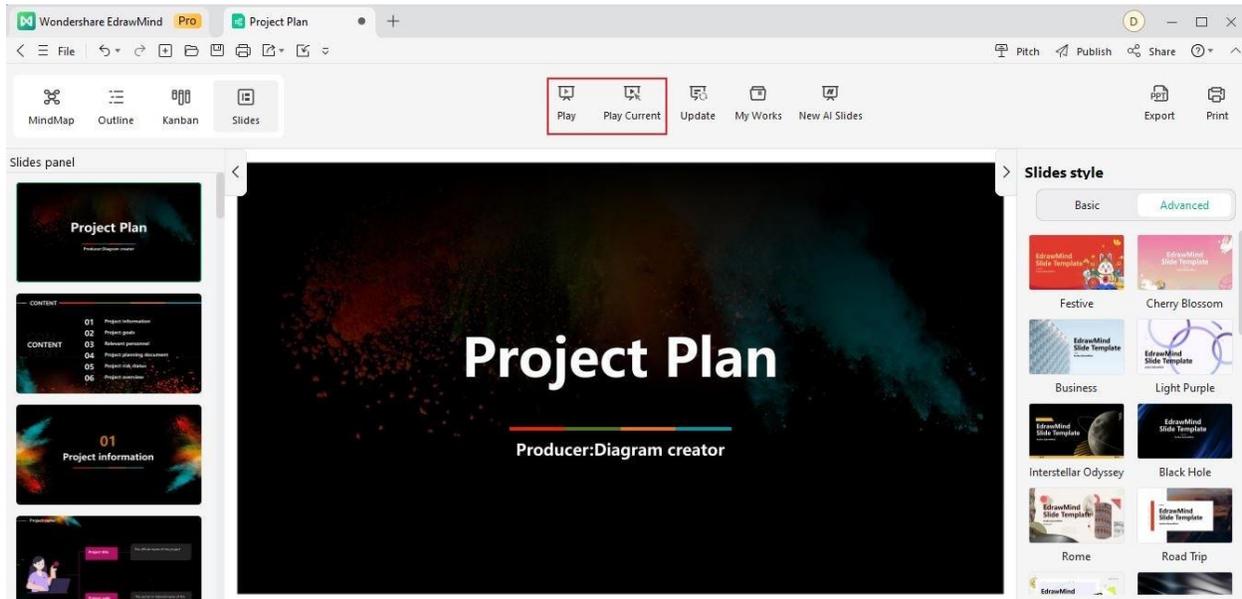

Click a thumbnail on the left-side panel and the corresponding slide will be displayed.

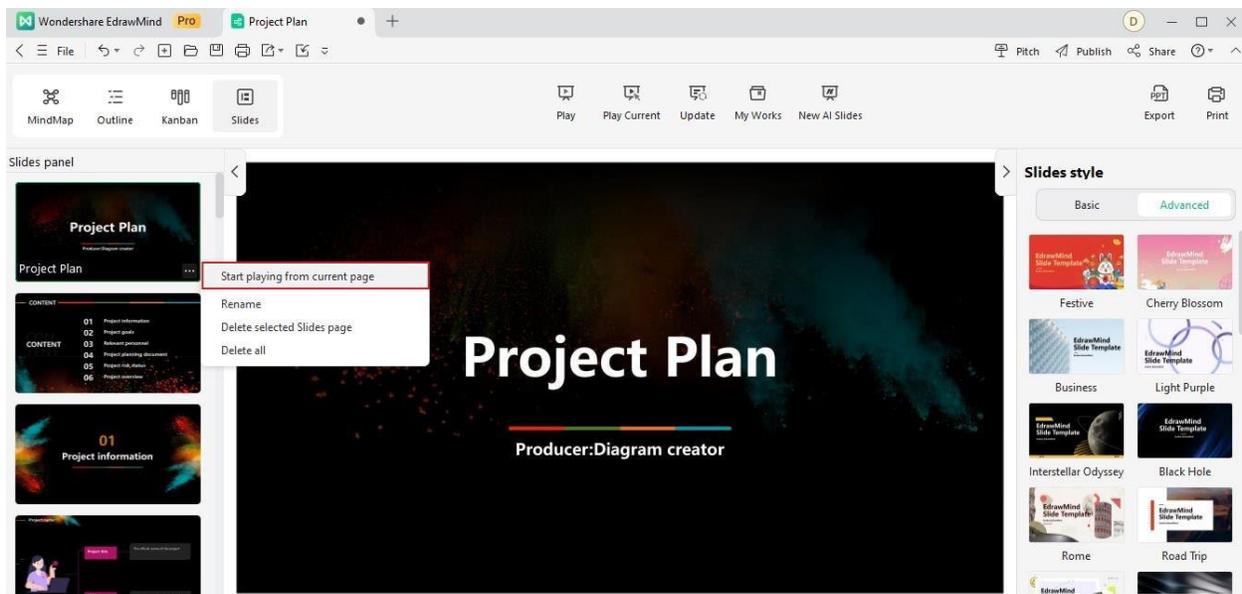

Start Slideshow (Start/Show Interface/Exit Slide Mode)

After finishing a slideshow, you can choose to play it within EdrawMind. Here's how.

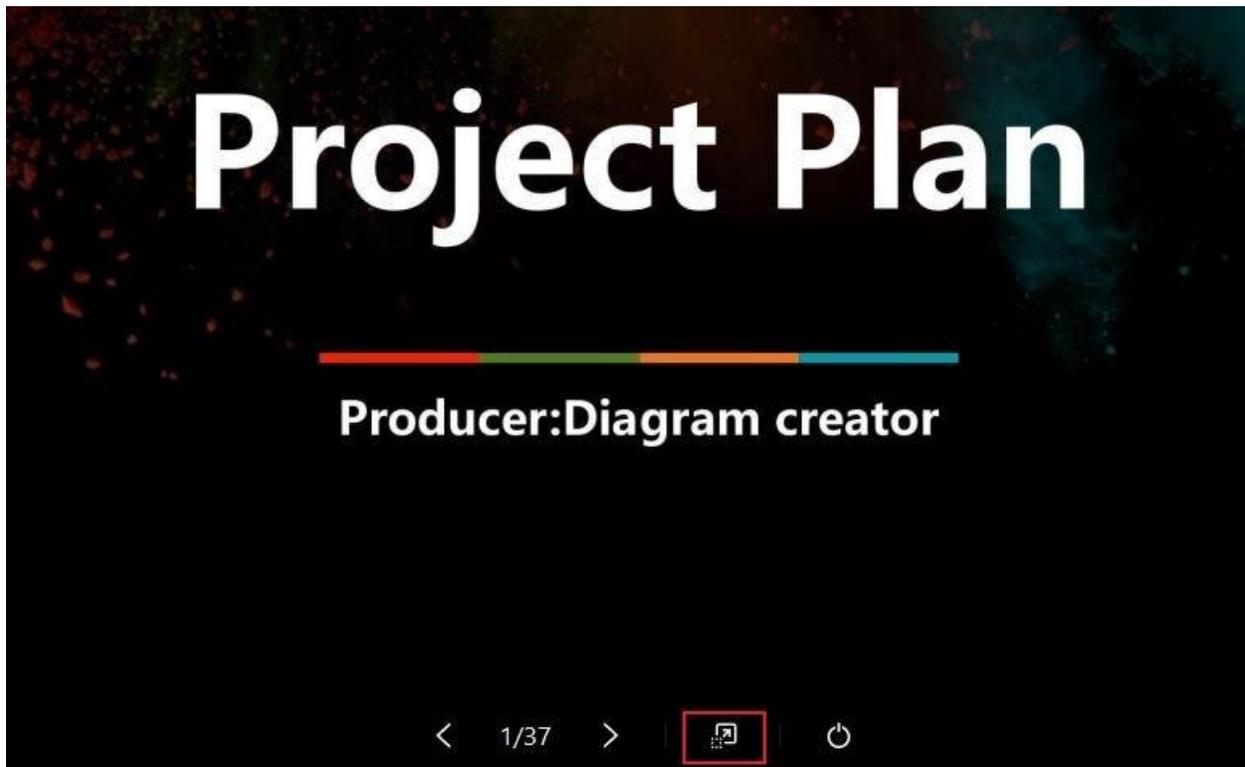

Click **Play Current** or **Play** on the top navigation bar to start the slideshow.

Alternatively, you can right-click a thumbnail of a slide and then choose **Start playing from current page**.

When the slideshow is being played, you can click Expand icon at the bottom to show the thumbnails of slides.

Click thumbnails or the arrows on the two ends to switch slides. Click the Indentation icon to hide the thumbnails of slides.

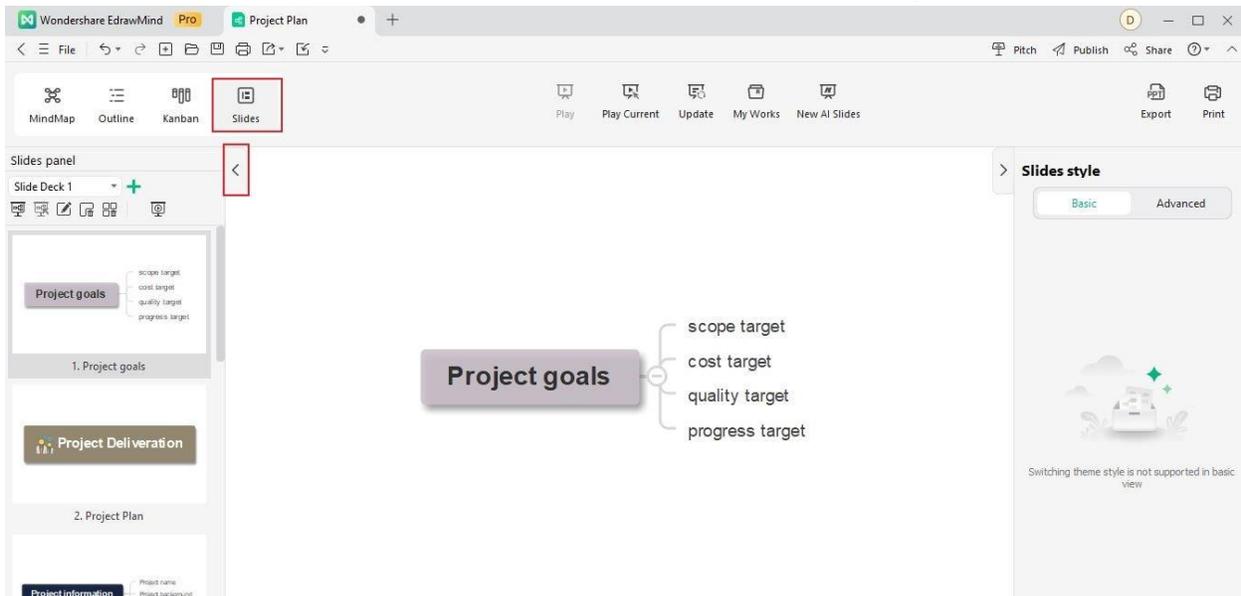

To exit the slideshow, click the Exit icon on the bottom.

Delete Slides

Streamline your slide management by deleting slides. Learn how to remove unwanted slides and fine-tune your mind map presentations. Clear the clutter and ensure a polished outcome. Take control of your content and easily delete slides, creating impactful slideshows that resonate. Here's how.

Step 1 Go to the Slides option to see the preview slideshow panel on the left side of screen or click the Slide Preview button to hide or show the Preview Slideshow panel.

Step 2 Select the desired slideshow page and click the Delete the selected slide button.

- Alternatively, right-click the specific slide and Delete the Selected Slide from the pop-up window.
- If you want to delete all slides, click the Delete the entire slideshow button at the right of the Delete the selected slide button from the Preview Slides panel.

Export/Print Slides

Elevate your presentations beyond the screen. Discover seamless options to export and print your mind map slides, ensuring your ideas come to life on paper or in digital formats. Share your brilliance with the world and leave a lasting impression every step of the way. Here's how.

01 Exporting Slides

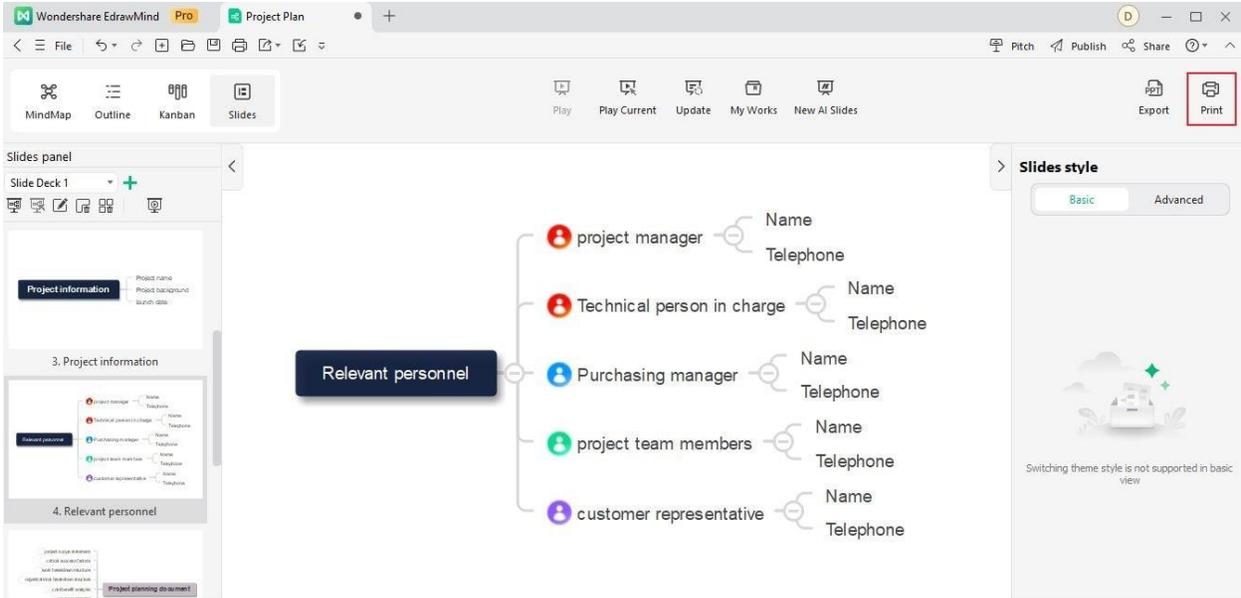

To export your PPT generated with EdrawMind, click Export button on the top-right corner. Then follow the settings like choosing export mode, file location, name the document, etc.

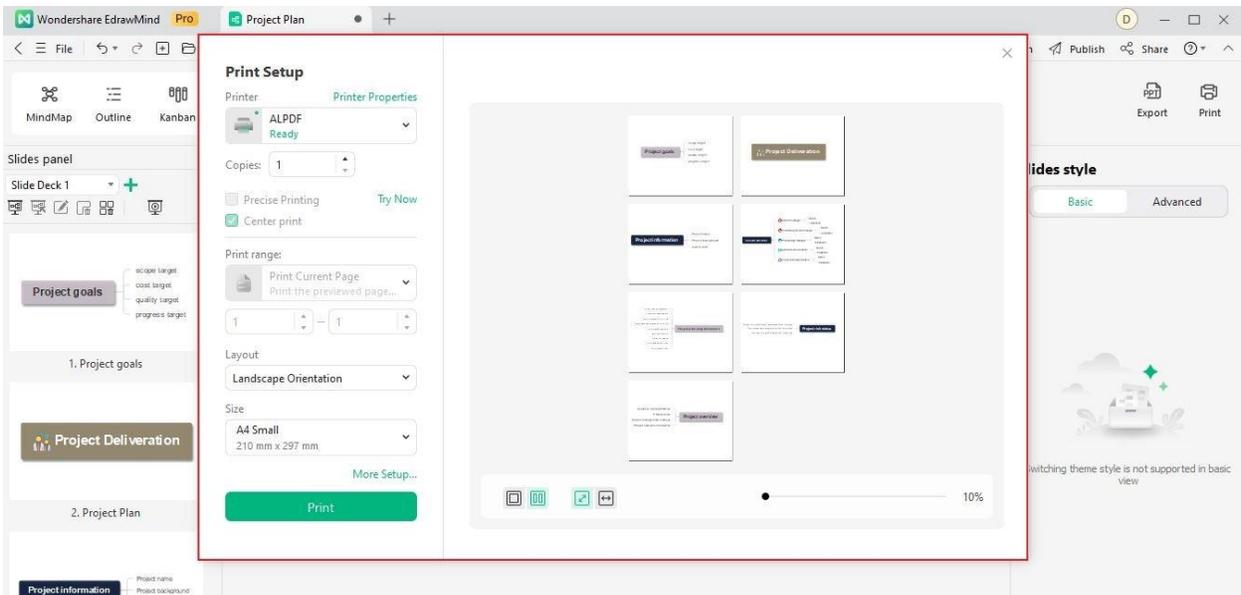

02 Printing Slides

The steps of printing your slides are also very easy. Here's how:

Step 1 Click Print button on the right-side of Export button after adjusting your slides.

Step 2 In the Print window, adjust the Copies number and Settings, and choose Printer, Size, and Layout. You can also preview print results on the right side.

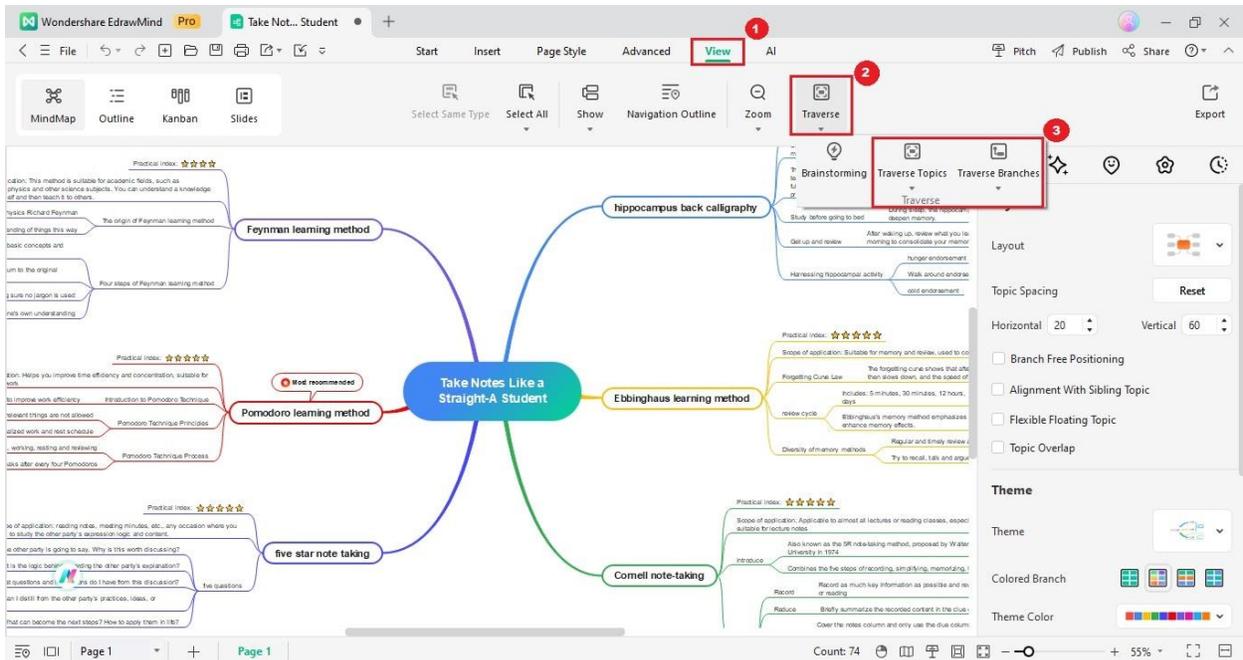

Traverse Your Mind Map

The Traverse feature enables focused presentations of maps, emphasizing specific topics or branches. This feature allows you to explore an alternative way to present your mind map. Discover a dynamic and engaging method of showcasing your ideas, offering a unique perspective to captivate your audience. Here's how.

Step 1 Go to View tab where you will find the traverse option. Choose Traverse Topics or Traverse Branches from the drop-down.

- Alternatively, press F5 to enter Traverse Topics quickly.
- Alternatively, press Shift + F5 to enter Traverse Branches.

Step 2 When Traversing, you can press the arrow keys on the keyboard to display the map content by topic or branch.

Brainstorming Mode

Brainstorming Mode

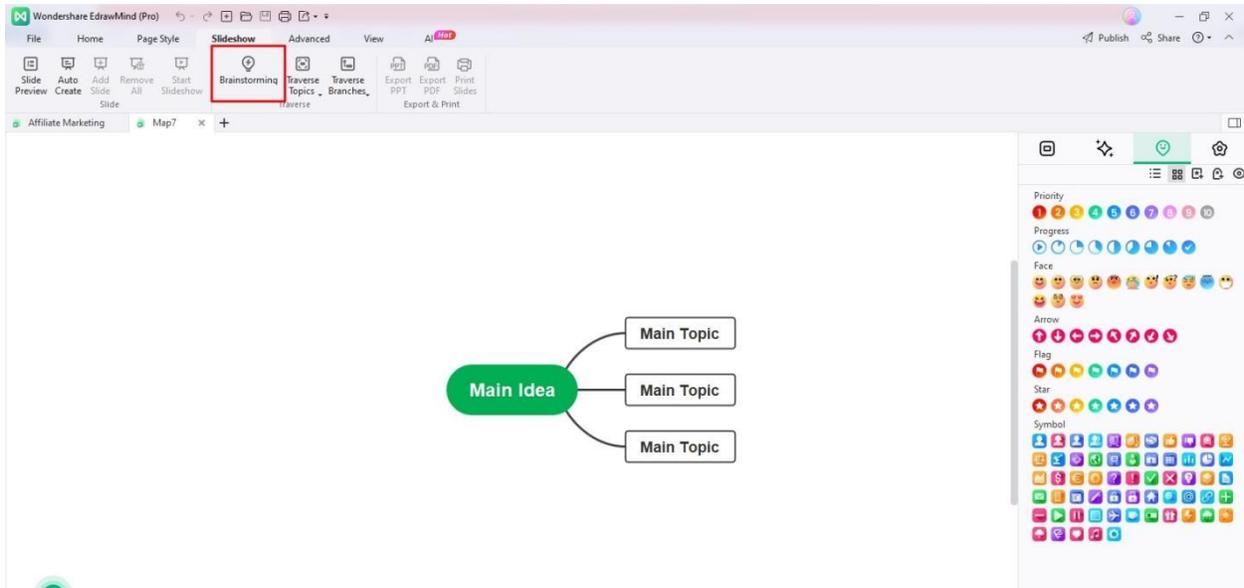

Brainstorming is a problem-solving approach by generating new ideas, topics, and solutions. The process begins with a defined objective to achieve or problem to solve followed by exploring all the possible angles. In the professional world of collaborative work, team members brainstorm ideas and topics without any judgment. These brainstormed ideas are transformed into a mind map after proper analysis and discussion.

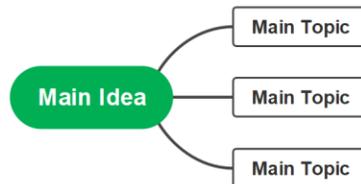

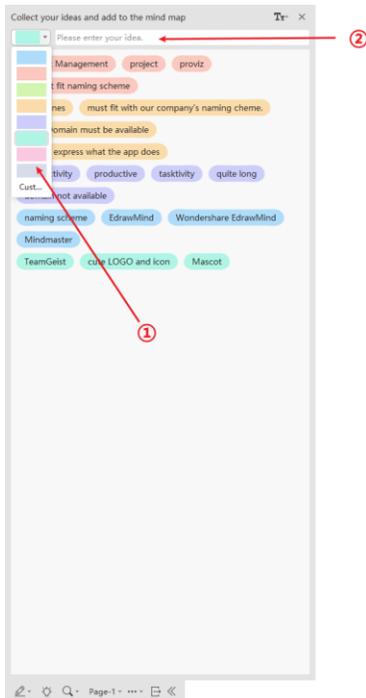

EdrawMind offers an excellent brainstorming mode where you can brainstorm ideas collaboratively, group the topics distinctively, analyze the ideas thoroughly, and transform them into a mind map structure instantly. You can collect random ideas, group them as per priority, and connect them. You can even use a timer to conduct the brainstorming session within time limits. Here is a step-by-step guide on how to open and use brainstorming mode.

Open and Use Brainstorming Mode

Step1 Click the Brainstorming option under the View tab to open brainstorming mode and enter full-screen mode. Alternatively, you can press the F8 key to open brainstorming mode instantly.

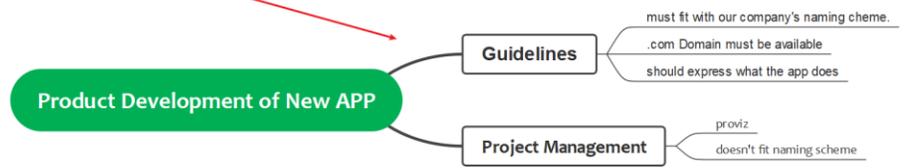

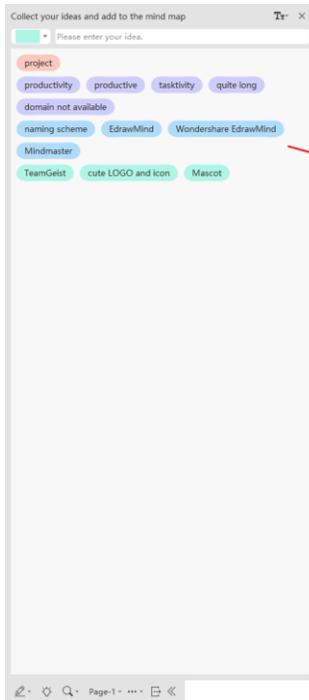

Step2 Click Select Group option from the upper left corner. Select a color for the ideas that belong to a particular group. Type in the ideas one by one and press the Enter key to collect them.

If you want to delete any collected idea, select the idea and press the Del key.

Step 3 Once you have collected all the ideas, drag and drop them into the existing mind map. If an idea is connected to the main topic, drag and drop it directly on the main topic so that it gets mapped as a subtopic automatically.

You can also drop ideas as a floating topic or main topic and connect other ideas as subtopics accordingly.

Draw Traces

Organizing the collected ideas properly in a mind map through analysis and discussion is a crucial step in a brainstorming session. EdrawMind offers an amazing set of tools to draw traces to illustrate, highlight, and connect ideas. These tools are essential for group discussion and judgment on the collected ideas, and organizing them properly in the mind map. Here are the tools and the steps to draw traces in a mind map in EdrawMind.

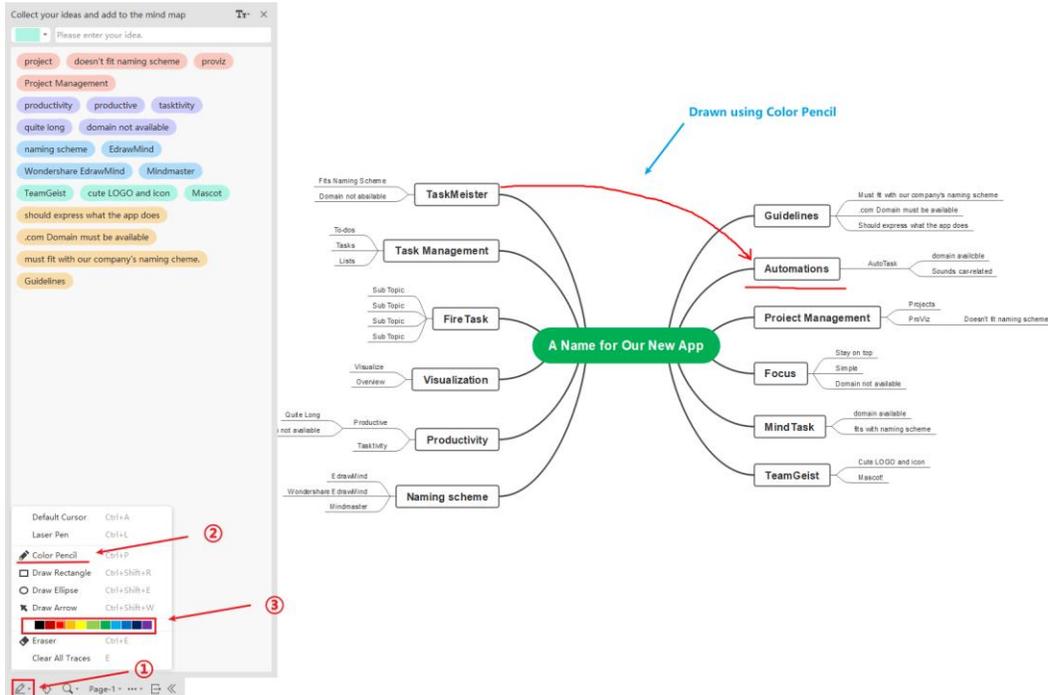

01 Color Pencil

Use the color pencil for freehand drawing and writing on the document to make your point to the team members. You can use choose different colors to highlight different ideas and points you want to make on the document. Here are the steps to follow.

Step1Click Drawing Trace option located at the bottom-left corner.

Step2Click Color Pencil option from the Drawing Trace menu.

Step3Select a specific color for the color pencil. The default color is red. Now, draw anything on the document as per your requirements.

02 Draw Shapes

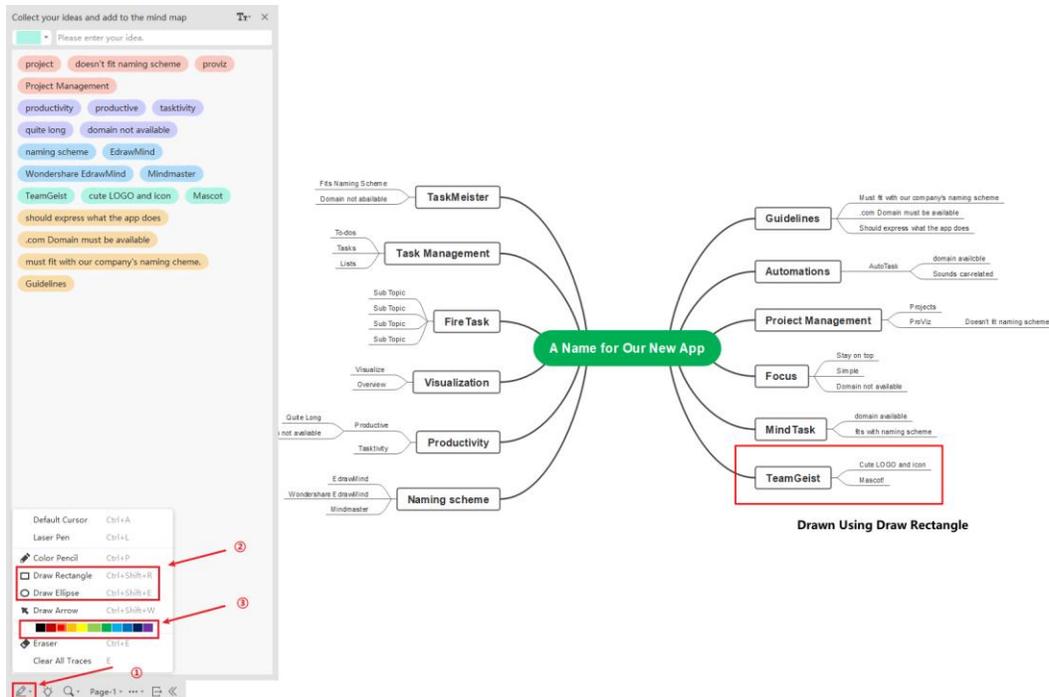

EdrawMind offers the two most used shapes to draw on your document for grouping ideas and highlighting them properly. You will find Rectangle and Ellipse shapes and

you can choose a specific color of the outline of the shapes. Here are the steps to follow.

Step1Click Drawing Trace option located at the bottom-left corner.

Step2Click Draw Rectangle option from the Drawing Trace menu. Alternatively, you can select Draw Ellipse option as needed.

Step3Select a specific color for the selected shape. The default color is red. Now, draw the shapes on the document.

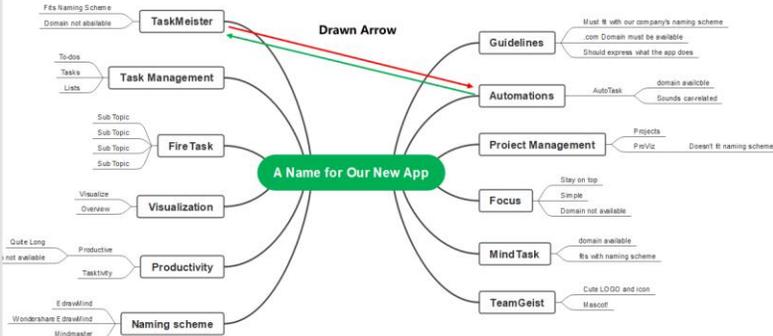

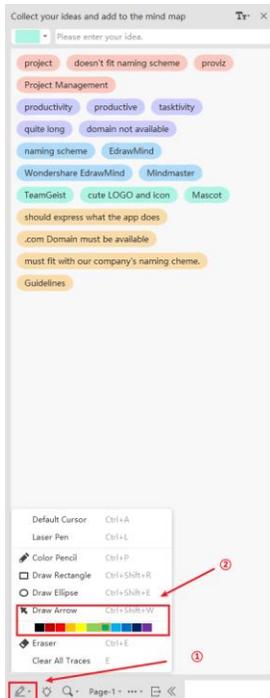

03 Draw Arrow

Use arrows to connect different ideas and show the flow of ideas in a mind map. You can connect the floating ideas with the main topic manually. Similarly, if you have multiple main topics, you can connect them to show the order of execution of the ideas required. You can use different colors for arrows you draw on the document. Here are the steps to follow.

Step1Click Drawing Trace option located at the bottom-left corner.

Step2Click Draw Arrow option from the Drawing Trace menu.

Step3Choose a specific color for the arrow. The default color is red. Now, draw the arrow on the document.

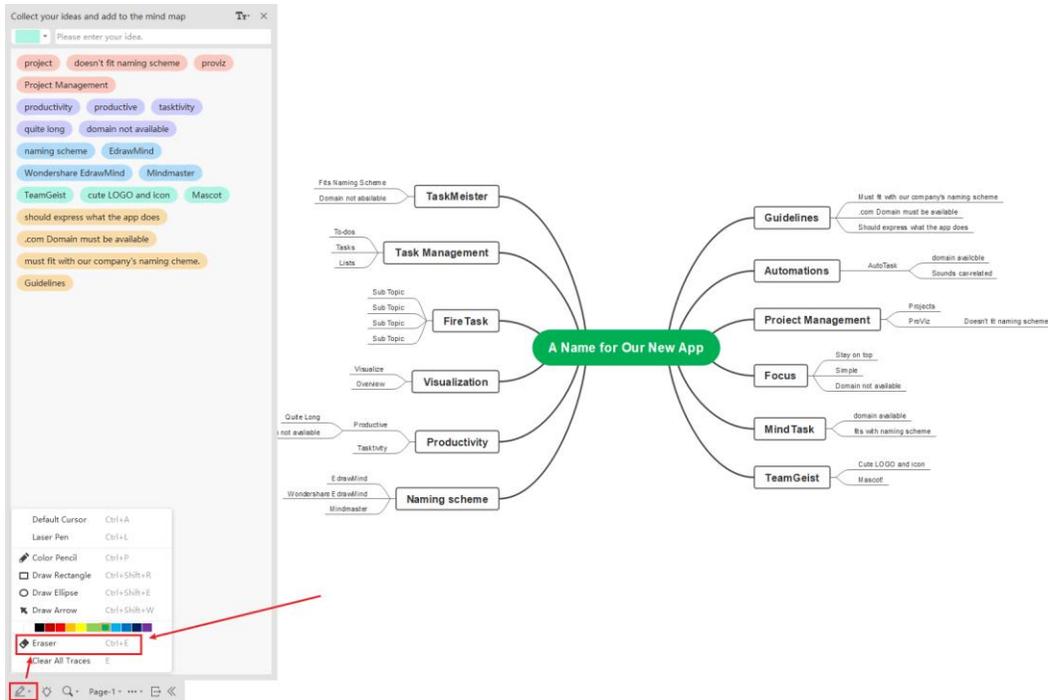

04 Delete Traces

Often professionals draw traces on the document for temporary illustration purposes. These drawings do not always stay in the final document. EdrawMind has options to delete any drawn.

Step1 Click Drawing Trace option located at the bottom-left corner.

Step2 If you want to erase any specific trace, click Eraser option from the Drawing Trace menu. The mouse pointer will change to an erase icon.

Step3 Click on the drawn trace to erase it instantly. You can delete multiple traces by clicking on them one by one.

If you want to erase all the drawn traces, click Clear All Traces option from the Drawing Trace menu. Alternatively, you can press E key to clear all tracks.

Other Settings

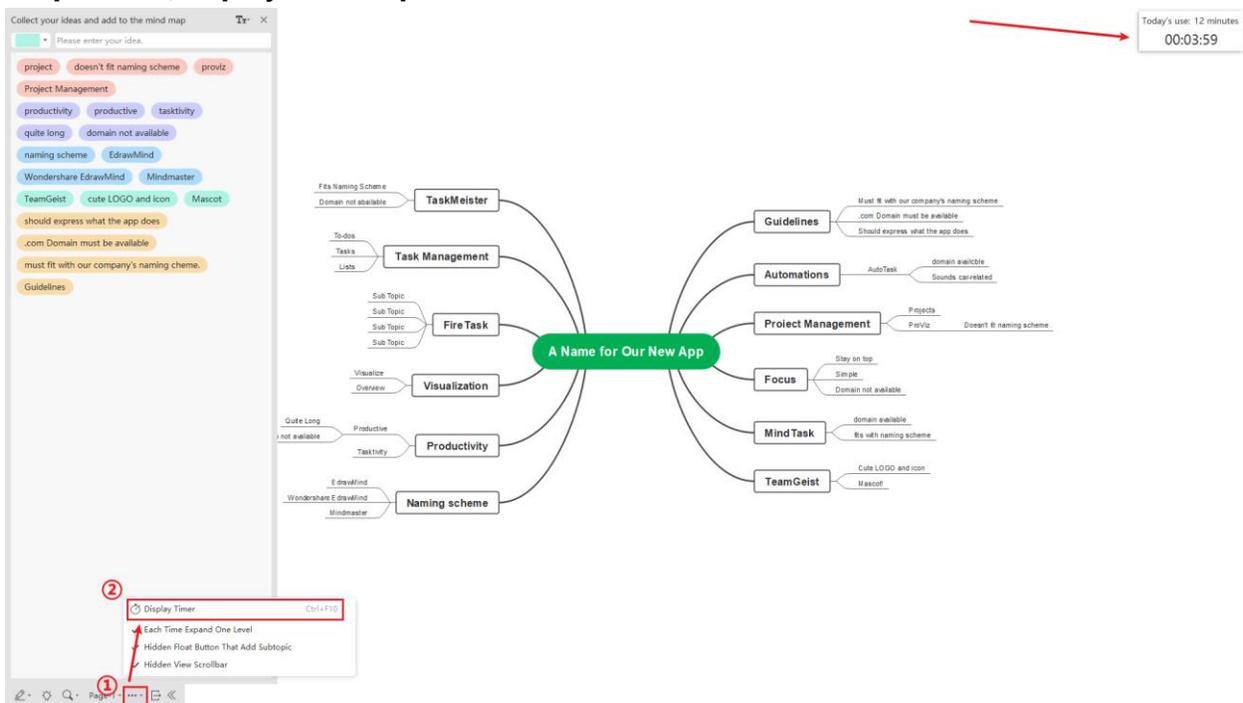

When brainstorming and finalizing the ideas for mind map, flexibility and convenience in the digital workspace are essential. EdrawMind offers a wide range of settings to enhance the brainstorming session and provide more convenience to present and discuss the ideas to create the perfect mind map. Here are all the settings you get in the brainstorming session.

01 Set A Timer

In the professional world, every activity has a time constraint. A brainstorming session should have a time limit so that productivity does not suffer. That is why EdrawMind comes with a time option to set a time limit for the different parts of the brainstorming section. Here are the steps to set a timer for your brainstorming session.

Step1Click More Function option located at the bottom-left corner.

Step2Click ,Display Timer option from the menu.

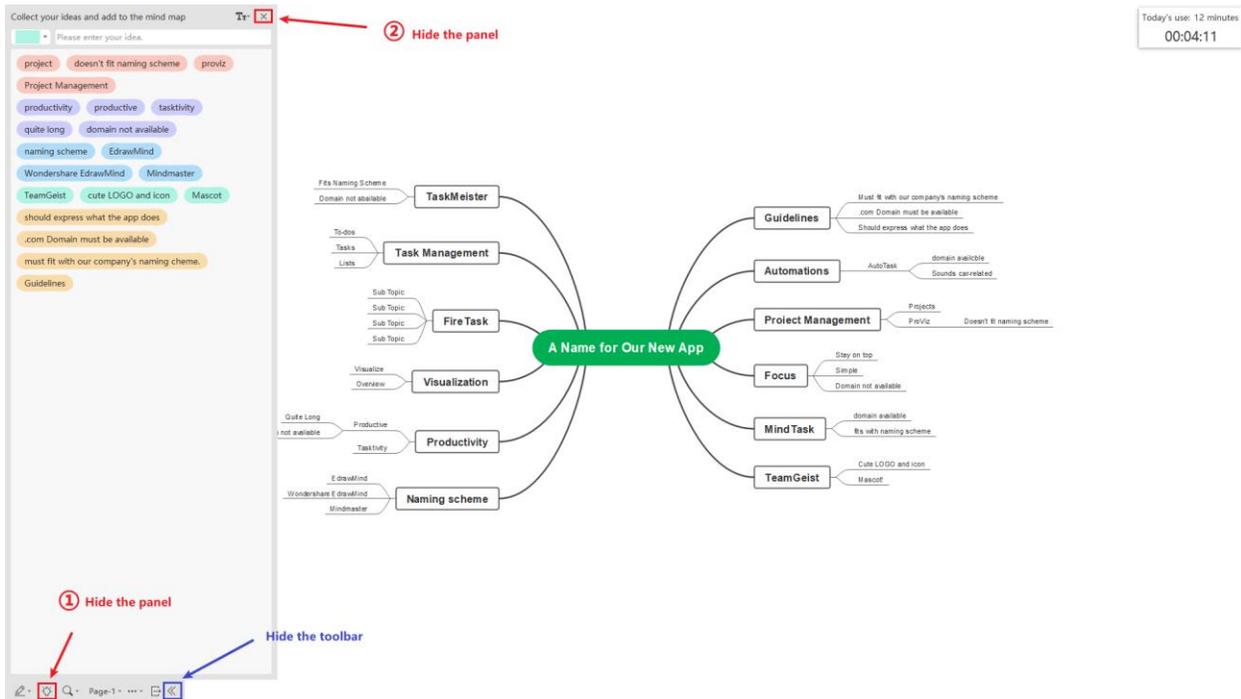

You will see a digital timer located at the top-right corner of the document. Press **Ctrl+F10** keys to hide the timer whenever you want.

02 Hide Panel and Toolbar

When discussing the collected ideas with your team members and drawing traces to illustrate your point, you may not want the left panel and toolbar. EdrawMind offers options to hide collect idea panel and toolbar for distract-free document. Here are the steps to hide panel and toolbar.

Step1 Click Collect Ideas option located at the bottom-left corner to hide the collect idea panel. Alternatively, you can click the close icon located at the top-left corner of the panel.

Step2 Click Hide Toolbar option located at the bottom-left corner to hide the collect idea toolbar.

You can click the right arrow located at the bottom-left corner to bring back the toolbar.

03 Zoom Document

When you are discussing the collected ideas, you may want to zoom in on a particular group of collected ideas or subtopics. If you have a very detailed mind map with a large number of ideas, you may need to zoom out to accommodate all ideas in the mind map on your screen. Here are the steps to zoom the document in brainstorming mode.

Step1 Click Zoom View option located at the bottom-left corner.

Step2Select a specific percentage for zoom in or out from the menu as per your requirements.

The screenshot shows a mind map application interface. On the left, there is a list of ideas and notes, including "project doesn't fit naming scheme", "Project Management", "productivity productive taskivity", "quite long domain not available", "naming scheme EdrawMind", "Wondershare EdrawMind Mindmaster", "TeamGeist cute LOGO and icon Mascot", "should express what the app does", ".com Domain must be available", "must fit with our company's naming scheme", and "Guidelines". A zoom menu is open at the bottom left, showing options for "Fit to Window Size", "Fit to Window Width", and various percentages (400%, 200%, 150%, 125%, 100%, 75%, 50%, 25%, Percent: 85%). A red circle highlights the zoom percentage options, and a red arrow points to the 400% option. On the right, a mind map is displayed with a central node "A Name for Our New App" and several branches: "TaskMeister", "Task Management", "Fire Task", "Visualization", "Productivity", "Naming scheme", "Guidelines", "Automations", "Project Management", "Focus", "MindTask", and "TeamGeist". Each branch has sub-nodes with related ideas and notes. A timer in the top right corner shows "Today's use: 12 minutes" and "00:04:12".

The document will reflect the selected magnification percentage. You can click and drag the mind map to place it centrally in the document.

04 Format Texts and Diagrams

When you add the collected ideas to the mind map, the diagrams and texts appear in black by default. You may want to colorize the diagrams and format the texts to highlight them so that everyone can distinguish them easily. Here are the steps to format the texts and diagrams in brainstorming mode.

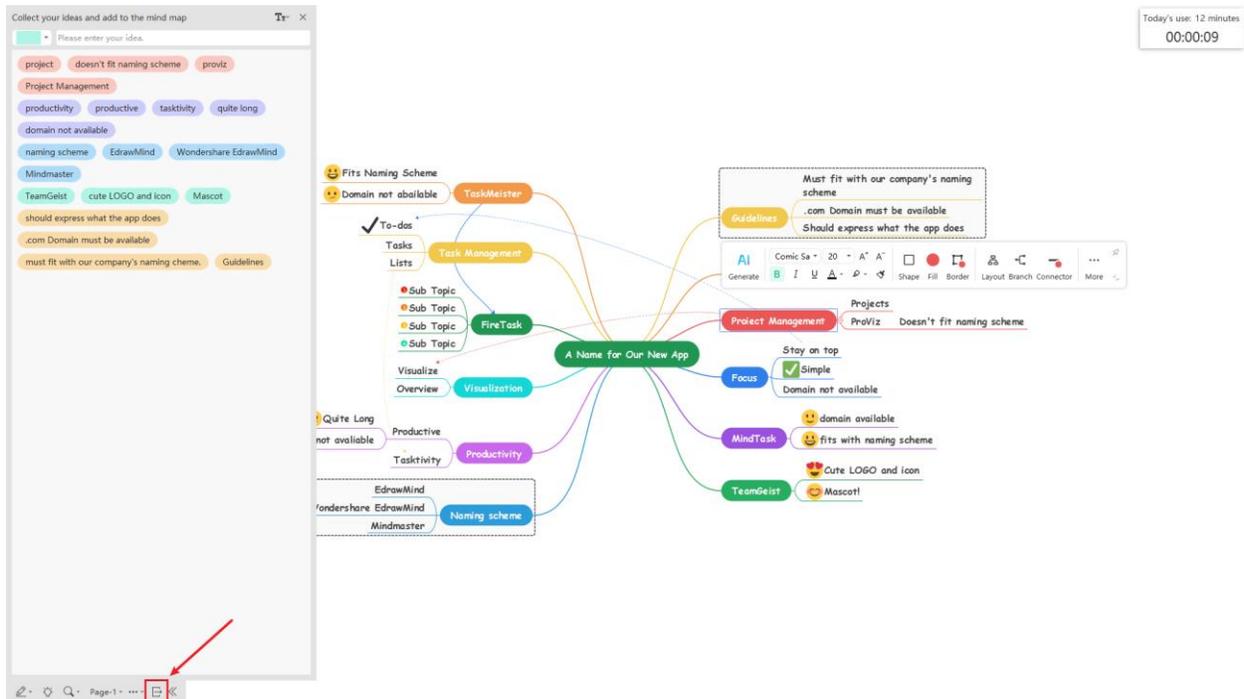

Step1Click on any text in your mind map. You will see a floating widget.

Step2Click Text Color option to change the text color you want. Click Text Highlight option to highlight the background of the text with any color.

Step3In the same mini-toolbar, Click Fill option and select a specific color to fill the diagram. Also Click Border option and select a specific color to colorize the border of the diagram.

Close Brainstorming Mode

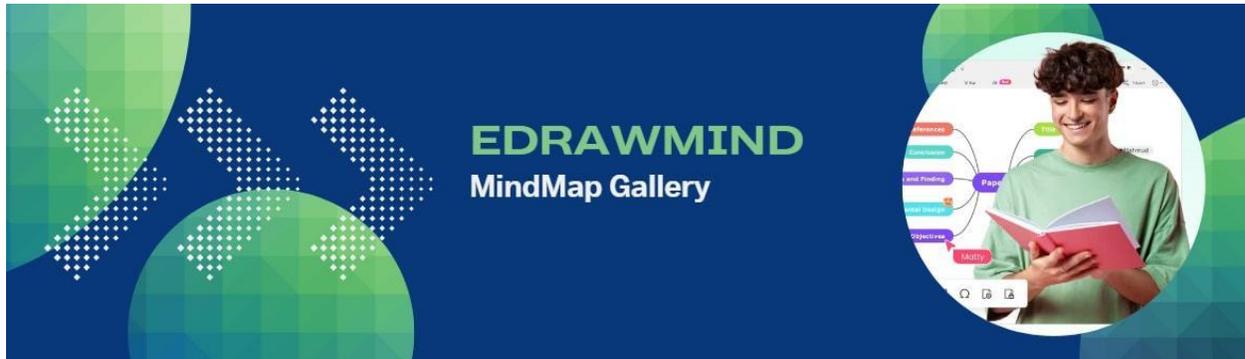

Once you have collected ideas, analyzed them, and organized them in the mind map, it is time to end the brainstorming session. Click Exit Brainstorm option located at the bottom-left corner of the brainstorming mode. Alternatively, you can press Esc key to close brainstorming mode and return to normal mode.

Once you close the brainstorming mode, you return to the normal window with the modified mind map.

Mind Map Gallery

MindMap Gallery

EdrawMind offers a wide range of abundant mind map templates that you can use as a reference for your diagramming needs. Starting from education, work, and life to events, trends, and notes, you will find ready-made templates to draw inspiration from and satisfy your requirements. You need to search for the category of mind map template from the gallery. You can also select a sub-category to get specialized templates for your project. Here are the steps to search for a template in MindMap Gallery.

Search For a Template

Step1 Launch EdrawMind and click Gallery from the left panel.

Step2 Go to the Search Template field and type in the category of mind map template you are looking for. Click the Search button or press the Enter key for EdrawMind to present you with the ready-made templates.

Alternatively, you can click on any keyword from the categories present. This will open sub-categories, and you can select any specific sub-category for more specific templates as per your requirements.

Step3 Go through the thumbnails of the templates and select one that is perfect for your project. Click on any template to check out its magnified preview.

Use a Template

Now that you have selected a ready-made template, you need to duplicate it and bring it to your document so that you can customize it. You can add topics, subtopics, and floating topics. Besides, you can edit the format of the existing texts and diagrams. EdrawMind allows you to customize the page style from themes to colors and fonts. Here are the steps to use a template in EdrawMind.

Step 1 Click the Duplicate button in the template preview window to duplicate the template and get it to your document.

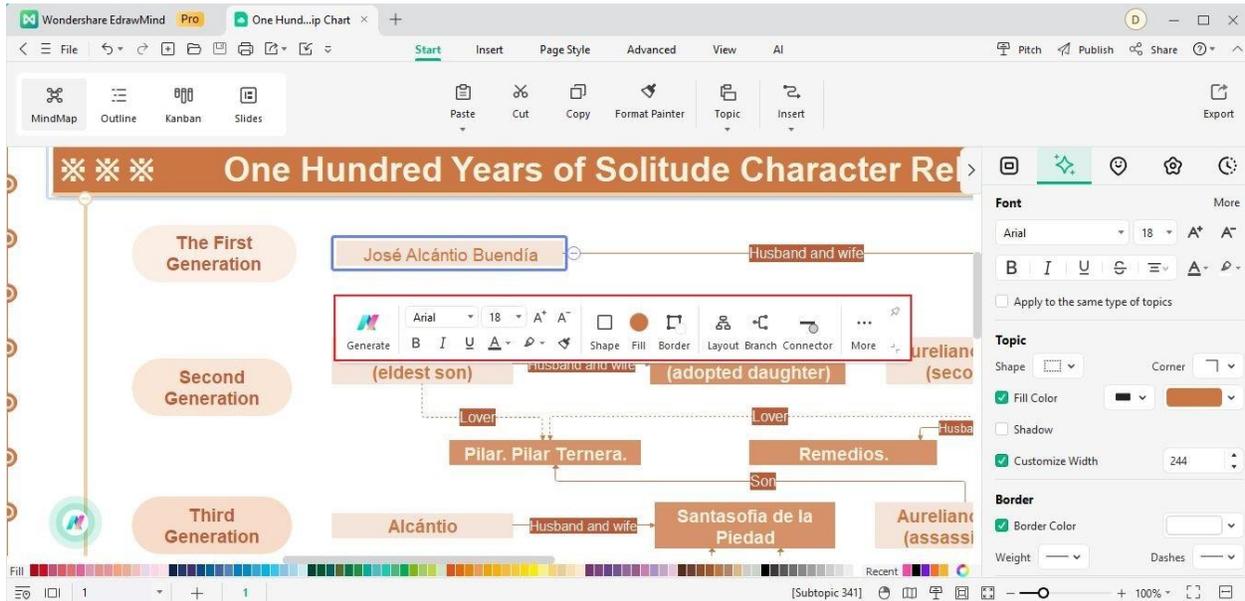

Step 2 To add a new topic, go to Start tab. Navigate to Topic > Topic and select Topic from the drop-down menu. Alternatively, you can press Enter key to insert a new topic.

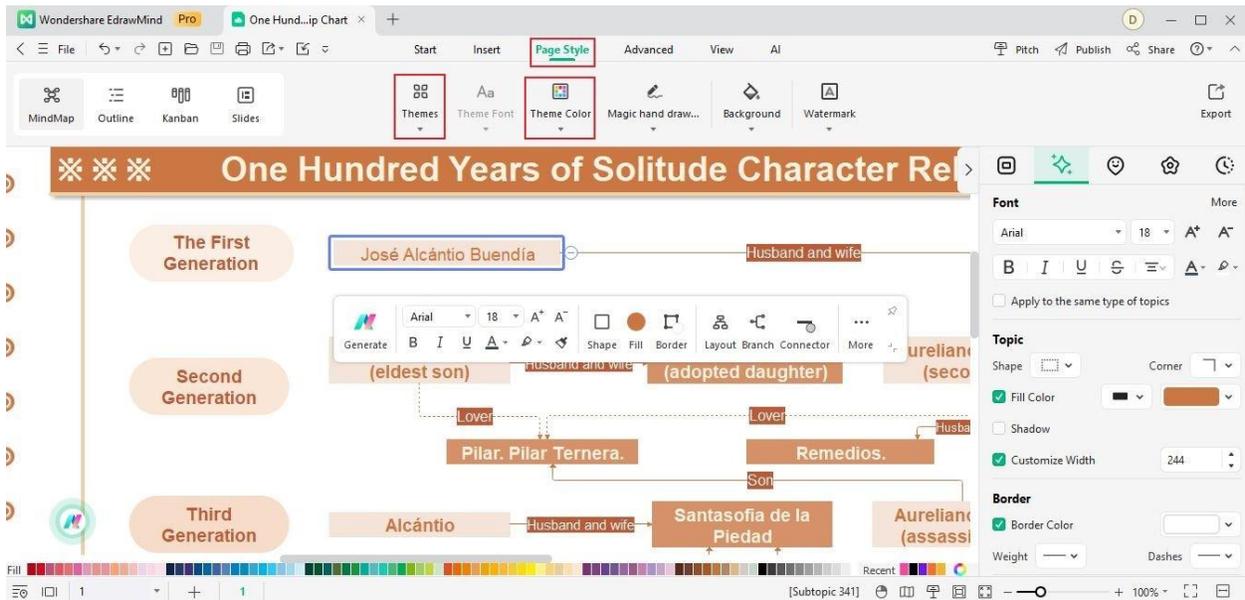

Similarly, you can insert a subtopic from Start tab after selecting the topic under which you want to insert the subtopic. Alternatively, you can press Ctrl+Enter keys together.

Step3To change the format of any text or diagram, click on the object. You will see a floating widget appear above it. You can change font, font size, text color, and select text highlight color. If you want to change the diagram color, go to Fill and select a color.

Step4Go to Page Style tab. Click Theme Color option and select any color scheme to change the colors of the templates. You can check out Themes option to explore different light and dark themes for the template.

Step5If you want to change the background, go to Background > Background Color option. If you want to change the plain background texture to a background design, select Background Texture option instead.

Publish a Template

You can publish your original template to the EdrawMind community so that users can use your template for reference and inspiration. If your template follows the community guideline, you can publish it in an appropriate category with tags so that users can discover your template easily from MindMap Gallery. Here are the steps to publish your original template in EdrawMind.

Step1 Click the Publish option located at the top-right corner.

Step2 You need to mention a name for the template, a description of the template and add relevant tags for easy discovery in the MindMap gallery. You can add tags manually as well as click Choose button to select from ready-made popular tags.

Step3 Agree to Community Guidelines and click Publish button.

The screenshot displays the EdrawMind Pro interface. The main workspace shows a detailed character relationship chart for 'One Hundred Years of Solitude', organized into six generations. The chart starts with José Alcánto Buendía in the first generation, branching into various characters like Aureliano Buendía, Úrsula, and others in subsequent generations. A portrait of a man is included in the fifth generation. The software's top menu bar includes 'File', 'Insert', 'Page Style', 'Advanced', 'View', and 'AI'. The 'Publish' button is highlighted with a red box in the top right corner. A right-side panel shows formatting options for the selected topic, including font (Arial, size 20), fill color (orange), and border color (black). The status bar at the bottom indicates '[Subtopic 341]' and a zoom level of 40%.

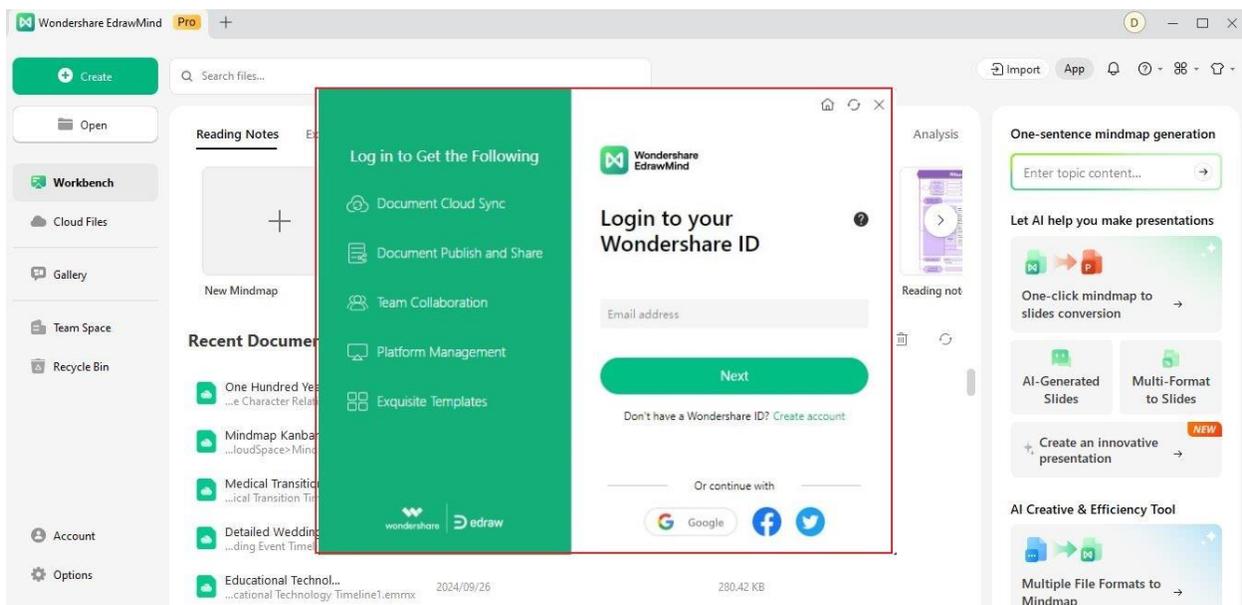

You will get a congratulatory message on your screen. Your submitted template will be reviewed by the EdrawMind team. If the template gets approval, it will be available under EdrawMind Template Center.

View Personal Gallery Homepage

The EdrawMind Mind Map Gallery provides a platform for users to discover, explore, and learn from a diverse range of mind maps, including both personal creations and works by other users. Follow these steps to access and view personal profiles and mind maps within the gallery:

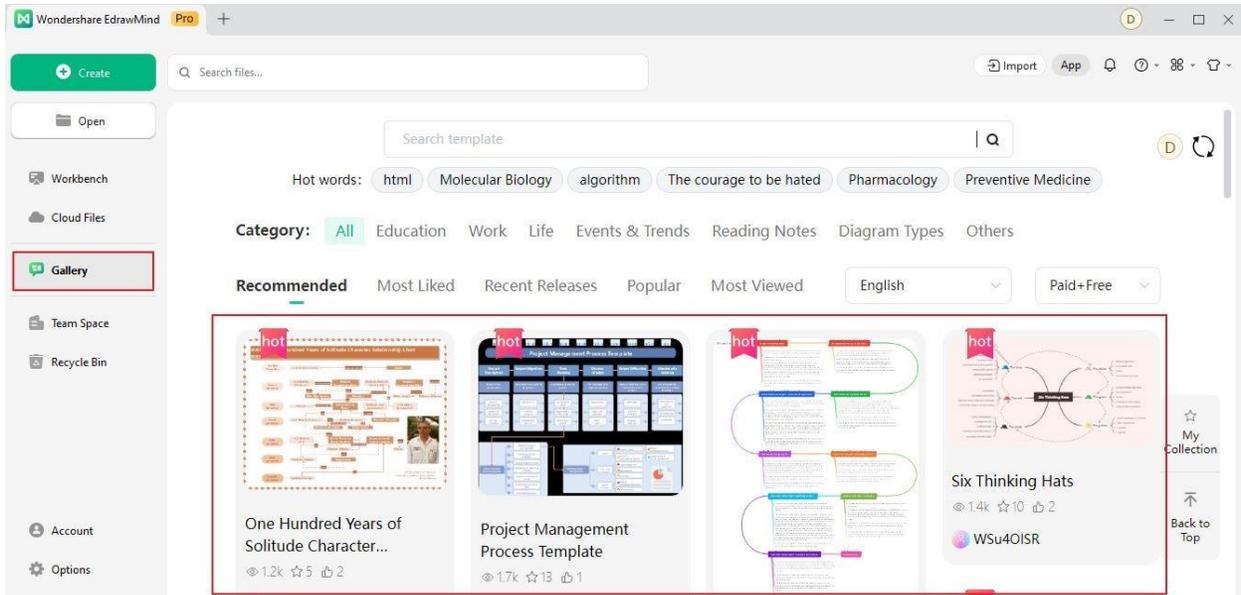

Step 1 Login to Your EdrawMind Account

Ensure that you are logged into your EdrawMind account. If you do not have an account, you can easily create one by following the registration process.

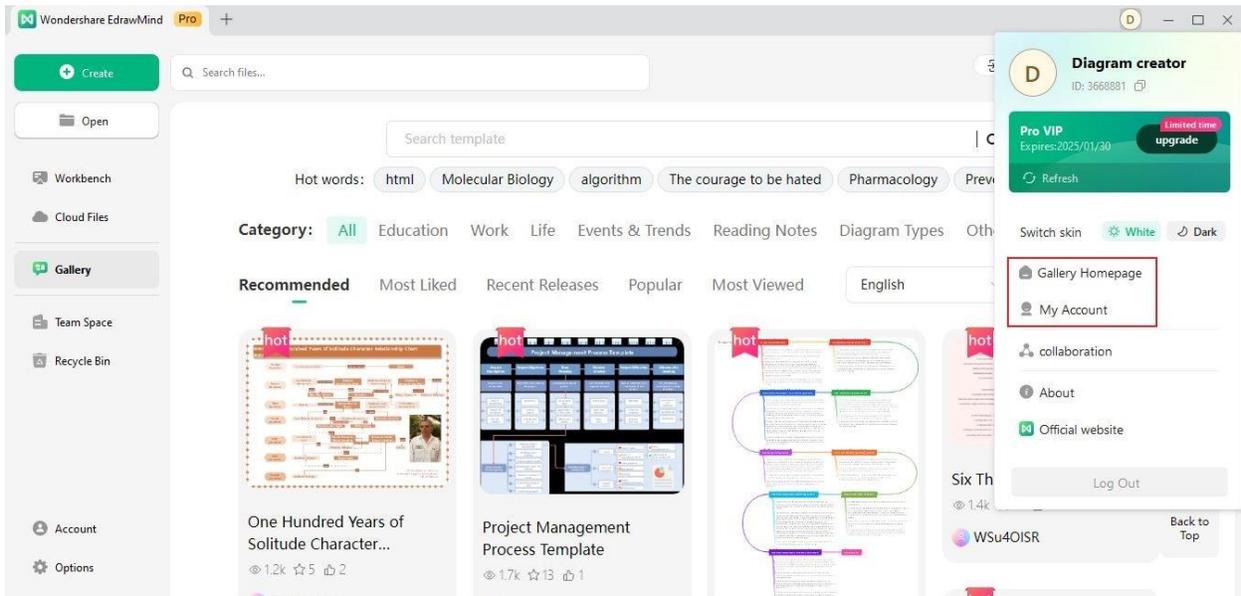

Step 2 Access the Mind Map Gallery

Once logged in, navigate to the main menu or dashboard of your EdrawMind account. Go to Gallery. This is where you will find a collection of mind maps contributed by various users.

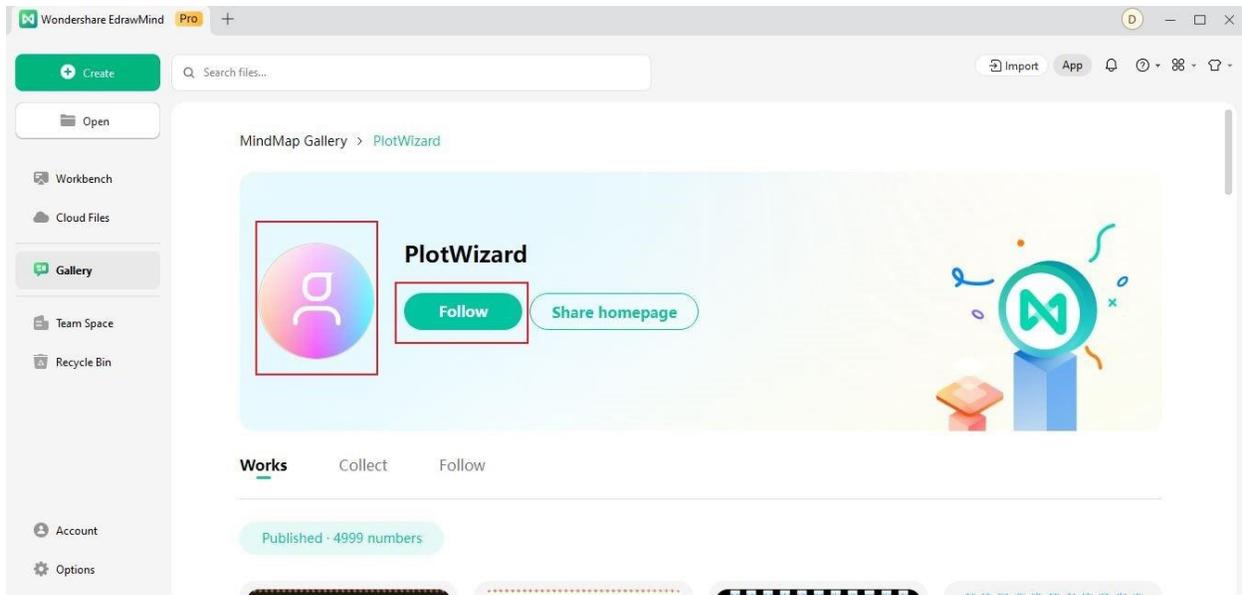

Step 3 View Personal Profile

To view your own personal profile and mind maps you've published, look for a "Gallery Homepage" section. Here, you can access mind maps you've created in the past and manage your profile information.

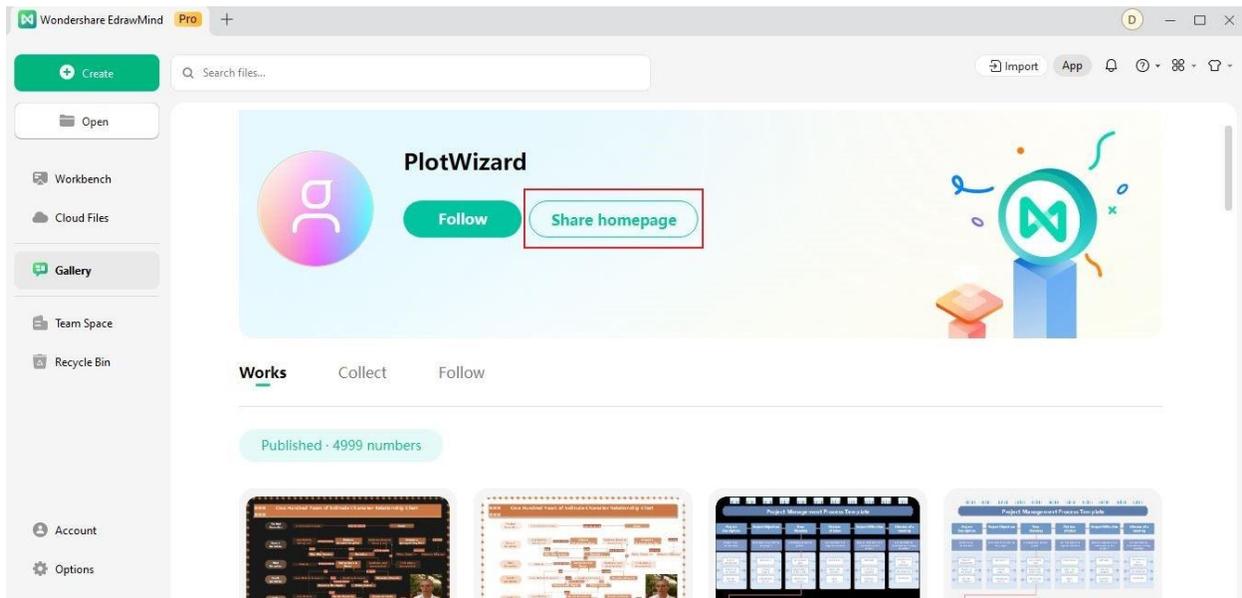

Step 4 Discover Other Users' Works

To explore mind maps created by other users, navigate through the gallery. Look for options like "Most Viewed," "Most Liked," or "Recent Release" that interest you. Click on a user's profile to access their collection of mind maps.

Step 5 View Mind Maps

Within a user's profile, you'll find a list of mind maps they have shared. Click on a specific mind map to view it in detail. You may be able to zoom in, move around, and interact with the mind map to explore its content.

Step 6 Gain Inspiration and Learn

Take this opportunity to gain inspiration from other users' works. Analyze the structure, organization, and creative elements of different mind maps. This can provide insights for your own mind map creations and projects.

Step 7 Collaborate and Connect

If you're interested in collaborating with another user or discussing their mind map, some platforms may offer communication features. Engage in meaningful conversations and share insights with fellow creators.

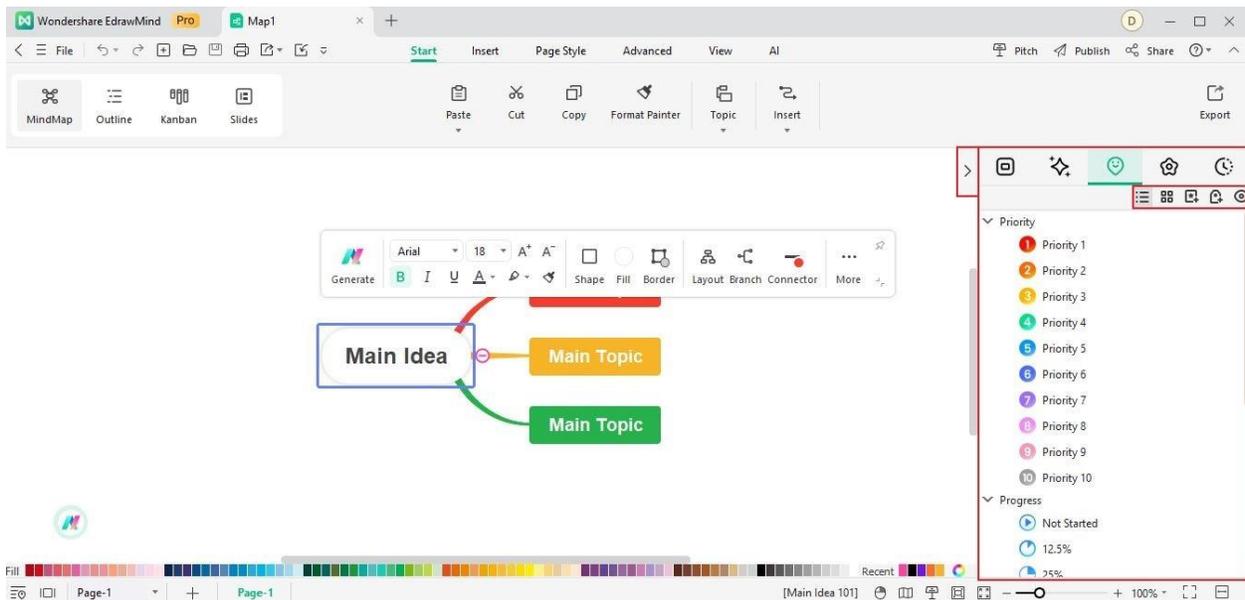

Step 8 Share Your Own Creations

As you explore the gallery and gain experience with mind mapping, consider contributing your own mind maps. Publish your creations to share your knowledge, ideas, and creativity with the EdrawMind community.

Task Management Tips

Resources

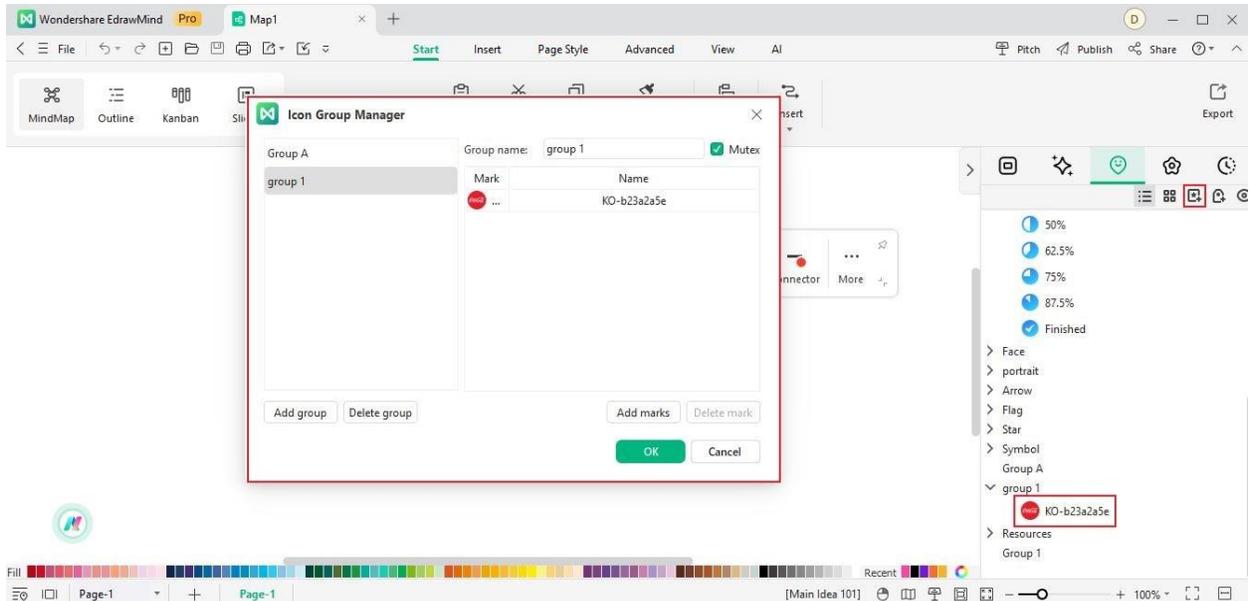

Within EdrawMind, resources allocated for task completion are regarded as a distinct tag group. Here's how to conveniently generate and oversee resources through the Tag Manager panel.

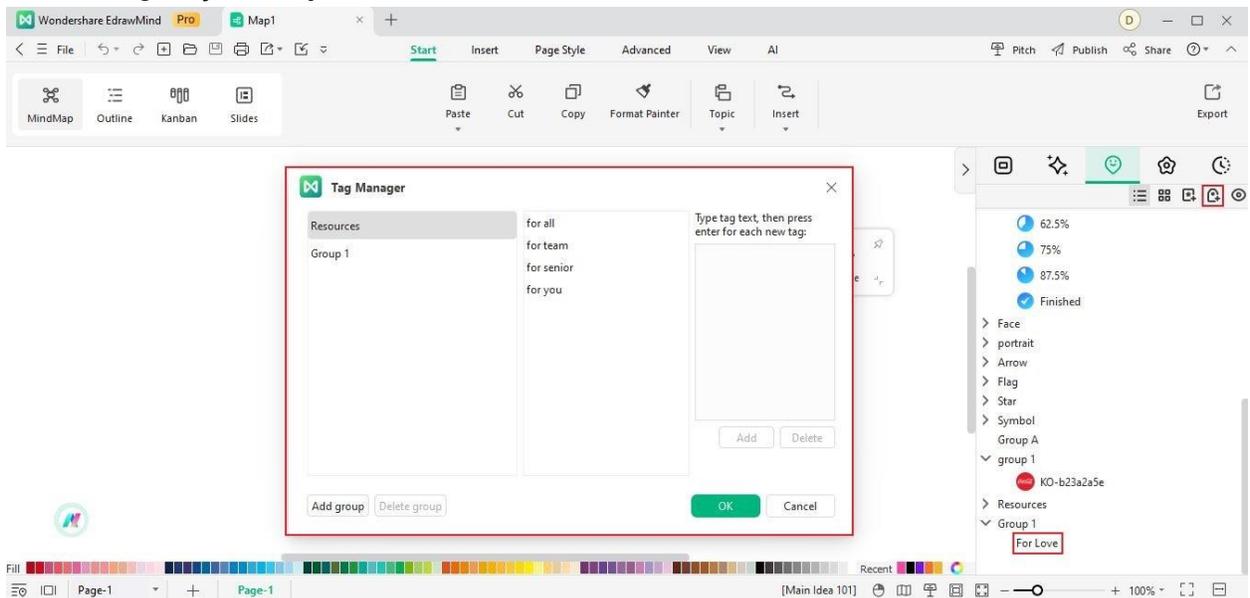

Create/Delete Resources

Follow the steps below to learn how to create or delete resource groups in EdrawMind.

Step 1 To add a custom icon, click the Mark Maker button to open a pop-up window. Add the name of the group and marks, and click OK. You can now place the icon on your project to further customize your map.

Step 2 Click Tag Manager to add a custom tag to your map. Click on Add group and type the tag text that you want. Click on OK to finish setting up your new tag. You can now place your custom tag on your map.

Step 3 To delete the added resource groups, select the groups' name and click Delete group next the Add group button in the Icon Group Manager and Tag Manager windows.

Add/Delete Resources to Topics

Once Tags are generated, incorporating them into topics becomes a straightforward process. Here's how.

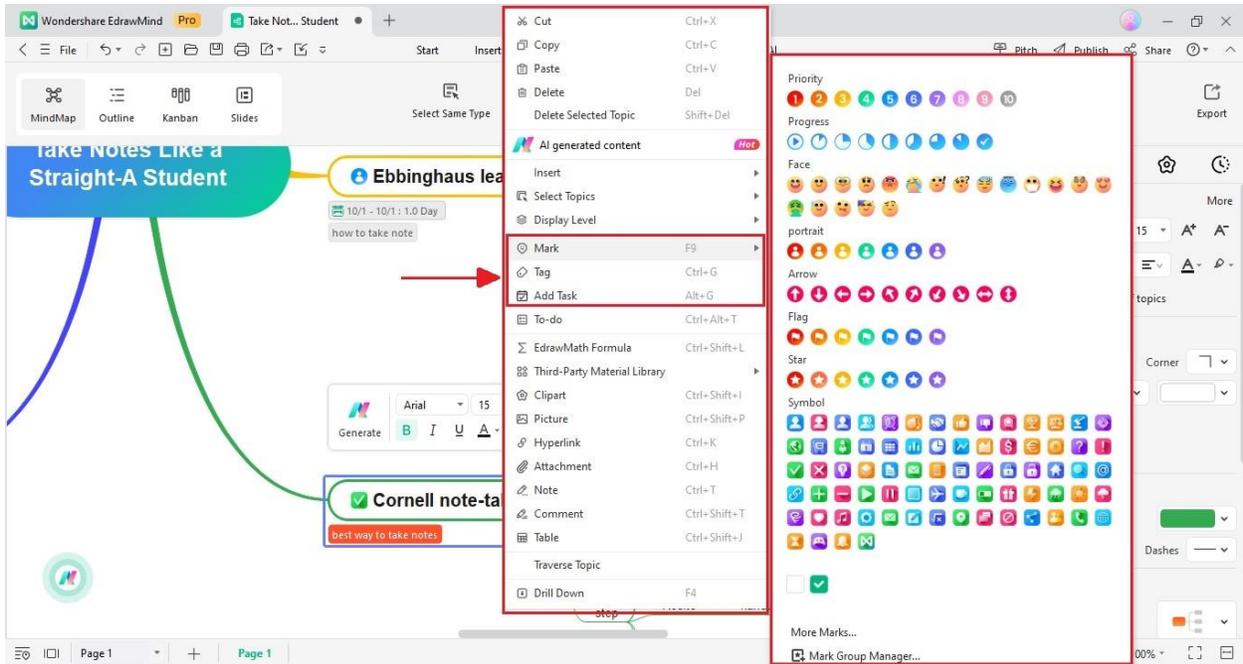

Step 1 Right-click any topic on your mind map or project. Select which resource fits your task at hand. You can choose between adding a Mark, Tag, or Task.

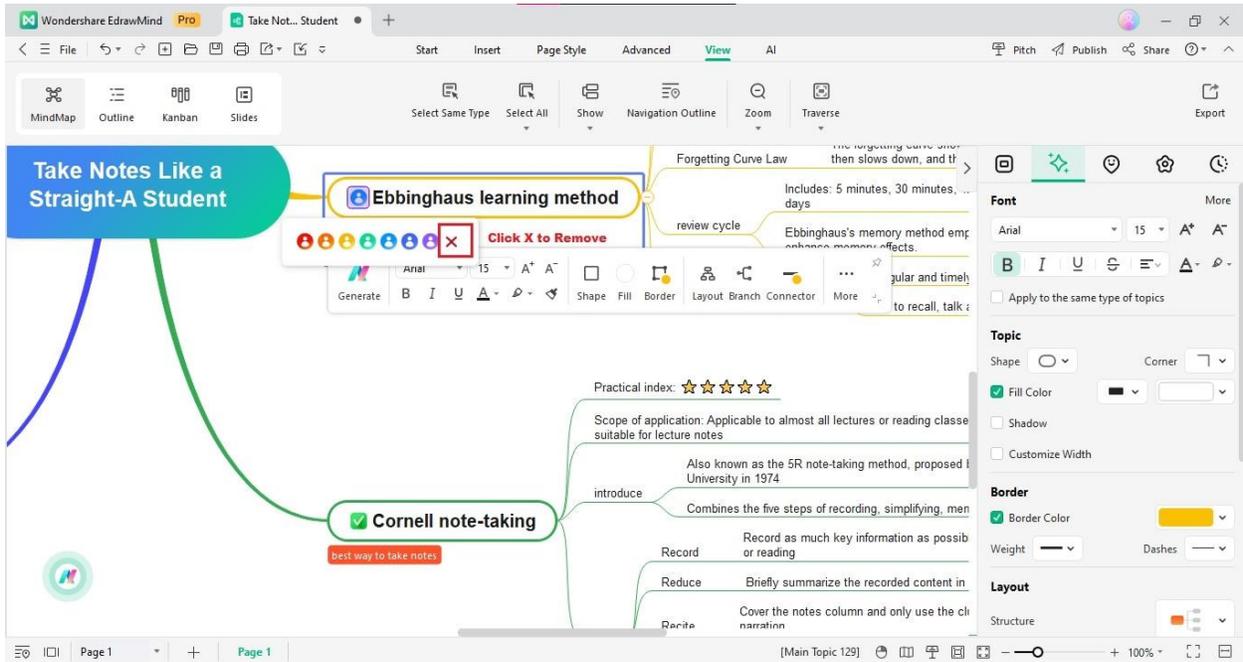

Step 2 You can see the selected topic has the resource in it or under it.

Note:

The mark will appear in the topic, while the tag and task show up under the topic.

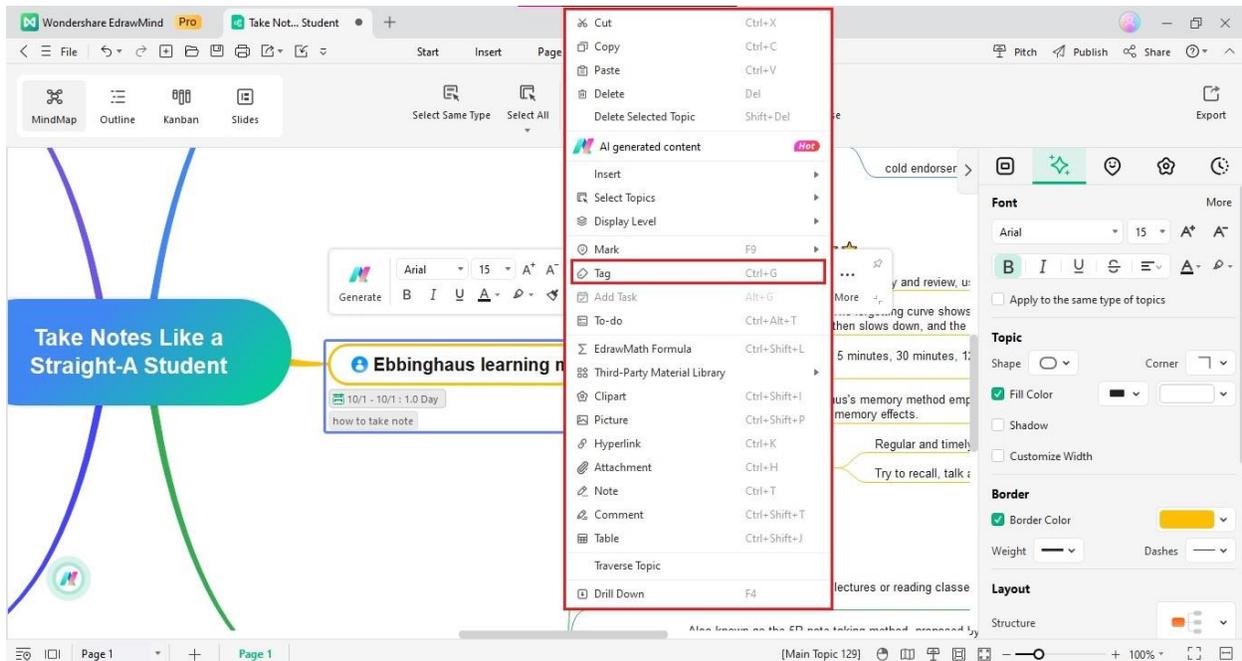

Step 3 To remove added resources, choose one of them and click X or Remove in the drop-down menu.

Add or Remove Tasks

You can distribute tasks to individual topics within a mind map. You have the flexibility to include diverse task details for a topic. You can set tasks details for Start Time and End Time, Duration and more. The task particulars will be displayed in the lower section of the respective topic. Follow the steps below to learn more.

Step 1 Right-click any topic or idea and click Add Task. Then, you'll see a calendar icon appears under the topic.

Step 2 To remove a Task, left or right-click any task and choose Remove.

Edit Task Information

Once your Tasks are set up, you can modify their details using the available task information choices. Here's how.

Step 1 Right-click any topic with a designated Task. You can edit the Start Time, End Time, and Duration of any task from the available options.

Step 2 In the pop-up calendar window, click the appropriate option and set the dates or duration depending on your chosen selection.

Gantt Chart View

A Gantt chart visually overviews a project's timeline, displaying tasks along a time axis. This tool is widely used in project management to aid teams in planning, scheduling, and tracking task progress. In the chart, each task appears as a horizontal bar. The length of the bar reflects the task's duration, while its position shows the start and end times.

Open/Close Gantt Chart Panel

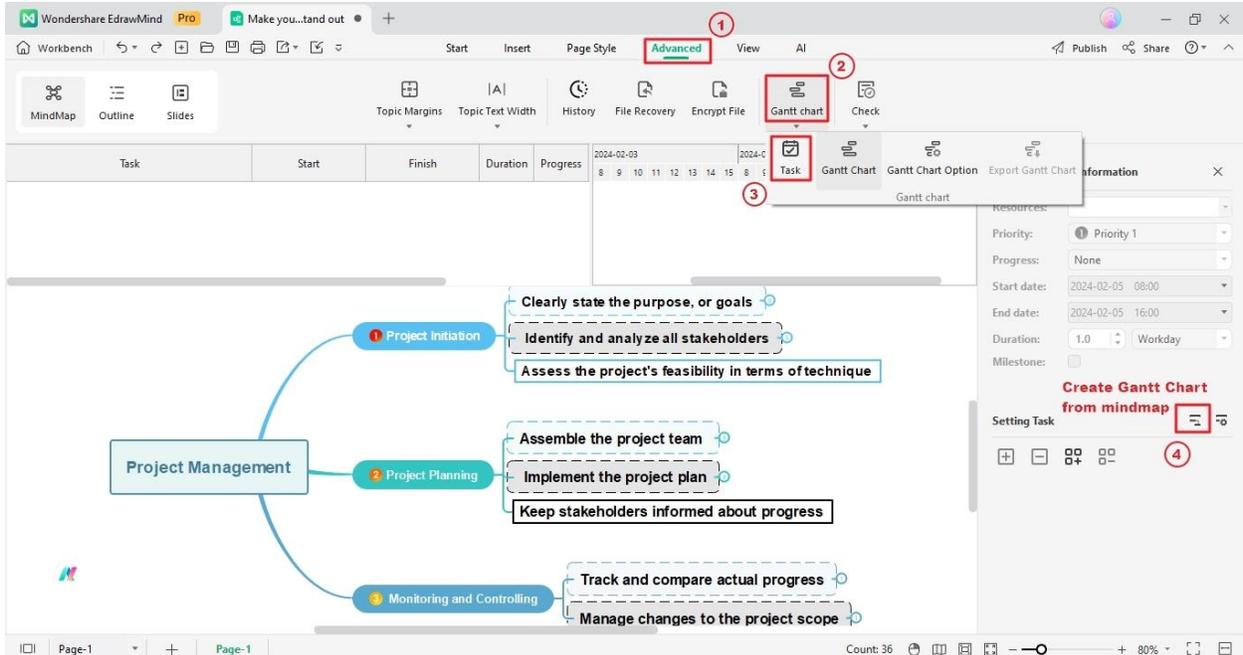

Within EdrawMind, you can harness the Gantt Chart view, effortlessly transforming your mind maps and diagrams into Gantt charts. Task management occurs seamlessly in this view. Editing task details in the Gantt chart also updates corresponding information on the mind map. Follow these steps to switch to the Gantt Chart view.

Step 1 You can access the Task Information sidebar in two ways for the Gantt chart view:

- Navigate to **Advanced > Gantt Chart** in the upper navigation pane.

The screenshot shows the Wondershare EdrawMind Pro interface. The top navigation bar includes 'Advanced' (circled in red) and 'Gantt chart' (circled in red). The main workspace displays a Gantt chart with three tasks: 'Project Initiation' (duration 8-15), 'Project Planning' (duration 8-15), and 'Monitoring and Controlling' (duration 8-15). A red arrow points to a split bar in the Gantt chart area. The 'Task Information' sidebar on the right shows details for the selected task, including priority, start/end dates, and duration. The 'Setting Task' section includes icons for adding, removing, and toggling the Gantt chart.

- Alternatively, go to **Advanced > Task** in the upper navigation pane. Then, from the Task Information left sidebar, click the **Create a Gantt Chart from the mind map** icon in the **Setting Task** section to show or hide the Gantt chart.

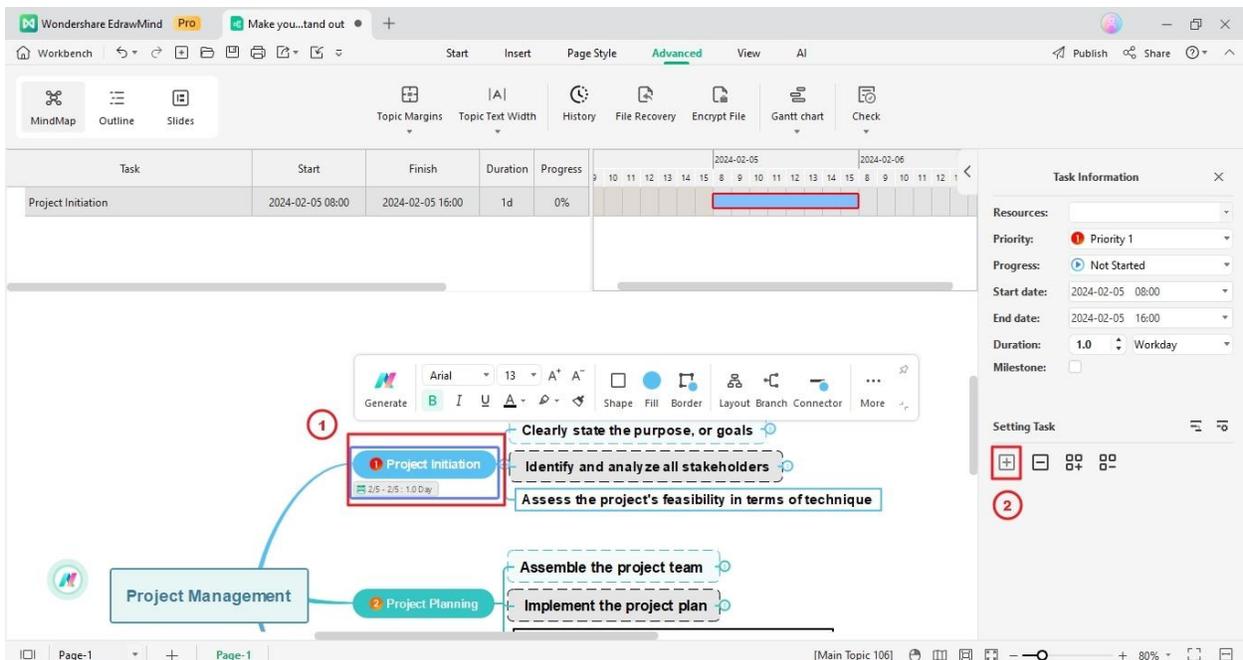

Note:

Double-click and drag the split bar to customize the area occupied by the Gantt chart and mind map on the canvas.

Step 2 Add essential task information to the Gantt chart from your diagram using these methods:

- You can choose a specific mind map task to include as an activity on the Gantt chart. To do so, select a task in the diagram. Next, from the Task Information sidebar on the left, click the + Add task info icon below the Setting Task section.

- Or, you can add all the tasks from the diagram directly into the Gantt chart. To do so, access the Task Information left sidebar. Then below the Setting Task section, click the Add all task info icon.

The screenshot displays the Wondershare EdrawMind Pro interface. At the top, there is a menu bar with options like 'Workbench', 'Start', 'Insert', 'Page Style', 'Advanced', 'View', and 'AI'. Below the menu is a toolbar with icons for 'MindMap', 'Outline', 'Slides', 'Topic Margins', 'Topic Text Width', 'History', 'File Recovery', 'Encrypt File', 'Gantt chart', and 'Check'. The main workspace is divided into three sections: a table, a Gantt chart, and a diagram.

Task	Start	Finish	Duration	Progress
Project Management	2024-02-05 08:00	2024-02-05 16:00	1d	0%
Project Initiation	2024-02-05 08:00	2024-02-05 16:00	1d	0%
Clearly state the purpose, or goals	2024-02-05 08:00	2024-02-05 16:00	1d	0%
Make good use of icons or pictu...	2024-02-05 08:00	2024-02-05 16:00	1d	0%
Good at using frames, outlines, ...	2024-02-05 08:00	2024-02-05 16:00	1d	0%
Adjust margins	2024-02-05 08:00	2024-02-05 16:00	1d	0%

The Gantt chart below the table shows a grid with columns for days (8-15) and rows for tasks. Blue bars represent task durations, all starting at 08:00 and ending at 16:00 on 2024-02-05.

The diagram at the bottom shows a central 'Project Management' node connected to 'Project Initiation' and 'Project Planning'. 'Project Initiation' is further broken down into 'Clearly state the purpose, or goals', 'Identify and analyze all stakeholders', and 'Assess the project's feasibility in terms of technique'. 'Project Planning' includes 'Assemble the project team' and 'Implement the project plan'.

The 'Task Information' sidebar on the right contains the following fields:

- Resources: [Dropdown]
- Priority: Priority 1
- Progress: Not Started
- Start date: 2024-02-05 08:00
- End date: 2024-02-05 16:00
- Duration: 1.0 Workday
- Milestone: [Checkbox]

The 'Setting Task' section at the bottom of the sidebar includes icons for adding, removing, and adding all task info (highlighted with a red box and a circled '1').

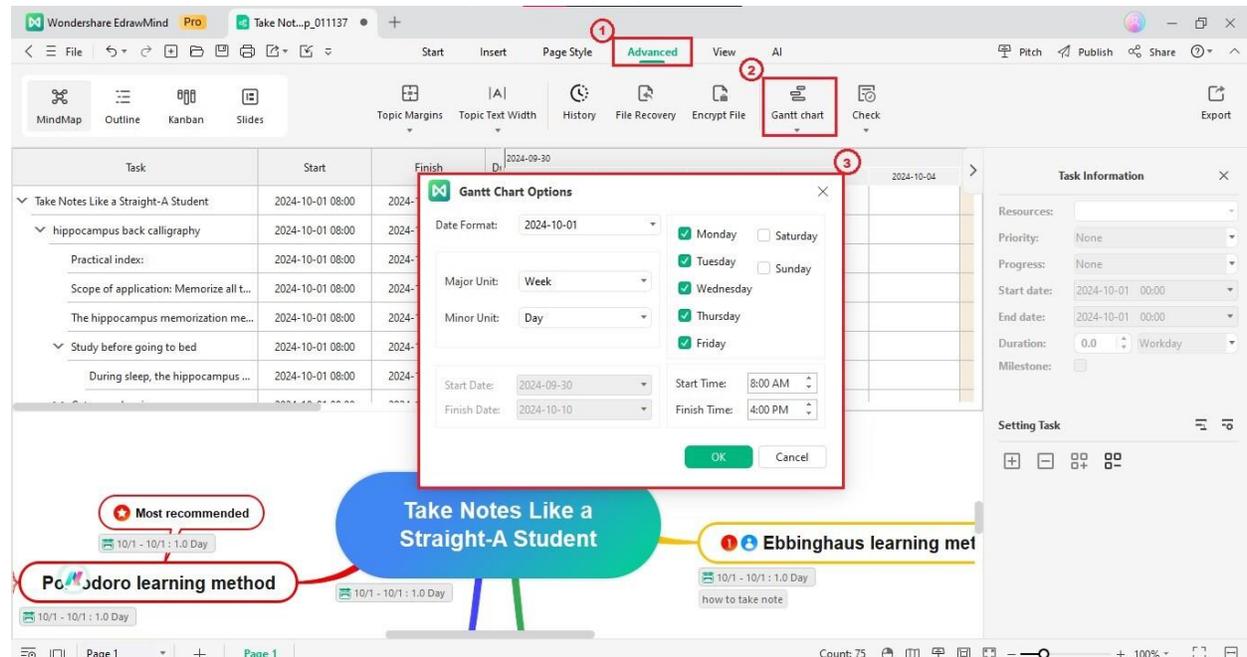

Step 3 Click any of the aforementioned buttons to close the Gantt Chart panel.

Set Gantt Chart Options

If you're using EdrawMind's Gantt chart view, you can easily adjust how elements appear, like start and end dates, time, and date format. Control how you see the project's duration, divided into days, weeks, or months. The time unit you select depends on how detailed you need the Gantt chart to be.

For instance, select hours if you are working on a project with many short-term tasks. For longer projects, months or even years work better. You can edit these elements through the Gantt chart option feature. Follow these steps to customize your Gantt chart settings:

Step 1 Open the Gantt Chart view, then click the Gantt Chart Option in the upper navigation pane. It will open the Gantt Chart Options pop-up window.

Step 2 In the Gantt Chart Options pop-up window, you can edit the following to adjust the Gantt chart's elements:

- To change the date format, click the Date Format drop-down list, then select a date format in the options.

The screenshot shows the 'Gantt Chart Options' dialog box in Wondershare EdrawMind Pro. The 'Date Format' is set to '2024-10-01'. The 'Major Unit' dropdown is set to 'Day'. The 'Minor Unit' dropdown is set to 'Day'. The 'Start Date' is '10.1.2024' and the 'Finish Date' is '1.10.2024'. The 'Start Time' is '8:00 AM' and the 'Finish Time' is '4:00 PM'. The dialog also has checkboxes for 'Monday', 'Tuesday', 'Wednesday', 'Thursday', 'Friday', 'Saturday', and 'Sunday'. The background shows a mind map with a central node 'Take Notes Like a Straight-A Student' and several branches, including 'Pomodoro learning method' and 'Ebbinghaus learning method'.

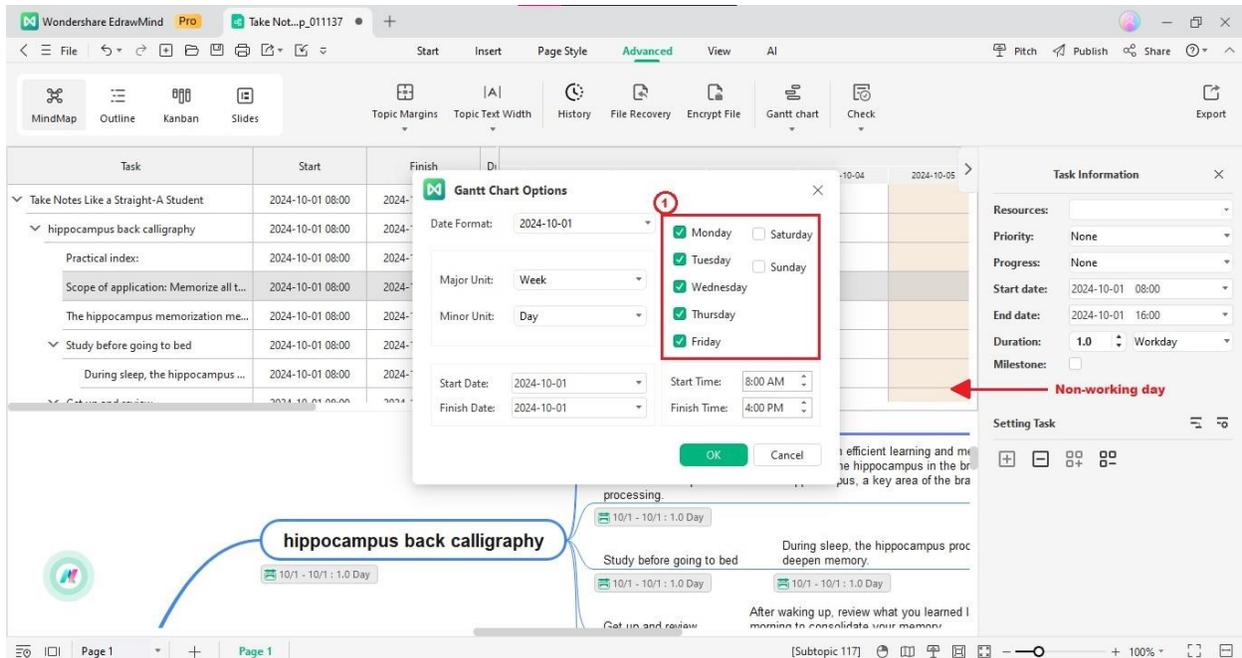

- To view the timeline in the Gantt chart by days, click the Major Unit drop-down list and select Day.

The screenshot shows the 'Gantt Chart Options' dialog box in Wondershare EdrawMind Pro. The 'Date Format' is set to '2024-10-01'. The 'Major Unit' dropdown is set to 'Day'. The 'Minor Unit' dropdown is set to 'Day'. The 'Start Date' is '10.1.2024' and the 'Finish Date' is '1.10.2024'. The 'Start Time' is '8:00 AM' and the 'Finish Time' is '4:00 PM'. The dialog also has checkboxes for 'Monday', 'Tuesday', 'Wednesday', 'Thursday', 'Friday', 'Saturday', and 'Sunday'. The background shows a mind map with a central node 'Take Notes Like a Straight-A Student' and several branches, including 'Pomodoro learning method' and 'Ebbinghaus learning method'.

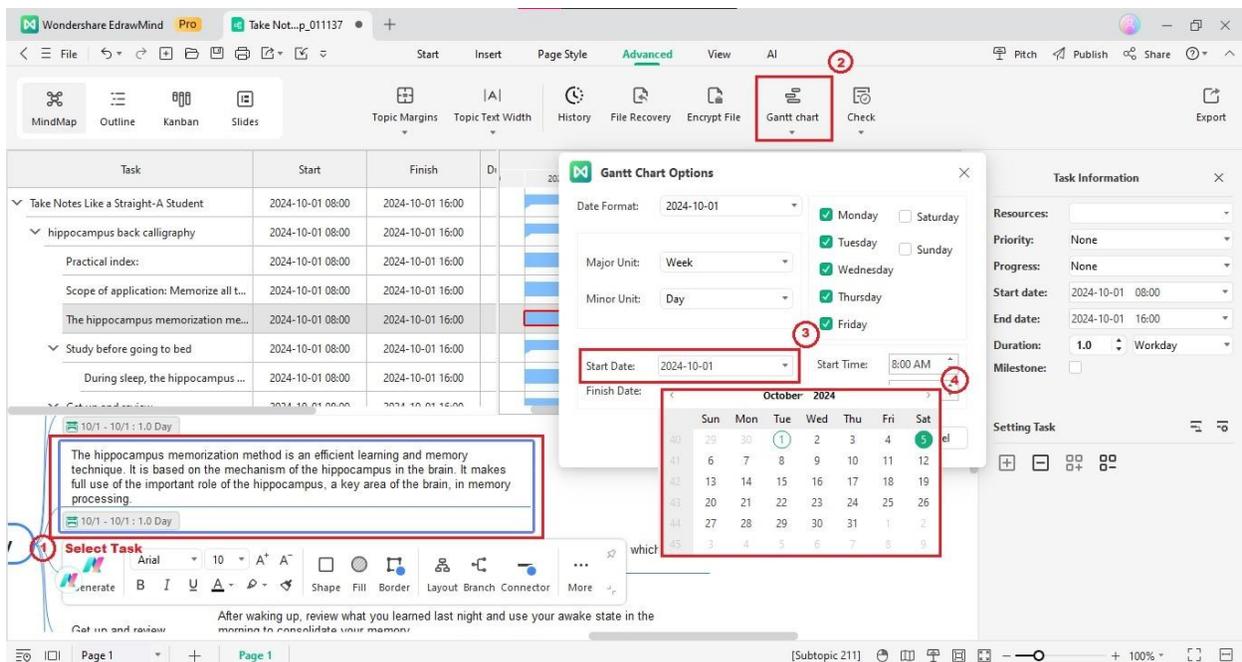

Note:

The Minor Unit will adjust accordingly. Alternatively, select an option in the Minor Unit drop-down list.

- To display working days on the Gantt chart, select the checkboxes for the working days from Monday to Sunday based on your work schedule. Clear checkboxes for non-working days to highlight them in the Gantt chart.

- **Adjust a task's Start Date and Finish Date details in the Gantt Chart. First, select a task in the mind map, then click the Gantt Chart Option in the upper navigation pane. Next, click the Start Date drop-down list and select a date from the calendar. Do the same for the Finish Date drop-down list.**

Step 3 Click OK to apply the changes in the Gantt chart.

Modify Task Info in Gantt View

You can directly edit the elements in the Gantt chart. These include the start and finish dates, time, progress, dependencies, and timeline units. Follow these to start:

Step 1 Go to **Advanced > Gantt Chart** in the upper navigation pane to open the Gantt chart view.

Note:

Drag the horizontal and vertical split bars for a better view of the Gantt chart. Also, click the right panel icon to hide it.

The screenshot shows the Wondershare EdrawMind Pro interface in Gantt chart view. The menu bar includes 'File', 'Insert', 'Page Style', 'Advanced', 'View', and 'AI'. The 'Advanced' menu is open, and 'Gantt chart' is selected. The toolbar contains icons for MindMap, Outline, Kanban, Slides, Topic Margins, Topic Text Width, History, File Recovery, Encrypt File, Gantt chart, and Check. The main workspace displays a Gantt chart with tasks and their durations. A red arrow points to a split bar with the text 'Adjust Split bar'. A red box highlights the right panel icon with the text 'Click to hide right side panel'.

Ebbinghaus learning method	2024-10-02 08:00	2024-10-02 16:00	1d	0%				

Step 2 In the Gantt chart view, do either of the following to change the task info:

- Double-click an activity/task in the Task column to rename it.

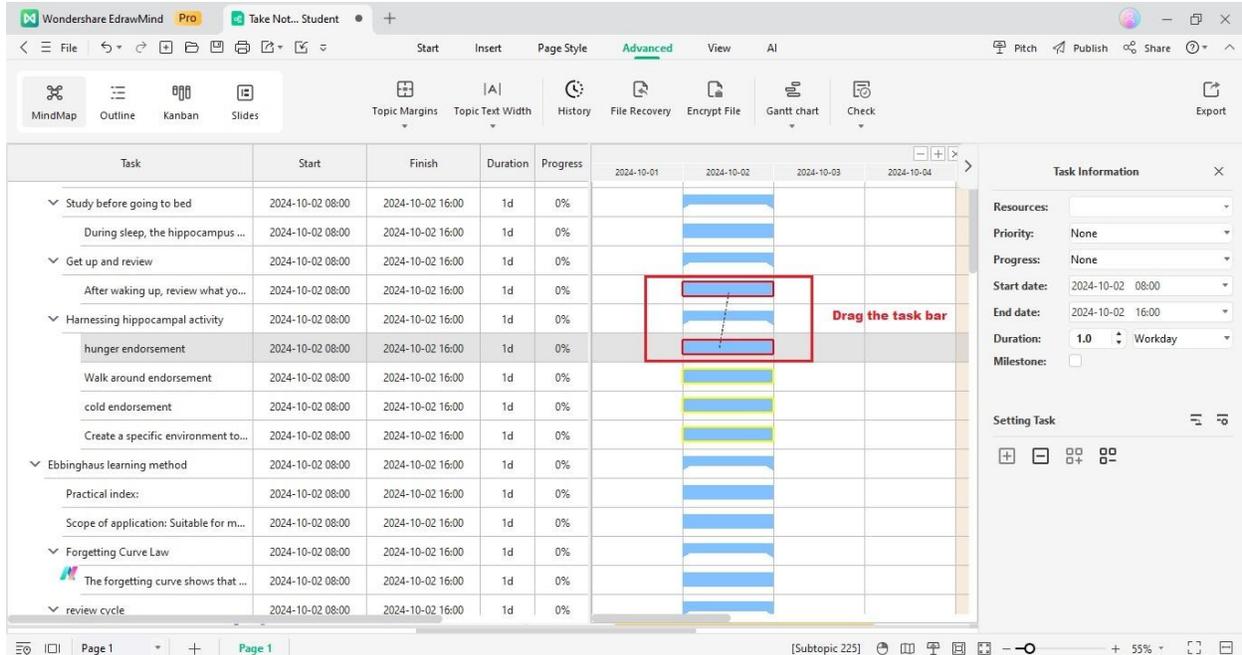

The screenshot shows the Wondershare EdrawMind Pro interface with a Gantt chart view. The task list includes: Study before going to bed, During sleep, the hippocampus..., Get up and review, After waking up, review what yo..., Harnessing hippocampal activity, hunger endorsement, Walk around endorsement, cold endorsement, Create a specific environment to stimulate hippocampus activity, Ebbinghaus learning method, Practical index:, Scope of application: Suitable for m..., Forgetting Curve Law, The forgetting curve shows that..., and review cycle. The task 'Create a specific environment to stimulate hippocampus activity' is highlighted in grey, and its start date '2024-10-02 08:00' is circled in red with a '2'. A red box labeled '1' is around the 'Task' header.

Step 3 There are several ways to change the duration of each task in the project, from its start date to its end date.

- Click the task's date in the Start column. Next, enter a date in the input field or click the drop-down list to select from the calendar.

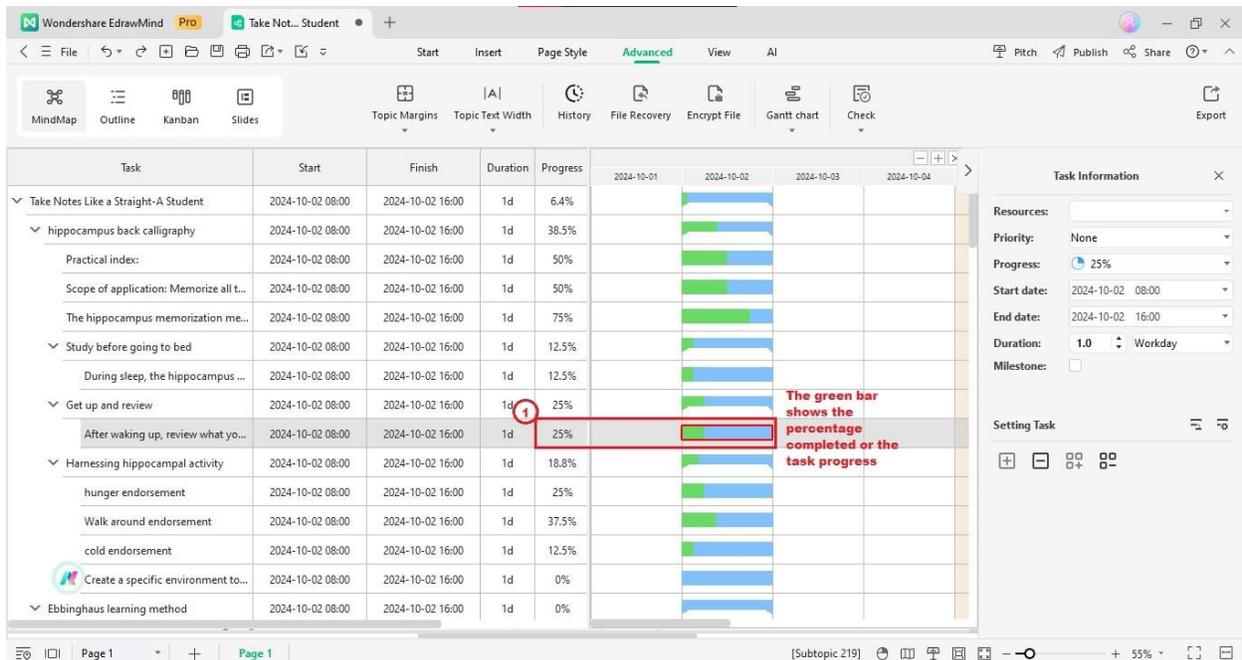

The screenshot shows the same Gantt chart as above, but with a calendar dropdown open for the task 'Create a specific environment to stimulate hippocampus activity'. The date '2024-10-02 08:00' is entered in the input field, and the calendar shows the month of October 2024. A red box labeled '1' is around the 'Start' header, '2' is around the date input field, and '3' is around the calendar dropdown.

- Resize the taskbar. To do so, hover your cursor over the right border of the taskbar until it becomes a double-headed arrow. Then, double-click and drag to the desired date.

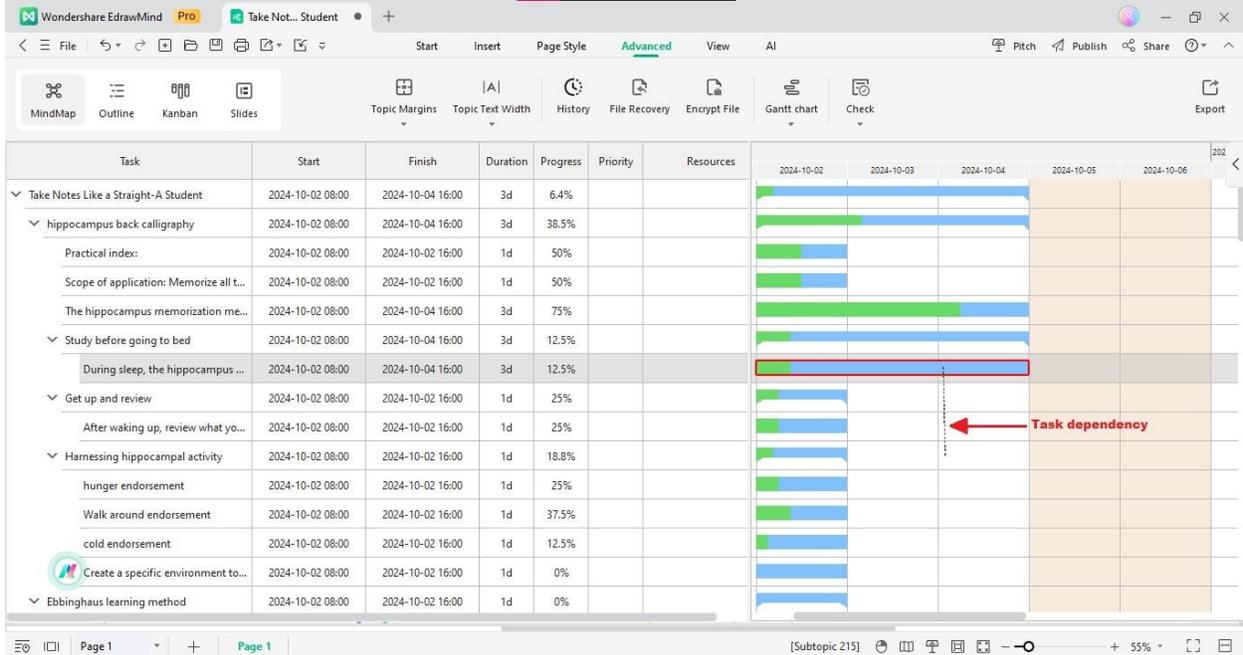

- Click the taskbar to select it, and once you see the move cursor, drag the taskbar.

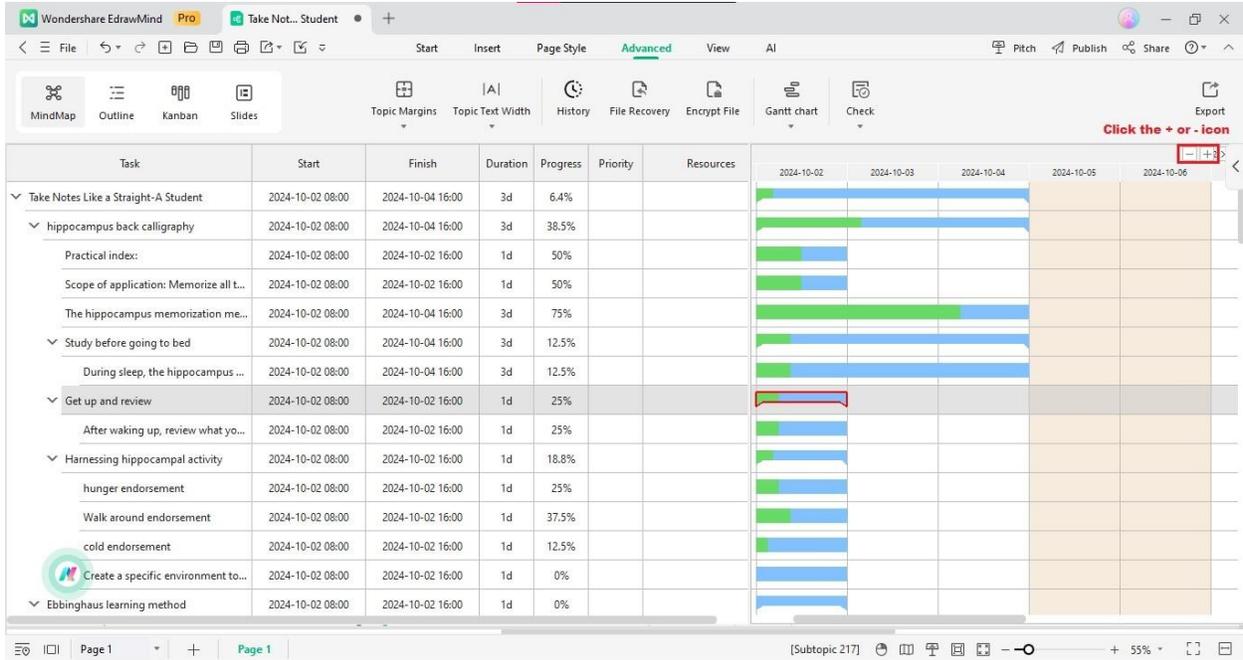

Step 4 Show task progress. Place your cursor on the left border of the taskbar. It will become a double-headed arrow. Then, hold down the mouse button while dragging the bar. A green bar will appear to show the progress of the task.

Step 5 Add task dependencies. Click one of the taskbars and hold down the mouse button while dragging it to the other taskbar.

Step 6 Change time unit. To do so, Click the + or - icon in the Gantt chart's top right corner.

Export Gantt Chart

You can export your Gantt Chart as a PDF file. Follow these steps to save your Gantt chart.

Step 1 Go to **Advanced > Export Gantt Chart** in the upper navigation pane.

The screenshot shows the Wondershare EdrawMind Pro software interface. The 'Advanced' menu is highlighted with a red box and a circled '1'. The 'Gantt chart' option is highlighted with a red box and a circled '2'. The 'Export Gantt Chart' option is highlighted with a red box and a circled '3'. The main workspace displays a Gantt chart with various tasks and their durations.

Find and Replace

EdrawMind offers a Find and Replace feature that simplifies locating specific elements and replacing them with desired content within your diagrams. Follow the steps below to learn how to use this feature.

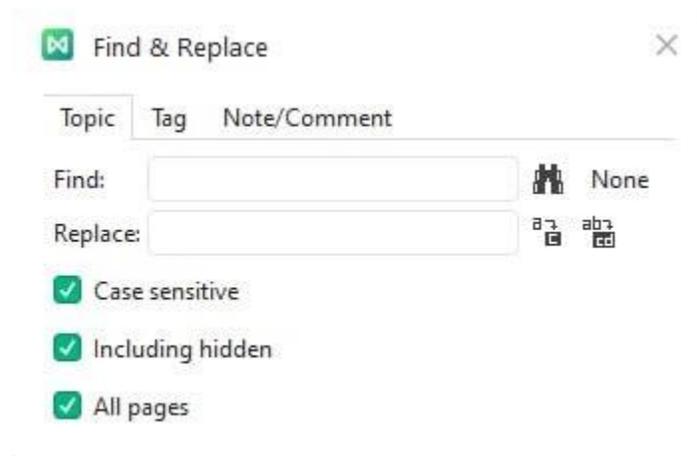

Use the **Ctrl + F** (For Windows) or **Command + F** (For Mac) keyboard shortcuts to turn on the function. Input words you are interested in in the pop-up window.

- **Tick the Case Sensitive checkbox for precision if you only want to filter capital words.**
- **Tick the All Pages checkbox to search and replace across all pages.**
- **Tick the Including hidden checkbox if you want to replace text that is in folded branches.**

Switch to the Tag menu if you are trying to search for words in tags.

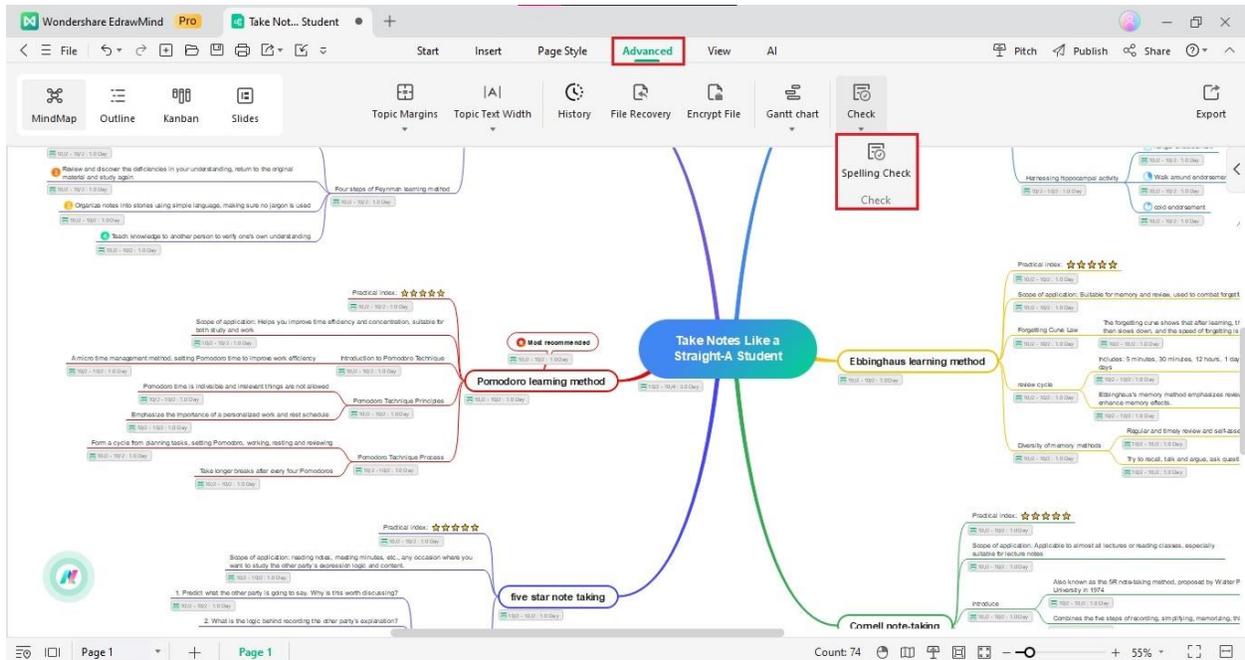

Switch to the Note/Comment menu if you are trying to search for words in notes or comments.

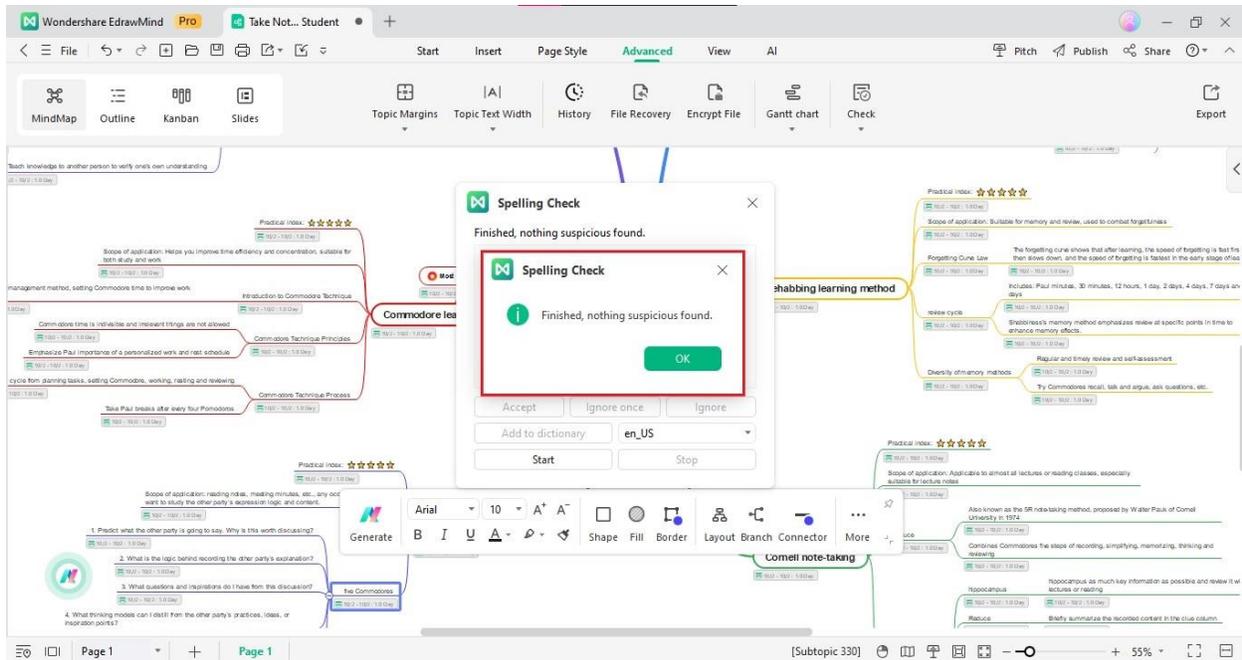

01 Spelling Check

Correct spelling is important in mind maps. It ensures clarity and prevents misunderstandings. EdrawMind has a spelling check feature you can use to ensure all the words are spelled correctly. Follow the steps below to use this feature:

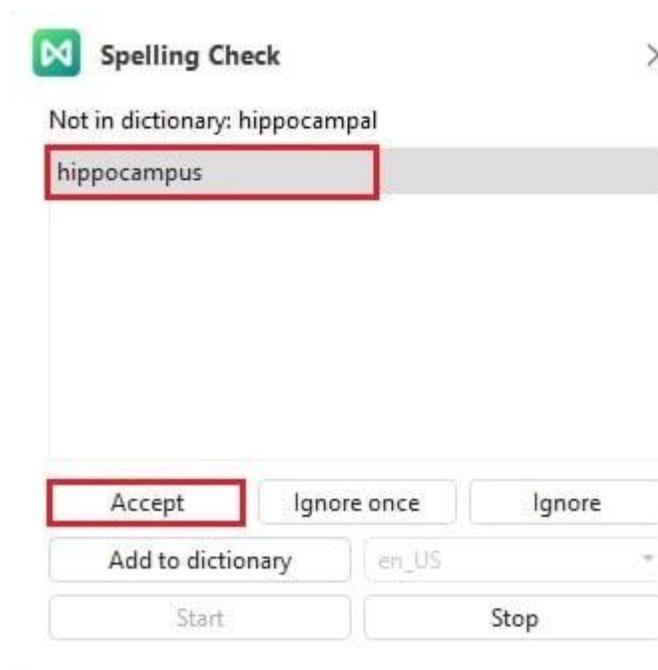

Click **Advanced > Spelling Check** or press **F7**.

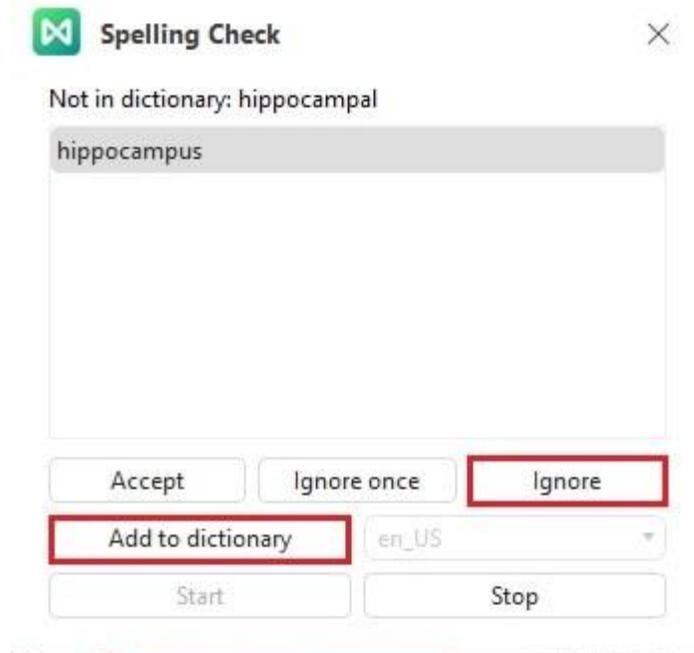

EdrawMind will then analyze the text in the mind map and look for incorrectly spelled words. It will inform you if there are no spelling errors.

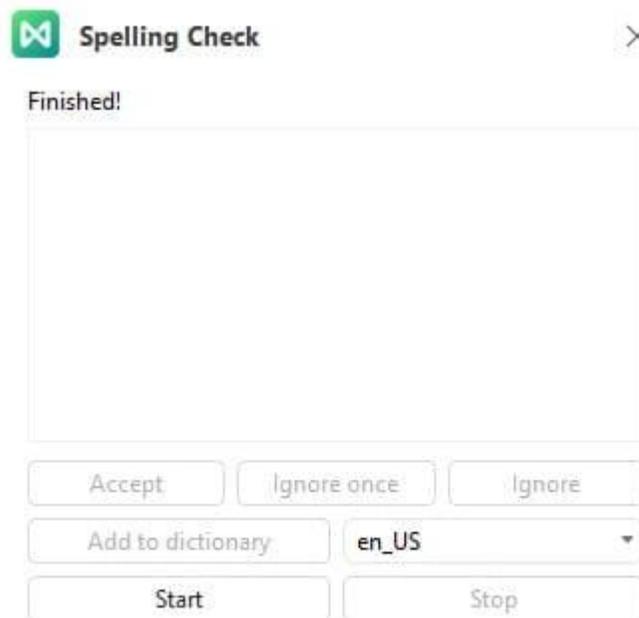

Suppose there are words with incorrect spelling. EdrawMind will show you an incorrectly-spelled word and suggest corrections. Select the correct spelling and click **Accept**.

If you believe the word is correctly spelled, click **Ignore**. You can also click **Add to Dictionary**, so EdrawMind will not consider it a spelling error next time.

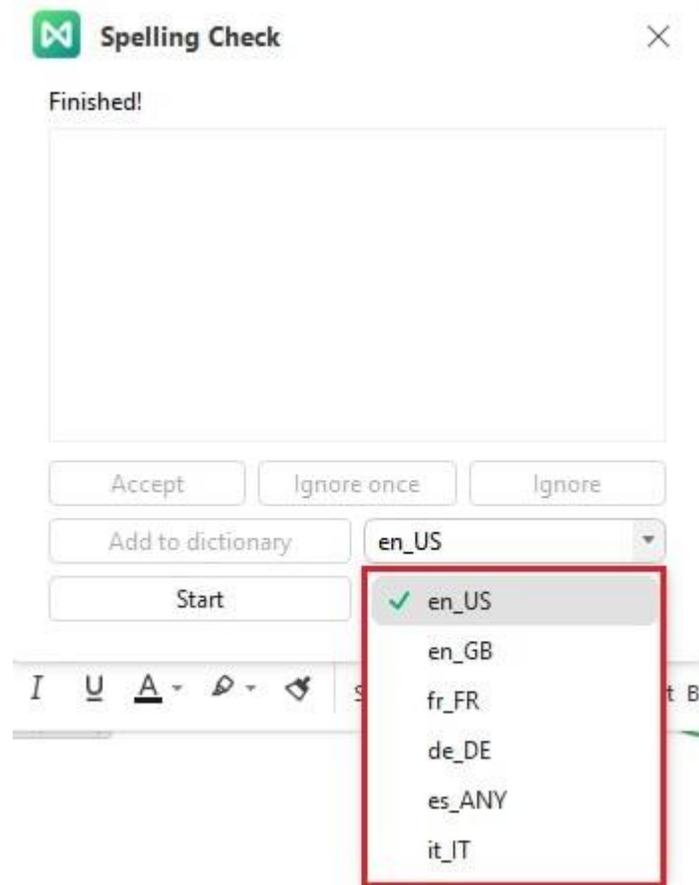

After pressing Accept or Ignore or Add to dictionary, the dialogue box will show the next spelling error. Repeat the process until there are no more spelling errors.

02 Changing the Language

EdrawMind's Spelling Check can check six languages. It includes USA and British English, French, German, Italian, and Spanish. To set the correct language:

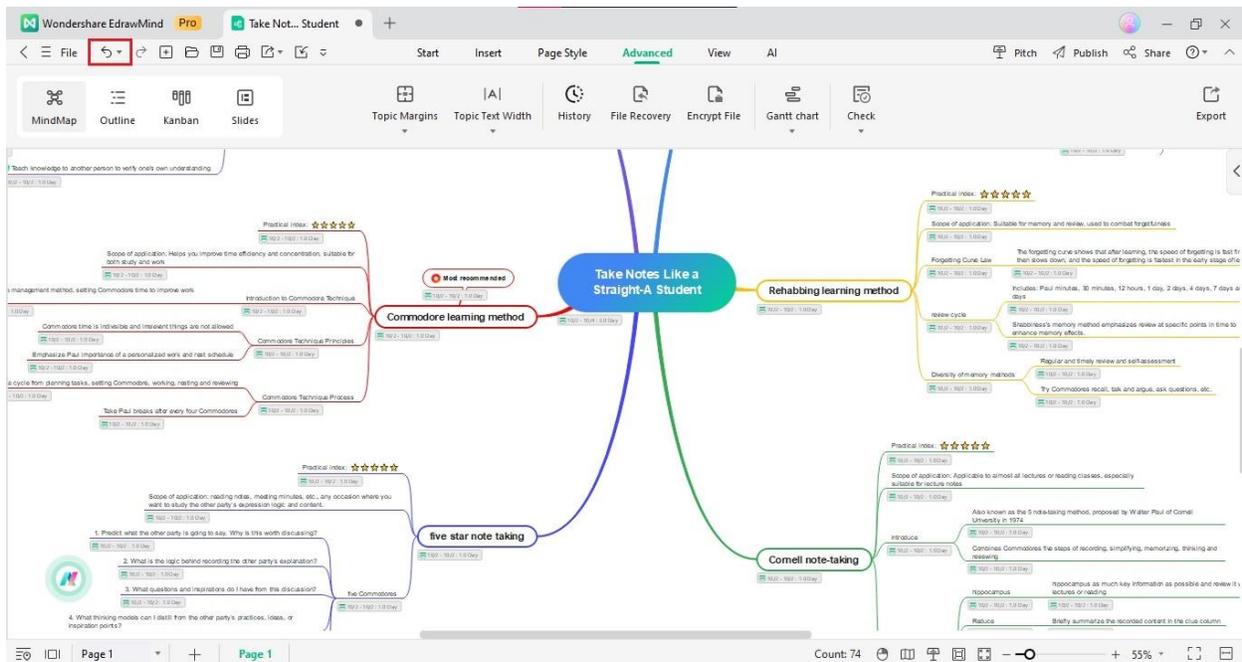

Click en_US on the dialogue box. Select the correct language.

Undo and Redo

The Undo and Redo actions are available on EdrawMind. Undo reverses your last action. Meanwhile, Redo reverses your last Undo action. To use these functions, follow the guide below.

Suppose you want to reverse your previous action. For example, you want to bring back a Floating Topic you just deleted. Press **Ctrl + Z** or click the Undo button on the top toolbar.

Suppose you want to reverse your previous Undo action. For example, you decided that you actually do not want the Floating Topic after bringing it back through Undo. Press **Ctrl + Y** or click the Redo button on the top toolbar.

How to Encrypt a File

EdrawMind offers a feature to encrypt files, which lets you protect your files with a password. This allows you to ensure only people with permission can access your file. Follow the steps below to encrypt a file.

Click **Advanced > Encrypt File**.

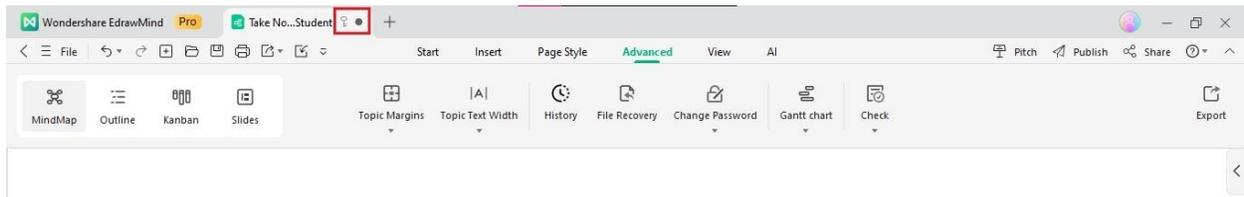

Set a Password, then retype the password on Confirm Password. Take note that the password is case-sensitive.

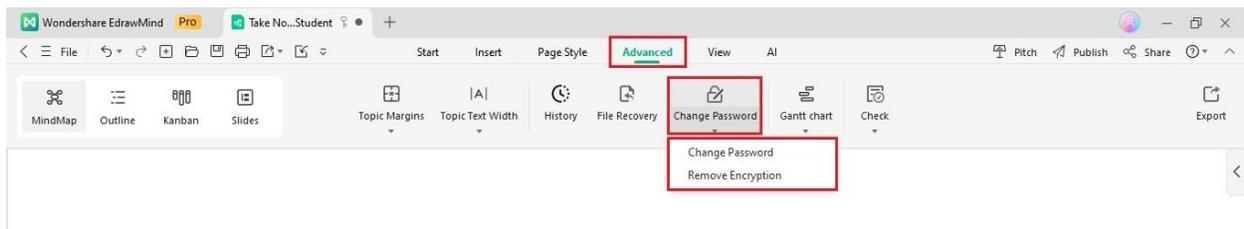

You can click and hold the eye button to see the password in plain text. This will allow you to verify if it is your desired password.

Click OK. You will see a “key” icon appear beside the file name. It indicates that the file is now encrypted.

To change the password or remove encryption. Go to Advanced > Change Password and click the corresponding option on the pop-up menu.

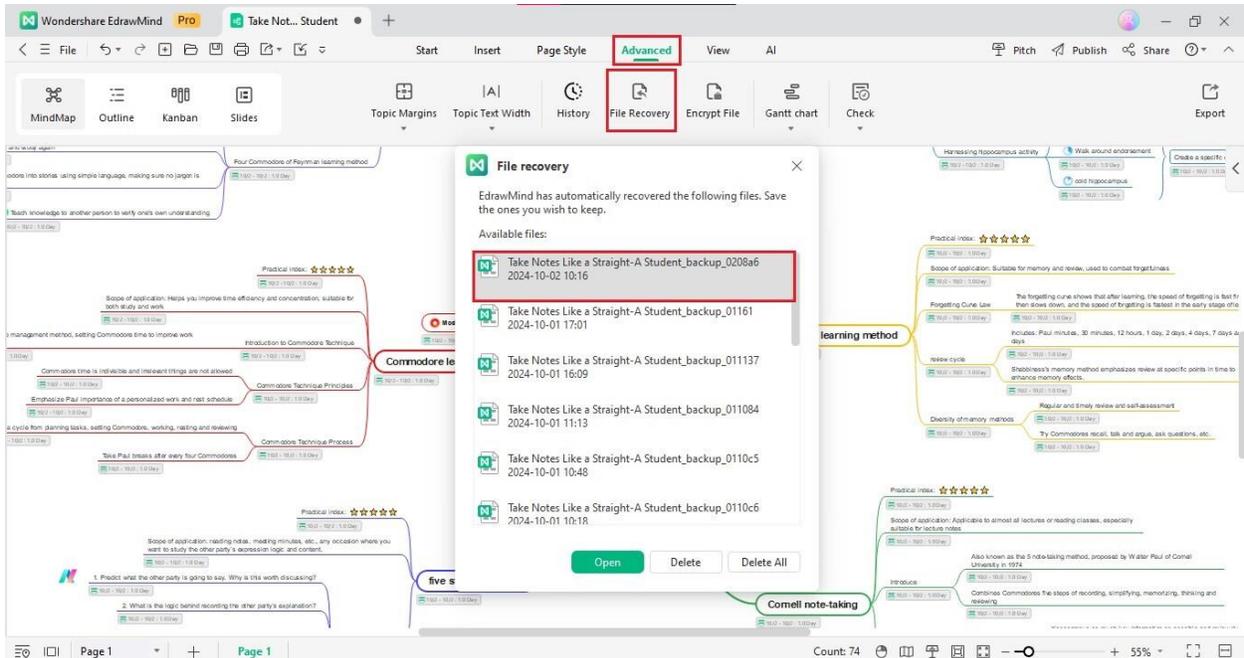

Recover a File

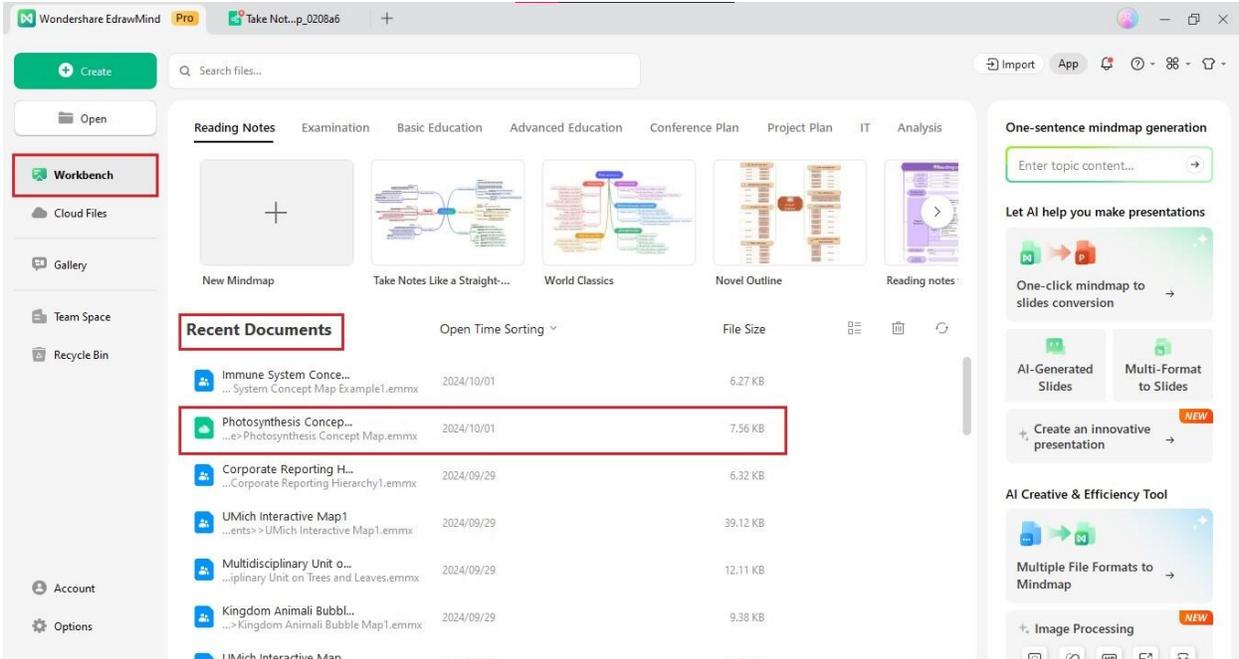

EdrawMind offers a feature to recover your files in case of was a sudden crash or an unintentional deletion. Here's how to do it:

Step 1 Go to **Advanced > File Recovery** on the top navigation bar.

Step 2 Select the file you want to recover from a pop-up menu.

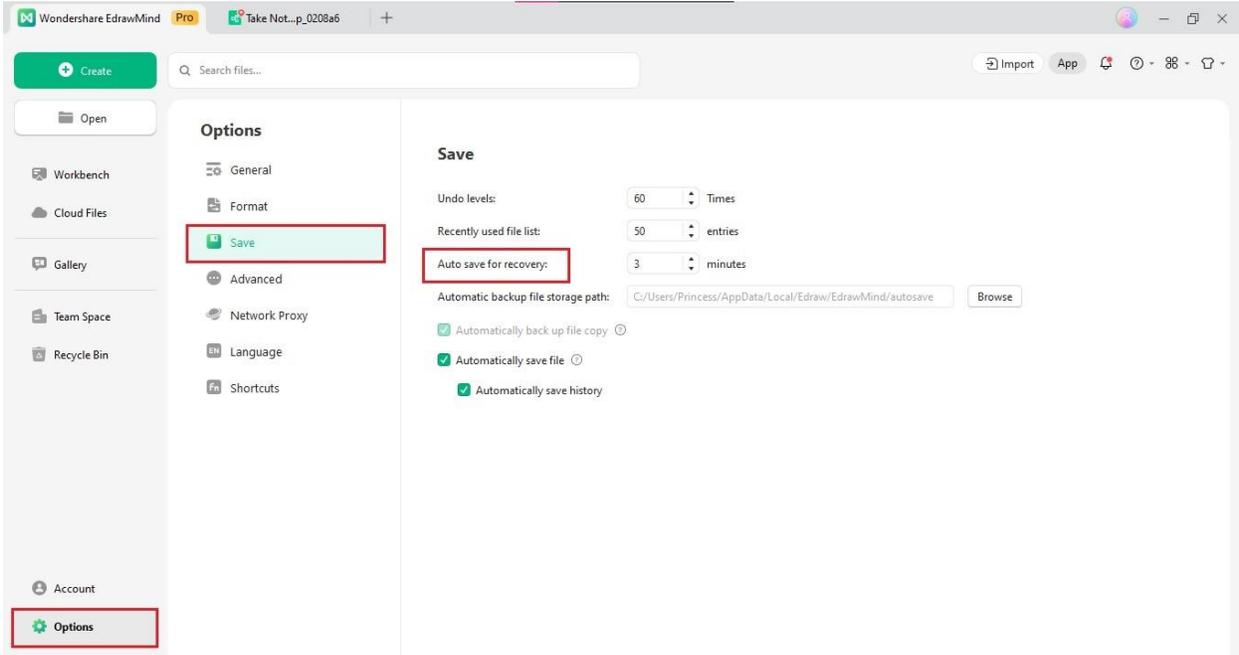

Alternatively, you can go to **Workbench**, and then the unsaved documents will show up.

Set the Auto-saved Recovery Mode

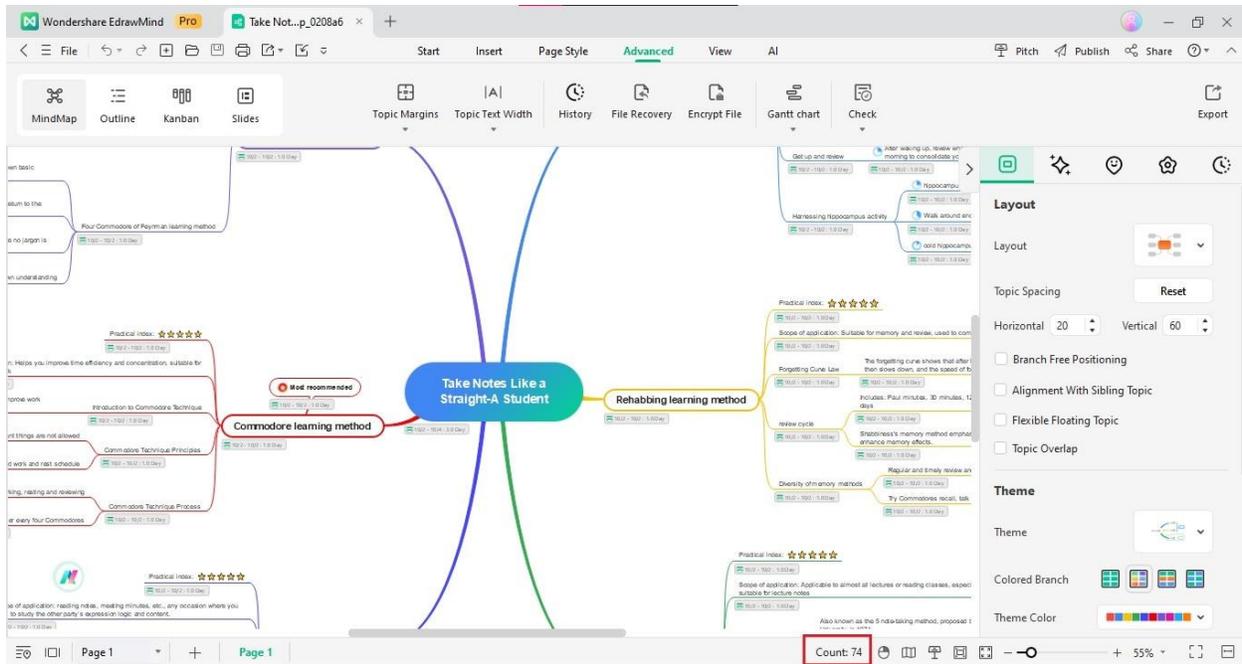

Step 1 Go to File > Options > Save to set the interval duration of every auto-save.

Topic Count

Knowing the total number of topics helps you understand the structure and organization of your mapped information. EdrawMind offers a Topic Count feature to help you track the count.

Navigate to the bottom of the canvas and look for the word Count. For the free version, there is a limit to the total number of topics and sub-topics you can create.

Note:
If you click on a topic, the number at the position will become the sequential number of the main topic or the sub-topic.

View Mind Map

View Mind Map

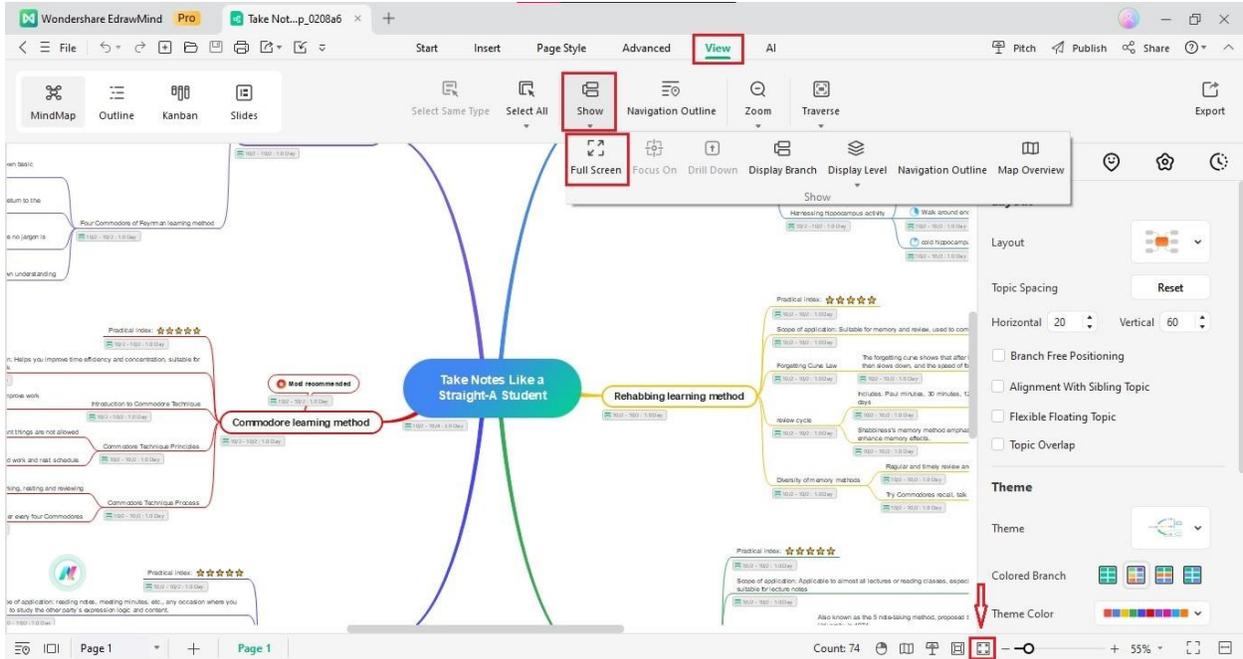

EdrawMind offers various methods to navigate, present, or view your mind maps. You can choose to use full-screen mode for a better overview, explore per level to delve into details or focus on specific topics for a targeted perspective.

How To Enter, Exit Full-Screen Mode

Working in full-screen mode with mind maps, charts, and diagrams provides a clearer picture, helping you understand the complex workflows. This focused approach eliminates distractions, allowing you to concentrate on the task at hand. Collaborating with your team becomes smoother, providing ample space for ideas and notes. Additionally, presentations become more effective, ensuring clear visibility for the audience.

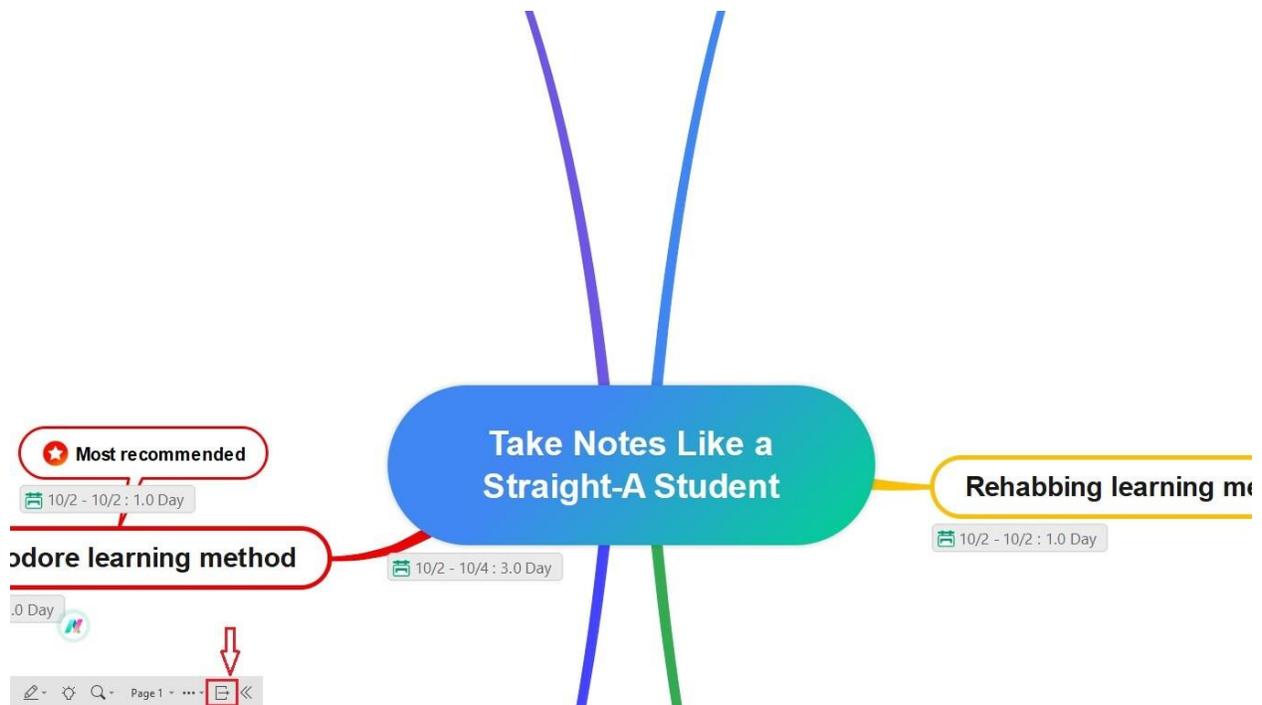

There are several ways to view and edit your charts and diagrams in full-screen mode.

- Go to the View tab in the upper navigation pane and click Show > Full Screen.
- Press the keyboard shortcut Ctrl + F5 or only F11.
- Click the full screen icon in the status bar below the canvas.

There are two ways to exit viewing in full-screen mode.

- Click the Exit brainstorming icon in the status bar to close the full screen mode.
- Press the keyboard shortcut Esc to exit full screen mode.

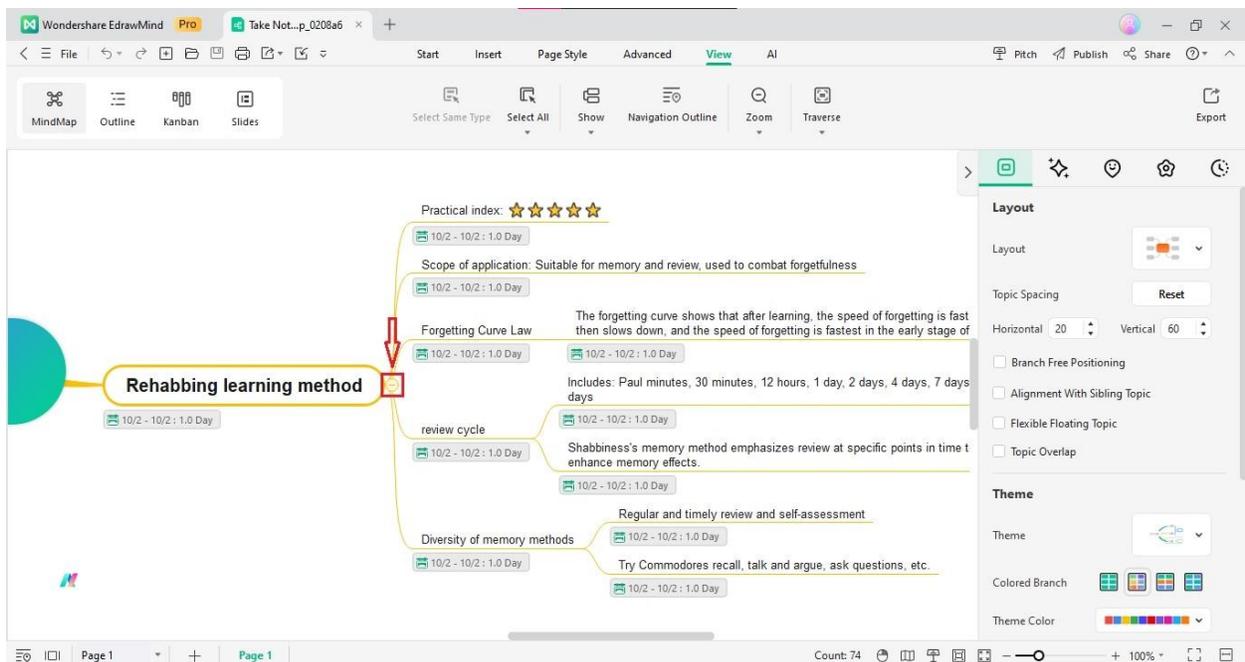

How to Fold and Unfold Branches

Folding parts of a diagram lets you focus on one section at a time when it gets too complex or overwhelming. It makes it more manageable to navigate and understand. When working in a team, folding allows you to hide and reveal specific parts as discussions evolve, keeping the focus on the topic at hand. For troubleshooting or brainstorming, folding sections might help identify issues step by step.

Follow one of these steps to fold and unfold the branches of the diagram on the canvas.

- **Fold Each Level:** Select a Topic and click the minus icon on the right side of the Topic.

- **Fold All Subtopics:** Press the keyboard shortcut **Ctrl + F3** to fold all subtopics. But it doesn't apply to the Main Idea and Main Topic.
- **Unfold Each Level:** Click the number beside the Main Topic to unfold the branches for each of them.

How To Display Level

When you display only a specific level within a diagram, you can focus your attention on a particular layer of information. It helps you dig into the details without being overwhelmed by the diagram. There are several ways to view only specific levels.

- **Display Per Level or All Levels:** Go to the View tab in the upper navigation pane and click Show > Display Branch to display the complete diagram.

- **Display Selected Level or All Levels:** Go to the View tab in the upper navigation pane and click Show > Display Level drop-down ...or All Levels.

How To Drill Down Topics

Hiding content and revealing only the main topic is effective, especially in presentations. It generates curiosity and allows a step-by-step exploration of topics. This gradual reveal keeps the audience engaged and ensures a logical flow when delving into details.

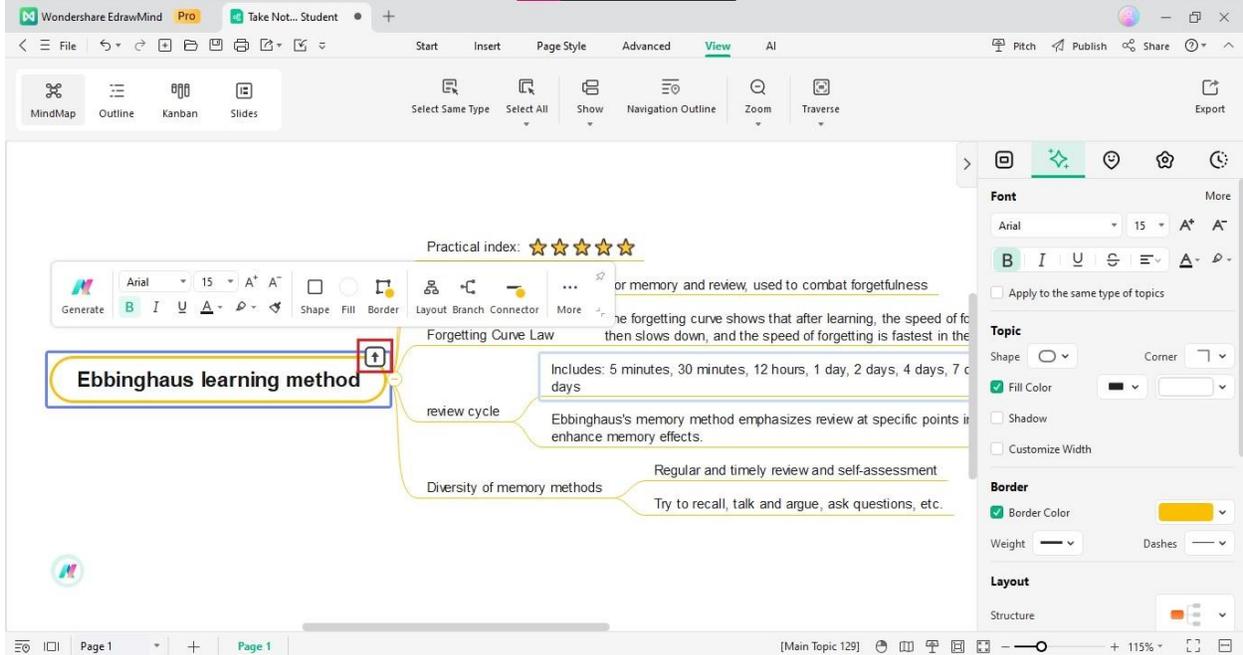

There are two ways to drill down the topics on your diagrams.

- Select a Main Topic or Subtopic on the canvas. Press F4 or go to the View tab in the upper navigation pane and click Show > Drill Down.

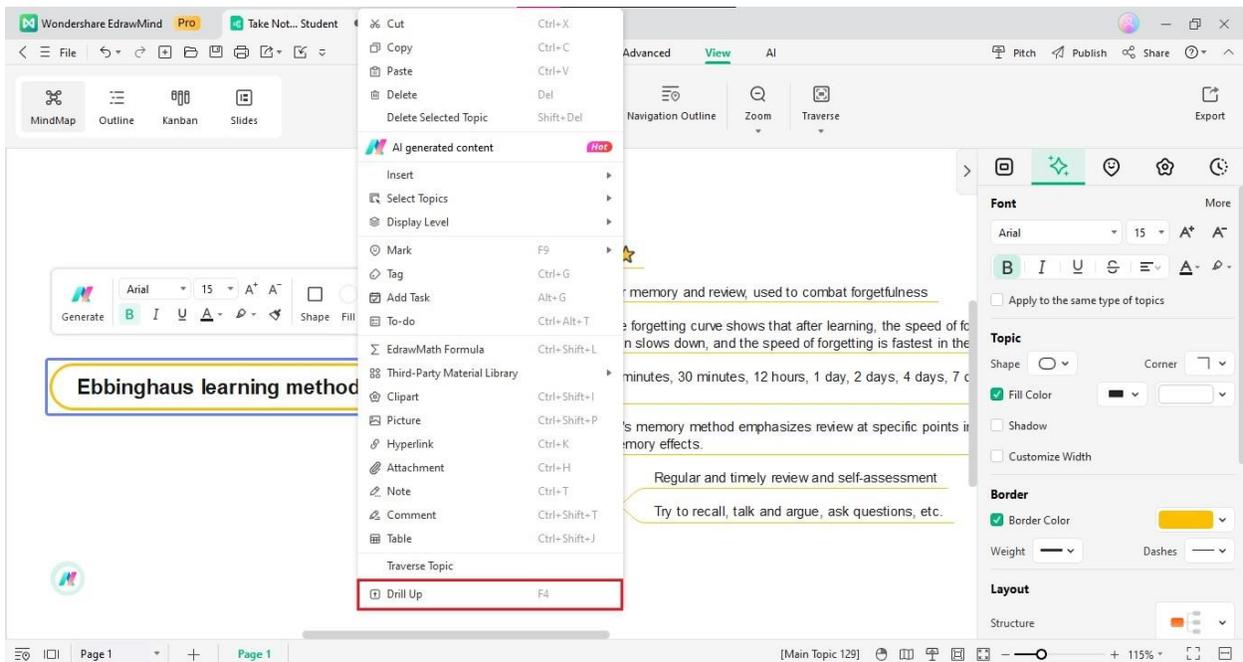

There are several ways to drill up the topics (already in the Drill Down mode).

- Select a Main Topic and click the arrow icon on the Main Topic shape.
- Press F4.

- **Select a Main Topic, right-click, and select Drill Up.**

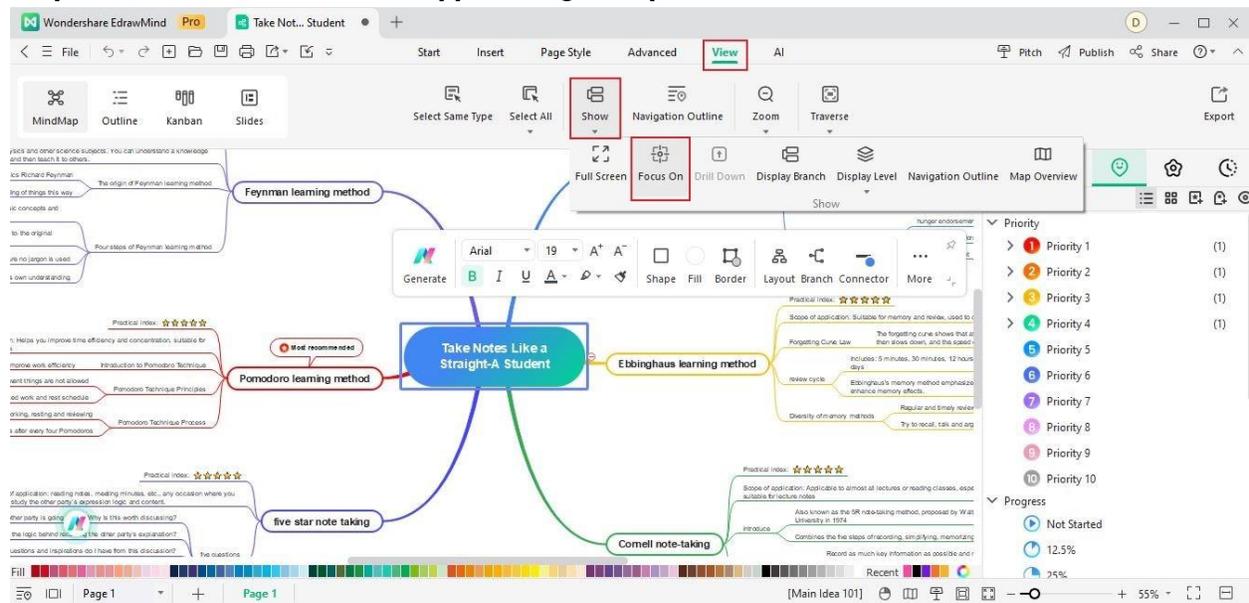

How To Focus on Selected Topic

The Focus On feature in EdrawMind brings the chosen topic right to the center of the canvas. When you're talking about that topic, it is easily visible and helps maintain the audience's attention. This feature makes meetings and discussions more organized, keeping everyone on track.

Here is how to use the Focus On feature:

Step 1 Select a topic or several branches in the canvas.

Step 2 Go to the View tab in the upper navigation pane and click Show > Focus On.

How To Show the Ratio

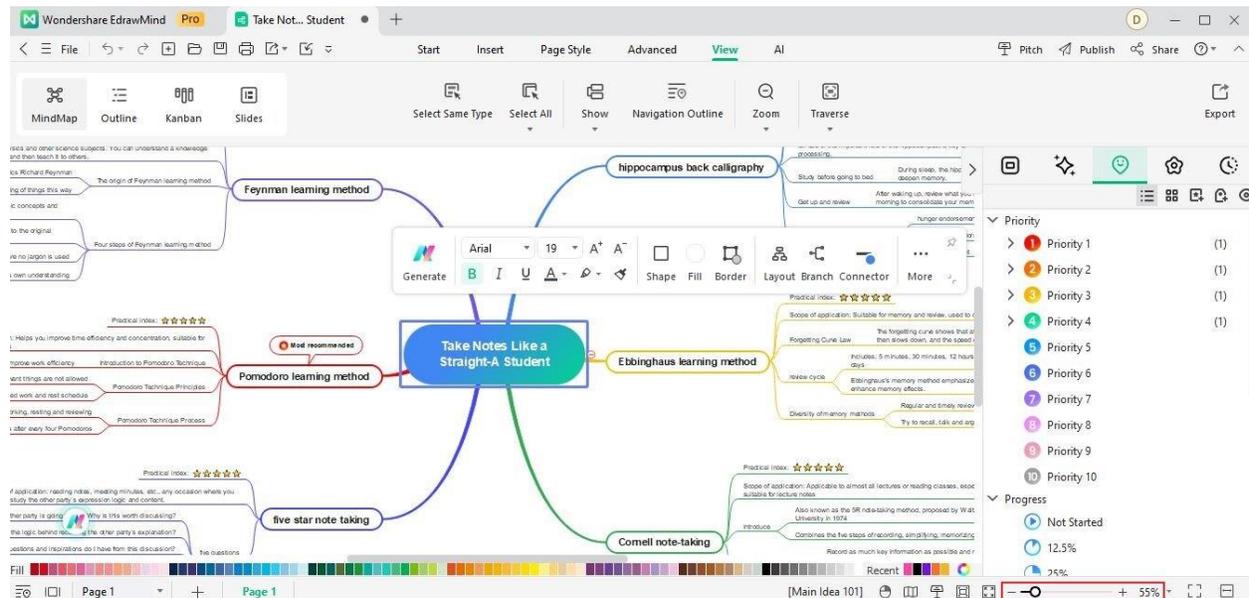

The Zoom slider in EdrawMind makes it easy to adjust the magnification of the content on the screen. It allows you to see more or less of the mind maps, depending on your needs. For example, you might zoom in on a mind map to see the details more clearly or zoom out to see the entire mind map at once.

01 Using the Zoom Slider

Here's how to use the Zoom slider in EdrawMind:

Step 1 Click the Zoom slider in the bottom right corner of the canvas.

Step 2 Drag the slider to the right to zoom in on the mind map. Otherwise, drag the slider to the left to zoom out.

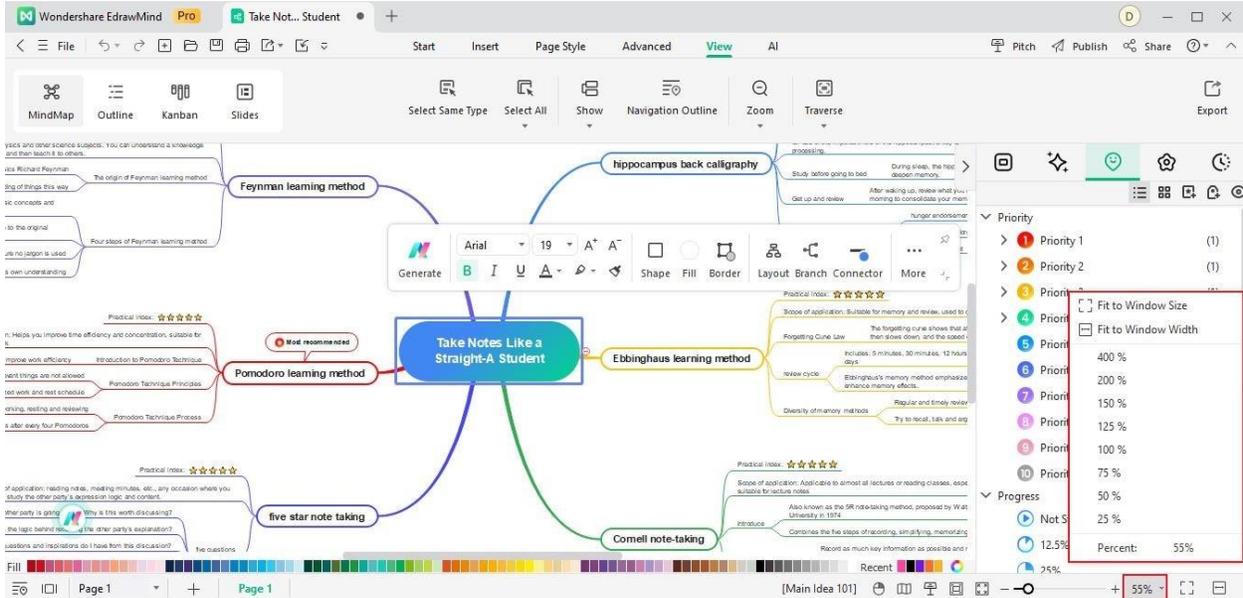

You can also click the (minus) - icon to decrease the zoom level by 10% or the (plus) + icon to increase the zoom level by 10%. The number next to the slider tells you the current zoom percentage or the zoom level.

02 Using the Zoom Level

You can also change the zoom level of the mind map from the zoom percentage. Here's how:

Step 1 Click the Zoom Level percentage display for more options.

Step 2 Enter a value in the Percent input field to specify the zoom level precisely or select from a predefined range of zoom levels from 25% to 400%. You can also choose to have the mind map fit to the window size or window width.

Select/Move Topics

This guide will show you how to select and move topics in EdrawMind.

01 Select Topics

Manually selecting topics in a diagram can be a laborious, error-prone, and challenging task. However, faster topic selection can improve a diagramming tool's efficiency, accuracy, and collaboration. EdrawMind offers an easier way to select topics that can help you customize, move, or highlight specific data points in your mind map.

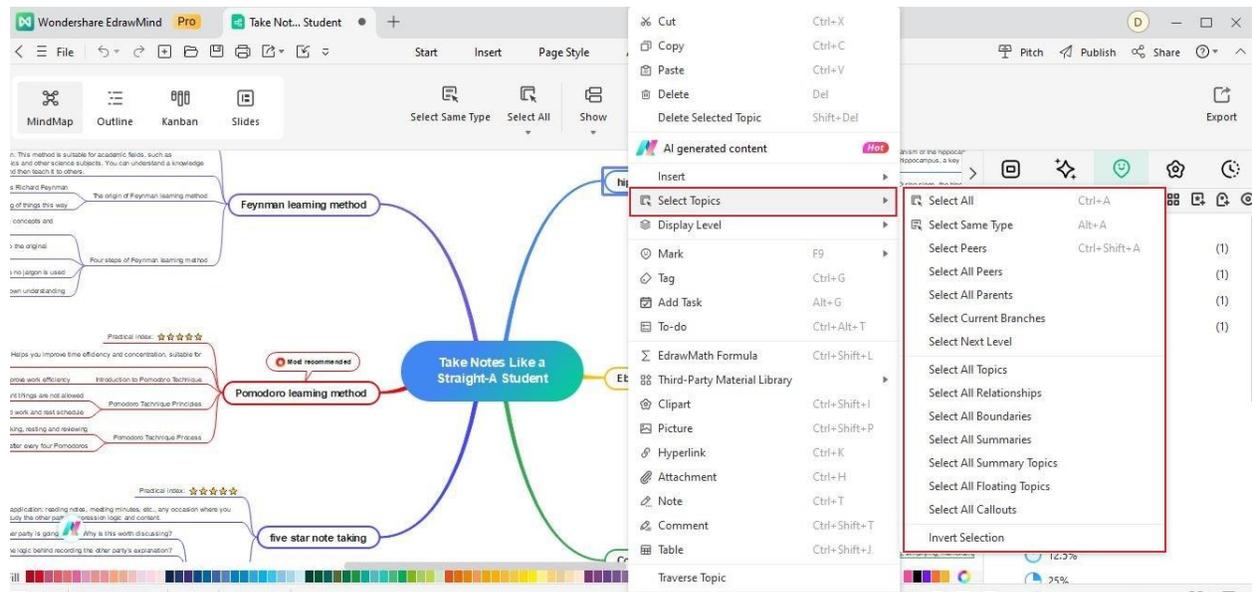

Step 1 Select a topic in your mind map.

Note:

After selecting a topic with your mouse, you can press the “up,” “down,” “left,” and “right” arrows on the keyboard to move to select neighboring topics.

Step 2 There are three ways to select more than one topic.

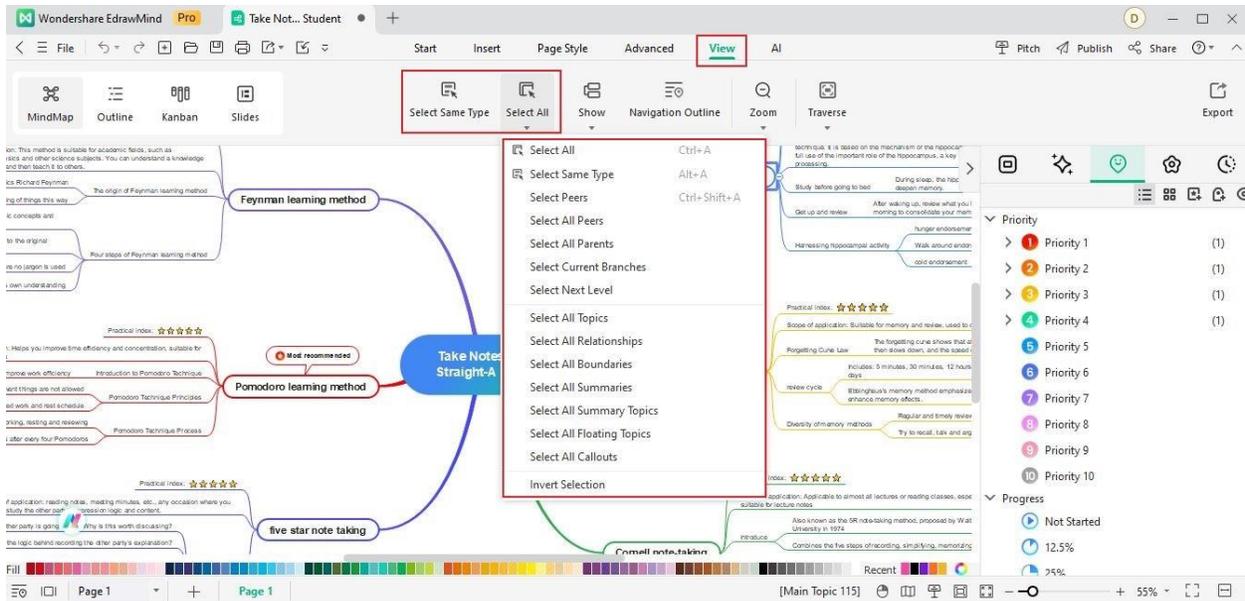

- **Right-click on the selected topic and choose Select Topics.** From there, you can select topics by their level or relationship to the current selection.

Note:

To select all the topics at the same level as the currently selected topic, choose **Select Topics > Select Same Type**.

- **Go to the View tab in the upper navigation pane and click Select Same Type or choose an option from the Select drop-down list.**

02 Move Topics

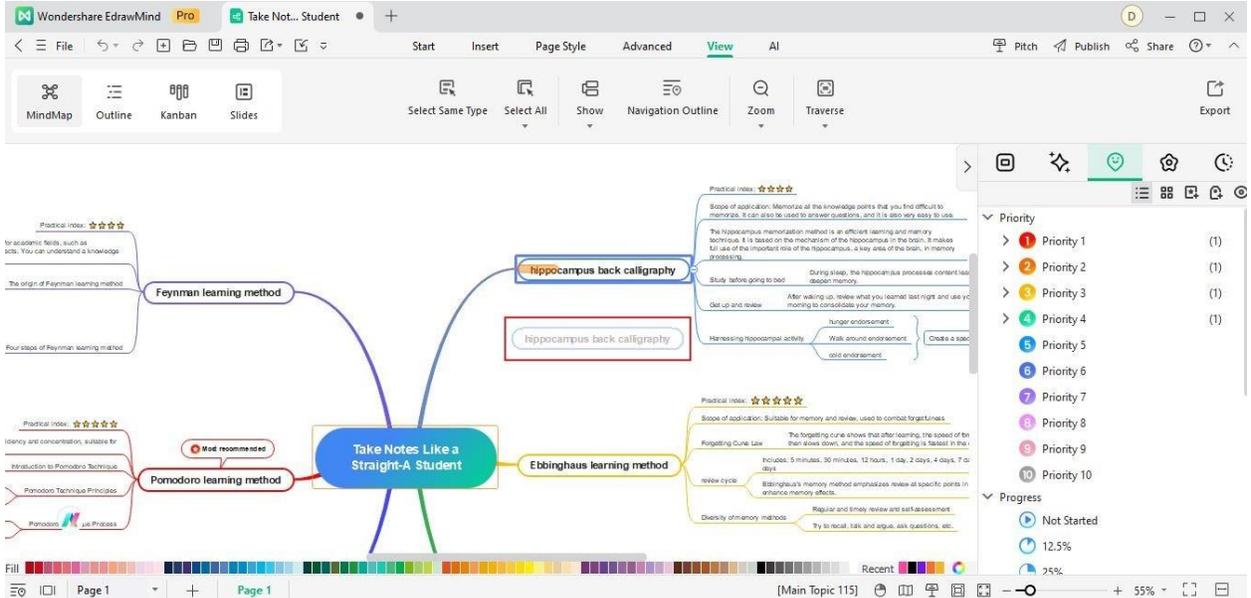

EdrawMind makes it easy to move topics around in your mind maps. You can use the drag-and-drop feature to move topics anywhere on the infinite canvas or use keyboard shortcuts to move topics on the same level.

Drag-and-Drop

When you move a topic in EdrawMind, any subtopics, and connectors connected to the selected topic will also move with it. It allows you to easily rearrange your diagram without having to move each topic manually.

Step 1 Select a topic in your mind map.

Step 2 Drag and drop the topic to the desired location on the canvas. You will see a visual highlight or mark indicating where to place the topic.

Action	Shortcut(s)
Move up	Ctrl + Shift + Up Arrow
Move down	Ctrl + Shift + Down Arrow
Move to start	Ctrl + Shift + Home
Move to end	Ctrl + Shift + End

Open, Save, Share and Print

Open/Import a Mind Map

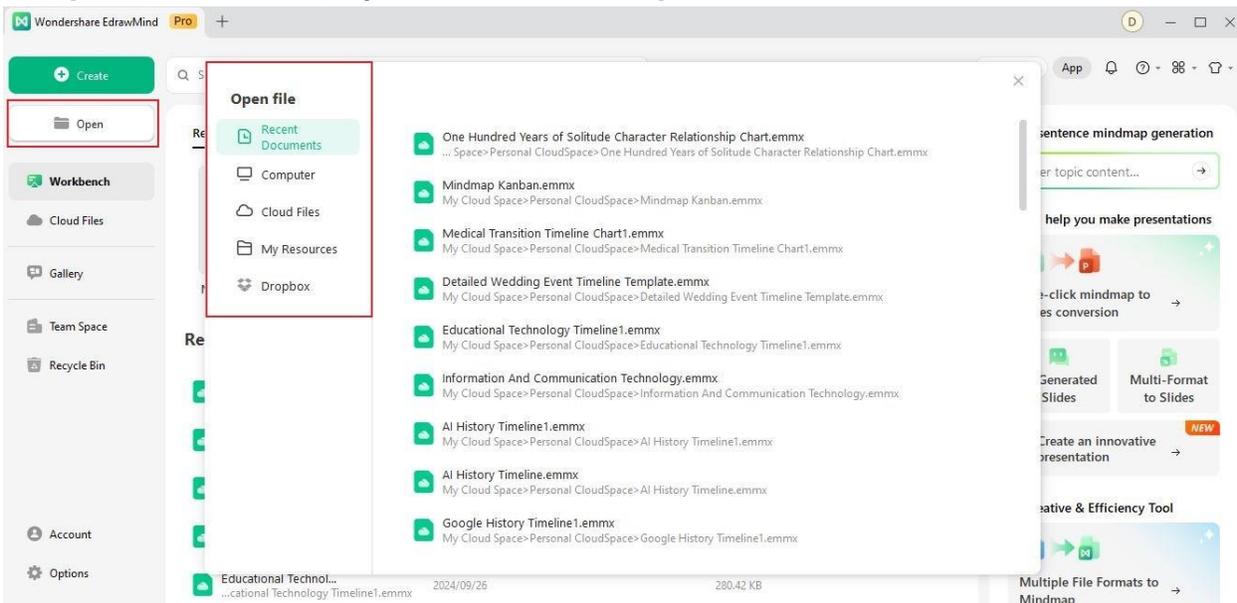

EdrawMind lets you open and import a mind map from several locations to help you become more productive. You can easily organize mind maps by the project, the client, or any other criteria that make sense. EdrawMind makes it easy to find the mind map you need.

01 How To Open a Mind Map File

Follow these steps to open a mind map:

Step 1 Click the Folder icon on the quick access toolbar on the top navigation pane to open the Mind Map.

Step 2 Choose the file location from the Open section. Select from Recent Documents, Computer, Cloud Files, My Resources and Dropbox.

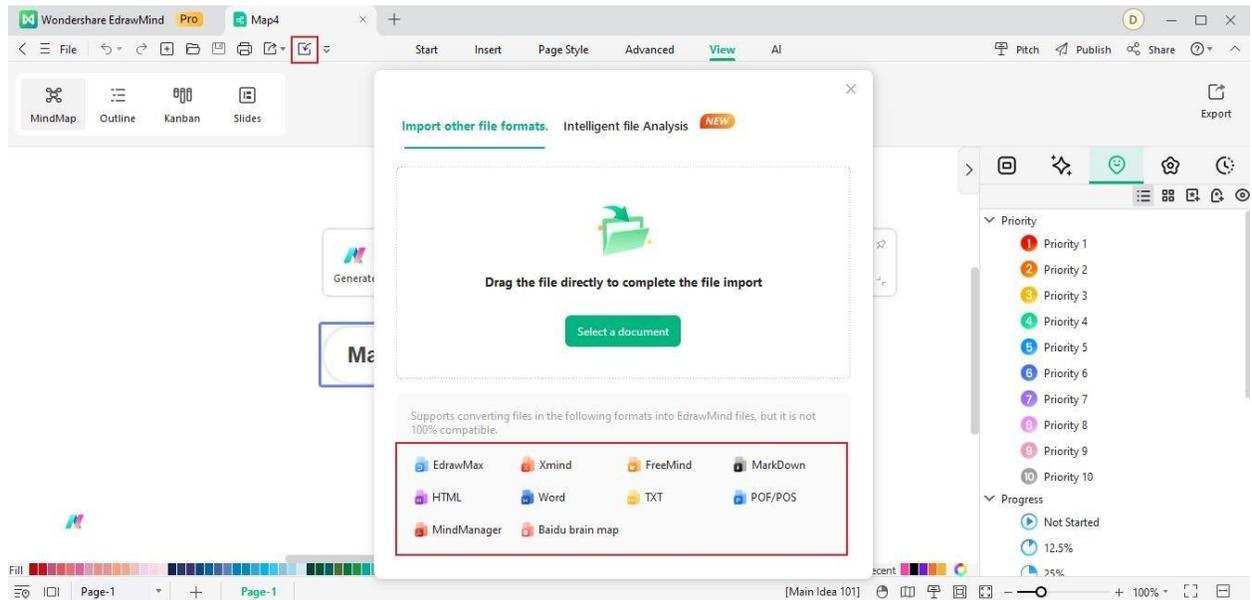

02 How To Import a File

You can import files in various formats, including MindManager, XMind, FreeMind, EdrawMax, Word, HTML, and Markdown in EdrawMind. However, note that the imported files may not be 100 percent compatible with it.

Follow these steps to import a file:

Step 1 Click the Import icon on the quick access toolbar on the top navigation pane.
Step 2 Select a format below the Import other file formats section.

Step 3 Upload the file from your local storage.

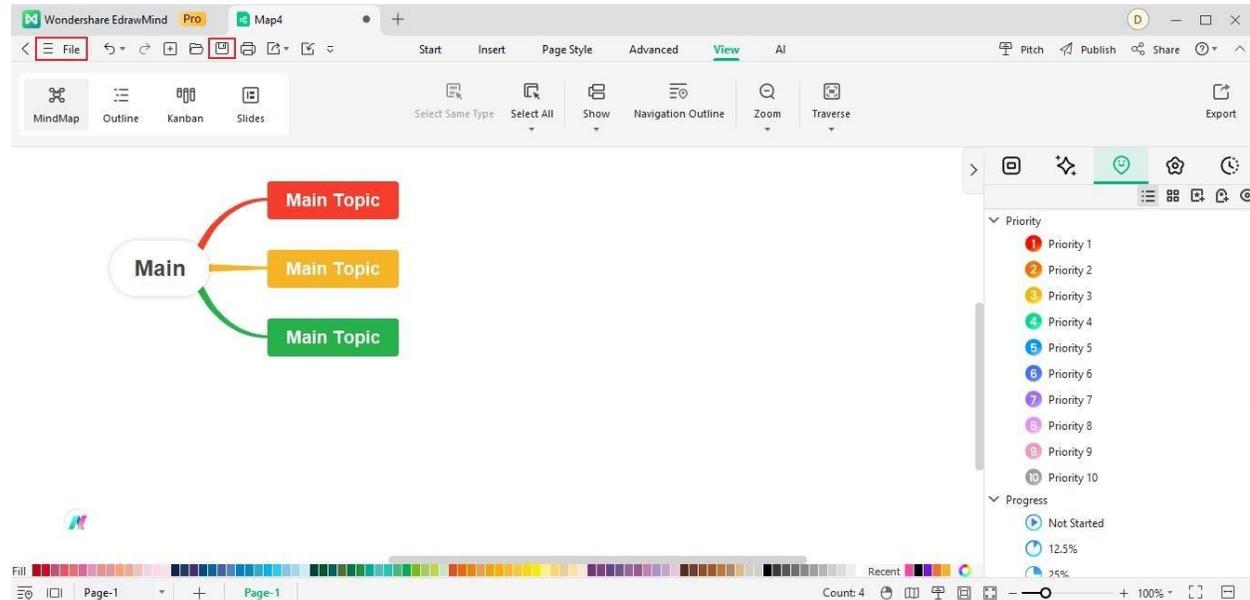

Save/Recover a Mind Map

Storing your mind maps in multiple locations can help protect data from loss or corruption. If something happens to your computer, you can still access your mind maps from your personal cloud storage or Dropbox account. In EdrawMind, you can do all these things and even save the mind maps as personal templates.

01 How To Save a Mind Map

Follow these steps to learn how to save your mind maps:

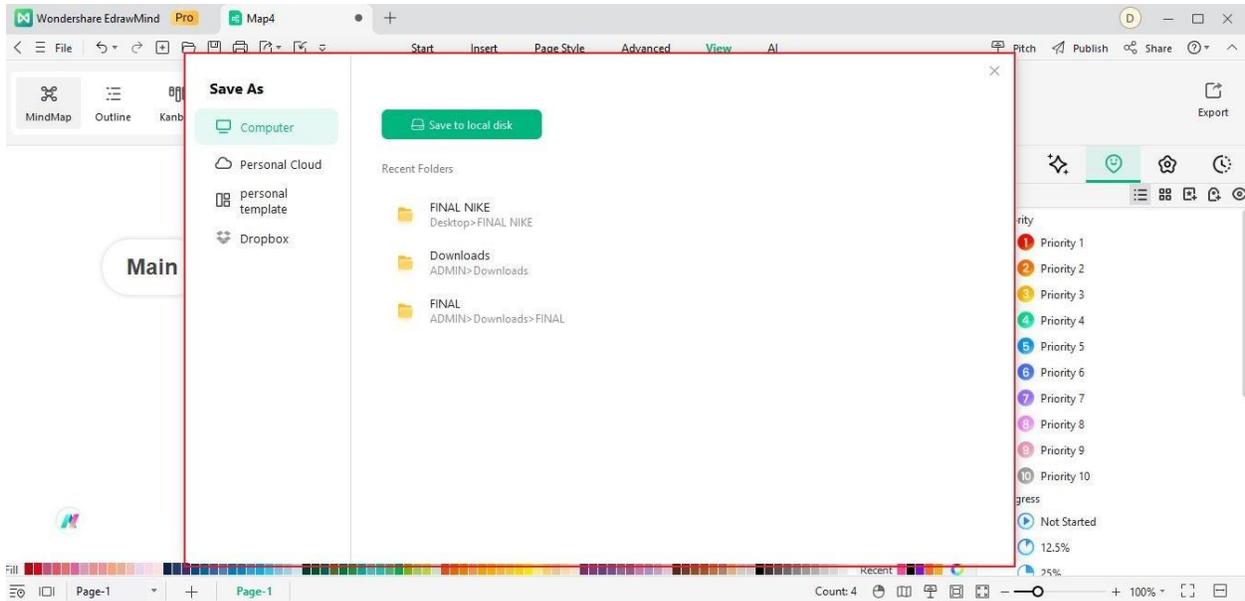

Step 1 Click the Save icon on the quick access toolbar on the top navigation pane once you have finished editing your mind map. Alternatively, click the File tab in the upper navigation pane.

Note:

You can also press the keyboard shortcut **Ctrl + S**.

Step 2 Choose **Save As > Computer, Personal Cloud, personal template, or Dropbox**.

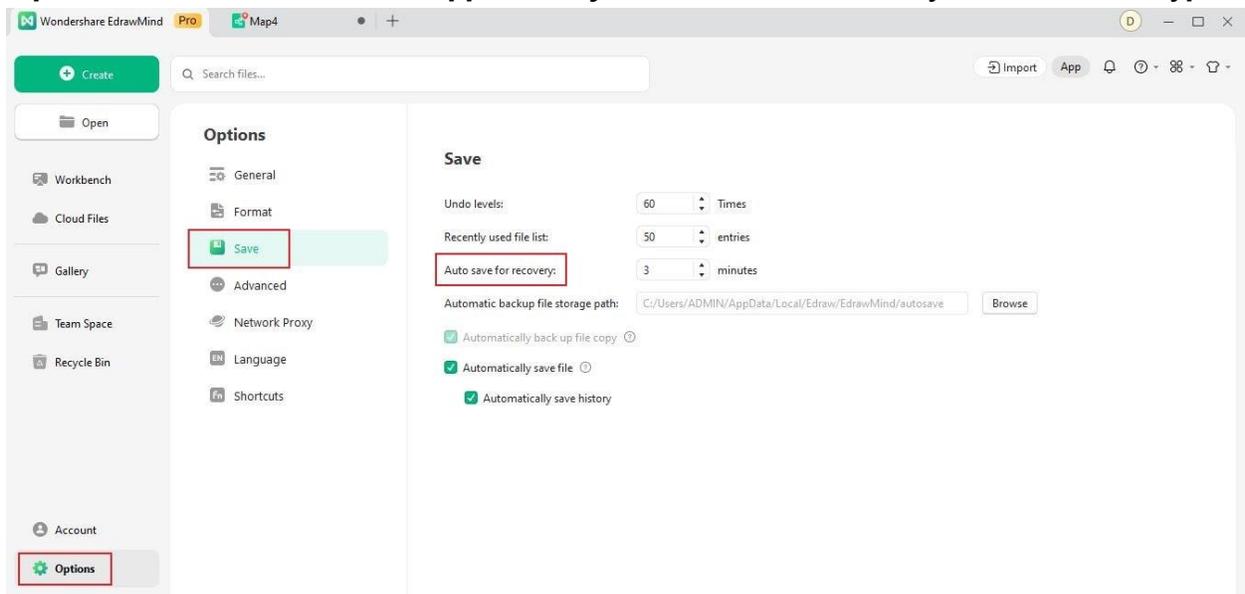

02 How To Auto Save a Mind Map

EdrawMind has a flexible auto-save feature that lets you save your mind map files at the frequency that works best for you. The default interval is three minutes, but you can change it. Here's how:

Step 1 Click the Return icon in the upper navigation pane.

Step 2 Choose Options > Save.

Step 3 In the Save section, enter the number of minutes in the Auto save for recovery input field. You can use the stepper to adjust the default value if you'd rather not type.

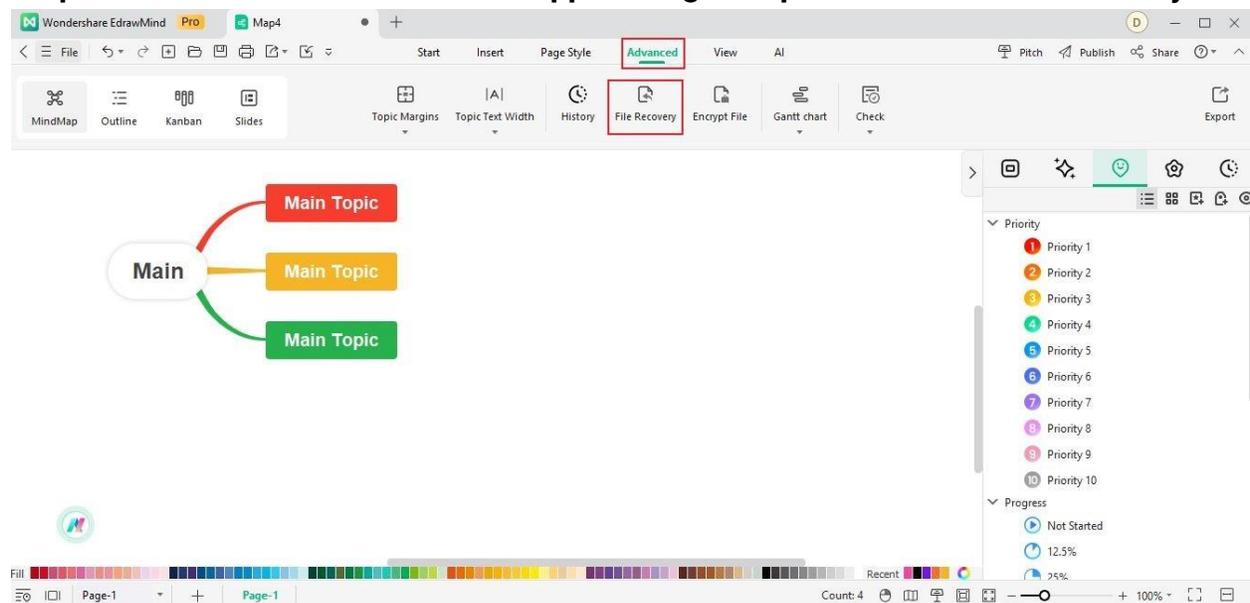

Note:

If you open a new mind map file, the auto-save feature will not save the file until you have manually saved it for the first time. After that, the software will automatically save the file every few minutes, as you specified in the auto-save for recovery settings.

03 How To Find and Recover Automatically Saved Files

This diagramming tool also allows you to easily restore previous auto-saved versions of your mind map file if needed. Follow these steps to learn how to find and recover automatically saved mind maps:

Step 1 Go to the Advanced tab in the upper navigation pane and click File Recovery.

Step 2 Select the file you need in the File recovery dialog box and click Open.

100%

The screenshot displays the Wondershare EdrawMind Pro interface. In the background, a mind map is visible with a central node labeled 'Main' and three branches, each ending in a box labeled 'Main Topic' (red, yellow, and green). A 'File recovery' dialog box is open in the center, listing several backup files with their names and timestamps. The first file, 'Map4_backup_0214e2', is highlighted with a red border. Below the list are 'Open', 'Delete', and 'Delete All' buttons. To the right, a 'Priority' list is shown with 10 items, each with a colored circle and a label from 'Priority 1' to 'Priority 10'. Below that, a 'Progress' section shows three items: 'Not Started', '12.5%', and '75%'. The bottom of the screen features a color palette, page navigation (Page-1), and a zoom level of 100%.

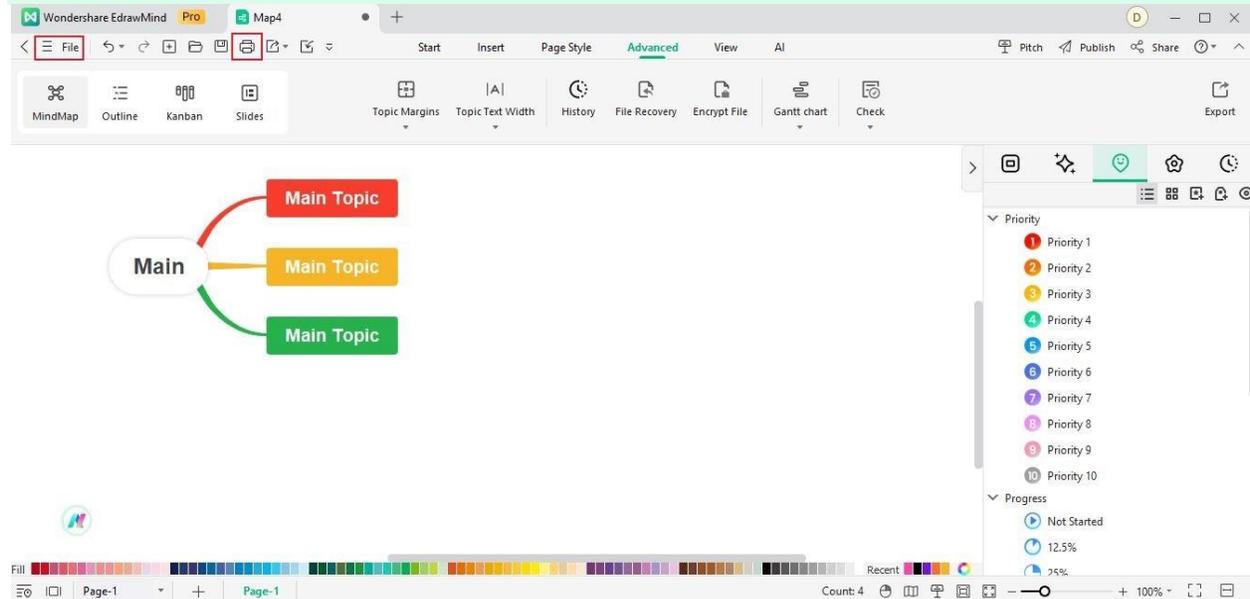

Print a Mind Map

Follow these steps to print your mind map:

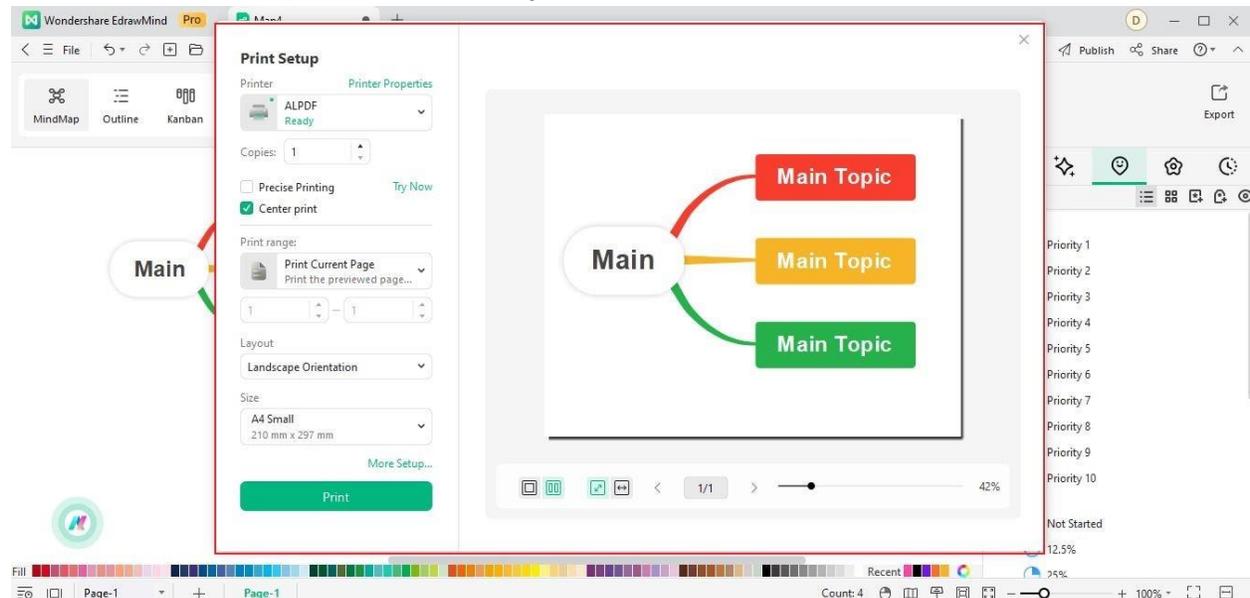

Step 1 Click the Print icon in the quick access toolbar on top. Alternatively, click the File tab in the upper navigation pane.

Note:

You can also press the keyboard shortcut **Ctrl + P**.

Step 2 Choose Print. Select the Printer, enter the number of Copies, change the Settings, choose the Pages to print, select the Layout, and set the Size of the file.

Step 3 Click Print to start printing the file.

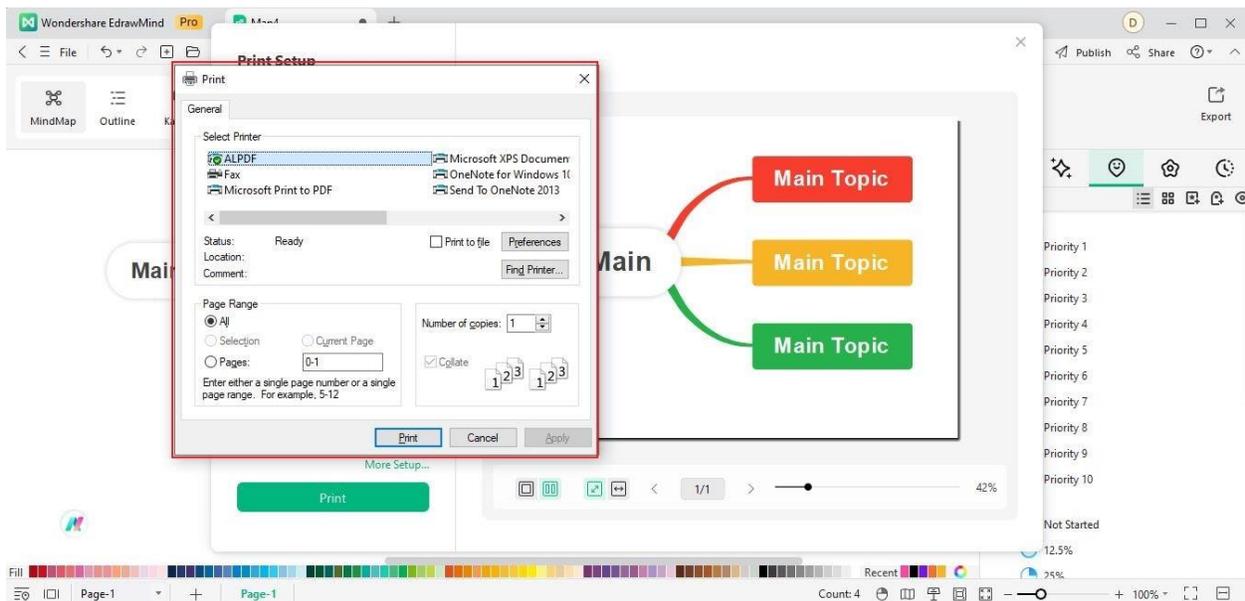

Printer Properties

Follow these steps to change more printer properties:

Step 1 Click Printer Properties in the Print section.

Step 2 In the Print dialogue box, you should see the following settings in the General tab:

- **Select Printer:** Select from the available printers connected.
- **Print to file:** It is a way to save a document in a format that a different printer can use. Selecting Print to file can be helpful if you want to print the file on a printer with different capabilities than your current printer.
- **Page Range:** You can print all or a specific range of pages in the Page Range section. Select the All radio button to print all pages. To print a specific range of pages, enter the required number of pages in the Custom range.
- **Number of Copies:** Enter a value for the number of copies you want to print.

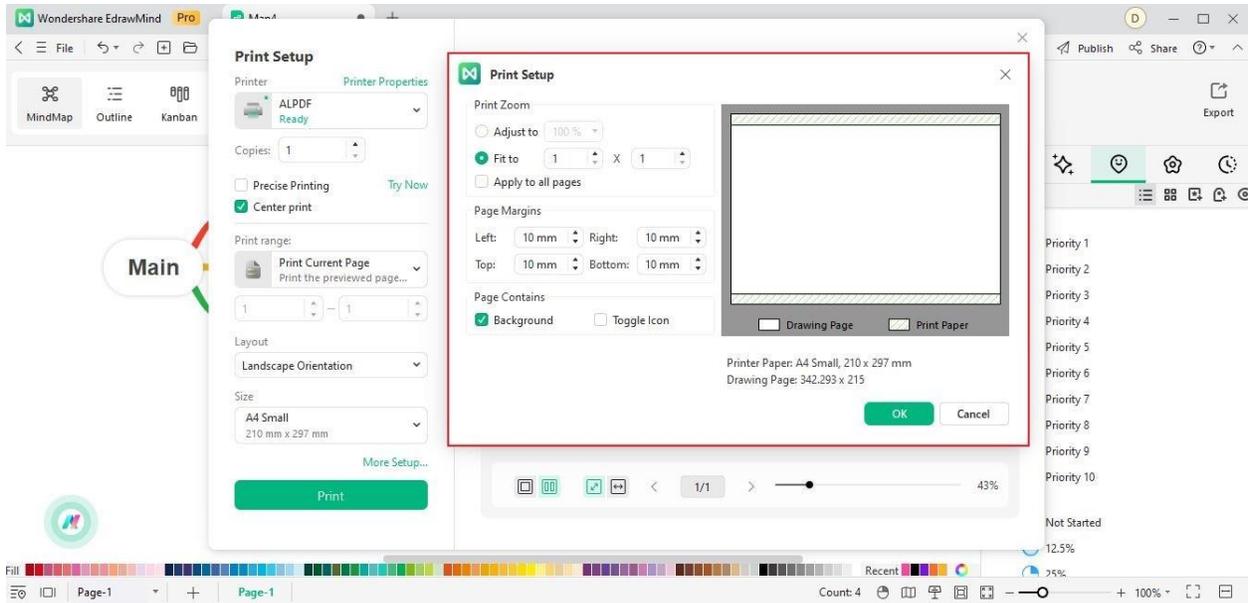

Step 3 Click Apply to save the changes. Then, click Print to start printing the file.

More Setup

Here are the steps on how to set up page print settings:

Step 1 Click More Setup... in the Print section.

Step 2 In the Print Setup dialogue box, you can change Print Zoom, Page Margins, and Page Contains sections according to your preferences.

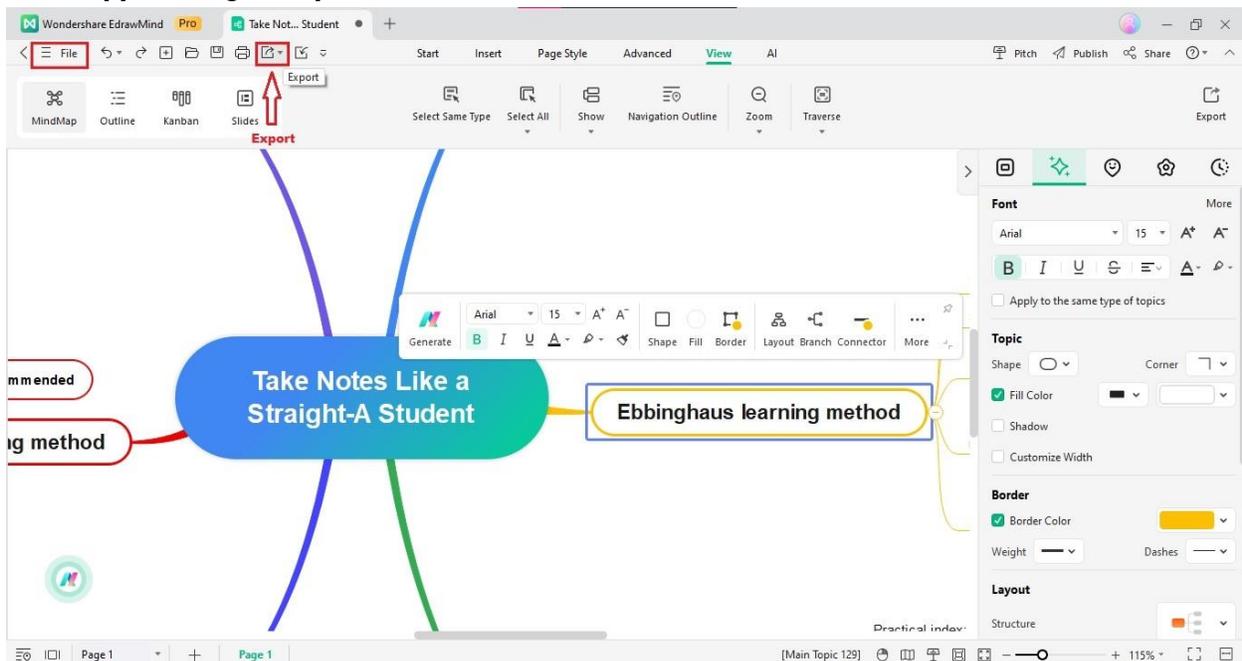

Step 3 Click OK to apply the changes and close the dialogue box.

Export a Mind Map

Mind maps can be a great way to share information with others. But not everyone uses the same diagramming tool. In Edrawmind, you can export the mind maps you create to different file formats and make them accessible to a wider audience. If you are working on a mind map with others, it can be helpful to be able to export it in a format that everyone can edit.

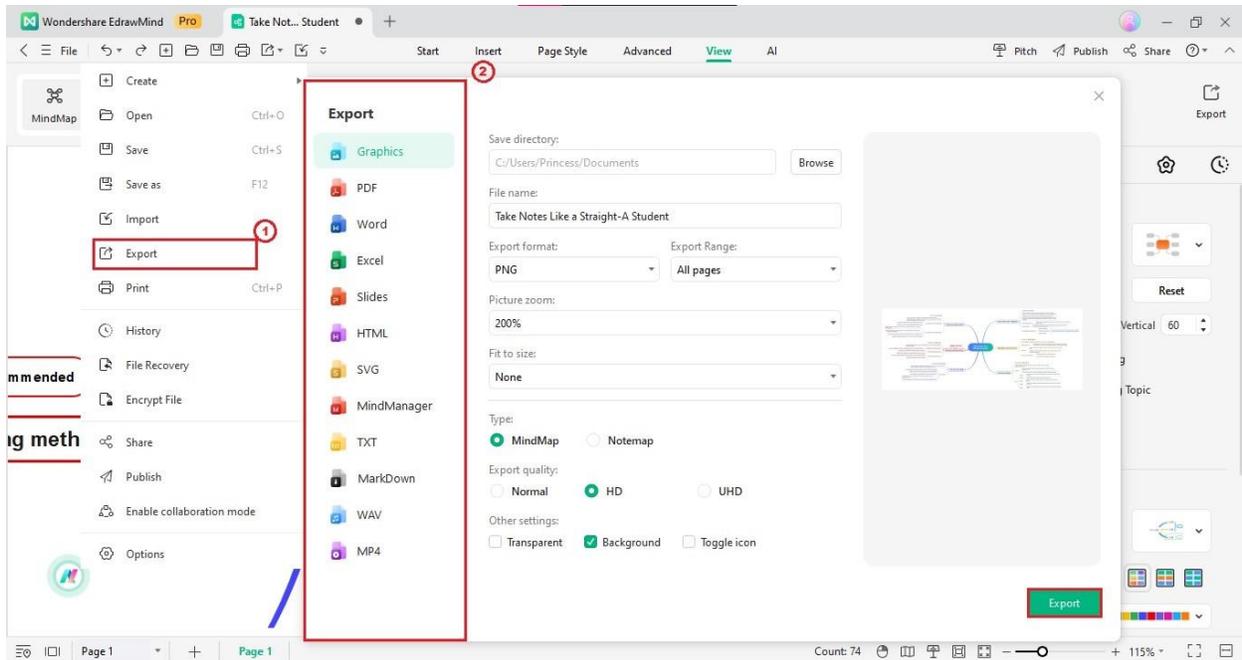

Follow these steps to export a mind map:

Step 1 Click the Export icon in the quick access toolbar on top. Alternatively, click the File tab in the upper navigation pane.

Step 2 Here are the two ways to select a file format for export:

- If you click the Export icon, select PDF or Graphics in the drop-down list. Otherwise, click More Formats for other options.
- Go to File > Export. Then, in the Export section, select Graphics, PDF, Word, Excel, PPT, HTML, SVG, MindManager, or TXT as a file format.

Step 3 Customize the Export settings to your liking. Then, click Export.

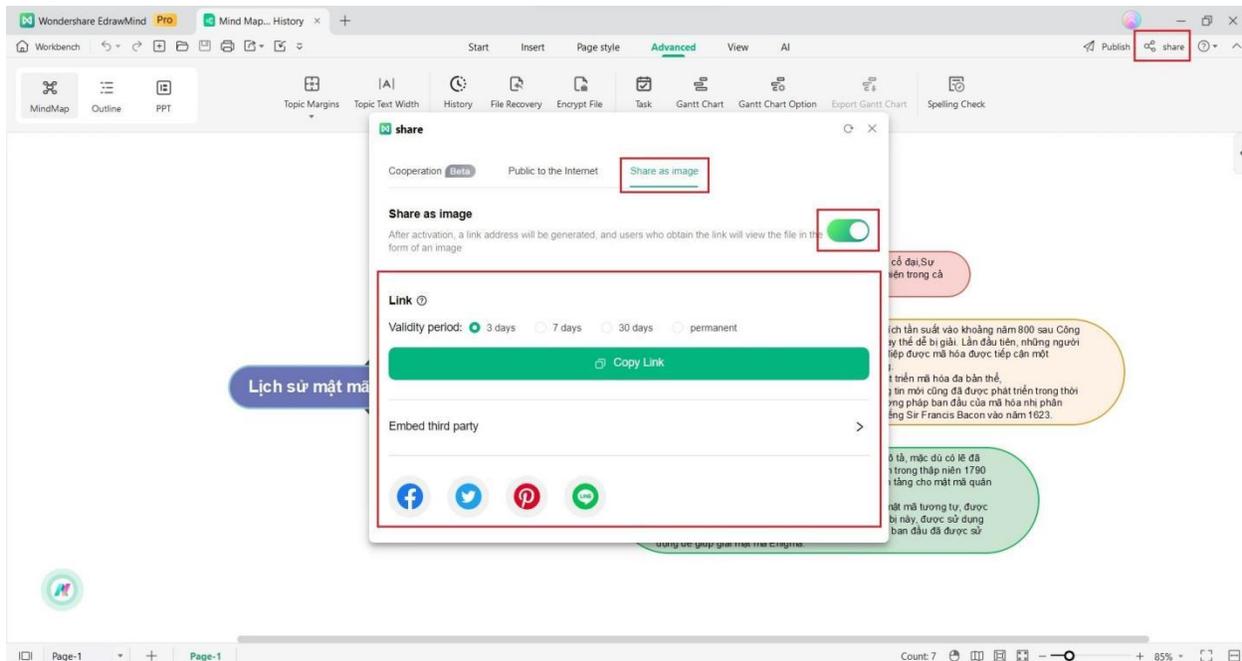

Share a Mind Map

Mind maps can be a great way to collaborate with others. By sharing your mind maps in different ways, you can make it easy for others to see your work and provide feedback. Follow these steps to share your mind maps:

Step 1 Click Share in the top right corner.

Step 2 In the Share dialogue box, there are several ways to share your mind map.

Step 3 Go to the Share tab.

- **Activate sharing as an image:** Turn the toggle button to the right for activation. This will allow you to take further sharing steps.
- **Share via a link with an expiration date.** Select a period in the Expires after section. Then, click Copy Link. This will create a link that is valid for a certain period. Also, anyone who clicks on this link will be able to view your mind map, but they will not be able to edit it.
- **Embed third party:** You can integrate the third party in SVG format. To do this, click on the Embed third party arrow in the right corner, copy the code, and embed it for integration.
- **Share to social media.** To share your mind map on social media, click on the icon of the platform you want to use. This will open a new window depending on the platform you choose.

Step 3 Go to the Public to the Internet tab and activate Multi-person collaborative editing mode by switching the toggle button. By turning the Public document link you can get the link to share the your mind maps with others to help them start their projects.

Cooperation **Beta** **Public to the Internet** Share as image ✕

Multi-person collaborative editing mode

Once turned on, it will be converted into collaboration mode, allowing multiple people to edit a document at the same time.

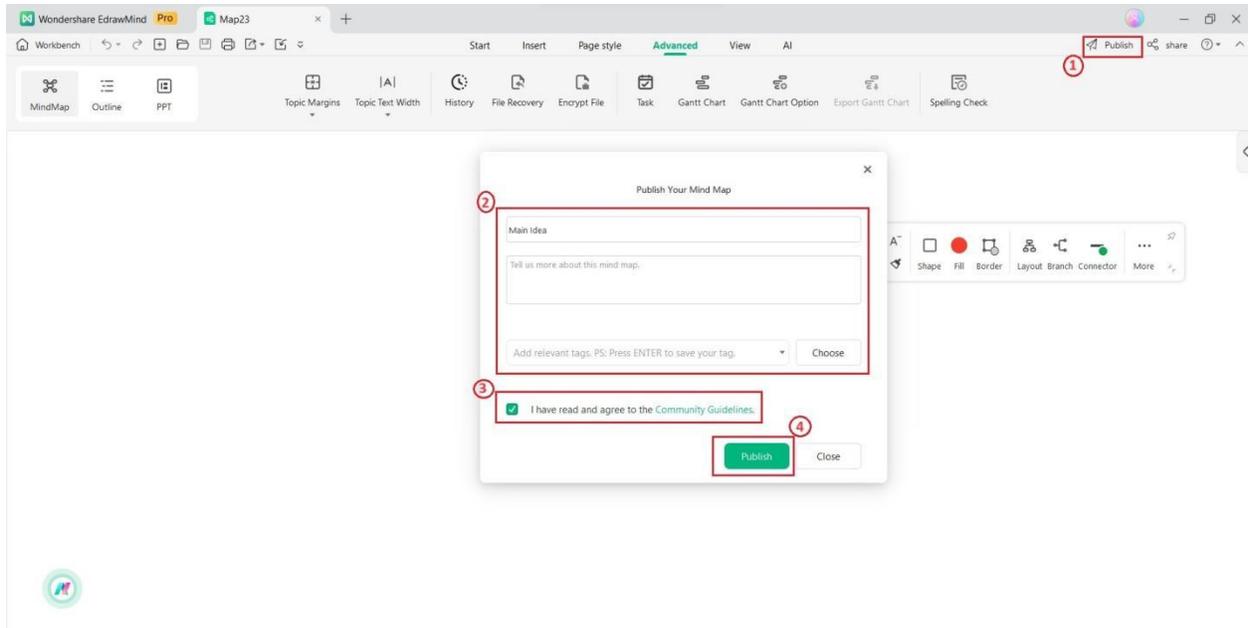

Public document link

```
graph LR; Edraw((Edraw)) --- SaraTin(Sara Tin); Edraw --- auntRuby(aunt ruby); Edraw --- rennie(rennie |); Edraw --- AndyLiu(Andy Liu); Edraw --- yellowA(yellow A); Edraw --- PhillS(Phill S...);
```

When enabled, anyone with the link or QR code can access this file

Note:

Alternatively, you can publish your mind maps by clicking Publish in the upper right corner next to the Share button.

Step 4 Click X in the top right corner to close the Share dialogue box once done.

How To Save a File Cloud and Open One

You can access your mind maps from anywhere with an internet connection. This means you can work on your mind maps from home, work, or on-the-go with EdrawMind.

01 Open a File From the Cloud

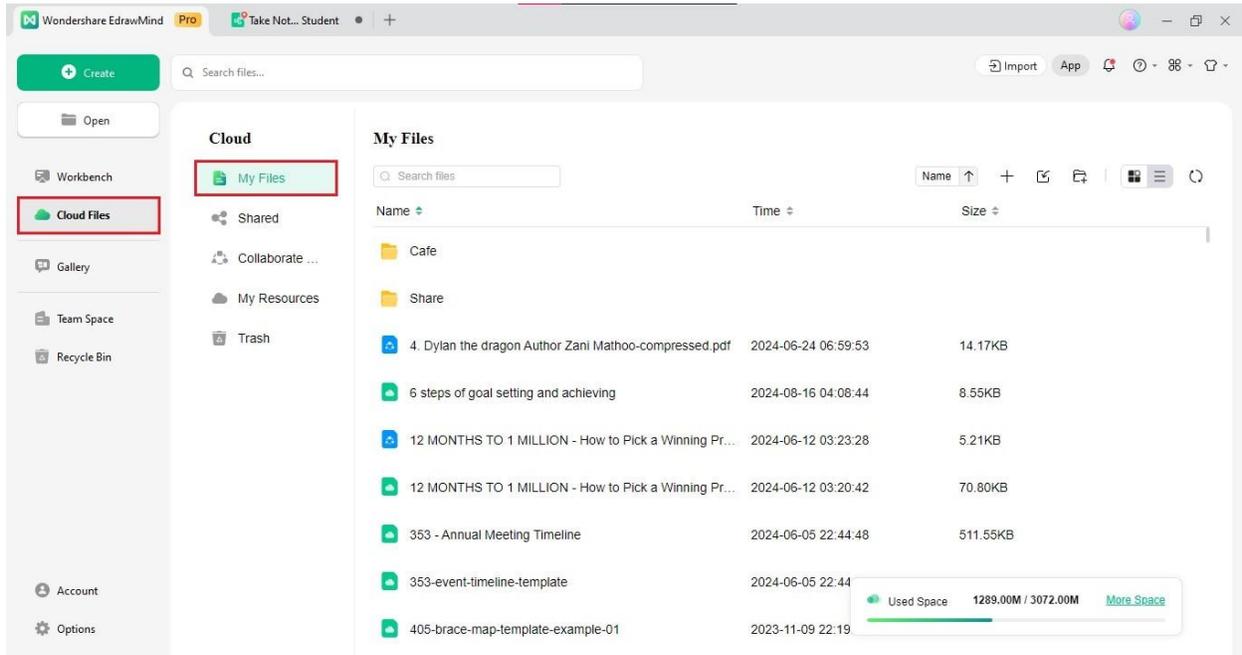

Follow the steps below to learn how to open your mind maps in cloud storage.

Step 1 Go to Workbench in the upper navigation pane.

Note:

Press the keyboard shortcut **Ctrl + O** if you are working on a mind map on the canvas.

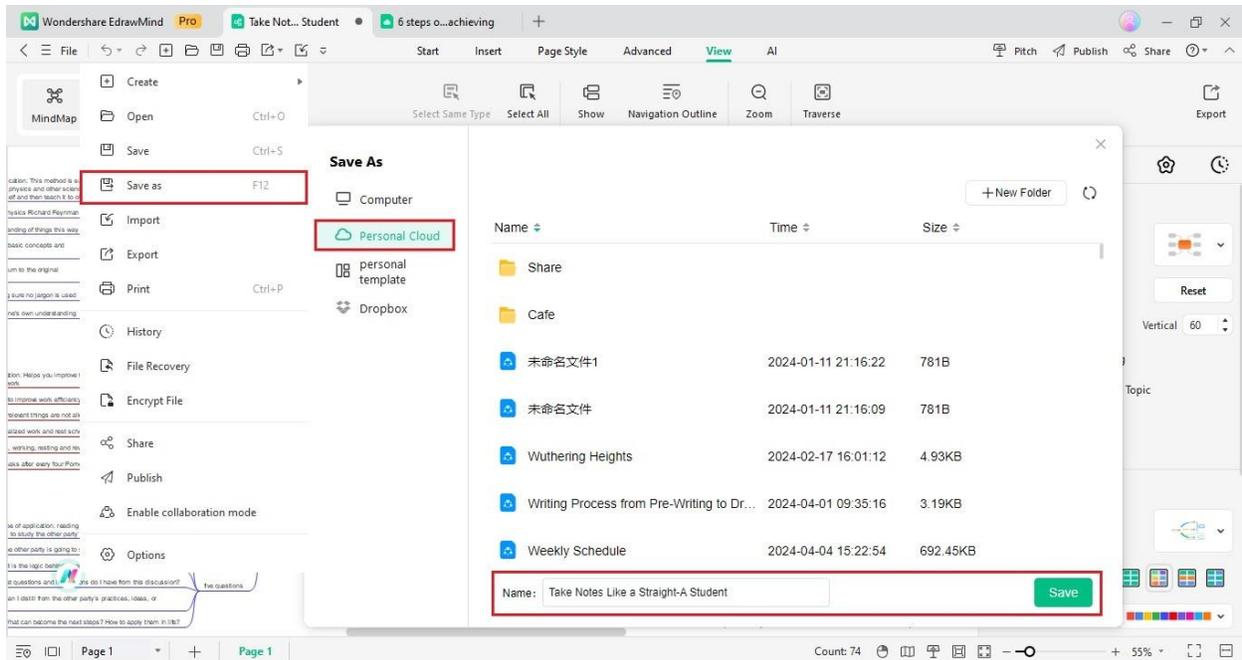

Step 2 Click Cloud Files in the left-side navigation pane.

Step 3 Double-click to select and open the file you need in the My Files section.

02 Save a File in the Cloud

Step 1 Choose Save As > Personal Cloud in the left-side navigation pane.

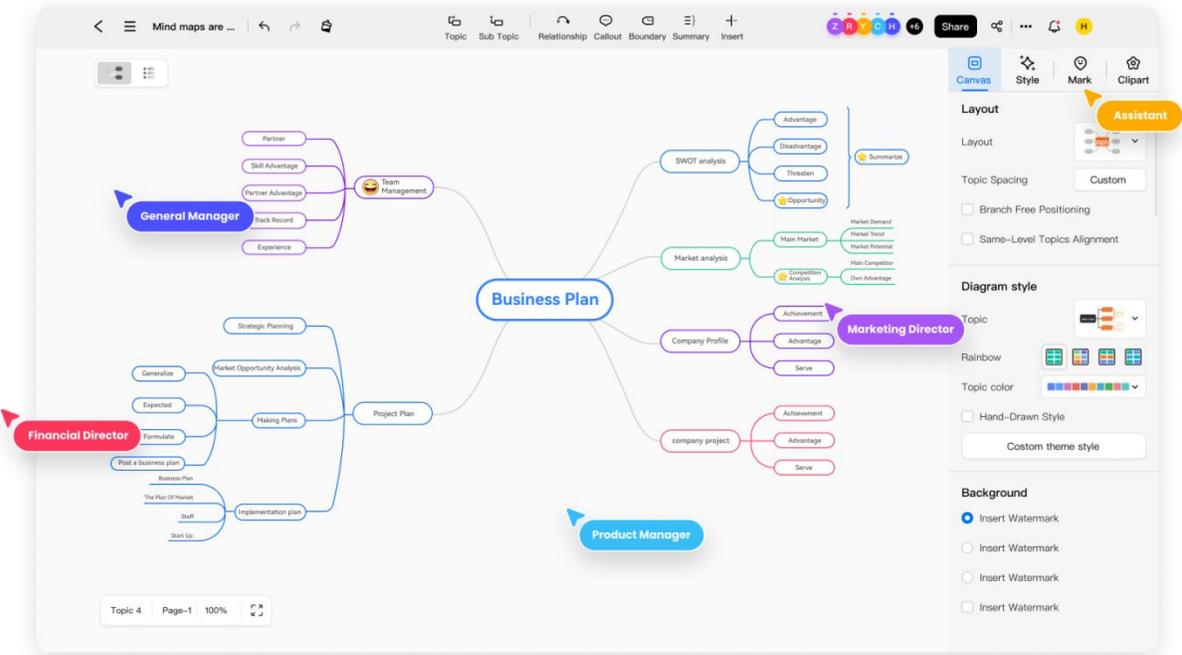

Step 2 Enter a file name in the input field at the top and click Save.

Real-time Collaboration

Real-Time Collaboration Feature

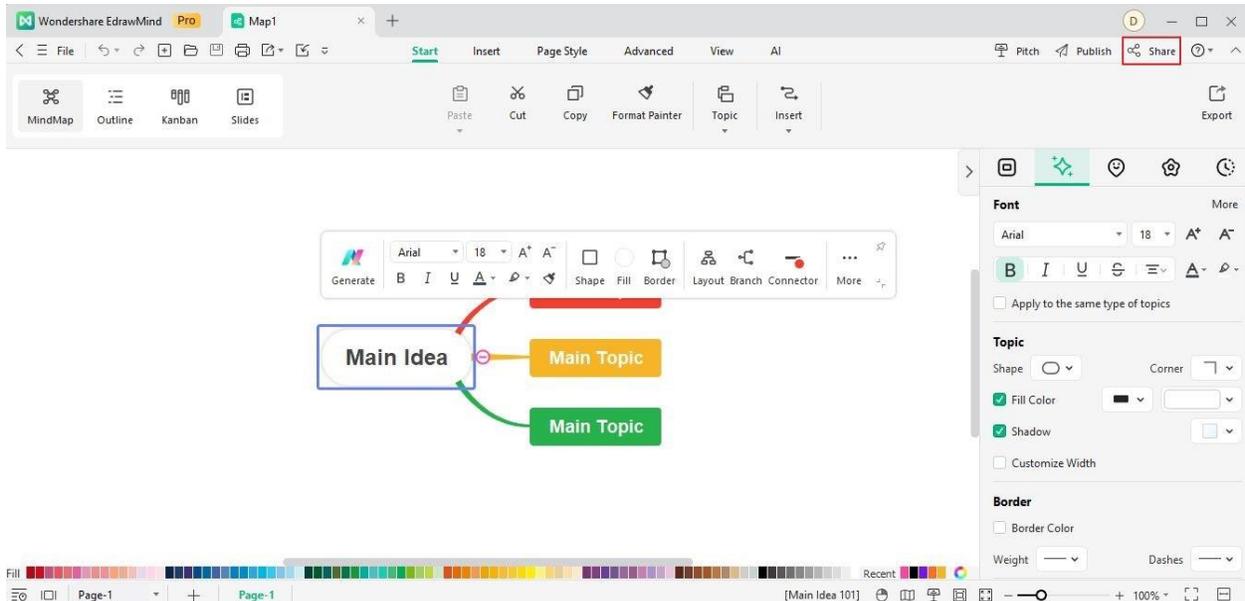

EdrawMind has revolutionized the collaborative experience with its latest real-time collaboration feature. This innovative feature enables multiple users to collaborate simultaneously on mind maps, allowing instant updates and changes to be visible to all participants in real time. Users can brainstorm ideas, plan projects, organize thoughts, and refine strategies collaboratively, regardless of their physical location.

How To Collaborate in EdrawMind

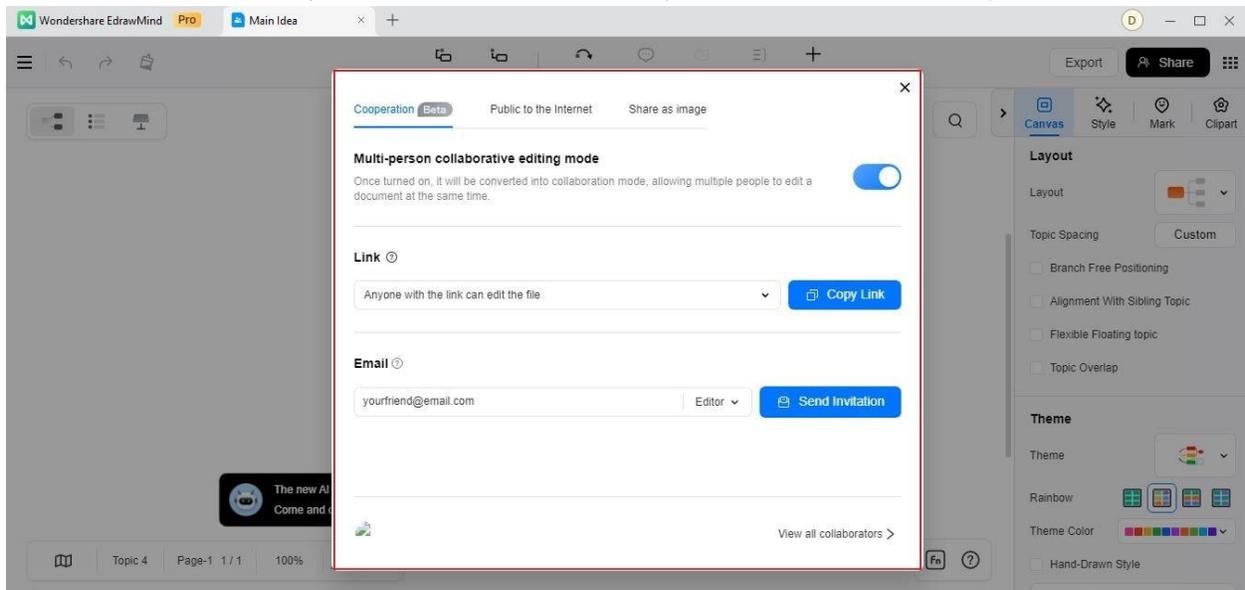

Collaborating in EdrawMind requires you to follow a few simple steps. In this tutorial, you'll learn how to convert your EdrawMind file into a collaborative file.

Step 1 Open a mind map first to access the real-time collaboration features. Then, click the Share button on the top-right portion of the workspace.

Step 2a Under the Cooperation tab, switch on the toggle button next to Multi-Person Collaborative Editing Mode. After that, click the Copy Link below it and send it to your friend/teammate to give them access to your file. Ensure the sharing option is set to Anyone with the link can edit the file.

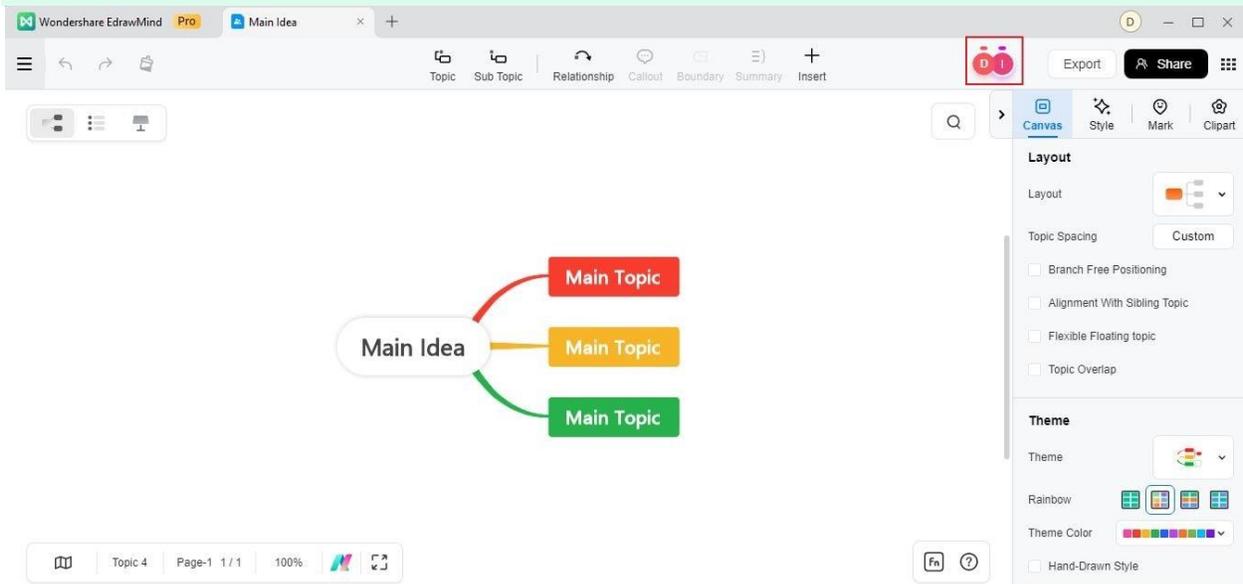

Step 2b Alternatively, you can give access using the Send Invitation option. Just type in your friend's email address (connected to Wondershare) and ensure the Editor option is enabled.

Step 3 Ask your teammate to open the link and log in with their accounts.

Note:
Your workspaces should now look like this, with your avatars available on the top panel.

Step 4 Now, any of you can add changes to the mind map document. Use the EdrawMind workspace as you normally would. All changes will be reflected in real-time. For example, editing texts, such as in this case, should appear like this on your teammate's screen.
